**Advice 7005-E**

(Pacific Gas and Electric Company ID U 39 E)

Public Utilities Commission of the State of California

**Subject: Pacific Gas and Electric Company's Intent to Offer Large Hydroelectric Energy Allocations for Delivery Year 2024 Pursuant to Decision 23-06-006**

**Purpose**

Pursuant to Ordering Paragraph (OP) 3 of the California Public Utilities Commission (Commission or CPUC) Decision 23-06-006 (Decision), Pacific Gas and Electric Company (PG&E) hereby submits this Tier 1 advice letter (AL) to state its intent to allocate GHG-Free Energy from large hydroelectric facilities generated in delivery year 2024. PG&E intends to offer such allocation consistent with the standards and criteria in its proposed revisions to Appendix P of PG&E's Conformed 2014 Bundled Procurement Plan (Conformed BPP) set forth in PG&E's AL 6985-E, which is pending disposition.

**Background**

On June 8, 2023, the Commission adopted D.23-06-006, the *Decision Addressing Greenhouse Gas-Free Resources, Long-Term Renewable Transactions, Energy Index Calculations, and Energy Service Providers' Data Access*. The Decision modifies the PCIA methodology by (a) valuing the PCIA-eligible Greenhouse Gas (GHG)-Free large hydroelectric resources for marketing and Power Content Label purposes through the use of either a new market price benchmark or an allocation to customers with cost responsibility at the investor-owned electric utility's (IOU's) election for each multi-year period corresponding to a Renewables Portfolio Standard (RPS) compliance period, and (b) revising the calculation of the Energy Index market price benchmark to improve accuracy and transparency.

The Decision required PG&E to file a Tier 2 AL within 30 days of the effective date of the Decision to revise the portion of its Conformed BPP that pertains to interim GHG-free allocations. Accordingly, PG&E submitted AL 6985-E on July 10, 2023, to revise its Conformed BPP Appendix P, which describes the standards and criteria pursuant to which PG&E may allocate and sell certain GHG-Free Energy from its portfolio. AL 6985-E is currently pending disposition.

Ordering Paragraph 3 of the Decision orders the IOUs to (a) submit a Tier 1 advice letter within 60 days of the effective date of the Decision to indicate whether it elects to provide an interim allocation of large hydroelectric energy for 2024; and (b) update its 2024 ERRA Forecast Application workpapers, as applicable, within 90 days of the effective date of the Decision to reflect whether it elects to provide an interim allocation of large hydroelectric energy for 2024.

Accordingly, PG&E submits this AL to indicate its election to provide an interim allocation of GHG-Free energy from large hydroelectric resources for the year 2024. For future years, PG&E will indicate in its ERRA Forecast Application made during the first year of subsequent multi-year periods corresponding to an RPS compliance period, whether PG&E shall elect to provide an interim allocation of large hydroelectric energy for that period.
