

Business Customers Know your rate plan options

Pacific Gas and Electric Company (PG&E) provides a range of electric and natural gas rate plans. Are you on the best plan for your business? To better understand the different rates, log in or register at [pge.com](https://www.pge.com) to compare your current rate plan with other eligible plans or options. Online you can:

- Get detailed information about your current usage
- Maximize savings with a free energy assessment through the Commercial Energy Checkup
- See your current rate plan listed on your monthly energy statement under “Details of Electric Charges”

In addition to the online services we provide, you may call us at **1-800-468-4743** for assistance with a rate analysis.

Together, Building
a Better California

Time-of-Use Rate Plans

Time-of-Use[†] (TOU) rate plans can help you save money based on when your business uses energy. They offer lower rates when energy demand is low. Conversely, rates increase when energy demand is high. Electric charges vary based on the time of day and the season.

Small General Time-of-Use Service (A-1)

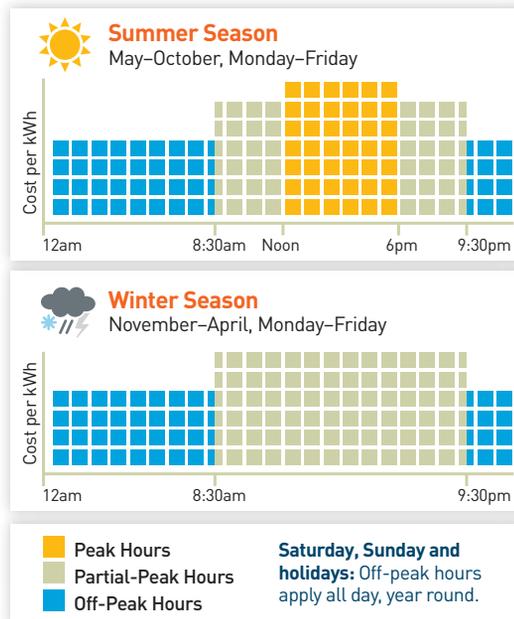

is for businesses whose peak monthly demand consistently remains less than 75 kilowatt (kW) or with usage of 150,000 kilowatt hour (kWh) or less per year. This rate includes:

- Customer and energy (per kWh) charges only

Small General Time-of-Use Service (A-6)

is for businesses whose peak monthly demand consistently remains less than 75 kW or with usage of 150,000 kWh or less per year. Effective April 1, 2017, these new A-6 rules apply to new A-6 applicants, but all pre-existing A-6 customers can remain on A-6 if their demand does not exceed 499 kW for more than three consecutive months during a 12-month period. For more information on the new A-6 rules, please visit pge.com/tariffs. This rate includes:

- Customer and energy charges only
- Higher energy charges on summer weekday afternoons compared to A-1 TOU
- Slightly lower winter and off-peak energy charges than A-1 TOU

[†]Time-of-Use periods will be adjusted for daylight savings time.

Medium General Time-of-Use Service (A-10)

is for businesses whose peak monthly demand consistently remains under 500 kW. This rate includes:

- A demand charge (per kW) based on the maximum load
- Higher customer charge than A-1 TOU or A-6 TOU
- Lower energy charges than A-1 TOU or A-6 TOU

Medium General Demand-Metered Service (E-19V)

is an optional plan for businesses whose peak monthly demand consistently remains under 500 kW. This rate includes:

- A demand charge based on the maximum load
- On-peak and part-peak demand charges
- Lower energy charges than A-1 TOU, A-6 TOU or A-10 TOU

*Customers over 499 kW for three consecutive months will automatically transition to E-19 TOU and those over 999 kW for three consecutive months will automatically transition to E-20 TOU rates. For more information, please visit pge.com/tariffs.

Additional Rate Plans or Options

Net Energy Metering allows businesses to install a renewable generator, interconnect to the PG&E grid and receive credits to offset the cost of their energy usage. Program details vary depending on the technology and options you select. For more information on interconnection and renewables, please visit pge.com/interconnectionprograms.

In addition, PG&E offers incentives to make installing renewable energy more affordable for your business. To learn more and see if you qualify, visit pge.com/businesssolarincentives.

California Alternate Rates for Energy (CARE) Program provides business customers a monthly discount on energy bills for qualified group living facilities. To learn more about the CARE Program, visit pge.com/CARE.

Peak Day Pricing combines a time-of-use rate with Peak Day Pricing credits and charges.

- There are 9 to 15 Peak Day Pricing “Event Days” per year
- An Event Day surcharge is added to the regular time-of-use rate during peak hours from 2–6 p.m.
- Rates are discounted all other times from May 1 to October 31
- Bill protection is provided the first year

To learn more about Peak Day Pricing, visit pge.com/pdp.

Small Renewable Generators (E-SRG) and Public Water and Wastewater Facilities (E-PWF) electric rates are available to renewable generators up to 1.5 megawatts. To learn more, visit pge.com/businesssolarincentives.

Option R is a voluntary option for qualifying **E-19** and **E-20** customers with solar generators that provide 15 percent or more of their annual electricity usage. For more information, please visit pge.com/tariffs. This option has:

- Higher on-peak and part-peak energy charges
- Lower on-peak and part-peak demand charges

Note: Direct Access and Community Choice Aggregation customers purchase electricity from another provider and receive electric transmission and distribution services from PG&E. These customers are eligible for many, but not all, of the rate plans or features listed in this notice. For more information, please contact your provider.

Natural Gas Services

Are you aware of your natural gas options? At PG&E your rate plan is determined by the level of service you need and the amount of gas used per month. For more detailed information, please visit pge.com/tariffs.

Small Commercial (G-NR1) is a rate plan for businesses that average less than 20,800 therms per month for 12 months. You choose who supplies your natural gas, PG&E or a third-party gas supplier. This rate is also available as an option to separately metered common areas in a multifamily complex.

Large Commercial (G-NR2) is a rate plan for businesses that average greater than 20,800 therms per month for 12 months, excluding the months which do not exceed 200 therms. You choose who supplies your natural gas, PG&E or a third-party gas supplier. If you choose a third-party gas supplier, PG&E will continue to transport and deliver gas to your business with the same high level of safety, reliability and service we provide all our customers regardless of which gas supplier you choose.

Gas Transportation Service to Noncore End-Use Customers (G-NT) is for businesses that initially qualify for G-NR2 and elect noncore service. Features of this option include:

- Must secure gas supply from a third-party provider
- Service may be curtailed or interrupted due to supply or system constraints
- Reduced rate for the transportation of natural gas

Other Natural Gas Rate Plans

Natural Gas Service for Compression on Customer's Premises (G-NGV1) applies to the sale of uncompressed natural gas for the sole purpose of compressing it for use as a motor-vehicle fuel while G-NGV2 provides compressed service at PG&E stations open to the public.

Gas Transportation Service to Noncore Natural Gas Vehicles (G-NGV4) is for customers who have elected noncore service and have a natural gas fueling station that averages greater than 20,800 therms per month through a single meter, excluding the months that do not exceed 200 therms.
