

Public Safety Power Shutoff

Preparing Your Business

June 2022

Support and resources are available to help you prepare for potential Public Safety Power Shutoffs (PSPS).

Prepare for a Potential Power Outage

We are making our system safer and working to reduce the impact of PSPS. Severe weather can happen at any time and result in potential outages. We have resources to help you prepare.

Complete this checklist before a power outage:

- Visit [pge.com/psps](https://www.pge.com/psps) and:
 - Update your contact information to receive outage alerts.
 - Sign up for Address Alerts to receive outage information for any locations important to you.
 - Use our planning map tool to prepare for potential safety outages.
- Protect important documents in advance with automatic cloud backup and recovery solutions.
- Have backup batteries for your cell phone, computer or mobile credit card processors.
- Consider a mobile hotspot to stay connected before internet goes out.

Keep your business running during a power outage

Backup Power Tips

- Find out if your business qualifies for a Backup Power Transfer Meter or a rebate on a generator or battery at pge.com/backuppowers.
- Learn about financial incentives through the Self-Generation Incentive Program at pge.com/sgip.
- Review backup power installation requirements and comply with all safety and maintenance instructions.
- Always operate generators and store fuel in a safe space.

Though PG&E is not responsible for providing backup power before or during a PSPS, we want to provide as much support as possible for businesses interested in energy solutions.
