Advice 6369-E
(Pacific Gas and Electric Company ID U39 E)

Public Utilities Commission of the State of California

Subject: Submits Notice of Construction, Pursuant to General Order 131-D, for the Construction of Sanger-Reedley 115 kV Power Line Relocation Project in the City of Sanger, County of Fresno

Pacific Gas and Electric Company (“PG&E” or “the Company”) hereby submits notice pursuant to General Order (G.O.) 131-D, Section XI, Subsection B.4, of the construction of facilities that are exempt from a Permit to Construct.

Purpose

This advice letter provides a copy of the Notice of Proposed Construction (Attachment I) and the Notice Distribution List, which comply with the noticing requirements found in G.O. 131-D, Section XI.

Background

In order to accommodate DR Horton’s Greenwood Estates residential subdivision, Pacific Gas Electric Company (PG&E) has been requested to relocate approximately 1,420 feet of the Sanger-Reedley 115 kilovolt (kV) power line in the City of Sanger. The proposed relocation begins approximately 10 feet north of North Avenue and runs south along the west side of Greenwood Avenue to a point approximately 1,360 feet south of the intersection (minor relocation). This segment of power line will be relocated approximately 9 to 11 feet west of its current alignment. Approximately 4 existing light duty steel poles with an aboveground height of approximately 58 feet will be removed and approximately 4 new light duty steel poles, approximately 6 to 14 feet taller, will be installed. The taller poles are required to meet current design standards and California Public Utilities Commission (CPUC) General Order 95 conductor clearance requirements. Construction is tentatively scheduled to begin in March 2022 or as soon as practicable after project approval. Construction will be completed in April 2022, or as soon as possible after construction begins.

CPUC General Order 131-D, Section III, Subsection B.1, exempts projects meeting specific conditions from the CPUC’s requirement to file an application requesting

authority to construct. The Company believes this project qualifies for the following exemption(s),

- c. The minor relocation of existing power line facilities up to 2,000 feet in length, or the intersetting of additional support structures between existing support structures.

This submittal will not cause the withdrawal of service, or conflict with any other rate schedule or rule.

Additional Project Information: To obtain further information on the proposed project, please call PG&E's Project Information Line at (415) 973-5530.

- a. There is reasonable possibility that the activity may have an impact on an environmental resource of hazardous or critical concern where designated, precisely mapped and officially adopted pursuant to law by federal, state, or local agencies; or
- b. The cumulative impact of successive projects of the same type in the same place, over time, is significant; or
- c. There is a reasonable possibility that the activity will have a significant effect on the environment due to unusual circumstances.

Protests should include the following:

1. Your name, mailing address and daytime telephone number.
2. Reference to the CPUC Advice Letter Number and Project Name.
3. A clear description of the reason for the protest.
