

Helping You Stay Safe & Prepared in Case of a Safety Outage

Visitor Information and Resources from Pacific Gas and Electric Company (PG&E)

To keep our communities safe, PG&E uses advanced safety tools that help prevent wildfires. These tools may result in temporary power outages, most likely to occur from June to November.

PUBLIC SAFETY POWER SHUTOFFS (PSPS)

As a last resort, power may be proactively turned off to help prevent wildfires when risk is highest. This is due to a combination of high winds, low humidity and dry vegetation.

Your host will be notified in advance, and the latest information can be found on our website and social media. Learn more at pge.com/psps.

HELPING YOU PREPARE

> Before an Outage

- Contact your host to learn about their emergency plan and resources they have on site for visitors, such as flashlights and portable chargers.
- Keep devices charged and write down phone numbers you may need in an emergency.
- During your visit, sign up to receive PSPS notifications for your accommodations at pge.com/addressalerts.

> During an Outage

- Call **211**, text “PSPS” to **211-211** or visit 211.org to be connected 24/7 with local resources like food, lodging and transportation.
- Locate Community Resource Centers for basic supplies, Wi-Fi, charging stations and ADA-accessible restrooms at pge.com/crc.
- Find food replacements at pge.com/pspsresources.

ENHANCED POWERLINE SAFETY SETTINGS (EPSS)

When wildfire risk is high, PG&E may enable EPSS technology, which allows powerlines to automatically turn off power within one-tenth of a second if there is problem that could cause an ignition.

We will share updates on our website and with your host during an unplanned safety outage. Learn more at pge.com/epss.
