

Agricultural Customers Know your rate plan options

We provide a range of options for electric service. Select the rate plan that best fits the needs of your business.

Log in or register at [pge.com](https://www.pge.com) to:

- Get detailed information about your current usage
- Improve your bottom line with the business energy savings quick tool
- Learn about Time-of-Use rate plans

In addition to these online tools, you can call **1-877-311-FARM (3276)** for help with a rate analysis.

Electric Rate Plan Options

Time-of-Use

Time-of-Use (TOU) rate plans support your energy management by lowering costs when demand is low and increasing costs when demand is high.

TOU rate plans for agricultural customers have changed. Depending on the way you use energy, you may save money with the new rates. Beginning **March 2021**, most agricultural businesses were transitioned to a new TOU rate plan. Qualifying high impact customers will transition starting March 2022. No action is required. Sign up or log in to your online account to see how your bill will be affected.

For details and more information, visit [pge.com/tou](https://www.pge.com/tou).

AG-A1 (<35 kW Low Use) is for small agricultural businesses with low to moderate operating hours and demand less than 35 kW.

AG-A2 (<35 kW High Use) is for small agricultural businesses with high annual operating hours and demand less than 35 kW.

AG-B (≥35 kW Med Use) is for medium agricultural businesses with low to moderate operating hours and demand 35 kW or greater.

AG-C (≥35 kW High Use) is for large agricultural businesses with high annual operating hours and demand 35 kW or greater. Only the AG-C rate plan includes Summer Peak Demand Charge and Demand Charge Limiter.

YEAR-ROUND

Consolidates current Ag rates into 3 size categories to provide a clear and simple choice.

Bills customers based on measured demand.

Peak Period applies for 365 days of the year.

Cost per kWh varies by season. Costs are higher in the summer than in the winter.

The max demand charge is now equal in summer and winter.

Peak Higher energy cost

Off-peak Lower energy cost

AG-F is an optional rate for businesses that can limit operating hours to certain days of the week (Wednesday and Thursday, Saturday and Sunday, or Monday and Friday). In exchange for two off peak days, peak prices on AG-F rate plans will be higher than peak prices on a rate plan with peak hours on seven days per week.

Peak Day Pricing

Peak Day Pricing combines a TOU rate with surcharges on 9 to 15 Event Days each year plus rate credits all summer.

Learn more about how Peak Day Pricing works by visiting [pge.com/pdp](https://www.pge.com/pdp).

For details and more information on all electric rate plan options, visit [pge.com/tariffs](https://www.pge.com/tariffs).

Clean Energy Alternatives

Net Energy Metering allows customers to install a renewable generator, interconnect to the PG&E grid and receive credits to offset the cost of their energy usage. With certain additional requirements, storage can also be installed with the renewable generation. Agricultural customers qualifying for **Net Energy Metering Aggregation (NEM2A)** may receive credit for all their aggregated energy accounts from a single renewable generator. To learn more, visit [pge.com/interconnectionprograms](https://www.pge.com/interconnectionprograms).

We also offer incentives to make installing renewable energy more affordable for your business. To learn more and see if you qualify, visit [pge.com/businesssolarincentives](https://www.pge.com/businesssolarincentives).

Renewable Feed-in Tariffs offer long-term wholesale electric energy contracts to eligible generators. To learn more, visit [pge.com/feedintariffs](https://www.pge.com/feedintariffs).

Note: Direct Access and Community Choice Aggregation customers purchase electricity from another provider and receive electric transmission and distribution services from PG&E. These customers are eligible for many, but not all, of the rate plans or features listed in this notice. To learn more, contact your provider.

Programs to save money

California Alternate Rates for Energy (CARE)

program provides agricultural customers a monthly discount on energy bills for qualified agricultural employee housing facilities.

To learn more about the CARE program, visit [pge.com/care](https://www.pge.com/care).

Capacity Bidding Program (E-CBP) offers incentives to eligible customers for reducing their energy consumption upon request. A customer may only enroll in Schedule E-CBP through an Aggregator.

Automated Demand Response Incentive (ADR)

offers a one-time incentive to help pay for the installation of automated controls to shed load during a demand response event upon a signal sent by PG&E. Requires enrolling in a demand response program.
