**Diablo Canyon Decommissioning Engagement Panel
to Host Public Meeting on Spent Fuel Storage**

April 14, 2022

San Luis Obispo, CA – The Diablo Canyon Decommissioning Engagement Panel (DCDEP) will hold a public meeting on **Wednesday, April 20, from 6:00pm-9:30pm (PT)**. The public meeting will be held at the County Government Center in San Luis Obispo and via Zoom. The in-person meeting will include a one-hour open house from **5:00pm – 6:00pm**, where members of the public can view exhibits and talk with Panel members and PG&E representatives.

The meeting agenda topics include:

- Discussion of PG&E's current Independent Spent Fuel Storage Installation (ISFSI), where spent fuel is stored onsite at Diablo Canyon Power Plant
- Review of the Panel's recommendations on spent fuel storage and ISFSI design and operation
- Briefing from PG&E and vendor Orano USA, which has been selected to transfer all remaining spent fuel from DCP operations to dry storage using Orano's NRC-licensed NUHOMS dry storage system

This is the first in a series of public meetings addressing spent fuel storage at Diablo Canyon. The purpose of this meeting is to introduce the new storage system to the Panel and the public, and to solicit questions and comments that will be discussed in further detail at the Engagement Panel's May 25 public meeting. A community open house that will include tours of the ISFSI will be held in June.

How to Participate:

The public can register to attend the online webinar by visiting the Diablo Canyon Decommissioning Engagement Panel website at <https://diablocanyonpanel.org/>. In addition to the live webinar, the meeting will be broadcast on SLOSPAN and local access Channel 21. Those who wish to attend the open house and meeting in person may come to the County Government Center at 1055 Monterey St, San Luis Obispo.

Information about decommissioning DCPD is available on the independent [Engagement Panel website](#) and also the recently updated [PG&E decommissioning website](#), which includes interactive maps and a special [YouTube channel for virtual access to decommissioning information](#).

About the Panel:

The Diablo Canyon Decommissioning Engagement Panel was created to foster open and frequent dialogue between members of the local community and PG&E on matters related to DCPD decommissioning. Panelists are local community members from across San Luis Obispo County who were selected to broadly represent diverse community viewpoints. The Panel meets periodically on matters related to DCPD decommissioning and the future use of DCPD lands and facilities.
