

PG&E's Solar Choice Product Information

2018 HISTORICAL PRODUCT CONTENT LABEL ¹

With PG&E's Solar Choice Program, you have the option to purchase 50% or 100% of your electricity from solar photovoltaic (PV) resources.

In 2018, PG&E's Solar Choice Program was made up of the following new renewable resources averaged annually:

Green-e Energy Certified New ² Renewables in PG&E's Solar Choice Program 2018		Generation Location
Solar	100%	California (within PG&E's service territory)
Total Green-e Energy Certified New Renewables	100%	

1. These figures reflect the solar power delivered to PG&E's Solar Choice customers in 2018.

2. **New Renewables for PG&E's Solar Choice Program first began commercial operation on January 1, 2014 or later.** As customers enroll in the program, PG&E will procure more, newer solar resources to match customer demand.

For comparison, the current average mix of resources supplying non-Solar Choice PG&E customers includes: Biomass and Biowaste (4%), Geothermal (5%), Renewable-Eligible Hydro (3%), Solar Electric (13%), Wind (8%), Nuclear (27%), Natural Gas (20%), Large Hydroelectric (18%), and Unspecified (2%). This resource mix was reported to the California Energy Commission as part of PG&E's 2017 Power Source Disclosure Report.

The average residential customer served by PG&E uses 482 kWh per month. Source: [PG&E FERC Form 1, 2017](#)
