

Agricultural Customers

Find the best rate plan options for your business

We provide a range of options for electric service. Select the rate plan that best fits the needs of your business.

Log in or register at [pge.com](https://www.pge.com) to:

- Get detailed information about your current usage
- Improve your bottom line with the business energy savings quick tool
- Learn about Time-of-Use rate plans and how your bill may be affected by changes

In addition to these online tools, you can call [1-877-311-FARM \(3276\)](tel:1-877-311-FARM) for help with a rate analysis.

Electric Rate Plan Options

For details and more information on all electric rate plan options, visit pge.com/tariffs.

Time-of-Use

Time-of-Use (TOU) rate plans can help save money on your energy bills. By shifting energy usage to when demand is lower and renewable energy is more plentiful, you can reduce your expenses while supporting a cleaner and more reliable energy grid.

The rate plan for most agricultural customers was transitioned to a new TOU rate plan beginning March 2021. The rate plan for qualifying high impact customers transitioned starting in March 2022.

The rate plan for remaining customers who become eligible will transition **annually each March**.

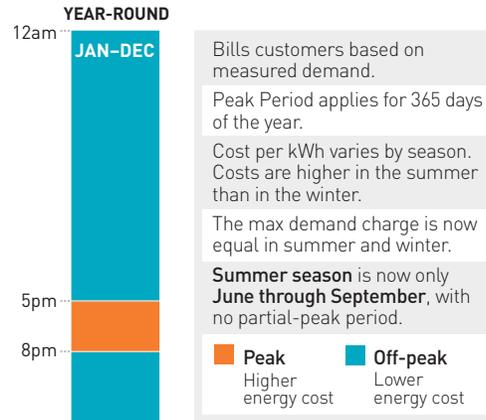

For details and more information, visit pge.com/tou.

Ag<35 kW Low Use (AG-A1) is for small agricultural businesses with low to moderate operating hours and demand less than 35 kW.

Ag<35 kW High Use (AG-A2) is for small agricultural businesses with high annual operating hours and demand less than 35 kW.

Ag35+ kW Med Use (AG-B) is for medium agricultural businesses with low to moderate operating hours and demand 35 kW or greater.

Ag35+ kW High Use (AG-C) is for large agricultural businesses with high annual operating hours and demand 35 kW or greater. Only the AG-C rate plan includes Summer Peak Demand Charge and Demand Charge Rate Limiter.

AG-F (Flex) is a flexible rate option available for agricultural businesses that can limit operating hours to two off-peak days per week (Wednesday and Thursday, Saturday and Sunday or Monday and Friday). This rate plan has peak hours from 5 p.m. to 8 p.m. on five days per week instead of seven. In exchange for two off-peak days, peak prices on this rate plan will be higher than peak prices on a seven-day per week peak hour rate plan.

Peak Day Pricing

Peak Day Pricing (PDP) offers agricultural customers a discount on summer electricity rates in exchange for higher prices on 9 to 15 PDP Event Days per year. PDP event hours changed to 4 p.m. to 9 p.m. in **March 2022**. TOU peak hours will remain 5 p.m. to 8 p.m.

To learn more, visit pge.com/pdp.

Clean Energy Alternatives

Net Energy Metering allows customers to install a renewable generator, interconnect to the PG&E grid and receive credits to offset the cost of their energy usage. With certain additional requirements, storage can also be installed with renewable generation. Agricultural customers qualifying for **Net Energy Metering Aggregation (NEM2A)** may receive credit for all their aggregated energy accounts from a single renewable generator. To learn more, visit pge.com/interconnectionprograms.

We also offer incentives to make installing renewable energy more affordable for your business. To learn more and see if you qualify, visit pge.com/businesssolarincentives.

Renewable Feed-in Tariffs offer long-term wholesale electric energy contracts to eligible generators. To learn more, visit pge.com/feedintariffs.

Note: Direct Access and Community Choice Aggregation customers purchase electricity from another provider and receive electric transmission and distribution services from PG&E. These customers are eligible for many, but not all, of the rate plans or features listed in this notice. To learn more, contact your provider.

Programs to save money

California Alternate Rates for Energy (CARE)

program provides agricultural customers a monthly discount on energy bills for qualified agricultural employee housing facilities.

To learn more, visit pge.com/care.

Capacity Bidding Program (E-CBP) offers incentives to eligible customers for reducing their energy consumption upon request. A customer may only enroll in Schedule E-CBP through an Aggregator.

To learn more, visit pge.com/cbp.

Automated Demand Response Incentive (ADR)

offers a one-time incentive to help pay for the installation of automated controls to shed load during a demand response event upon a signal sent by PG&E. Requires enrolling in a demand response program.

To learn more, visit pge.com/adr.

Emergency Load Reduction Program (ELRP)

offers incentives (\$2/kWh) for voluntarily reducing energy consumption during times of grid stress. No penalties are associated with participation.

To learn more, visit elrp.olivineinc.com.
