

PG&E's Green Saver Product Information

2020 PROSPECTIVE PRODUCT CONTENT LABEL ¹

With PG&E's Green Saver Program, you have the option to purchase 100% of your electricity from solar photovoltaic (PV) resources.

In 2020, PG&E's Green Saver Program will be made up of the following new renewable resources averaged annually.

Green-e Energy Certified New ² Renewables in PG&E's Green Saver Program 2020		Generation Location
Solar	100%	California (within PG&E's service territory)
Total Green-e Energy Certified New Renewables	100%	

1. These figures reflect the renewables that we have contracted to provide. Actual figures may vary according to resource availability. We will annually report to you the actual resource mix of the electricity you purchased during the preceding year before August 1 in the form of a Historic Product Content Label.

2. **New Renewables for PG&E's Green Saver Program first began commercial operation January 1, 2014 or later.** As customers enroll in the program, PG&E will procure more, newer solar resources to match customer demand.

For comparison, the current average mix of resources supplying PG&E customers includes: Biomass and Biowaste (4%), Geothermal (5%), Renewable-Eligible Hydro (3%), Solar Electric (13%), Wind (8%), Nuclear (27%), Natural Gas (20%), Large Hydroelectric (18%), and Unspecified (2%). This resource mix was reported to the California Energy Commission as part of PG&E's 2017 Power Source Disclosure Report.

The average residential customer served by PG&E uses 482 kWh per month. Source: [PG&E FERC Form 1, 2017](#)
