

Community Microgrid Intake Form

Instructions

Please complete with the assistance of a PG&E Resilience Coordinator.

Applicant Contact Information

Please complete the following with your information.

Applicant / Community Microgrid Aggregator Name

Date

Applicant Address

City

State

Zip

Local Authority having jurisdiction at the proposed location

Local Government Tribe CCA

Primary Contact Name

Day Phone

Cell Phone

Email Address (Correspondence will be sent via e-mail)

Project Details

Please briefly describe the community resilience objectives (~100 words):

[example: hours of backup wanted, underserved customers, support critical facilities, clean energy goals, etcetera]

Does the proposed project have support from the Local Government or Tribe or Community Choice Aggregator? No Yes

Anticipated Funding Source

Proposed Project Location Description

Community Microgrid Intake Form

List any facilities within the proposed microgrid boundary categorized as "Critical Facilities" (See FAQ at www.pge.com/cmep):

Facility Name

Function

Address

PG&E Service Agreement ID or Meter Number (if known)

Facility Name

Function

Address

PG&E Service Agreement ID or Meter Number (if known)

Facility Name

Function

Address

PG&E Service Agreement ID or Meter Number (if known)

Other key community resources within the proposed Microgrid (if applicable)

Has the Applicant engaged a non-PG&E technical consultant or engineer for the microgrid project? (Note, this is not required at this point.) No Yes

If Yes, please indicate the consultant above

Attach other relevant design documentation that has been completed to date for the project.

Community Microgrid Intake Form

Facility / Load Overview

Estimated number of facility / customer meters within the proposed microgrid electrical boundary

Existing Energy Service Provider

Types of Customers to Serve (e.g. Commercial, Residential, Industrial, any disadvantaged or vulnerable populations, etcetera)

Do you expect the load to grow significantly in the next 10 years? (please describe)

Project Resource Details

To the extent that Project Resources have been identified, please describe microgrid project generation and storage resources under consideration whether existing or new. If existing, please note whether the resource has an Interconnection Agreement under PG&E's Rule 21 or Wholesale Distribution Tariff. Project Resources must not exceed 20 MW in aggregate and comply with Section 94203 of Title 17 of the California Code of Regulations.
