

2022 PRICE, TERMS AND CONDITIONS

	<p>PG&E's Solar Choice Program is Green-e Energy certified and meets the environmental and consumer-protection standards set forth by the nonprofit Center for Resource Solutions. Learn more at www.green-e.org.</p>																								
Company	Pacific Gas and Electric Company (PG&E)																								
Whom should I contact for more information?	For more information about PG&E's Solar Choice Program, visit pge.com/solarchoice or call 877-743-8429.																								
How will I be billed for PG&E's Solar Choice Program?	You will be billed for PG&E's Solar Choice Program on your monthly PG&E electricity bill. PG&E's Solar Choice Program charges and credits will be listed as separate line items and are in addition to your regular electricity charges.																								
How will my PG&E's Solar Choice bill be calculated?	<p>Your PG&E's Solar Choice bill is calculated with a Solar Charge, a Program Charge, a Power Charge Indifference Adjustment, and a Generation Credit:</p> <ul style="list-style-type: none"> • The Solar Charge is the cost of the renewable power. • The Program Charge is set to fund the program's marketing and administration costs as well as to cover additional energy-related costs to ensure that non-participating customers do not fund the program. These energy-related costs include: costs associated with integrating the new renewable resources into the grid (Renewables Integration Charge), state-level grid management costs (California Independent System Operator), costs for registering, tracking and retiring Renewable Energy Certificates (RECs) in the Western Renewable Energy Generation Information System (WREGIS), Resource Adequacy (RA) costs, and a credit or charge for the positive or negative value that solar provides in delivering energy to the grid during peak hours (Solar Value Adjustment). • The Power Charge Indifference Adjustment (PCIA) is set to ensure stranded generation costs are not shifted to non-participating customers when you switch to PG&E's Solar Choice Program. PCIA will be applied based on the date that you begin service on PG&E's Solar Choice Plan. If you begin service in the first six months of the calendar year (e.g. 2020), you are assigned the prior year's vintage (i.e. 2019). If you begin service on or after July 1, you are assigned the vintage for the current year (2020 in this example). • The Generation Credit is a credit equal to the average generation rate for your customer class. This credit is to recognize that your renewable energy purchase displaces the charges for the generation portfolio associated with your base rate. <p>These charges and credits will be applied on a per kWh basis to either 50% or 100% of your monthly electricity usage, depending on your participation level. Applicable federal, state, and local taxes and charges still apply.</p> <p>Rates are rounded to four decimal places for presentation purposes. See rate schedule E-GT for complete rates.</p>

* The Small Business class includes Schedules A-1, A-6, A-15 and TC-1.

Will my rate change over time?	PG&E's Solar Choice rates are based on current California Public Utility Commission (CPUC) approved tariffs. Rates are subject to change annually and as approved by the CPUC.
What other fees might I be charged?	No other fees apply.
What length of agreement /contract is required?	PG&E offers Solar Choice on a month-to-month basis. There is no further length of agreement or contract required.
Can I cancel my participation?	You may cancel your participation in PG&E's Solar Choice Program at any time and without a fee. The cancellation will become effective as of your last closed bill period. You will then be ineligible to participate in PG&E's Solar Choice Program for a period of 12 months from the date of the change (certain customers may be exempted).
Can I change my participation level?	<p>You may elect to change your participation level once in a 12-month period (e.g. changing from 50% to 100% and vice versa). If PG&E's Solar Choice Program is closed to new customers, existing customers may change their enrollment level down only (from 100% to 50%).</p> <p>Participation level changes will apply on the first day of the next billing cycle where the billing cycle start date occurs at least five business days after the date of the customer's request. A customer request that is received within five business days of the customer's next billing cycle may result in the customer being placed on PG&E's Solar Choice Program the following billing cycle.</p>
Can I move and continue to participate in PG&E's Solar Choice Program?	Yes. PG&E's Solar Choice Program is portable within PG&E's electric service territory. You will be considered as having continuously received service under this schedule for the purposes of determining the PCIA vintage to apply to the new service agreement.
Can I participate in both PG&E's Solar Choice and Regional Choice program at the same time?	No. You may only be enrolled in either program at a time.

PG&E's Solar Choice Product Information

2022 PROSPECTIVE PRODUCT CONTENT LABEL ¹

With PG&E's Solar Choice Program, you have the option to purchase 50% or 100% of your electricity from solar photovoltaic (PV) resources.

In 2022, PG&E's Solar Choice Program will be made up of the following new renewable resources averaged annually.

Green-e Energy Certified New ² Renewables in PG&E's Solar Choice Program 20222022		Generation Location
Solar	100%	California (within PG&E's service territory)
Total Green-e Energy Certified New Renewables	100%	

1. These figures reflect the renewables that we have contracted to provide. Actual figures may vary according to resource availability. We will annually report to you the actual resource mix of the electricity you purchased during the preceding year before August 1 in the form of a Historic Product Content Label.

2. **New Renewables for PG&E's Solar Choice Program first began commercial operation January 1, 2014 or later.** As customers enroll in the program, PG&E will procure more, newer solar resources to match customer demand.

For comparison, the current average mix of resources supplying PG&E customers includes: Biomass and Biowaste (3%), Geothermal (3%), Renewable-Eligible Hydro (1%), Solar Electric (16%), Wind (8%), Nuclear (43%), Natural Gas (16%), and Large Hydroelectric (10%). This resource mix was reported to the California Energy Commission as part of PG&E's 2020 Power Source Disclosure Report.

The average residential customer served by PG&E uses 477 kWh per month. Source: [PG&E FERC Form 1, 2018](#)
