Advice 6198-E

(Pacific Gas and Electric Company ID U 39 E)

Public Utilities Commission of the State of California

Subject: Submits Notice of Construction, Pursuant to General Order 131-D, for the Construction of Moraga-Oakland X 115 kV Power Line Reliability Project in Contra Costa County and City of Orinda

Pacific Gas and Electric Company ("PG&E" or "the Company") hereby submits notice pursuant to General Order (G.O.) 131-D, Section XI, Subsection B.4, of the construction of facilities that are exempt from a Permit to Construct.

Purpose

This advice letter provides a copy of the Notice of Proposed Construction (Attachment I) and the Notice Distribution List, which comply with the noticing requirements found in G.O. 131-D, Section XI.

Background

To continue to maintain safe and reliable electric service in Contra Costa County, Pacific Gas and Electric Company (PG&E) is proposing to replace wires (reconductoring) on approximately 0.4 miles of the Moraga – Oakland X Circuit 1 and 2 115 Kilovolt (kV) Power Line and approximately 0.4 miles of the Moraga – Oakland X Circuit 3 and 4 115 kV Power Line in Contra Costa County and the City of Orinda (existing easement and franchise). The project begins approximately 0.5 miles southwest of the intersection of Valley View Drive and Lost Valley Drive in the City of Orinda and continues southwest approximately 2,000 feet, terminating approximately 75 feet northeast of the East Bay Regional Park District McCosker Loop Trail near Pinehurst Road in Contra Costa County. PG&E will replace approximately five existing lattice steel structures (structure) with four new lattice steel structures. The replacement structures will be approximately 13 to 44 feet taller than the existing structures to comply with California Public Utilities Commission (CPUC) General Order 95 minimum ground-to-conductor clearance requirements. The project will avoid impacts to watercourses and other nearby resources. Helicopters will be used to facilitate construction in some areas. Construction is tentatively scheduled to begin in the third quarter of 2021 or as soon as practicable after project approval. Construction is

scheduled to be complete in the fourth quarter of 2021 or as soon as possible after construction begins.

CPUC General Order 131-D, Section III, Subsection B.1, exempts projects meeting specific conditions from the CPUC's requirement to file an application requesting authority to construct. The Company believes this project qualifies for the following exemption(s),

- g. "power line facilities or substations to be located in an existing franchise, road-widening setback easement, or public utility easement; or in a utility corridor designated, precisely mapped and officially adopted pursuant to law by federal, state, or local agencies for which a final Negative Declaration or EIR [Environmental Impact Report] finds no significant unavoidable environmental impacts."

This submittal will not cause the withdrawal of service, or conflict with any other rate schedule or rule.
