Advice 6534-E
(Pacific Gas and Electric Company ID U 39 E)

Public Utilities Commission of the State of California

Subject: **Information-Only Voltage Complaints Reports for the Period February 22, 2021 to February 21, 2022 Pursuant to Resolution E-4898 Ordering Paragraph 7**

Purpose

The purpose of this information-only advice letter is for Pacific Gas and Electric Company (PG&E) to submit its report on the amount of voltage excursions pursuant to Resolution E-4898[1] Ordering Paragraph (OP) 7.

Background

The California Public Utilities Commission (CPUC or Commission) initiated Rulemaking (R.) 11-09-011 on September 22, 2011 to review and, if necessary, revise the rules and regulations governing the interconnection of generation and storage facilities to the electric distribution systems of the investor-owned utilities (IOUs) [2]. The IOUs' rules and regulations pertaining to the interconnection of generating facilities are set forth in the Electric Rule 21 Tariff.

In early 2013, the Smart Inverter Working Group (SIWG) was formed by parties of R.11-09-011 to develop proposals to take advantage of the new, rapidly advancing technical capabilities of inverters. In March 2016, the SIWG completed its first set of recommendations for the Phase 3 advanced functions.[3,4]

[4] The SIWG's Phase 1 and Phase 2 recommendations were incorporated into Rule 21 in April 2015 and April 2017.

Among the key Phase 3 advanced functions of relevance to this advice letter was Function 6, Volt Watt Mode. In E-4898[5] it is described as:

> "As a general rule, the production of active power raises voltage. This relationship can be problematic when solar photovoltaic (PV) systems interconnect in large numbers on distribution circuits where utilities have not planned for voltage rise and where existing distribution equipment cannot lower voltage. **Volt Watt Mode modifies active power from DERs based on predetermined voltage ranges to prevent the local voltage on the distribution circuit from rising/dropping outside of allowable levels.** Voltage regulators are a common mitigation measure used on circuits with and without PV to ensure that voltage stays within acceptable levels all the way to the end of the circuit. As PV injects power to the grid at various points along a circuit, the complex interaction of ever-changing load and generation conditions can cause imbalances in voltage levels. **These voltage excursions can be mitigated by the smart inverter's Volt Watt Mode raising or lowering voltage but that change in voltage reduces the amount of real power that is exported.**" (Emphasis added)

On June 23, 2016, the Commission adopted Decision (D.) 16-06-052[6], which directed the IOUs to submit advice letters proposing revisions to Rule 21 setting forth any agreed-upon technical requirements, testing and certification processes, and effective dates for Phase 3 functions. On November 17, 2016, the Energy Division hosted a public workshop with the purpose of providing guidance to the IOUs on the Advice Letter submittals.

On December 20, 2016, the IOUs jointly submitted a Tier 1 Advice Letter (AL) 4983-E[7] that provided a work plan and an outline of next steps for tariff development including a status update on the activities outlined in the work plan by March 30, 2017.

On March 31, 2017, the SIWG submitted final revisions to the Phase 3 recommendations. In addition, the IOUs submitted the required status update on March 30, 2017. In accordance with the work plan, the IOUs each anticipated submitting a Tier 3 Advice Letter in June 2017.

On June 27, 2017, the IOUs were granted a requested to extend the submittal date of the Tier 3 Advice Letters to August 18, 2017. On August 18, 2017, PG&E submitted Advice Letter 5129-E[8] to comply with D.16-06-052 proposing Rule 21 tariff revisions.

Following the submission of AL 5129-E, the Energy Division held a public workshop to discuss and, if possible, resolve issues raised in protests to the advice letters.

On April 27, 2018 the CPUC issued Resolution E-4898 - Approval, with Modifications, of Request for Modifications to Electric Rule 21 Tariff to Incorporate Smart Inverter Phase 3 Advanced Functions in Compliance with Decision 16-06-052. Among other things, OP 1 stated that PG&E AL 5129-E is approved as modified herein.

With regards to this advice letter, E-4898 OP 7 requires:

> Pacific Gas and Electric, Southern California Edison, and San Diego Gas & Electric shall each submit quarterly reports via Tier 1 information-only Advice Letter for one year starting three months after the mandatory activation of Function 6 **on the voltage complaint process**, and following the completion of the quarterly reports, shall submit annual reports on the voltage complaint process via Tier 1 information-only Advice Letter. No sooner than five years after the activation of Function 6, the IOUs may submit proposals via Tier 2 Advice Letter on whether to continue or modify the reporting requirement. [Emphasis added]

In its Discussion[9] about the voltage complaint process, the E-4898 noted:[10]

> In the event that customers, with or without DERs, experience voltage issues, these customers can and should report these issues to the utility. The Volt Watt Mode will assist in discovering these voltage issues and ensuring that they are not exacerbated. Reporting on the voltage complaint process, as is discussed later in this Discussion section, will assist with enforcing utility compliance with Rule 2 and ensuring voltage issues are resolved in a timely and appropriate manner.
>
> In the case that utility engineering analysis uncovers that the voltage issue is caused by the customer, it is the customer's responsibility under Rule 2 to resolve the issue. In this situation, the IOU works with the customer to help the customer adjust their settings if feasible or coordinate on the appropriate infrastructure upgrades. Volt Watt Mode helps these customers to stay in compliance with Rule 2. The alternative could be worse for the customer. If their voltage rises above 110% of nominal voltage, then

their system automatically trips off, which would have more of an impact on their power production than the small amount of curtailment from the use of Volt Watt Mode.[11]

Additionally, E-4898 notes:

> If we find that the IOUs are not resolving voltage issues within a timely period that are on the utility side of the meter, and thus, the responsibility of the IOU, we may determine to deactivate the Volt Watt Mode at a later time. In order to do so, we order the IOUs to report on their voltage complaint resolution process. Specifically, we order the IOUs to report on **how many voltage complaints were received with categories for both DER and non-DER customers, whether the complaint was from the customer or a third-party on behalf of the customer, the duration it took to resolve each complaint, whether the voltage issue was on the utility side or the customer side of the meter, the method for resolving the voltage issue, and the cost of the method for resolving the voltage issue**.[12] [emphasis added]
>
> … the IOUs shall file quarterly reports via Tier 1 Advice Letter on the voltage complaint process for one full calendar year, i.e. four reports, starting three months after the mandatory activation of Function 6. Following this year, the IOUs shall submit annual reports on the voltage complaint process via Tier 1 Advice Letter with a submittal date based on the anniversary of the activation of Function 6. No sooner than five years after the activation of Function 6, the IOUs may submit proposals via Tier 2 Advice Letter on whether to continue or modify the reporting requirement.
>
> By the time of the first quarterly Tier 1 Advice Letter the utilities shall update their websites with clearly identified and easy to find information explaining their respective voltage complaint processes, including steps of the customer and utility and how a customer can contact the utility regarding a voltage issue. This section of utility website should explain how the utility determines if the cause of a voltage issue is attributable to the utility or the customer.[13]
