**Advice 6968-E**

(Pacific Gas and Electric Company ID U 39 E)

Public Utilities Commission of the State of California

**Subject: Electric Rate Change Effective July 1, 2023**

**Purpose**

Pacific Gas and Electric Company (PG&E) submits this Tier 1 advice letter to update its electric rates and tariffs effective July 1, 2023, to implement various revenue requirement changes approved by the California Public Utilities Commission (CPUC or Commission). This advice letter contains tables of proposed average rates and revenues in Attachment 1; an average residential rate and bill impact summary table in Attachment 2; and final tariffs in Attachment 3.

**Background**

PG&E submits this advice letter to change electric rates effective July 1, 2023, to implement various Commission-approved revenue requirement changes. As a result of the changes described below, the total authorized revenue requirement in rates will increase by a total of \$1,209 million, or 7.5 percent, effective July 1, 2023. The change in revenue requirement results in an increase to the system average bundled rate of 1.6 cents per kilowatt-hour (kWh), or 5.3 percent, and an increase to the Direct Access (DA) and Community Choice Aggregator (CCA) average rate of 1.5 cents per kWh, or 10.4 percent.<sup>1</sup>

**Revenue Requirement Changes****1. Decision (D.) 23-06-004 for Interim Rate Relief Recovery of PG&E's 2022 Wildfire Mitigation and Catastrophic Event (WMCE) Application**

On December 15, 2022, PG&E submitted Application (A.) 22-12-009 seeking to recover a total revenue requirement of approximately \$1.3 billion for recorded costs in the Wildfire Mitigation Balancing Account, Vegetation Management Balancing Account, Catastrophic Event Memorandum Account, and other miscellaneous Memorandum Accounts. Concurrent with the 2022 WMCE Application, PG&E

---

<sup>1</sup> The average rate for DA and CCA customers is for PG&E provided services only and excludes the generation component provided by DA and CCA service providers.

submitted a motion requesting interim rate relief of 85% of the total requested revenue requirement, equating to approximately \$1.104 billion (including interest), to be recovered over a 12-month period in electric distribution rates.

On June 8, 2023, the Commission issued D.23-06-004, granting PG&E's request and authorizing recovery, on an interim rate basis, of no more than \$1.104 billion in revenue over a 12-month period beginning as early as June 2023.<sup>2</sup> PG&E will refund, with interest, any excess rate recovery amount pending a final decision in the 2022 WMCE proceeding. In this advice letter, PG&E is implementing the adopted revenue requirement of \$1.104 billion in electric distribution rates to be recovered over a 12-month period from July 1, 2023, through June 30, 2024.

## **2. Recovery of an Additional Costs for Enhanced Summer Reliability under PG&E's 2023 Market Access Program (MAP)**

On May 5, 2023, PG&E submitted Advice 6934-E requesting an additional \$17.8 million for program implementation and incentive costs for the 2023 MAP program. On May 19, 2023, the Commission approved that advice letter, effective June 6, 2023. In this advice letter, PG&E is implementing the \$17.8 million revenue requirement, plus revenue fees and uncollectibles (RF&U), for a total of \$18 million, approved in Advice 6934-E for recovery in Public Purpose Program rates starting July 1, 2023.

## **3. Recovery of Amount Recorded in the Risk Transfer Balancing Account (RTBA)**

The Risk Transfer Balancing Account (RTBA) was approved in D.20-12-005 in PG&E's 2020 General Rate Case (GRC) proceeding. The RTBA is a two-way balancing account that authorizes PG&E to record and recover \$1.4 billion of general liability insurance coverage, inclusive of all risk transfer instruments (reinsurance, collateralized reinsurance, catastrophe bonds, insurance-linked securities, etc.) and related costs (such as broker fees and excise taxes), purchased to protect against liability claims or losses that may arise from PG&E's business operations, assets, and risk of loss from the supply of electric and natural gas to customers.

D.23-01-005 in PG&E's 2023 GRC proceeding approved the Settlement Agreement Between PG&E, TURN, and Cal Advocates on Wildfire Liability Insurance Issues (Settlement). The Settlement Agreement establishes PG&E's Wildfire Liability Self-Insurance program. The Settlement defines PG&E's Wildfire Liability Self-Insurance program as consisting of "(i) the remaining wildfire liability insurance coverage

---

<sup>2</sup> D.23-06-004 OP1 granted recovery from June 2023 through the end of May 2024 and recognized should PG&E begin recovery after June 2023, the end of the recovery period would be extended commensurately.

currently in place through existing commercial market policies, which will expire in 2023; and (ii) additional self-insurance". Further, the Settlement at section 3.8, as approved by the Commission in D.23-01-005, states that "[t]he shift to a 100% self-insurance framework for the 2023 GRC Period shall not affect PG&E's authority to collect through the RTBA the remaining, outstanding costs of commercial insurance policies PG&E's has already purchased and paid for during the 2020-2022 time period..." The cost recovery requested through this advice letter is only for expiring 2022-2023 commercial wildfire liability insurance policies executed prior to the Joint Motion for Adoption of the Settlement Agreement on October 7, 2022. This advice letter includes \$86 million, plus interest and RF&U, for a total balance of \$87 million for the collection of the electric distribution portion of the 2022-2023 expiring commercial wildfire liability insurance policy costs.

### **Tariff Revisions**

PG&E is submitting final tariffs in Attachment 3 for this consolidated electric rate change effective July 1, 2023.

1. APPLICABILITY: **Option R for Standalone Storage:** The Option R rate is available to qualifying customers taking Bundled, DA and CCA service under Schedule E-20. Eligible customers system must have a minimum discharge capacity equal to or greater than 20 percent of the customer's annual peak demand, as recorded over the previous 12 months to be eligible for Option R. Discharge capacity for Option R will be calculated using the same method as that used for Option S. For additional Option R details and program specifics, including the participation cap, see Sections 3 and 16.

**Option R for Renewable Distributed Generation Technologies:** The Option R rate is available to qualifying customers taking Bundled, DA or CCA service under Schedule E-20. Eligible customers system with solar, wind, fuel cells or other eligible onsite renewable distributed generation technologies as defined by the California Solar Initiative program (CSI, or Self Generation Incentive Program (SGIP), customers with behind-the-meter storage paired with such renewable distributed generation and Permanent Load Shifting (PLS) technologies. Eligible renewable generation systems and PLS systems must have a net renewable generating capacity or load shift capacity equal to or greater than 15 percent of the customer's annual peak demand, as recorded over the previous 12 months. For additional Option R details and program specifics, including the participation cap, see Sections 3 and 16.

Sheet 2

**RATES:** Total bundled service charges are calculated using the total rates below. On-peak, part-peak, and off-peak usage is assigned to tiers on a pro-rated basis. For example, if twenty percent of a customer's usage is in the on-peak period, then twenty percent of the total usage in each tier will be treated as on-peak usage. Customers on this schedule are subject to the delivery minimum bill amount shown below applied to the delivery portion of the bill (i.e. to all rate components other than the generation rate). In addition, total bundled charges will include applicable generation charges per kWh for all kWh usage.

Customers receiving a medical baseline allowance shall pay for all usage based on the rates shown below, and shall not pay the Wildfire Fund Charge. Customers receiving a medical baseline allowance shall also receive a 50 percent discount on the delivery minimum bill amount shown below.

Direct Access (DA) and Community Choice Aggregation (CCA) charges shall be calculated in accordance with the paragraph in this rate schedule titled Billing.

California Climate Credit (per household, per semi-annual payment occurring in the March <sup>†</sup> and October bill cycles)			(\$38.39)			

Total bundled service charges shown on customer's bills are unbundled according to the component rates shown below. Where the delivery minimum bill amount applies, the customer's bill will equal the sum of (1) the delivery minimum bill amount plus (2) for bundled service, the generation rate times the number of kWh used. For revenue accounting purposes, the revenues from the delivery minimum bill amount will be assigned to the Transmission, Transmission Rate Adjustments, Reliability Services, Public Purpose Programs, Nuclear Decommissioning, Competition Transition Charges, Energy Cost Recovery Amount, Wildfire Fund Charge, and New System Generation Charges based on kWh usage times the corresponding unbundled rate component per kWh, with any residual revenue assigned to Distribution.\*

<sup>†</sup> Pursuant to D.23-02-014, disbursement of the April 2023 residential Climate Credit shall begin by March 1, 2023.

\* This same assignment of revenues applies to direct access and community choice aggregation customers.

The above commercial CARE discount per kWh by rate schedule shall be updated by PG&E with each future electric rate change based on the overall percentage distribution and generation discount for the residential CARE customer class, and assigned as a residual reduction to the commercial distribution rate component, after the waiver of the Wildfire Fund Charge, Recovery Bond Charge, Recovery Bond Credit, and the CARE Surcharge portion of the PPP rate component otherwise applicable to each commercial rate schedule from Preliminary Statement Part I. Should commercial CARE customers take service on a rate schedule not listed above, PG&E shall use the most appropriate rate schedule currently listed above, until such time as a new corresponding rate per kWh is developed and available for billing purposes with Commission approval.

**COMMUNITY CHOICE AGGREGATION AND DIRECT ACCESS:** Direct access (DA) and Community Choice Aggregation (CCA) customers shall pay charges for transmission, transmission adjustment rates, reliability services, distribution, public purpose programs, nuclear decommissioning, the franchise fee surcharge in accordance with Schedule E-FFS and the Vintaged Power Charge Indifference Adjustment (PCIA), as provided in the otherwise applicable rate schedule and Schedule DA CRS (Cost Responsibility Surcharge) or Schedule CCA CRS (as applicable), except that distribution and public purpose program charges will be discounted, and Wildfire Fund Charge, Recovery Bond Charge, and Recovery Bond Credit waived as described above.

**TOTAL RATES (Cont'd)**

Total bundled service charges shown on customers' bills are unbundled according to the component rates shown below. Where the delivery minimum bill amount applies, the customer's bill will equal the sum of (1) the delivery minimum bill amount plus (2) for bundled service, the generation rate times the number of kWh used. For revenue accounting purposes, the revenues from the delivery minimum bill amount will be assigned to the Transmission, Transmission Rate Adjustments, Reliability Services, Public Purpose Programs, Nuclear Decommissioning, Competition Transition Charges, Energy Cost Recovery Amount, Wildfire Fund Charge, and New System Generation Charges based on kWh usage times the corresponding unbundled rate component per kWh, with any residual revenue assigned to Distribution.\*\*\*

**UNBUNDLING OF TOTAL RATES**

Discount: Discount rates provided in the Total Rates section above are assigned entirely to the unbundled distribution component.

CUSTOMER-OWNED STREET AND HIGHWAY LIGHTING ELECTROLIER METER RATE

**APPLICABILITY:** Applicable to service to electrolier lighting systems, excluding incandescent luminaires, which illuminate streets, highways, and other outdoor ways and places where the Customer owns the lighting fixtures, poles and interconnecting circuits, and PG&E furnishes metered energy. Customers may connect incidental load on a single service account, not to exceed 5% of Customer's total circuit load on the account. Total lighting load must operate in conformance with the 85% off-peak design of this Rate. All lighting must be power factor corrected in accordance with electric Rule 2G. Where loads are found outside these limits PG&E will default the rate to A1 General Service.

**TERRITORY:** The entire territory served.

**RATES:** Total bundled service charges are calculated using the total rates shown below. Direct Access (DA) and Community Choice Aggregation (CCA) charges shall be calculated in accordance with the paragraph in this rate schedule titled Billing.

RATES: (Cont'd) **DEFINITION OF SERVICE VOLTAGE:** (Cont'd)

- c. Transmission: This is the voltage class if the customer is served without utility transformation at one of the standard transmission voltages specified in PG&E's Electric Rule 2, Section B.1.

The Standby Reservation Charges for customers who have paid for the total cost of the service transformers as special facilities under electric Rule 2 are determined by the voltage at the high side of the service transformer. All other charges will be billed on the voltage level at the low side of the service transformer.

PG&E retains the right to change its line voltage at any time, after reasonable advance notice to any customer affected by the change. The customer then has the option of changing its system to receive service at the new line voltage or accepting service at the initial voltage level through transformers supplied by PG&E.

**DEFINITION OF MAXIMUM DEMAND:**

The real (kW) and reactive (kVAR) demands billed under this tariff will be averaged over each 15-minute interval. "Maximum demand" (real and reactive) will be the highest 15-minute interval average for the billing month. If the customer's use of electricity is intermittent or subject to severe fluctuations, a 5-minute interval may be used. If the customer has any welding machines, the diversified resistance welder load, calculated in accordance with Section J of Rule 2, will be considered the maximum demand if it exceeds the maximum demand that results from averaging the demand over 15-minute intervals.

Total bundled service charges are calculated using the total rates shown below. DA and CCA charges shall be calculated in accordance with the paragraph in this rate schedule titled Billing.

Streetlights on traffic circuits and other equipment operating on a 24-hour basis in conformity with this rate design may also be connected under this Schedule. Also applicable for service to these installations where service is initially established in the name of a developer who has installed such systems as required by a governmental agency, where ownership of facilities and responsibility for service will ultimately be transferred to the jurisdiction requiring the installation. Non-conforming incidental load such as low voltage sprinkler controls may also be attached where such loads do not exceed 5% of the total connected load served under a TC-1 Service Account. Maximum load per meter is 34,000 kWh per month.
