Community Wildfire Safety Program
KINGS COUNTY

July 10, 2020
Safety
### MEETING PURPOSE

- Share progress on important work to prevent wildfires and reduce PSPS impacts
- Co-create solutions to local issues
- Partner to prepare for PSPS events in 2020

*We understand how busy your teams must be responding to COVID-19 and appreciate your time*

### DISCUSSION TOPICS:

- 2020 PSPS IMPROVEMENTS
- LOCAL PROJECTS
- 30-YEAR WEATHER ANALYSIS
- EVENT COORDINATION AND INFORMATION SHARING
- ELECTRIC GRID OVERVIEW
- DISCUSSION

---

All data is preliminary and based on early 2020 work planning. Data as of June 2020. Some of the measures included in this presentation are contemplated as additional precautionary measures intended to further reduce the risk of wildfires.
All data is preliminary and based on early 2020 work planning. Data as of June 2020.

### 2020 PSPS Improvements

<table>
<thead>
<tr>
<th>GOAL</th>
<th>INITIATIVES</th>
</tr>
</thead>
<tbody>
<tr>
<td>SMALLER IN SIZE</td>
<td>Reduce the number of customers impacted by PSPS events by one-third compared to 2019</td>
</tr>
<tr>
<td>• Installing <strong>sectionalizing devices</strong> on the transmission and distribution systems capable of re-directing power and limiting the size of outages</td>
<td></td>
</tr>
<tr>
<td>• Developing <strong>microgrids</strong> that use generators to keep the lights on</td>
<td></td>
</tr>
<tr>
<td>• Conducting <strong>targeted undergrounding</strong> as part of system hardening</td>
<td></td>
</tr>
<tr>
<td>SHORTER IN LENGTH</td>
<td>Restore customers twice as fast after severe weather has passed</td>
</tr>
<tr>
<td>• Adding <strong>more PG&amp;E crews</strong> to speed inspection of lines</td>
<td></td>
</tr>
<tr>
<td>• Expanding <strong>helicopter fleet</strong> from 35 to 65 for aerial line inspections</td>
<td></td>
</tr>
<tr>
<td>• Commissioning two new <strong>airplanes</strong> for aerial line inspections</td>
<td></td>
</tr>
<tr>
<td>• Utilizing <strong>infrared equipment</strong> to inspect at night</td>
<td></td>
</tr>
<tr>
<td>SMARTER FOR CUSTOMERS</td>
<td>Provide more accurate/timely communications and additional resources</td>
</tr>
<tr>
<td>• Enhancing <strong>meteorology technology</strong> to pinpoint location and timing of severe weather</td>

*Locations identified on a monthly basis*
We’re installing real-time tools to better understand how severe weather can impact our system and proactively respond to potential threats.

Targeting one station roughly every 20 circuit-miles in high fire-threat areas by 2022.

We’re installing real-time tools to better understand how severe weather can impact our system and proactively respond to potential threats.

Targeting one station roughly every 20 circuit-miles in high fire-threat areas by 2022.

Weather stations installed to date

MAP LEGEND:
- PG&E Weather Station installed
- PG&E Weather Station planned
- Remote Automated Weather Stations (RAWS) within PG&E’s service area

Data is publicly available at pge.com/weather and mesowest.utah.edu

All data is preliminary and based on early 2020 work planning. Data as of June 2020.

Some of the measures included in this presentation are contemplated as additional precautionary measures intended to further reduce the risk of wildfires.
We’re supporting the installation of new HD cameras in high fire-threat areas, which allow PG&E and first responders to monitor wildfires in real time.

This will increase our coverage to more than 90 percent of our service area by 2022.

MAP LEGEND:
- PG&E HD Camera installed
- PG&E HD Camera planned
- Non-PG&E Camera that looks into PG&E’s service area

Images are publicly available at pge.com/weather and alertwildfire.org
Community Resource Center (CRC) Locations

Our goal is to work together to identify and secure multiple CRC locations within each county/tribe in our service area.

<table>
<thead>

- **Outdoor Location**

Locations will be activated as needed, depending on event scope and potential customer impacts. **During a PSPS event, the locations will be made available on pge.com/pspsupdates** and via social media, local news and radio.

All data is preliminary and based on early 2020 work planning. Data as of June 2020. Some of the measures included in this presentation are contemplated as additional precautionary measures intended to further reduce the risk of wildfires.
Transmission lines carry high-voltage electricity over long distances, like the freeways of the electric system. The higher the voltage, the more power that line is carrying.

### Electric Transmission Line

- **60 kV**
- **115 kV**
- **230 kV**
- **500 kV**

### PG&E Facility

- Substation

#### 2019 Peak Load:

- **196 MW**

This data is also publicly available at:

- [www.pge.com/wildfiremitigationplan](http://www.pge.com/wildfiremitigationplan)
- County Energy Commission (CEC) website: [https://cecgis-caenergy.opendata.arcgis.com/](https://cecgis-caenergy.opendata.arcgis.com/)
We’re installing new sectionalizing devices to limit the number of customers impacted during a PSPS event.

**2020 TARGET** 0 DEVICES

**MAP LEGEND:**
- Distribution sectionalizing devices installed in late 2019 or planned in 2020
- Area potentially removed from scope due to planned sectionalizing (distribution level event only)
- New area now in scope
- No change from 2019
- PG&E Substation

**Note:** Map reflects projects in planning and/or underway and is subject to change. Some data points may overlap.
Our system hardening work involves:

- **Installing stronger and more resilient poles** that will be set deeper in the ground to better withstand high winds.
- **Re-framing poles** to increase the separation of the conductors.
- **Replacing bare conductors** with larger, covered conductors.
- **Installing more poles than previously needed** to support the weight of the covered conductor and to meet new utility standards.
- **No longer using trees** to support PG&E infrastructure.
- **Adding down guys and anchors** to some poles to prevent leaning or falling.
- **Targeted undergrounding** of select overhead lines.

All data is preliminary and based on early 2020 work planning. Data as of June 2020. Some of the measures included in this presentation are contemplated as additional precautionary measures intended to further reduce the risk of wildfires.
Enhanced Vegetation Work in Your Community

We are exceeding state vegetation and fire safety standards by addressing vegetation that poses a higher potential for wildfire risk to maximize the safety of our customers and communities.

All data is preliminary and based on early 2020 work planning. Data as of June 2020. Some of the measures included in this presentation are contemplated as additional precautionary measures intended to further reduce the risk of wildfires.
30-Year Weather Analysis
PG&E analyzed 30 years of high-resolution data covering ~80 billion data points, as well as 26 years of wildfire data in our service area to help determine the average likelihood and frequency of a PSPS event.

The following weather model data points were analyzed:

- Wind Speed
- Wind Gust
- Temperature
- Relative Humidity
- Precipitation
- Dead Fuel Moisture (4 Types)
- Live Fuel Moisture
- Fosberg Fire Weather Index
- National Fire Danger Rating System Outputs (4 Main Outputs)

During an event, the meteorology model is updated and run 4x daily.

PG&E collaborates with the following agencies:

- US Forest Service
- National Weather Service
- Northern and Southern California Geographic Area Coordination Center
- CAL FIRE
- External fire agencies
- San Jose State University Fire Weather Research Lab

All data is preliminary and based on early 2020 work planning. Data as of June 2020. Some of the measures included in this presentation are contemplated as additional precautionary measures intended to further reduce the risk of wildfires.
The following is a conservative estimate of potential PSPS events in your community based on 30 years of data when Fire Potential Index (FPI) and Outage Producing Winds (OPW) met the PSPS criteria threshold.

**Potential historical PSPS events over 30 year period**

![Graph showing potential historical PSPS events over 30 years.](image)

**Annual average of local PSPS events (1989-2018)**

![Map showing annual average of local PSPS events.](image)

**NOTE:** Additional factors are considered before turning power off for safety such as red flag warning days or conditions on the ground during winter months.

All data is preliminary and based on early 2020 work planning. Data as of June 2020. Some of the measures included in this presentation are contemplated as additional precautionary measures intended to further reduce the risk of wildfires.
Event Coordination and Information Sharing
PG&E will offer the following resources to support local EOCs during a PSPS event:

**Local EOC Liaison** can be embedded in a county or tribe’s local EOC, upon request.

**Agency Representative** will be assigned to each county and tribe to act as a single point of contact during an event.

**GIS Technical Specialist** can be embedded in a county or tribe’s local EOC upon request; remote support is also available, if preferred.

**Third-Party Representative** such as cities, counties, tribes, water agencies and telecom providers may request to send a representative to observe the PG&E EOC during a PSPS event.

### YOUR LOCAL REPRESENTATIVES

**Charlotte Jordan**
Public Safety Specialist leads outreach to state and county OES and other emergency responders
Phone: 559-974-0356 | Email: Charlotte.Jordan@pge.com

**Kristen Doud**
Local Public Affairs leads outreach to city/county elected and staff
Phone: 661-858-9766 | Email: Kristen.Doud@pge.com

**Terry Metters Jr.**
Senior Manager Local Customer Experience and Division Lead leads outreach to critical customers and addresses escalated issues
Phone: 559-908-7350 | Email: Terry.Metters@pge.com

**Reno Franklin**
Tribal Liaison leads outreach to tribal groups
Phone: 707-694-4783 | Email: Reno.Franklin@pge.com

**Denny Boyles**
Media Rep serves as main point of contact between PG&E and local media
Phone: 559-341-7717 | Email: Dennis.Boyles2@pge.com
Once PG&E’s Emergency Operations Center (EOC) is activated, we will provide information through the following:

**Operational Areas Cooperators Call**
- Hosted twice-daily by Agency Representatives with each impacted county and tribe.
- Event-specific information changes will be reviewed.
- Opportunity to resolve local issues and ask questions.

**Systemwide Cooperators Call**
- Hosted once-daily by the EOC.
- Provide the latest high-level updates (inform only).
- Local and tribal agencies within the service area are welcome to join the call, as well as other public safety partners (i.e., telecom, water providers, transportation agencies, CCAs, etc.).

**Event-Specific Information**
- Up-to-date information will be provided twice-daily at regular intervals.
- Information provided will include counties and tribes in scope, estimated time of de-energization, estimated time of restoration, number of Medical Baseline Customers and number and types of critical facilities in scope.

When possible, we will strive to provide timely information to emergency service agencies in advance of notifying customers.
The portal includes the following:

<table>
<thead>
<tr>
<th>Before an Event</th>
<th>During an Event</th>
</tr>
</thead>
<tbody>
<tr>
<td>PSPS Planning Maps (GIS, KMZ)</td>
<td>Event-specific Information and Maps (GIS, PDF, KMZ)</td>
</tr>
<tr>
<td>Summary of Potentially Impacted Customers</td>
<td>Activated CRC Location Information</td>
</tr>
<tr>
<td>List of Critical Customers (excluding Telecom)</td>
<td>Summary of Affected Customers</td>
</tr>
<tr>
<td>List of Medical Baseline Customers</td>
<td>List of Medical Baseline and Critical Customers</td>
</tr>
</tbody>
</table>

**NOTE:** Though we are going to open the portal to all public safety partners (including telecom, water agencies and hospitals), not all partners will receive confidential customer data.

All data is preliminary and based on early 2020 work planning. Data as of June 2020.

Some of the measures included in this presentation are contemplated as additional precautionary measures intended to further reduce the risk of wildfires.
All data is preliminary and based on early 2020 work planning. Data as of June 2020.

Some of the measures included in this presentation are contemplated as additional precautionary measures intended to further reduce the risk of wildfires.

Sample PSPS Event Map Refinement

2019 buffered event map (polygon level)
Proposed event map (parcel level)
Community Resource Centers (CRCs)

During a PSPS event, PG&E will open CRCs where community members can access a safe location with basic resources, as well as up-to-date information. The following resources may be available:

- Heating and cooling
- Device charging
- Bottled water
- Non-perishable snacks
- Wi-Fi service
- Coffee/tea
- Blankets
- ADA-compliant toilets and hand washing stations
- Security personnel
- Chairs and tables

During a PSPS event, the locations will be made available on pge.com/pspsupdates and via social media, local news and radio.

PG&E is adapting our approach to CRCs to reflect appropriate COVID-19 public health considerations. We are planning to offer micro CRCs (smaller, open air tents) and mobile CRCs (vans) to supplement hardened CRCs if shelter-at-home and physical distancing requirements are in place during PSPS events.

Employees staffing CRC sites will take all necessary precautions:

- Wearing personal protective equipment including facial coverings
- Metering attendance to maintain physical distancing
- Regularly sanitizing surfaces

Some of the measures included in this presentation are contemplated as additional precautionary measures intended to further reduce the risk of wildfires.
PG&E is working with the California Foundation for Independent Living Centers (CFILC) to fund resources to help prepare for disasters and extended power outages.

<table>
<thead>
<tr>
<th>Resources include:</th>
</tr>
</thead>
<tbody>
<tr>
<td>Portable backup power</td>
</tr>
<tr>
<td>Emergency preparedness assistance</td>
</tr>
<tr>
<td>Accessible transportation</td>
</tr>
<tr>
<td>Hotel vouchers and food stipends</td>
</tr>
<tr>
<td>Medical Baseline application assistance</td>
</tr>
</tbody>
</table>

**Application Process:** The CFILC will determine who qualifies for resources. Medical needs and income will be taken into account.

Applications are available online or at Independent Living Centers (ILCs) and will be accepted at regional ILC locations.

**PSPS event specific AFN resources** will be posted at [pge.com/afn](http://pge.com/afn). Press releases, radio advertisements and leveraging our network of CBOs will also be used to communicate with customers who depend on power for medical and independent living needs when possible during events.

**Coordination of resources takes time.** Individuals are encouraged to engage with their local ILC and plan before a PSPS event is imminent.

Sharing the Message and Next Steps

You can help your community take steps to prepare:

- **Encourage customers to update their contact info** (Visit [pge.com/mywildfirealerts](http://pge.com/mywildfirealerts) or call 1-866-743-6589)
- **Inform customers that they may be eligible for the Medical Baseline Allowance** (Visit [pge.com/medicalbaseline](http://pge.com/medicalbaseline))
- **Remind residents to participate in a local Community Wildfire Safety Program webinar** (Visit [pge.com/wildfiresafety](http://pge.com/wildfiresafety))
- **Share preparedness messages through your newsletter, website or social media**
- **Let us know about other outreach opportunities and ways we can partner**

We want to coordinate with you on the following:

- [ ] Contact information
- [ ] Portal access
- [ ] CRC locations
- [ ] Critical facility information
- [ ] Event communications
Electric Grid Overview
Weather Deep Dive
All data is preliminary and based on early 2020 work planning. Data as of June 2020.

KEY TAKEAWAYS

Datasets/Model
- PG&E 30-year climatology
- Fire Occurrence dataset from USFS (1992 – 2018)

Analysis/Results
-Benchmarked FPI against agency and utility best practices
- Evaluated dozens of parameters to determine best predictors of large fires
- Constructed over 4,000 FPI model variants for predictive analysis
- PG&E FPI outputs the probability of large fire occurrence

PG&E Utility FPI

Weather
Wind Speed, Temperature and Humidity

Fuels
Dead Fuel Moisture and Live Fuel Moisture

Land Type
Forest, Shrub/Brush or Grass-land Dominated
The **Utility Fire Potential Index** and **Outage Producing Winds Model** are used in unison to analyze what conditions existed during the most catastrophic fires in California history to forecast when ignitions are most likely to intensify into catastrophic fires.

- **Scenario: Winter Storm**
  - High Outage Probability
  - Low Probability of an Ignition Becoming a Large Fire

- **Scenario: Blue Sky Day in February/March**
  - Low Outage Probability
  - Low Probability of an Ignition Becoming a Large Fire

- **Scenario: Wind Event with Dry Fuels**
  - High Outage Probability
  - High Probability of an Ignition Becoming a Large Fire

- **Scenario: Hot/Dry Summer Day**
  - Low Outage Probability
  - High Probability of an Ignition Becoming a Large Fire

All data is preliminary and based on early 2020 work planning. Data as of June 2020. Some of the measures included in this presentation are contemplated as additional precautionary measures intended to further reduce the risk of wildfires.

</table>

All data is preliminary and based on early 2020 work planning. Data as of June 2020. Some of the measures included in this presentation are contemplated as additional precautionary measures intended to further reduce the risk of wildfires.
Prioritizing Wildfire Mitigation Activities

PG&E prioritizes wildfire mitigation work by evaluating which circuits in our service area are at the highest risk for wildfire. This is a dynamic and ongoing process.

We look at **three key factors** when determining a circuit’s risk for wildfire:

1. **Likelihood of an ignition**
2. **How quickly a fire could spread** in that location and potential impact
3. **How easy it is to get in and out** of the area in the event of a fire

Working to include **PSPS likelihood** as an additional criteria

Circuits at the greatest risk for wildfire are prioritized for:

- Inspections and repairs
- Enhanced vegetation management
- System hardening

**NOTE:** In some cases, PG&E made changes to the prioritization order of circuits based on other factors (i.e., environmental issues, safety, planned projects, geographic access and weather).
Undergrounding

The process for identifying priority circuits for undergrounding includes the following steps:

- **IDENTIFY** overhead circuits with highest wildfire risk.
- **REVIEW** of circuits by PG&E or contract staff specialized in electric systems, fire prevention and suppression, construction and environmental impact.
- **CONSIDER** if elimination of high-risk assets is possible (including if customers or communities can be served through alternate means).
- **DETERMINE** the most effective, timely and feasible approach. If undergrounding is not feasible, a hardened and/or relocated overhead system can be pursued.
- **CONFIRM** chosen risk mitigation approach and design (asset elimination, undergrounding or hardened overhead) will reduce wildfire risk.

We will engage with local officials throughout this process to discuss decision factors and considerations. Note that undergrounding is a complex process that can take years to complete. We will continue to take immediate wildfire safety measures while work is planned.
Our updated System Inspections Program evaluates our electric infrastructure on an ongoing basis to find and fix potential risks to the safety and reliability of our system.

- Continuing in 2020, we will evaluate Tier 2 and Tier 3 areas more frequently, while infrastructure in non-high fire-threat areas will be inspected at least every six years.
- In 2020, we plan to inspect more than 15,000 miles of electric lines, which includes:
  - All lines in Tier 3 areas
  - One-third of all lines in Tier 2 areas
  - Additional line miles in non-high fire-threat areas
Microgrids – Community Microgrid Enablement Program (CMEP)

PG&E is exploring the ability to support communities and customers to **develop their own multi-customer or community-level microgrids** as a way to **reduce PSPS impacts**.

This may include **sponsoring enhanced technical support** for project development, **project tools** and in some cases, **one-time matching funds**.

**To qualify for this program**, microgrid projects must meet the following criteria:

- ✔ Serve areas that **experienced a PSPS event in 2019**
- ✔ Located in an area that could be **safely energized during a PSPS event**
- ✔ Serve **one or more critical facility**
- ✔ Supported by local governments and stakeholders

This program is currently under development and **pending approval by the California Public Utilities Commission (CPUC)**.

All data is preliminary and based on early 2020 work planning. Data as of June 2020.
Some of the measures included in this presentation are contemplated as additional precautionary measures intended to further reduce the risk of wildfires.

**Note:** All data is subject to change based on ongoing data reconciliation.

All data is preliminary and based on early 2020 work planning. Data as of May 2020. Some of the measures included in this presentation are contemplated as additional precautionary measures intended to further reduce the risk of wildfires.
PSPS Transmission-level Criteria

As part of our wildfire risk monitoring, we will review transmission lines in the potentially affected area.

• While no single factor will drive a PSPS, some factors for a transmission-level event include:

  ✔ Severity and duration of weather
  ✔ Site-specific environmental conditions that increase wear
  ✔ Age and condition of the asset
  ✔ Status of recent repairs
  ✔ Real-time field observations

• If it is determined that a transmission line might be de-energized for safety, **PG&E works closely with the California Independent System Operator to assess the system impacts.**
All data is preliminary and based on early 2020 work planning. Data as of June 2020.

Some of the measures included in this presentation are contemplated as additional precautionary measures intended to further reduce the risk of wildfires.
PG&E provides certain critical facility customers* with advanced communication (where possible), prioritized restoration and other resources in advance of and/or during planned outages (e.g., Public Safety Power Shutoffs) and unplanned outages (e.g., winter storms).

Facilities Identified As Critical Include:

- **Emergency Services Sector** (Police, Fire, Emergency)
- **Government Facilities Sector** (Schools, Jails, Prisons)
- **Healthcare and Public Health Sector** (Health Departments, Medical Facilities)
- **Energy Sector** (Public/Private Utility Facilities)
- **Water and Wastewater Systems Sector** (Water/Wastewater facilities)
- **Communications Sector** (Communication Infrastructure)
- **Chemical Sector** (Chemical Manufacturing, Maintenance or Distribution facilities)

Critical Facility Identification & Agency Outreach

- PG&E has an existing process that identifies critical facility customers based on the criteria referenced above.
- Beginning in May, we will provide cities, counties and tribal governments with a list of all critical facility customers within their jurisdiction through our secure PSPS portal (excluding commercially sensitive customer data, including telecommunication facilities). Agencies will be encouraged to review and provide feedback to this existing list in alignment with CPUC criteria.

*As defined by the California Public Utilities Commission in Public Safety Power Shutoff Decision 19-05-042.

Additionally, PG&E also considers major local and national public transportation centers (e.g., BART, ferries and airports) as critical facility customers which means they also receive this additional support.
What is Medical Baseline?

- The Medical Baseline Program provides financial assistance to residential customers that have special energy needs due to certain qualifying medical conditions.
- Eligible customers may receive a “standard” Medical Baseline quantity of approximately 500 kilowatt-hours (kWh) of electricity and/or 25 therms of gas per month, in addition to regular baseline quantities.

Who Qualifies for Medical Baseline?

A licensed medical practitioner must certify that a full-time resident in your home is:

- Dependent on life-support equipment used in the home.
- A paraplegic, hemiplegic, quadriplegic or multiple sclerosis patient with special heating and/or air-conditioning needs.
- A scleroderma patient with special heating needs.
- Being treated for a life-threatening illness, compromised immune system or other medical condition with special heating and/or air-conditioning requirements necessary to sustain the patient’s life or prevent deterioration of the patient’s medical condition.
All data is preliminary and based on early 2020 work planning. Data as of June 2020.
Some of the measures included in this presentation are contemplated as additional precautionary measures intended to further reduce the risk of wildfires.
