Community Wildfire Safety Program
Alpine, Mariposa and Tuolumne Counties

July 15, 2020
Safety

We know that everyone is currently focused on the response to COVID-19.

We appreciate your participation during this challenging time and hope the following information is helpful in understanding how PG&E is working to reduce wildfire risk.
Introductions

Vanessa Bryan  Manager, Local Customer Experience

Dave Meier  Senior Manager, Stockton and Yosemite Division

Corey Peters  Supervising Vegetation Program Manager
Topics For Today

- Your Local Electric System
- What Is Public Safety Power Shutoff?
- Lessons Learned and 2020 Improvements
- Local Progress to Help Prevent Wildfires
- Preparing for Public Safety Power Shutoffs
- Open Discussion

All data is preliminary and based on early 2020 work planning. Data as of June 2020. Some of the measures included in this presentation are contemplated as additional precautionary measures intended to further reduce the risk of wildfires.
Your Electric System In Alpine, Mariposa and Tuolumne
The California Public Utilities Commission (CPUC) has a map that designates areas that are most at risk for wildfire.

- Tier 3 areas are at extreme risk
- Tier 2 areas are at elevated risk

This map helps PG&E to plan and prioritize wildfire prevention efforts.

~50 percent of PG&E’s service area is in high fire threat districts

What Is A Public Safety Power Shutoff?
All data is preliminary and based on early 2020 work planning. Data as of June 2020.
Some of the measures included in this presentation are contemplated as additional precautionary measures intended to further reduce the risk of wildfires.
What Weather Could Lead To A PSPS?

While no single factor will drive a Public Safety Power Shutoff, some factors include:

| A RED FLAG WARNING declared by the National Weather Service | LOW HUMIDITY LEVELS generally 20% and below |
| FORECASTED SUSTAINED WINDS GENERALLY ABOVE 25 MPH AND WIND GUSTS IN EXCESS OF APPROXIMATELY 45 MPH, depending on location and site-specific conditions such as temperature, terrain and local climate |
| CONDITION OF DRY FUEL on the ground and live vegetation moisture content | ON-THE-GROUND, REAL-TIME OBSERVATIONS from PG&E’s Wildfire Safety Operations Center and field observations from PG&E crews |

All data is preliminary and based on early 2020 work planning. Data as of June 2020. Some of the measures included in this presentation are contemplated as additional precautionary measures intended to further reduce the risk of wildfires.
How Often Will A PSPS Event Occur?

Below is an estimate of potential PSPS events in your communities based on a review of 30 years of weather data.

The number of events in any particular year will be exclusively driven by the weather pattern experienced and the above historical weather analysis may not be representative of the experience in a particular year.

Alpine County: 0 events per year on average
Mariposa County: 1 event per year on average
Tuolumne County: 1-2 events per year on average

All data is preliminary and based on early 2020 work planning. Data as of June 2020. Some of the measures included in this presentation are contemplated as additional precautionary measures intended to further reduce the risk of wildfires.
How Are We Improving For This Year?

**SMALLER IN SIZE**
Reduce the number of customers impacted by PSPS events by one-third compared to 2019

**SHORTER IN DURATION**
Restore customers twice as fast after severe weather has passed

**SMARTER FOR CUSTOMERS**
Provide more accurate/timely communications and additional resources
Deliver more assistance for customers before, during and after a PSPS event

All data is preliminary and based on early 2020 work planning. Data as of June 2020. Some of the measures included in this presentation are contemplated as additional precautionary measures intended to further reduce the risk of wildfires.
How Are We Improving For This Year?

SMALLER IN SIZE

GOAL:
Reduce the number of customers impacted by PSPS events by one-third compared to 2019

WHAT WE’RE DOING:
- Installing sectionalizing devices
- Developing microgrids
- Conducting targeted undergrounding
How Are We Improving For This Year?

SHORTER IN LENGTH

GOAL:
Restore customers twice as fast after severe weather has passed

WHAT WE’RE DOING:
- Adding more PG&E crews
- Expanding helicopter fleet from 35 to 65 and commissioning two new airplanes for aerial line inspections
- Utilizing infrared equipment to inspect at night

All data is preliminary and based on early 2020 work planning. Data as of June 2020. Some of the measures included in this presentation are contemplated as additional precautionary measures intended to further reduce the risk of wildfires.
How Are We Improving For This Year?

SMARTER FOR CUSTOMERS

GOALS:
Provide more timely communications and additional resources
- AND -
Deliver more assistance before, during and after a PSPS event

WHAT WE’RE DOING:
- Enhancing meteorology technology
- Bolstering website capacity
- Improving customer alerts and notifications
- Upgrading Community Resource Centers
- Improving coordination with local agencies and critical service providers
- Working with the California Foundation for Independent Living Centers (CFILC) and Community-Based Organizations (CBOs)
- Making it easier for eligible customers to join and stay on the Medical Baseline program
- Expanding in-language communications

All data is preliminary and based on early 2020 work planning. Data as of June 2020. Some of the measures included in this presentation are contemplated as additional precautionary measures intended to further reduce the risk of wildfires.
Local Progress To Help Prevent Wildfires
Advanced Weather Station Network

We’re adding advanced weather stations to better understand how severe weather can impact our system and proactively respond to potential threats.

**ALPINE COUNTY**

0 PG&E Stations

**MARIPOSA COUNTY**

21 PG&E Stations

**TUOLUMNE COUNTY**

23 PG&E Stations

All data is preliminary and based on early 2020 work planning. Data as of June 2020. Some of the measures included in this presentation are contemplated as additional precautionary measures intended to further reduce the risk of wildfires.

To sign up for daily email alerts regarding PSPS potential, visit cloud.em.pge.com/PSPS-7day-Signup.

Data is publicly available at: mesowest.utah.edu

pge.com/weather
We are working to lessen PSPS impacts through establishing additional temporary microgrids that can utilize backup generation sources to keep portions of communities energized.

In 2020, PG&E will have a portfolio of temporary generation assets that will support some of these microgrid locations across our service area.

<table>
<thead>
<tr>
<th>Sites Considered</th>
<th>County</th>
</tr>
</thead>
<tbody>
<tr>
<td>70+</td>
<td>Across PG&amp;E’s</td>

<td>Mariposa County</td>
</tr>
<tr>
<td>3</td>
<td>Tuolumne County</td>
</tr>
</tbody>
</table>

The ability to energize these substations with temporary generation during a PSPS event will be subject to operational constraints, the specific circumstances of each event, and the available supply of temporary generation.
We are exceeding state vegetation and fire safety standards by addressing vegetation that poses a higher potential for wildfire risk to maximize the safety of our customers and communities.

*Work plan is subject to change due to weather, access or other scheduled constraints.

All data is preliminary and based on early 2020 work planning. Data as of June 2020. Some of the measures included in this presentation are contemplated as additional precautionary measures intended to further reduce the risk of wildfires.
Advance PSPS Alerts For Customers

We provide advance notice prior to turning off power and updates until power is restored. This year, notifications will include more details about when the power will be shut off and restored.

Timing of Notifications (when possible)

- **2 days** before power is turned off
- **1 day** before power is turned off
- **Just before** power is turned off
- **During** the PSPS event
- **Once** power has been restored

Notifications will provide an estimated window of time when the power will be shut off and restored.

Direct Customer Notifications
We will attempt to reach customers through calls, texts and emails.

Additional Updates
We will also use social media and keep local news and radio outlets informed and updated.

All data is preliminary and based on early 2020 work planning. Data as of June 2020.
Some of the measures included in this presentation are contemplated as additional precautionary measures intended to further reduce the risk of wildfires.

**PSPS Watch**

*Due to current weather forecasts, your area is currently under a Watch for a Public Safety Power Shutoff.*

Current weather forecasts, including high winds and dry conditions, may require us to turn off power for wildfire safety.

Estimated shut off: 6:00pm – 10:00pm. Estimated restoration: 10/8/20 by 4:00 pm. Changes in weather can affect shutoff & restoration times. pge.com/pspsupdates

Reply w/ “1” to verify receipt.

We recommend all customers have a plan for an extended outage. We will provide daily updates until the weather risk has passed or power has been restored. This will include a Warning alert if we have determined it is necessary to turn off your power. For planning resources or more information visit pge.com/pspsupdates or call 1-800-743-5002.

If you rely on power to operate life-sustaining medical devices or have access and functional needs, additional support may be available. For more information, visit pge.com/specialresources.

If this is not the correct phone number for 1234 EL ANYWHERE COURT, press 2.

Press # to repeat this message.

Thank you. Goodbye.
All data is preliminary and based on early 2020 work planning. Data as of June 2020. Some of the measures included in this presentation are contemplated as additional precautionary measures intended to further reduce the risk of wildfires.
Community Resource Centers (CRCs)

During a PSPS event, PG&E will open CRCs where community members can access a safe location with basic resources, as well as up-to-date information. The following resources may be available:

- Heating and cooling
- Device charging
- Bottled water
- Non-perishable snacks
- Wi-Fi service
- Coffee/tea
- Blankets
- ADA-compliant toilets and hand washing stations
- Security personnel
- Chairs and tables

During a PSPS event, the locations will be made available on pge.com/pspupdates and via social media, local news and radio.

PG&E is adapting our approach to CRCs to reflect appropriate COVID-19 public health considerations. We are planning to offer micro CRCs (smaller, open air tents) and mobile CRCs (vans) to supplement hardened CRCs if shelter-at-home and physical distancing requirements are in place during PSPS events.

Employees staffing CRC sites will take all necessary precautions:

- Wearing personal protective equipment including facial coverings
- Metering attendance to maintain physical distancing
- Regularly sanitizing surfaces

All data is preliminary and based on early 2020 work planning. Data as of June 2020. Some of the measures included in this presentation are contemplated as additional precautionary measures intended to further reduce the risk of wildfires.
Additional Support For People With Disabilities And Older Adults

PG&E is working with the California Foundation for Independent Living Centers (CFILC) to fund resources to help prepare for disasters and extended power outages.

PSPS event specific resources for the disabled and aging population will be posted at pge.com/afn. We will also leverage our network of CBOs to communicate with customers who depend on power for medical and independent living needs when possible during events.

Application Process: The CFILC will determine who qualifies for resources. Medical needs and income will be taken into account.

Applications are available online or at Independent Living Centers (ILCs) and will be accepted at regional ILC locations.

**Disability Resource Agency for Independent Living (DRAIL)**
- 209-521-7260
- 1101 Sylvan Ave Suite A-25, Modesto, CA 95350

**DRAIL Satellite Office**
- 209-532-0963
- 19060 Standard Road, Suite 6, Sonora, CA 95370

**DRAIL Satellite Office**
- 209-477-8143
- 1350 W Robinhood Drive, Suite 15, Stockton, CA 95207

Coordination of resources takes time. Individuals are encouraged to engage with their local ILC and plan before a PSPS event is imminent.

**Resources include:**

- Portable backup power
- Emergency preparedness assistance
- Accessible transportation
- Hotel vouchers and food stipends
- Medical Baseline application assistance

**disabilitydisasteraccess.org**

All data is preliminary and based on early 2020 work planning. Data as of June 2020.

Some of the measures included in this presentation are contemplated as additional precautionary measures intended to further reduce the risk of wildfires.
Where To Go For Additional Information

Note: All data is subject to change based on ongoing data reconciliation.

All data is preliminary and based on early 2020 work planning. Data as of June 2020.
Some of the measures included in this presentation are contemplated as additional precautionary measures intended to further reduce the risk of wildfires.
How Is PG&E Improving Restoration Times?

We expect to be able to restore power to most customers within 12 daylight hours after extreme weather has passed, a 50 percent improvement from 2019.

**Note:** Because extreme weather can last several hours or days, for planning purposes, we suggest customers prepare for outages that could last multiple days.
Monitoring For Wildfires

We’re supporting the installation of new HD cameras in high fire-threat areas, which allow PG&E and first responders to monitor potential wildfire threats in real time.
