

Where your electricity comes from

PG&E meets our area's growing energy demands with a diverse mix of energy sources that are nearly 80 percent greenhouse gas free. We met California's 2020 renewable energy goal three years ahead of schedule, supplying 33 percent of the electricity our customers use from renewable resources that qualify under California's Renewables Portfolio Standard.

We continue to add more renewable energy to our power mix and are well on our way toward 50 percent eligible renewables by the end of 2030.

2017 POWER MIX

PG&E-owned generation and power purchases

*Greenhouse gas free and/or renewable resources

PG&E delivers a range of clean energy resources, such as solar, wind, geothermal, biomass and small hydro and is also integrating innovative technology to make the power grid smarter and more resilient.

Together, Building
a Better California

Actual 2017 Power Content Label for PG&E, as reported to the California Energy Commission.¹

ENERGY RESOURCES	PG&E 2017 POWER MIX (Actual)	2017 CA POWER MIX ² (For Comparison)
Eligible Renewable:	33%	29%
• Biomass and waste	4%	2%
• Geothermal	5%	4%
• Small hydroelectric	3%	3%
• Solar	13%	10%
• Wind	8%	10%
Coal	0%	4%
Large Hydroelectric³	18%	15%
Natural Gas	20%	34%
Nuclear	27%	9%
Other	0%	<1%
Unspecified⁴	2%	9%
TOTAL	100%	100%

¹ The figures above may not sum to 100 percent due to rounding.

² Percentages are estimated annually by the California Energy Commission based on electricity sold to California consumers during the previous year.

³ A significant amount of energy generated by PG&E comes from clean, large hydroelectric power stations which do not qualify as an eligible renewable resource under California law.

⁴ Beginning in 2010, transactions not specifically traceable to specific generation sources are designated as “unspecified” in accordance with Public Utilities Code Section 398.2 (d).
