Public Utilities Commission of the State of California

Subject: Biomethane Incentive Reservation Application Form

Purpose

Pursuant to Ordering Paragraph (OP) 1 of Decision (D.)19-12-009 (Decision), Pacific Gas and Electric Company, (PG&E), Southern California Gas Company (SoCalGas), San Diego Gas & Electric Company (SDG&E) and Southwest Gas Corporation (Southwest Gas) ("the Utilities") respectfully submits this Tier 1 advice letter to establish a standard Biomethane Incentive Reservation Application form.

Background

On December 5, 2019, the California Public Utilities Commission (CPUC) approved D.19-12-009 *Establishing a Reservation System for the Biomethane Incentive Program, Extending Date and Addressing Rate Recovery for Pipeline Interconnection Infrastructure*. This decision implements an Incentive Reservation System for the biomethane monetary incentive program initially established pursuant to D.15-06-029. The biomethane monetary incentive program provides up to \$3 million for non-dairy cluster projects and \$5 million for dairy clusters that successfully interconnect with the natural gas pipeline system and operate by December 31, 2026.

The Biomethane Incentive Reservation System allows project developers to reserve incentive funds during the development phase of a project and receive the funds once the project is interconnected and operating in accordance with utility tariffs. Applications for

the Incentive Reservation System are designed to ensure that only viable projects can secure a spot on the reservation list managed by the CPUC's Energy Division.

In accordance with OP 1, the Utilities collaborated to develop a standard Biomethane Incentive Application form that meets the criteria outlined in Section 3.2 and 3.3 of D.19-12-009 (Attachment A), which includes the following information:

- Contact Information including: first name, last name, title, company name, street address, city, county, state, zip code, office phone, mobile phone, fax number, and email address
- Interconnecting Facility Information including: project name, project location, and approximate location and information of the proposed Point of Interconnection (site plan showing facility location and Point of Interconnection)
- Proposed schedule including: proposed commercial Operation Date and proposed Terms of Service (years)
- Documentation of a pending application for pipeline interconnection with the utility including commencement of the Step 3 study process with PG&E (Engineering and Construction Phase) and SoCalGas/SDG&E (Detailed Engineering Study) or a completed Interconnection Engineering Study with Southwest Gas, as well as payment of any amount required by the Utility to initiate construction of the interconnection equipment.

Once the Utilities' Tier 1 advice letter is approved by Energy Division, the standard Biomethane Incentive Reservation Application (downloadable) form will be available as soon as possible at each Utility website.¹

This submittal would not increase any current rate or charge, cause the withdrawal of service, or conflict with any rate schedule or rule.
