Advice 6065-E
(Pacific Gas and Electric Company ID U39 E)

Public Utilities Commission of the State of California

**Subject: Submits Notice of Construction, Pursuant to General Order 131-D,
for the Construction of Lakeville-Petaluma 60kV Power Line Pole
Replacement in the City of Petaluma**

Pacific Gas and Electric Company (“PG&E” or “the Company”) hereby submits notice pursuant to General Order (G.O.) 131-D, Section XI, Subsection B.4, of the construction of facilities that are exempt from a Permit to Construct.

Purpose

This advice letter provides a copy of the Notice of Proposed Construction (Attachment I) and the Notice Distribution List, which comply with the noticing requirements found in G.O. 131-D, Section XI.

Background

To maintain safe and reliable electric service in the City of Petaluma, Pacific Gas and Electric Company (PG&E) is proposing to replace approximately 0.72 miles of electric distribution conductor (wires) located beneath (underbuild) the existing Lakeville-Petaluma C 60 Kilovolt (kV) Power Line conductor. PG&E will also replace approximately 12 existing wood poles with 12 new wood poles. The new wood poles will be approximately 5 to 10 feet taller than the existing wood poles. Taller poles are needed to comply with California Public Utilities Commission (CPUC) General Order 95 minimum ground-to-conductor clearanace requirements, while accommodating electric distribution wires on the poles (underbuild).

The project begins at an existing wood pole in existing PG&E easement located approximately 475 feet southwest of the intersection of North McDowell Boulevard with East Madison Street, and runs northeast approximately 0.72 miles to an existing wood pole on the northeast side of Sonoma Mountain Parkway located approximately 125 feet northwest of the intersection of Sonoma Mountain Parkway with East Madison Street. Construction is tentatively scheduled to begin in May 2021, or as soon as

practicable after project approval. Construction will be completed in August 2021, or as soon as possible after construction begins.

CPUC General Order 131-D, Section III, Subsection B.1, exempts projects meeting specific conditions from the CPUC's requirement to file an application requesting authority to construct. The Company believes this project qualifies for the following exemption,

- g. "power line facilities or substations to be located in an existing franchise, road-widening setback easement, or public utility easement; or in a utility corridor designated, precisely mapped and officially adopted pursuant to law by federal, state, or local agencies for which a final Negative Declaration or EIR [Environmental Impact Report] finds no significant unavoidable environmental impacts."

This filing will not cause the withdrawal of service, or conflict with any other rate schedule or rule.
