PG&E’s new Business EV rate plans

PG&E is offering two new electric vehicle rate plans for business customers with on-site EV charging. These rates are specifically designed for business customers with separately metered EVs at sites with fleets, fast-charging stations, workplaces and multi-unit dwellings.

The new rate plans help you meet your EV charging needs while keeping fuel costs lower than gasoline or diesel alternatives. Results can be as low as $0.99 per eGallon*. Both rate plans combine a customizable monthly subscription charge with a time-of-use rate to help you save money.

How Business EV rate plans work

Monthly subscription charge: Choose your subscription level based on your maximum monthly EV charging kilowatt (kW) consumption. This can be adjusted throughout the month as needed to avoid overage fees.

Overage fees: If your actual consumption (kW) exceeds your subscription level, you will be charged an overage fee of two times the cost of one kW for each kW you are over.

Grace period: To help you determine the best subscription level, you have a grace period with no overage fees for three billing cycles after you enroll or when you add more EV charging units.

Enroll now and start saving

Take advantage of more affordable EV charging for your business with a call to our Business and Solar Customer Service Center at 1-877-743-4112, Monday–Friday 8:00 a.m.–5:00 p.m.

---

*Actual results may vary. An “eGallon” represents the cost of fueling a vehicle with electricity as compared to gasoline or diesel.

**Business High Use EV Rate (BEV2) values shown. Business Low Use EV Rate (BEV1) has a peak rate of $0.33/kWh and the same off-peak and super off-peak rates as BEV2. For primary customer rates, see our FAQ at pge.com/businessevrate.
