

R.18-10-007

WMP Guidelines page 26, Table 9, requires disclosure GIS information of “Current baseline state of service territory and utility equipment” of “All utility assets by asset type, model, age, specifications, and condition” by “Point, GPS coordinate.”

A party to R.18-10-007 may contact PG&E, (Wade Greenacre wag9@pge.com) to execute our Non-Disclosure Agreement to access all information responsive to the above request, except for the following information, which is confidential and will not be provided to any party.

- 1) Information for 115 kV facilities or above voltage
- 2) Information and data associated with PG&E’s operation and control of its critical bulk electric system (BES) facilities that are subject the North American Electric Reliability Corporation’s Critical Infrastructure Protection (“NERC CIP”) program and are confidential. These include, but are not limited to, information and data associated with PG&E’s:
 - a) BES cyber system facilities and assets,
 - b) BES cyber assets;
 - c) physical access control systems,
 - d) electronic access control and monitoring systems,
 - e) network topology diagrams, and
 - f) physical security perimeter diagrams.
- 3) SCADA enabled devices
- 4) Synchrophasor measurement units
- 5) Protection equipment:
 - a) Reclosers,
 - b) Interrupters,
 - c) Sectionalizers, and
 - d) Fuses.
- 6) Switches
- 7) Voltage Regulating Equipment:
 - a) Regulators,
 - b) Boosters, and
 - c) Capacitors.
 - d) Disconnects
 - e) All substation equipment
