(d) Two hundred thousand dollars ($200,000) for each occurrence if the Gross Nameplate Rating of Producer's Generating Facility or AC/DC Converter is ten (10) kW or less and Producer's Generating Facility or Non-Export AC/DC Converter is connected to an account receiving residential service from PG&E.

Such general liability insurance shall include coverage for "Premises-Operations, Owners and Contractors Protective, Products/Completed Operations Hazard, Explosion, Collapse, Underground, Contractual Liability, and Broad Form Property Damage including Completed Operations."

8.2. The general liability insurance required in Section 8.1 shall, by endorsement to the policy or policies, (a) include PG&E as an additional insured; (b) contain a severability of interest clause or cross-liability clause; (c) provide that PG&E shall not by reason of its inclusion as an additional insured incur liability to the insurance carrier for payment of premium for such insurance; and (d) provide for thirty (30) calendar days' written notice to PG&E prior to cancellation, termination, alteration, or material change of such insurance.

8.3. If Producer's Generating Facility or Non-Export AC/DC Converter is connected to an account receiving residential service from PG&E and the requirement of Section 8.2(a) prevents Producer from obtaining the insurance required in Section 8.1, then upon Producer's written Notice to PG&E in accordance with Section 9.1, the requirements of Section 8.2(a) shall be waived.

8.4. Evidence of the insurance required in Section 8.2 shall state that coverage provided is primary and is not in excess to or contributing with any insurance or self-insurance maintained by PG&E.

8.5. Producer agrees to furnish the required certificates and endorsements to PG&E prior to Initial Operation. PG&E shall have the right to inspect or obtain a copy of the original policy or policies of insurance.

8.6. If Producer is self-insured with an established record of self-insurance, Producer may comply with the following in lieu of Sections 8.1 through 8.4:

(a) Producer shall provide to, PG&E, at least thirty (30) calendar days prior to the date of Initial Operation, evidence of an acceptable plan to self-insure to a level of coverage equivalent to that required under Section 8.1.

(b) If Producer ceases to self-insure to the level required hereunder, or if Producer are unable to provide continuing evidence of Producer's ability to self-insure, Producer agrees to immediately obtain the coverage required under Section 8.1.

8.7. All insurance certificates, statements of self-insurance, endorsements, cancellations, terminations, alterations, and material changes of such insurance, if any, shall be made available to PG&E upon request.

9. NOTICES

9.1. Any written notice, demand, or request required or authorized in connection with this Agreement (Notice) shall be deemed properly given if delivered in person or sent by first class mail, postage prepaid, to the person specified below:

If to PG&E: [Contact information to be supplied]

If to Producer: [Contact information to be supplied]

9.2. A Party may change its address for Notices at any time by providing the other Party Notice of the change in accordance with Section 9.1.

9.3. The Parties may also designate operating representatives to conduct the daily communications, which may be necessary or convenient for the administration of this Agreement. Such designations, including names, addresses, and phone numbers may be communicated or revised by one Party's Notice to the other.

10. REVIEW OF RECORDS AND DATA

10.1. PG&E shall have the right to review and obtain copies of Producer's operations and maintenance records, logs, or other information such as, unit availability, maintenance outages, circuit breaker operation requiring manual reset, relay targets and unusual events pertaining to Producer's Generating Facility or Non-Export AC/DC Converter or its interconnection with PG&E's Distribution System.

10.2. Producer authorizes to release to the California Energy Commission (CEC) information regarding Producer's facility, including customer name, location, size, and operational characteristics of the unit, as request6ed from time to time pursuant to the CEC's rules and regulations.

11. ASSIGNMENT

Producer shall not voluntarily assign its rights nor delegate its duties under this Agreement without PG&E's written consent. Any assignment or delegation Producer makes without PG&E's written consent shall not be valid. PG&E shall not unreasonably withhold its consent to Producer's assignment of this Agreement.

12. NON-WAIVER

None of the provisions of this Agreement shall be considered waived by a Party unless such waiver is given in writing. The failure of a Party to insist in any one or more instances upon strict performance of any of the provisions of this Agreement or to take advantage of any of its rights hereunder shall not be construed as a waiver of any such provisions or the relinquishment of any such rights for the future, but the same shall continue and remain in full force and effect.

13. GOVERNING LAW, JURISDICTION OF COMMISSION, INCLUSION OF PG&E's TARIFF SCHEDULES AND RULES

13.1. This Agreement shall be interpreted, governed, and construed under the laws of the State

of California as if executed and to be performed wholly within the State of California without giving effect to choice of law provisions that might apply to the law of a different jurisdiction.

13.2. This Agreement shall, at all times, be subject to such changes or modifications by the Commission as it may from time to time direct in the exercise of its jurisdiction.

13.3. The interconnection and services provided under this Agreement shall at all times be subject to the terms and conditions set forth in the Tariff Schedules and Rules applicable to the electric service provided by, PG&E, which Tariff Schedules and Rules are hereby incorporated into this Agreement by this reference.

13.4. Notwithstanding any other provisions of this Agreement, PG&E shall have the right to unilaterally file with the Commission, pursuant to the Commission's rules and regulations, an application for change in rates, charges, classification, service, tariff or rule or any agreement relating thereto.

13.5. In accordance with PG&E Advice Letter 4941-E-A, the provisions provided for in Rule 21 Section N and covered under this interconnection agreement are being implemented under a pilot approach with a July 1, 2017 through June 30, 2018 reporting period. As such, the provisions may be continued, modified and/or withdrawn as determined by the Commission.

14. AMENDMENT AND MODIFICATION

This Agreement can only be amended or modified in writing, signed by both Parties.

15. ENTIRE AGREEMENT

This Agreement, including any incorporated Tariff Schedules and rules, contains the entire agreement and understanding between the Parties, their agents, and employees as to the subject matter of this Agreement. Each party also represents that in entering into this Agreement, it has not relied on any promise, inducement, representation, warranty, agreement or other statement not set forth in this Agreement or in the incorporated tariff schedules and rules.

16. SIGNATURES

IN WITNESS WHEREOF, the Parties hereto have caused two originals of this Agreement to be executed by their duly authorized representatives. This Agreement is effective as of the last date set forth below.

APPENDIX A
DESCRIPTION OF GENERATING FACILITY
AND SINGLE-LINE DIAGRAM,
(Provided by Producer)

APPENDIX B
RULES “2” AND “21”
(and any other Tariffs pertinent to the situation)
(Provided by PG&E)

(Note: PG&E’s tariffs are included for reference only and shall at all times be subject to such changes or modifications by the Commission as the Commission may, from time to time, direct in the exercise of its jurisdiction.)

APPENDIX C

(Intentionally Left Blank)

APPENDIX D

(If Applicable)

OPERATING REQUIREMENTS FOR ENERGY STORAGE DEVICE(S)

The following Operating Requirement(s) apply to the charging functions of the Generating Facility:

❑ Producer's storage device(s) will not consume power from Distribution Provider's Distribution System at any time.

❑ Producer's storage device(s) will not cause the Host Load to exceed its normal peak demand. Normal peak demand is defined as the highest amount of power required from the Distribution System by Producer's complete facilities without the influence or use of the energy storage device(s).

❑ To avoid upgrades or other technical mitigation items identified in the interconnection process, Producer has chosen the following Generating Facility operating constraint(s):

For the annual period between _____ [Month/Day] and _____ [Month/Day]

And during the hours of _____

The storage device(s) will consume no more than a total of ___ kW from the Distribution System.

This operating constraint voids the need for the following specific mitigation scope:

No other charging function limitation is required for this Generating Facility except the requirements above. Producer will be responsible for the costs of the corresponding upgrades or other technical mitigations if at any time the Producer elects to forego or violates the operating requirement.

Consistent with current load service Rules, Distribution Provider is not required to reserve capacity for load. Producer is responsible to contact the utility for any modification to its equipment or change in operations that may result in increased load demand per Electric Rule 3.C.

If any operating requirement is specified above, Distribution Provider reserves the right to ask for data at the 15-minute interval level at any time to verify that the operating requirement is being met. Distribution Provider will make such request via a written notice no more than once per calendar quarter. Producer must provide such data within 30 Calendar Days of the written request.

If the Generating Facility fails to adhere to the operating requirements at any time, it will be disconnected immediately in accordance with Rule 21 Section D.9 and not reconnected until an approved mitigation (e.g., supervising controls) is in place as determined by Distribution Provider.*

Electric Sample Form No. 79-1193 Sheet 1

Agreement and Customer Authorization Net Energy Metering Interconnection for Solar and/or Wind Electric Generating Facilities of 30 Kilowatts or Less Paired with Energy Storage of 10 Kilowatts or Less

Please Refer to Attached Sample Form

(Continued)

AGREEMENT AND CUSTOMER AUTHORIZATION
Net Energy Metering Interconnection For Solar And/Or Wind Electric Generating Facilities Of 30 Kilowatts Or Less Paired with Energy Storage of 10 Kilowatts Or Less

IMPORTANT NOTES:

- Customers may not operate their Generating Facility while interconnected to the PG&E system until they receive written permission from PG&E.
- City and County of San Francisco ("CCSF") owned generating facilities seeking Schedule NEMCCSF and participants in the Demand Response Programs below are not eligible to participate in NEM.
  - Scheduled Load Reduction Program (SLRP)
  - SmartRate
- Customers who participate in Direct Access and Community Choice Aggregation must contact their Energy Service Provider directly regarding their NEM program.

Part I – Generating Facility Information and Responsible Parties

A. Customer and Generating Facility Information (*as it appears on the PG&E bill):

NEM 30 kilowatts or Less Paired with Energy Storage: ❑ Single Account ❑ Multiple Aggregated Accounts

Note: Net Energy Metering Aggregation (NEMA) is a program that allows customers with multiple meters to use the renewable energy generated at one meter (up to 1MW) to be credited against other meters that are located on parcel(s) that is/are contiguous or adjacent to the parcel that has the renewable generator. Energy Storage system must be 10 kilowatts or less.

Customer Sector (check only one):

❑ Residential
❑ Commercial
❑ Industrial
❑ Non-Profit
❑ Educational
❑ Military
❑ Other Government

Account Holder Name* (Individual or Company) | Electric Service Agreement ID * | Meter Number*

Service Address* | City* | State (CA) | Zip*

Customer Phone Number | Email (if blank, Permission to Operate (PTO) letter will be mailed to mailing address on record)

B. Meter Access Issues (if applicable, check all that apply and provide contact information to request access):

❑ Meter in building or behind locked gate
❑ Unrestrained animal at meter or AC Disconnect Switch
❑ Other: _____

Contact Name to Request Access (if access issues exist) | Contact Phone

C. Authorized Contact Information (required if Customer is authorizing a third party to act on Customer's behalf):

Company Name | Contact Person

Contact Phone Number | Email

Please complete this agreement in its entirety

† Information collected on this form is used in accordance with PG&E's Privacy Policy.
The Privacy Policy is available at pge.com/privacy.

AGREEMENT AND CUSTOMER AUTHORIZATION
Net Energy Metering Interconnection For Solar And/Or Wind Electric Generating Facilities Of 30 Kilowatts Or Less with Energy Storage of 10 Kilowatts Or Less

❑ **By checking this box and signing this Agreement, I (Customer) authorize PG&E to release my PG&E Electric Account information to the Company above limited to kilowatt hour (kWh) usage, operational characteristics, and other information related to my Generating Facility application. Company is also authorized to submit an Interconnection Request and act on my behalf with regard to the interconnection and receive copies of this executed Interconnection Agreement and the Permission to Operate Letter when issued.**

Part II – NEM Generator System Size

A. Interconnection Study and Requirements

This Agreement covers the installed Generating Facility nameplate listed in the associated Interconnection Request.

The interconnection study will use the nameplate to determine if Interconnection Facilities or Distribution or Network Upgrades are required and the responsible party for the associated costs. If upgrades are required, this will increase the time it will take for PG&E to approve your interconnection.

In order for PG&E to approve your system, you will need to provide (1) this signed Agreement, (2) a valid Interconnection Request, and (3) a copy of the final signed jurisdiction approval (building permit) for your project.

NEM systems should be sized with an estimated annual production no larger than 100% of the Customer's total previous 12 months of usage (annual usage) and projected future increase. For customers on a Time-of-Use rate, sizing your system to offset 80%-85% of your average electricity usage could be an effective way to minimize your electricity bill. For customer who are not on a Time-of-Use rate, you might want to size your system larger (90-95% of your annual load), in order to minimize your electricity bill. Of course, individual circumstances may vary. Customers can obtain their usage data by following the instructions on www.pge.com on the page titled "Access, download, or share usage data." System sizing eligibility will be reviewed using the criteria below.

B. Generator System Sizing

Generator System Type: ❐ Solar ❑ Wind ❐ Both

Estimated Annual Production:

- Please complete this section only if installing a new Solar or Wind system or modifying an existing Solar or Wind system. This section is not applicable if only adding energy storage to an existing previously interconnected Solar or Wind system.
- Solar Systems > 5 kW (CEC-AC kW) or any system with wind, size is determined below. Please continue to fill out all of Section B.
- The Solar CEC-AC kW calculated from the Application cannot exceed 5% of the CEC-AC kW listed above

AGREEMENT AND CUSTOMER AUTHORIZATION
Net Energy Metering Interconnection For Solar And/Or Wind Electric Generating Facilities Of 30 Kilowatts Or Less with Energy Storage of 10 Kilowatts Or Less

	(1) Solar CEC-AC rating[A]	_____ (kW) X 1,500[B]	=	_____ (kWh)
AND/OR	(2) Wind Nameplate rating	_____ (kW) X 2,190[C]		_____ (kWh)
	(3) Total Energy Production	(1) + (2)		_____ (kWh)

Estimated Annual Energy Usage:

	(4) Recent annual usage	_____ (kWh) X 1.1	=	_____ (kWh)
OR (If 12 months usage not available)	(5) Building size	_____ (sq ft) X 3.32[D]	=	_____ (kWh)
AND	(6) I plan to increase my annual usage (kWh) by			_____ (kWh)
	(7) Total Energy Usage	(2 or 3) + (4)	=	_____ (kWh)

Net Generation:

	(8) Production - Usage	(3) – (7)	=	_____ (kWh)*

*Positive number indicates that the system is estimated to generate more than the estimated usage. Please refer to Part IV, Section J to read the provisions around Net Surplus Compensation (NSC).

Non-NEM Eligible Energy Storage System:

Energy Storage System Rating _____ kW

Does the energy storage system share an inverter with the NEM system? ☐ Yes ☐ No

If not, please provide:

Energy Storage Inverter Rating _____ kW

Part III – Rate Selection

A. Current Rate: Please identify your existing rate by reviewing your PG&E energy statement or by calling the phone number listed below.

Otherwise Applicable Rate Schedule (OAS) for NEM Account: Select one rate from the category applicable to you. Visit www.pge.com/rateoptions or call (800)-PGE-5000 for rate information.

[A] CEC-AC (kW) =California Energy Commission Alternating Current, refers to the inverter efficiency rating (Quantity of PV Modules x PTC Rating of PV Modules x CEC Inverter Efficiency Rating)/1000

[B] 8,760 hrs/yr x 0.172 solar capacity factor = 1,500

[C] 8,760 hrs/yr x 0.25 wind capacity factor = 2,190

[D] 2 watts/ sq ft x 1/1,000 watts x 8,760 hrs/yr x 0.19 solar capacity factor = 3.32

AGREEMENT AND CUSTOMER AUTHORIZATION
Net Energy Metering Interconnection For Solar And/Or Wind Electric Generating Facilities Of 30 Kilowatts Or Less with Energy Storage of 10 Kilowatts Or Less

Residential Service Rate (Select one):

- ❑ E-1 – Non-Time-of-Use
- ❑ E-6 – Time-of-Use
- ❑ E-7[E] – Time-of-Use
- ❑ E-8[F] – Non-Time-of-Use
- ❑ E-9A[F] – Time-of-Use for Customers with a single meter for Electric Vehicle (EV) recharging station and home
- ❑ E-9B[F] – Time-of-Use for Customers with a separately metered EV recharging station
- ❑ EV-A[F] – Time-of-Use for Customers with a single meter for Electric Vehicle (EV) recharging station and home
- ❑ EV-B[G] – Time-of-Use for Customers with a separately metered EV recharging station
- ❑ Other (_____)

Small and Medium Commercial Service Rate (Select one rate and primary or secondary service voltage):

❑ AG-4 – Time-of-Use	❑	❑	❑	❑	❑	❑
❑ AG-5 – Time of Use	❑	❑	❑	❑	❑	❑
❑ Other (_____)	❑	❑	❑	❑	❑	❑

If your current rate is a closed rate, as identified in Footnote F, and you are now opting to move to a non-closed rate per the Otherwise Applicable Rate Schedule (OAS) for NEM Account, please check the box below acknowledging that you are leaving the closed rate and will not be able to select the closed rate in the future.

❑ I acknowledge and consent to leaving my current rate that is a closed rate

[E] E-7, E-8, E-9A, E-9B, AG-R, and AG-V are closed to all new customers and are only available to Customers that are currently on the rate
[F] Rates effective August 1, 2013 for Customers with Electric Vehicles. Please visit www.pge.com/electricvehicles for more rate information

AGREEMENT AND CUSTOMER AUTHORIZATION
Net Energy Metering Interconnection For Solar And/Or Wind Electric Generating Facilities Of 30 Kilowatts Or Less with Energy Storage of 10 Kilowatts Or Less

Part IV – Interconnection Agreement Provisions

A. Purpose

The purpose of this Net Energy Metering (NEM) Application and Interconnection Agreement for Solar and/or Wind Electric Generating Facilities of 30 Kilowatts or Less (Agreement) is to allow Customer to interconnect with Pacific Gas and Electric Company's (PG&E) Distribution System, subject to the provisions of this Agreement and PG&E's Electric Schedule Net Energy Metering (NEM). Customer has elected to interconnect and operate its solar and/or wind electric Generating Facility in parallel with PG&E's Distribution System to offset part or all of the Customer's own electrical requirements at this service point. Customer shall comply at all times with this Agreement as well as with all applicable laws, tariffs and requirements of the California Public Utilities Commission (CPUC).

B. Applicability

This Agreement applies to Electric Schedule NEM Customer-Generators (Customer) who interconnect a solar and/or wind turbine electrical Generating Facility, or a hybrid system of both, with an aggregate capacity of 30 kilowatts or less that is located on Customer's premises and that operates in parallel with PG&E's Distribution System.

C. NEM Transition

Customers receiving service on the current NEM tariff prior to the date that PG&E reaches its NEM Cap or July 1, 2017, whichever is earlier, are subject to the NEM Transition Provisions outlined in Rate Schedule NEM. Please see Rate Schedule NEM at https://www.pge.com/tariffs/assets/pdf/tariffbook/ELEC_SCHEDS_NEM.pdf for more details.

D. Permission to Operate

Customer may not operate their generator while interconnected to the PG&E system until receiving written permission from PG&E. Unauthorized Parallel Operation could result in injury to persons and/or damage to equipment and/or property for which the Customer may be liable.

E. Safety

Customer shall meet all applicable safety and performance standards established by the National Electrical Code, the Institute of Electrical and Electronics Engineers, accredited testing laboratories such as Underwriters Laboratories and, where applicable, PG&E's Electric Rule 21, and other rules approved by the CPUC regarding safety and reliability. A Customer with a solar or wind-turbine electrical generating system, or a hybrid system of both, that meets those standards and rules shall not be required to install additional controls, perform or pay for additional tests, or purchase additional liability insurance.

F. Safe Operation of your Generating Facility

Notwithstanding any other provision of this Agreement, if at any time PG&E determines that the Customer's Facility, or its operation, may endanger (a) the public, (b) PG&E personnel, or (c) the safe and reliable operation of PG&E's electrical system, PG&E shall have the right to disconnect the Facility from PG&E's system. Customer's Facility shall remain disconnected until such time as PG&E is satisfied that the unsafe condition(s) have been corrected.

G. AC Disconnect Switch

PG&E recommends that a customer installing an inverter-based generator consider also installing an AC Disconnect Switch to facilitate maintenance of the Customer's equipment (i.e. inverter, PV arrays, etc.). If an AC Disconnect Switch is not installed, the revenue meter may be temporarily removed by PG&E due to an emergency or maintenance on PG&E's system to isolate the Customer's generator from the electric distribution system. Removal of the revenue meter will result in loss of electrical service to the Customer's facility or residence. AC Disconnect Switch requirements are available in PG&E's Greenbook www.pge.com/greenbook.

H. Rate

Customer has confirmed their otherwise applicable rate schedule (OAS), establishing how Customer's monthly usage or net generation will be charged/credited when submitting this Agreement. Further Customer-initiated rate changes are governed in accordance with PG&E's Electric Rule 12.

I. NEM Billing

PG&E installs a "net meter" on a customer's property that measures the net energy, defined as the difference between the amount of electricity supplied by the energy service provider and the amount of electricity exported to the grid over the course of a month. The Customer's account is enrolled in the NEM program and put on an annual (12- billing months) true-up cycle.

The meter is read monthly and an amount is calculated based on the net energy recorded in kilowatt hours (kWh). If a customer exported more electricity than they drew from PG&E in a given billing cycle, the amount is deemed a surplus. If a customer received more electricity from PG&E than they exported, the amount is deemed a charge. The rate at which the charge or surplus is calculated is based on the customer's OAS which is requested by the Customer in this Agreement.

After 12 billing cycles, the corresponding charges and surpluses are reconciled in the annual true-up bill. Any remaining charges must be paid and any excess surpluses are typically zeroed out. More information about NEM billing is available at www.pge.com/nembilling.

J. Net Surplus Compensation (NSC)

NSC payments are made to NEM customers who produce more electricity than they use during the Relevant Period. The payment rate is based on a rolling 12-month average of spot market prices and may fluctuate on a monthly basis. The historical range of the NSC rate at the time of this Advice Filing is approximately $0.03 to $0.04. A history of NSC rates is available at www.pge.com/nembilling. If a customer would like to opt out from receiving this payment, please visit https://www.pge.com/tariffs/assets/pdf/tariffbook/ELEC_FORMS_79-1130.pdf. Participants in NEMA, please see provisions in Form 79-1153.

K. Limitation of Liability

PG&E's and Customer's (Individually Party or together Parties) liability to the other Party for any loss, cost, claim, injury, liability, or expense, including reasonable attorney's fees, relating to or arising from any act or omission in its performance of this Agreement, shall be limited to the amount of direct damage actually incurred. In no event shall either Party be liable to the other Party for any indirect, special, consequential, or punitive damages of any kind whatsoever.

L. Governing Law

This Agreement shall be interpreted, governed, and construed under the laws of the State of California as if executed and to be performed wholly within the State of California.

M. Governing Authority

This Agreement shall at all times be subject to such changes or modification by the CPUC as said Commission may, from time to time, direct in the exercise of its jurisdiction.

N. Term of Agreement

This Agreement shall become effective as of the date of PG&E's issuance of the permission to operate letter after receipt of all applicable fees, required documents, and this completed Agreement. This Agreement shall continue in full force and effect until terminated by either Party providing 30-days prior written notice to the other Party, or when a

new Customer takes service with PG&E operating this approved generating facility. This new Customer will be interconnected subject to the terms and conditions as set forth in Schedule NEM.

O. Meter Access

The electric meter must be installed in a safe location easily accessible upon PG&E request.

P. Stale Agreements

If this agreement is still pending one year from the date it is received by PG&E and Customer has not met all of the requirements, PG&E will close this application and Customer will be required to submit a new Agreement and Application should Customer wish to take service on Schedule NEM.

Q. Smart Inverters

For Customer applications received on or after September 9, 2017, the Customer certifies that their inverter-based Generating Facilities fully comply with Section Hh of Rule 21, including configuration of protective settings and default settings, in accordance with the specifications therein.

Distribution Provider may require a field verification of the Customer's inverter. Customer further agrees to cooperate fully with any such request and make their inverter available to the Distribution Provider for such verification. Customer understands that in the event the inverter is not set in accordance with Section Hh of Rule 21, Customer will need to cease operation of generating facility until verification is confirmed by Distribution Provider.

Solar inverter models and firmware versions that comply with Rule 21 Section Hh can be found at http://www.gosolarcalifornia.org/equipment/inverters.php.

Verification of compliance with such requirements shall be provided by the Customer upon request by PG&E in accordance with PG&E's Electric Rule 21.

An "existing inverter" is defined as an inverter that is a component of an existing Generating Facility that meets one or more of the following conditions:

(a) it is already approved by PG&E for interconnection prior to September 9, 2017
(b) the Customer has submitted the interconnection application prior to September 9, 2017,
(c) the Customer provides evidence of having applied for an electrical permit for the Generating Facility installation that is dated prior to September 9, 2017 and submitted a complete interconnection application[1] no later than March 31, 2018, or
(d) the Customer provides evidence of a final inspection clearance from the governmental authority having jurisdiction over the Generating Facility prior to September 9, 2017.

All "existing inverters" are not required to be Smart Inverters and are only subject to Section H of Rule 21. Customer replacing an "existing inverter" certifies it is being replaced with either:

(i) inverter equipment that complies with Section Hh of Rule 21, (encouraged); or
(ii) a conventional inverter that is of the same size and equivalent ability to that of the inverter being replaced, as allowed in Rule 21 Section H.3.d.ii.

[1]A complete application consists all of the following without deficiencies:
1. A completed Interconnection Application including all supporting documents and required payments
2. A completed signed Interconnection Agreement
3. Evidence of the Customer final inspection clearance from the governmental authority having jurisdiction over the generating system.

AGREEMENT AND CUSTOMER AUTHORIZATION
Net Energy Metering Interconnection For Solar And/Or Wind Electric Generating Facilities Of 30 Kilowatts Or Less with Energy Storage of 10 Kilowatts Or Less

R. Signature

IMPORTANT INFORMATION FOR CUSTOMERS – BE SURE TO READ THIS ENTIRE DOCUMENT BEFORE SIGNING – THIS IS A LEGALLY BINDING CONTRACT – READ IT CAREFULLY.

THIS FORM MUST BE SIGNED BY AN EXISTING PG&E CUSTOMER.

Under Pacific Gas and Electric Company's (PG&E's) privacy policies, which can be found at [http://www.pge.com/about/company/privacy/customer], PG&E generally does not sell or disclose personal information about you, such as your name, address, phone number, or electric account and billing information, to third parties unless you expressly authorize us to do so. The purpose of this form is to allow you, the customer, to exercise your right to choose whether to disclose your personal electricity usage data and other personal information to a third party. Once you authorize a third party to access personal information about you, you are responsible for ensuring that the third party safeguards the personal information from further disclosure without your consent.

By signing below, I declare under penalty of perjury under the laws of the State of California that:

1) **The information provided in this Agreement is true and correct.**
2) **By completing the fields and checking the box in Part I Section C, I authorize the identified third party (Company) to receive my information and act on my behalf, which includes submitting or revising my Interconnection Application.**
3) **I have completed and reviewed Part II to determine if my system is sized to meet no more than my projected energy usage.**
4) **I have read in its entirety and agree to all the terms and conditions in this Interconnection Agreement and agree to comply with PG&E's Electric Rule 21.**

_____
(Print Customer Name as it appears on the PG&E Bill)

_____
(Signature)

_____
(Print name and title of signee, applicable if customer is a Company)
(e.g. John Doe, Manager)

_____
(Date)

Note: PG&E will accept electronic signatures that are verified by qualified Third Parties such as, Adobe EchoSign, e-SignLive, and DocuSign for this Agreement if the Agreement is completed in its entirety before signing.

To confirm project approval, the Customer should retain a copy of this signed agreement and a copy of the Permission to Operate (PTO) letter from PG&E authorizing the Customer to operate the Generating Facility after PG&E deems satisfactory compliance with all NEM requirements.

A. Customer and Generating Facility Information (*as it appears on the PG&E bill):

Standard NEM2 Agreement Type: ❑ Single Account ❑ Multiple Aggregated Accounts

Note: Net Energy Metering Aggregation 2 (NEM2A) is a program that allows customers with multiple meters to use the renewable energy generated at one meter to be credited against other meters that are located on parcel(s) that is/are contiguous or adjacent to the parcel that has the renewable generator.

Customer Sector (check only one):
❑ Residential ❑ Educational
❑ Commercial ❑ Military
❑ Industrial ❑ Other Government
❑ Non-Profit

Account Holder Name* (Individual or Company) | Electric Service Agreement ID * | Meter Number*

Service Address* | City* | CA | State | Zip*

Customer Phone Number | Email (if blank, Permission to Operate (PTO) letter will be mailed to mailing address on record)

Is there an electric vehicle charging on site at the above service address? ❑ Yes ❑ No
If yes, please indicate how many electric vehicles _____

B. Meter Access Issues (if applicable, check all that apply and provide contact information to request access):

❑ Meter in building or behind locked gate ❑ Unrestrained animal at meter or AC Disconnect Switch ❑ Other: _____

Contact Name to Request Access (if access issues exist) | Contact Phone

Please complete this agreement in its entirety

† Information collected on this form is used in accordance with PG&E's Privacy Policy. The Privacy Policy is available at pge.com/privacy.

AGREEMENT AND CUSTOMER AUTHORIZATION
Net Energy Metering (NEM2) Interconnection For Solar And/Or Wind Electric Generating Facilities Of 30 Kilowatts Or Less with Energy Storage of 10 Kilowatts Or Less

C. Authorized Contact Information (required if Customer is authorizing a third party to act on Customer's behalf):

Company Name	Contact Person
Contact Phone Number	Email

❑ **By checking this box and signing this Agreement, I (Customer) authorize PG&E to release my PG&E Electric Account information to the Company above limited to kilowatt hour (kWh) usage, operational characteristics, and other information related to my Generating Facility application. Company is also authorized to submit an Interconnection Request and act on my behalf with regard to the interconnection and receive copies of this executed Interconnection Agreement and the Permission to Operate Letter when issued.**

Part II – NEM2 Generator System Size

A. Interconnection Study and Requirements

This Agreement covers the installed Generating Facility nameplate listed in the associated Interconnection Request.

The interconnection study will use the nameplate to determine if Interconnection Facilities or Distribution or Network Upgrades are required and the responsible party for the associated costs. If upgrades are required, this will increase the time it will take for PG&E to approve your interconnection.

In order for PG&E to approve your system, you will need to provide (1) this signed Agreement, (2) **a valid Interconnection Request**, and (3) a copy of the final signed jurisdiction approval (building permit) for your project.

NEM2 systems should be sized with an estimated annual production no larger than 100% of the Customer's total previous 12 months of usage (annual usage) and projected future increase. All NEM2 customers must take service on a Time-of-Use rate schedule and sizing your system to offset 80%-85% of your average electricity usage could be an effective way to minimize your electricity bill[A]. Of course, individual circumstances may vary. Customers can obtain their usage data by following the instructions on www.pge.com on the page titled "Access, download, or share usage data."

[A] Customers on rate schedules such as ET, ES, and ESR, which do not have a corresponding TOU Rate, are not required to switch to TOU rates, unless and until such a rate becomes available.

AGREEMENT AND CUSTOMER AUTHORIZATION
Net Energy Metering (NEM2) Interconnection For Solar And/Or Wind Electric Generating Facilities Of 30 Kilowatts Or Less with Energy Storage of 10 Kilowatts Or Less

B. Generator System Sizing

Please complete this section only if installing a new Solar or Wind system or modifying an existing Solar or Wind system. This section is not applicable if only adding energy storage to an existing previously interconnected Solar or Wind system.

Generator System Type: ❑ Solar ❑ Wind ❑ Both

	(1) Solar CEC-AC rating[B]	_____ (kW) X 1,500[C]	=	_____ (kWh)
AND/OR	(2) Wind Nameplate rating	_____ (kW) X 2,190[D]		_____ (kWh)
	(3) Total Energy Production	(1) + (2)		_____ (kWh)

Estimated Annual Energy Usage:
(Solar systems ≤ 5 kW (CEC-AC) do not need to complete this section)

	(4) Recent annual usage	_____ (kWh) X 1.1	=	_____ (kWh)
OR (If 12 months usage not available)	(5) Building size	_____ (sq ft) X 3.32[E]	=	_____ (kWh)
AND	(6) I plan to increase my annual usage (kWh) by			_____ (kWh)
	(7) Total Energy Usage	(4 or 5) + (6)	=	_____ (kWh)

Net Generation:

	(8) Production – Usage	(3) – (7)	=	_____ (kWh)*

*Positive number indicates that the system is estimated to generate more than the estimated usage. Please refer to Part IV, Section H to read the provisions around Net Surplus Compensation (NSC).

[B] CEC-AC (kW) =California Energy Commission Alternating Current, refers to the inverter efficiency rating (Quantity of PV Modules x PTC Rating of PV Modules x CEC Inverter Efficiency Rating)/1000
[C] 8,760 hrs/yr x 0.172 solar capacity factor = 1,500
[D] 8,760 hrs/yr x 0.25 wind capacity factor = 2,190
[E] 2 watts/ sq ft x 1/1,000 watts x 8,760 hrs/yr x 0.19 solar capacity factor = 3.32

AGREEMENT AND CUSTOMER AUTHORIZATION
Net Energy Metering (NEM2) Interconnection For Solar And/Or Wind Electric Generating Facilities Of 30 Kilowatts Or Less with Energy Storage of 10 Kilowatts Or Less

Non-NEM Eligible Energy Storage System:

Energy Storage Rating _____ kW

Does the energy storage system share an inverter with the NEM system? ☐ Yes ☐ No

If not, please provide:

Energy Storage Inverter Rating _____ kW

Part III – Rate Selection

A. Current Rate: Please identify your existing rate by reviewing your PG&E energy statement or by calling the phone number listed below.

Otherwise Applicable Rate Schedule (OAS) for NEM2 Account: Select one rate from the category applicable to you. NEM2 residential customers must be an applicable time-of-use rate[F] schedule. If you are currently on a rate that is no longer open to new customers and are opting to move to a different rate, by signing this Agreement and Customer Authorization you are acknowledging that you are leaving the current rate and will not be able to return to this rate in the future. Visit www.pge.com/rateoptions or call (800)-PGE-5000 for rate information.

☐ Stay on existing rate

☐ Requested new rate _____

Part IV – Interconnection Agreement Provisions

A. Applicability

This Agreement applies to Electric Schedule NEM2 Customer-Generators (Customer) who interconnect a solar and/or wind turbine electric Generating Facility, or a hybrid system of both, with an aggregate capacity of 30 kilowatts or less that is located on Customer's premises and that operates in parallel with PG&E's Distribution System.

B. Permission to Operate

Customer may not operate their generator while interconnected to the PG&E system until receiving written permission from PG&E. Unauthorized Parallel Operation could result in injury to persons and/or damage to equipment and/or property for which the Customer may be liable.

C. Safety

Customer shall meet all applicable safety and performance standards established by the National Electrical Code, the Institute of Electrical and Electronics Engineers, accredited testing laboratories such as Underwriters Laboratories and,

[F] Schedules such as ES, ESR or ET, which have no available corresponding time-of-use rate, are not required to switch to time-of-use rates, unless and until such a rate becomes available.

where applicable, PG&E's Electric Rule 21, and other rules approved by the CPUC regarding safety and reliability. A Customer with a solar or wind-turbine electric generating system, or a hybrid system of both, that meets

those standards and rules shall not be required to install additional controls, perform or pay for additional tests, or purchase additional liability insurance.

D. Safe Operation of your Generating Facility

Notwithstanding any other provision of this Agreement, if at any time PG&E determines that the Customer's Facility, or its operation, may endanger (a) the public, (b) PG&E personnel, or (c) the safe and reliable operation of PG&E's electric system, PG&E shall have the right to disconnect the Facility from PG&E's system. Customer's Facility shall remain disconnected until such time as PG&E is satisfied that the unsafe condition(s) have been corrected.

E. AC Disconnect Switch

PG&E recommends that a customer installing an inverter-based generator consider also installing an AC Disconnect Switch to facilitate maintenance of the Customer's equipment (i.e. inverter, PV arrays, etc.). If an AC Disconnect Switch is not installed, the revenue meter may be temporarily removed by PG&E due to an emergency or maintenance on PG&E's system to isolate the Customer's generator from the electric distribution system. Removal of the revenue meter will result in loss of electrical service to the Customer's facility or residence. AC Disconnect Switch requirements are available in PG&E's Greenbook www.pge.com/greenbook.

F. Rate

Customer has confirmed their otherwise applicable rate schedule (OAS) to establish how the Customer's monthly usage or net generation will be charged/credited when submitting this Agreement. Further Customer-initiated rate changes are governed in accordance with PG&E's Electric Rule 12.

G. NEM2 Billing

The Customer's meter separately measures exports and imports.

The meter is read monthly and an amount is calculated based on the net energy (kWh) and total energy(kWh) exports recorded in kilowatt hours (kWh). If a customer exported more electricity than they drew from the energy supplier in a given billing cycle, the amount is deemed a surplus. If a customer received more electricity from the energy supplier than they exported, the amount is deemed a charge. The rate at which the charge or surplus is calculated is based on the customer's OAS which is requested by the Customer in this Agreement.

Additionally, the Customer will be billed for non-bypassable charges on all imports from the grid, as describe in Schedule NEM2 Special Condition 2.

After 12 billing cycles, the corresponding charges and surpluses are reconciled in the annual true-up bill. Any remaining charges must be paid and any excess surpluses are typically zeroed out. More information about NEM2 billing is available at www.pge.com/nembilling.

H. Net Surplus Compensation (NSC)

NSC payments are made to NEM2 customers who produce more electricity than they use during the Relevant Period. The payment rate is based on a rolling 12-month average of spot market prices and may fluctuate on a monthly basis. The historical range of the NSC rate at the time of this Advice Filing is approximately $0.03 to $0.04. A history of NSC rates is available at www.pge.com/nembilling. If a customer would like to opt out from receiving this payment, please visit https://www.pge.com/tariffs/assets/pdf/tariffbook/ELEC_FORMS_79-1130.pdf. Participants in NEM2A, please see provisions in *NEM2 Load Aggregation Appendix (Form 79-1153)*.

I. Limitation of Liability

PG&E's and Customer's (Individually Party or together Parties) liability to the other Party for any loss, cost, claim, injury, liability, or expense, including reasonable attorney's fees, relating to or arising from any act or omission in its performance of this Agreement, shall be limited to the amount of direct damage actually incurred. In no event shall either Party be liable to the other Party for any indirect, special, consequential, or punitive damages of any kind whatsoever.

J. Governing Law

This Agreement shall be interpreted, governed, and construed under the laws of the State of California as if executed and to be performed wholly within the State of California.

K. Governing Authority

This Agreement shall at all times be subject to such changes or modification by the CPUC as said Commission may, from time to time, direct in the exercise of its jurisdiction.

L. Term of Agreement

This Agreement shall become effective as of the date of PG&E's issuance of the permission to operate letter after receipt of all applicable fees, required documents, and this completed Agreement. This Agreement shall continue in full force and effect until terminated by either Party providing 30-days prior written notice to the other Party, or when a new Customer takes service with PG&E operating this approved generating facility. This new Customer will be interconnected subject to the terms and conditions as set forth in Schedule NEM2.

M. Meter Access

The electric meter must be installed in a safe location easily accessible upon PG&E request.

N. Stale Agreements

If this agreement is still pending one year from the date it is received by PG&E and Customer has not met all of the requirements, PG&E will close this application and Customer will be required to submit a new Agreement and Application should Customer wish to take service on Schedule NEM2.

O. CEC Listed

In order to promote the safety and reliability of the customer's Generating Facility, the applicant certifies that as a part its request for NEM2, that all major solar system components are on the verified equipment list maintained by the California Energy Commission and certifies that other equipment, as determined by PG&E, has safety certification from a nationally recognized testing laboratory.

P. Warranties or Service Agreements

Applicant certifies as a part of its interconnection request for NEM2 that:

(i) a warranty of at least 10 years has been provided on all equipment and on its installation, or

(ii) a 10-year service warranty or executed "agreement" has been provided ensuring proper maintenance and continued system performance.

Q. Smart Inverters

For Customer applications received on or after September 9, 2017, the Customer certifies that their inverter-based Generating Facilities fully comply with Section Hh of Rule 21, including configuration of protective settings and default settings, in accordance with the specifications therein.

Distribution Provider may require a field verification of the Customer's inverter. Customer further agrees to cooperate fully with any such request and make their inverter available to the Distribution Provider for such verification. Customer understands that in the event the inverter is not set in accordance with Section Hh of Rule 21, Customer will need to cease operation of generating facility until verification is confirmed by Distribution Provider.

Solar inverter models and firmware versions that comply with Rule 21 Section Hh can be found at http://www.gosolarcalifornia.org/equipment/inverters.php.

Verification of compliance with such requirements shall be provided by the Customer upon request by PG&E in accordance with PG&E's Electric Rule 21.

An "existing inverter" is defined as an inverter that is a component of an existing Generating Facility that meets one or more of the following conditions:

(a) it is already approved by PG&E for interconnection prior to September 9, 2017

(b) the Customer has submitted the interconnection application prior to September 9, 2017,

(c) the Customer provides evidence of having applied for an electrical permit for the Generating Facility installation that is dated prior to September 9, 2017 and submitted a complete interconnection application[1] no later than March 31, 2018, or

(d) the Customer provides evidence of a final inspection clearance from the governmental authority having jurisdiction over the Generating Facility prior to September 9, 2017.

All "existing inverters" are not required to be Smart Inverters and are only subject to Section H of Rule 21. A Customer replacing an "existing inverter" certifies it is being replaced with either:

(i) inverter equipment that complies with Section Hh of Rule 21, (encouraged); or

a conventional inverter that is of the same size and equivalent ability to that of the inverter being replaced, as allowed in Rule 21 Section H.3.d.ii.

[1]A complete application consists all of the following without deficiencies:
1. A completed Interconnection Application including all supporting documents and required payments
2. A completed signed Interconnection Agreement
3. Evidence of the Customer final inspection clearance from the governmental authority having jurisdiction over the generating system.

AGREEMENT AND CUSTOMER AUTHORIZATION
Net Energy Metering (NEM2) Interconnection For Solar And/Or Wind Electric Generating Facilities Of 30 Kilowatts Or Less with Energy Storage of 10 Kilowatts Or Less

IMPORTANT INFORMATION FOR CUSTOMERS – BE SURE TO READ THE FULLY POPULATED DOCUMENT BEFORE SIGNING – THIS IS A LEGALLY BINDING CONTRACT – READ IT CAREFULLY.THIS FORM MUST BE SIGNED BY THE EXISTING PG&E CUSTOMER LISTED IN PART I.

Under Pacific Gas and Electric Company's (PG&E's) privacy policies, which can be found at [http://www.pge.com/about/company/privacy/customer], PG&E generally does not sell or disclose personal information about you, such as your name, address, phone number, or electric account and billing information, to third parties unless you expressly authorize us to do so. The purpose of this form is to allow you, the customer, to exercise your right to choose whether to disclose your personal electricity usage data and other personal information to a third party. Once you authorize a third party to access personal information about you, you are responsible for ensuring that the third party safeguards the personal information from further disclosure without your consent.

By signing below, I declare under penalty of perjury under the laws of the State of California that:

1) **The information provided in this Agreement is true and correct.**
2) **By completing the fields and checking the box in Part I Section C, I authorize the identified third party (Company) to receive my information and act on my behalf, which includes submitting or revising my Interconnection Application.**
3) **I have completed and reviewed Part II to determine if my system is sized to meet no more than my projected energy usage.**
4) **I have read in its entirety and agree to all the terms and conditions in this Interconnection Agreement and agree to comply with PG&E's Electric Rule 21.**

_____
(Print Customer Name as it appears on the PG&E Bill)

_____
(Signature)

_____
(Print name and title of signee, applicable if customer is a Company)
(e.g. John Doe, Manager)

_____
(Date)

Note: PG&E can request additional documentation to verify the authenticity of the externally signed Agreement and Customer Authorization.

To confirm project approval, the Customer should retain a copy of this signed agreement and a copy of the Permission to Operate (PTO) letter from PG&E authorizing the Customer to operate the Generating Facility after PG&E deems satisfactory compliance with all NEM2 requirements.

Electric Sample Form No. 79-1194 Sheet 1
Local Agency And District Customers On-Bill Financing Loan Agreement

Please Refer to Attached Sample Form

(Continued)

LOCAL AGENCY AND DISTRICT CUSTOMERS ON-BILL FINANCING LOAN AGREEMENT

The undersigned Local Agency or District customer ("**Customer**") has contracted for the provision of energy efficiency/demand response equipment and services (the "**Work**") which qualify for one or more of PG&E's applicable rebate or incentive programs. Subject to the conditions (including the process for Adjustment and preconditions to funding) set forth below, Pacific Gas & Electric Company (**"PG&E"**) shall extend a loan (the "**Loan**") to Customer in the amount of the loan balance (the "**Loan Balance**") pursuant to the terms of this On-Bill Financing Loan Agreement ("**Loan Agreement**") and PG&E's rate schedules E-OBF and/or G-OBF, as applicable (the "**Schedule**").

To request the Loan, Customer has submitted a completed On-Bill Financing Application and associated documentation as required by PG&E (the "**Application**"). Collectively the Application and this Loan Agreement (including any Adjustment hereunder) comprise the "Agreement".

1. Customer shall arrange for its Contractor, as identified at the end of this Agreement ("**Contractor**"), to provide the Work as described in the Application.

2. The estimated Loan Balance is set forth below. The total cost of the Work as installed, rebate/incentive for qualifying energy efficiency measures, Loan Balance, monthly payment, and loan term specified in this Loan Agreement may be adjusted, if necessary, after the Work and the post-installation inspection described in the Application and/or herein are completed (the "**Adjustment**"). The Adjustment will be calculated using the actual total cost of the Work, as installed, and the estimated energy savings (as described in the Application) of such Work. In no event will the Loan Balance be increased without Customer's written consent, even if Customer is eligible for such increased Loan Balance. Moreover, in no event will the Loan Balance exceed the maximum loan amount stipulated in the Application. Customer understands that in order to be eligible for the Loan, the initial Loan Balance for Work may not fall below the minimum loan amount, nor may the payback period exceed the maximum payback period. **Accordingly, if after the Adjustment, the Loan Balance falls below the minimum loan amount or if the simple payback period exceeds the program maximum payback period, each as described in the Application, PG&E shall have no obligation to extend the Loan, as the Work would not meet program requirements.** The Adjustment described in this paragraph will be communicated to the Customer in writing and will automatically become part of this Loan Agreement, except that any proposed increase in the Loan Balance will only become part of this Loan Agreement upon Customer's written consent to such increase.

3. **PG&E shall have no liability in connection with, and makes no warranties, expressed or implied, regarding the Work.** The Parties acknowledge and agree that PG&E is only providing the Local Agency or District cited here with financing. The Customer has independently hired contractors ("Local Agency or District Contractors") to perform the work on behalf of the Customer to qualify for financing. The Customer acknowledges and agrees that the Local Agency or District Contractors are not third party beneficiaries to this agreement between the Customer and PG&E. To the extent authorized by law and subject to appropriation of the Legislature, the Customer agrees that it will look only to Local Agency or District Contractors for any claims related to the installed equipment or its performance and that PG&E shall have no responsibility or liability, except for the payment of the loan proceeds, and the Customer shall indemnify PG&E for any claims made by the Local Agency or District Contractors against PG&E.

4. Customer represents and warrants that (a) Customer is receiving this Loan solely for Work obtained in connection with Customer's business, and not for personal, family or household purposes; (b) Customer, if not an individual or a government agency, is duly organized, validly existing and in good standing under the laws of its state of formation, and has full power and authority to enter into this Agreement and to carry out the provisions of this Agreement. Customer is duly qualified and in good standing to do business in all jurisdictions where such qualification is required; (c) this Loan Agreement has been duly authorized by all necessary proceedings, has been duly executed and delivered by Customer and is a valid and legally binding agreement of Customer duly enforceable in accordance with its terms; (d) no consent, approval, authorization, order, registration or qualification of or with any court or regulatory authority or other governmental body having jurisdiction over Customer is required for, and the absence of which would adversely affect, the legal and valid execution and delivery of this Loan Agreement, and the performance of the transactions contemplated by this Loan Agreement; (e) the execution and delivery of this Loan Agreement by Customer hereunder and the compliance by Customer with all provisions of this Loan Agreement: (i) will not conflict with or violate any Applicable Law; and (ii) will not conflict with or result in a breach of or default under any of the terms or provisions of any loan agreement or other contract or agreement under which Customer is an obligor or by which its property is bound; and (f) all factual information furnished by Customer to PG&E in the Application and pursuant to this Agreement is true and accurate.

5. The Application must include the Federal Tax Identification Number or Social Security Number of the party who will be the recipient of the checks for the rebate/incentive or any Loan proceeds. Checks may be issued directly to the Customer or its designated Contractor or both, for the benefit of the Customer, as specified below. Customer acknowledges that PG&E will not be responsible for any tax liability imposed on the Customer or its contractor in connection with the transactions contemplated under the Agreement, whether by virtue of the Loan contemplated under the Agreement, or otherwise, and Customer shall indemnify PG&E for any tax liability imposed upon PG&E as a result of the transactions contemplated under the Agreement.

6. Upon completion of the Work, Customer shall send a written confirmation of completion to PG&E's On-Bill Financing Program Administrator at the address listed in Section 15. Within 60 days after receiving the confirmation, PG&E (a) will conduct a post installation inspection and project verification, including review of invoices, receipts and other documents as required by PG&E to verify the correctness of any amounts claimed by Customer; and (b) will adjust, if necessary, the total cost, incentive, Loan Balance, monthly payment, and loan term as stated above. Customer shall give PG&E reasonable access to its premises and the Work. If the Work conforms to all requirements of the Agreement and all amounts claimed by Customer as Work costs are substantiated to PG&E's reasonable satisfaction, PG&E will issue a check ("**Check**") to Customer or Contractor (as designated by Customer in Section 15) for all amounts PG&E approves for payment in accordance with the Agreement. The date of such issuance is the "**Issuance Date**". If the Check is issued to Customer, Customer shall be responsible for paying any outstanding fees due to Contractor for the Work. If the Check is less than the amount due from Customer to Contractor, Customer shall be responsible for the excess due to the Contractor.

7. Customer shall repay the Loan Balance to PG&E as provided in this Loan Agreement irrespective of whether or when the Work is completed, or whether the Work is in any way defective or deficient, and whether or not the Work delivers energy efficiency savings to Customer.

8. The monthly payments will be included by PG&E on the Account's regular energy service bills, or by separate bill, in PG&E's discretion. Regardless whether the monthly payments are included in the regular utility bill or a separate loan installment bill, the following repayment terms will apply:

    a. The Customer agrees to repay to PG&E the Loan Balance in the number of payments listed below and in equal installments (with the final installment adjusted to account for rounding), by the due date set forth in each PG&E utility bill or loan installment bill rendered in connection with Customer's account (identified by the number set forth below) ("Account"), commencing with the bill which has a due date falling at least 30 days after the Issuance Date.

    b. If separate energy service bills and loan installment bills are provided, amounts due under this Loan Agreement as shown in the loan installment bill shall be deemed to be amounts due under each energy services bill to the Account, and a default under this Loan Agreement shall be treated as a default under the Account.

    c. If the Customer is unable to make a full utility bill payment in a given month, payment arrangements may be made at PG&E's discretion.

    d. Any partial bill payments received for a month will be applied in equal proportion to the energy charges and the loan obligation for that month, and the Customer may be considered in default of both the energy bill and the loan installment bill.

    e. Further payment details are set forth below.

9. Any notice from PG&E to Customer regarding the Program or the transactions contemplated under the Loan Agreement may be provided within a PG&E utility bill or loan installment bill, and any such notices may also be provided to Customer at the address below or to the Customer's billing address of record in PG&E's customer billing system from time to time, and in each case shall be effective five (5) days after they have been mailed.

10. The Loan Balance shall not bear interest.

11. Customer may, without prepayment penalty, pay the entire outstanding loan balance in one lump sum payment provided the Customer first notifies PG&E by telephoning the toll free phone number (1-800-468-4743), and by sending written notice to PG&E On-Bill Financing Program Administrator at the address listed below, in advance of making the lump sum payment. Accelerated payments that are received from Customer without PG&E's prior approval may, at PG&E's sole discretion, be applied proportionally to subsequent energy charges and Loan repayments and PG&E shall have no obligation to apply accelerated payments exclusively to reduction of the outstanding Loan.

12. The entire outstanding Loan Balance will become immediately due and payable, and shall be paid by Customer within 30 days if: (i) the Account is closed or terminated for any reason; (ii) Customer defaults under the Agreement; (iii) Customer sells the equipment forming part of the Work to any third party; or (iv) Customer becomes Insolvent. Customer becomes "Insolvent" if: (i) Customer is unable to pay its debts as they become due or otherwise becomes insolvent, makes a general assignment for the benefit of its creditors, or suffers or permits the appointment of a receiver for its business or assets or otherwise ceases to conduct business in the normal course; or (ii) any proceeding is commenced by or against Customer under any bankruptcy or insolvency law that is not dismissed or stayed within 45 days.

13. Customer understands that without limiting any other remedy available to PG&E against Contractor or Customer, **failure to repay the Loan Balance in accordance with the terms of the Agreement could result in shut-off of utility energy service, adverse credit reporting, and collection procedures, including, without limitation, legal action**.

14. If there is any conflict among the documents comprising the Agreement, the following order of priority shall apply: 1. this Loan Agreement; 2. the Application; 3. any documents attached to the Application.

15. LOCAL AGENCY OR DISTRICT REQUIREMENT

    a. All Payment Obligations Subject to Appropriation

    The Customer acknowledges that the cost incurred pursuant to this Loan Agreement will be part of the monthly bill for electricity use. All payment obligations and the Work replacement obligations of the Customer under this Loan Agreement or any related agreement or application is subject to appropriation by the Legislative body belonging to the Local Agency or District cited in this loan agreement.

    b. No Lien or Encumbrance; Subordination:

    (1) Notwithstanding any other provision in this Loan Agreement – , PG&E acknowledges that nothing in this Loan Agreement shall constitute a mortgage, charge, assignment, transfer, pledge, lien or encumbrance upon either the Work or any part of the buildings, structures or related facilities in which the Work is constructed, installed or situated (collectively, the "Related Facilities"). Accordingly, PG&E agrees it will not record or file any instrument that would indicate or imply it has a security interest in the Related Facilities, including but not limited to a UCC-1.

    (2) In addition to the preceding paragraph (a), if this Loan Agreement were ever construed or deemed to create any such encumbrance, then: (i) this Loan Agreement shall be junior and subordinate and subject in all respects to the terms and conditions of any and all leases, and indentures related to lease revenue bonds issued by the Local Agency or District cited here or any other issuer of bonds on behalf of the Local Agency or District concerning the Related Facilities entered into in the past, the present or the future (the "Senior Security Documents"); and (ii) any term or condition of this Loan Agreement relating to any right, title or interest in the Related Facilities or other benefits derived there from shall be in all respects junior and subordinate to, and subject to the terms of, the Senior Security Documents.

16. Loan Particulars

This table is to be completed by PG&E

LOCAL AGENCY AND DISTRICT CUSTOMERS ON-BILL FINANCING LOAN AGREEMENT

Total Cost	Incentive	Customer Contribution (if applicable)	Loan Balance [1]	Monthly Payment	Term [2] (months)	Number of Payments
$	$	$	$	$		

Check Made Payable to Contractor□ or Customer □ *[customer to select payment method. Note that only one check can be issued]*

[1] The Loan Balance shall not exceed two-hundred fifty thousand dollars ($250,000) except where, in PG&E's sole opinion, the opportunity for uniquely large energy savings exist, in which case the Loan Balance may exceed two-hundred fifty thousand dollars ($250,000) but shall not exceed four million dollars ($4,000,000).

[2] The loan term in months will be established by PG&E at the time of the OBF Loan Agreement initiation. The maximum loan term shall be one hundred and twenty (120) months.

17. This agreement at all times shall be subject to such modifications as the California Public Utilities Commission may direct from time to time in the exercise of its jurisdiction.

Eligible Low Income Development Virtual Net Energy Metering (NEMVMASH) Interconnection Agreement for Multifamily Affordable Housing with Solar Generation Totaling 1 MW or Less

Please Refer to Attached Sample Form

(Continued)

ELIGIBLE LOW INCOME DEVELOPMENT VIRTUAL NET ENERGY METERING (NEMVMASH) INTERCONNECTION AGREEMENT FOR MULTIFAMILY AFFORDABLE HOUSING WITH SOLAR GENERATION TOTALING 1 MW OR LESS

This *Eligible Low Income Development Virtual Net Energy Metering (NEMVMASH) Interconnection Agreement for Multifamily Affordable Housing with Solar Generation Totaling 1 MW or Less*, (Agreement) is entered into by and between _____ (Customer-Generator), and Pacific Gas and Electric Company (PG&E), a California Corporation. Customer-Generator and PG&E are sometimes also referred to in this Agreement jointly as "Parties" or individually as "Party." In consideration of the mutual promises and obligations stated in this Agreement and its attachments, the Parties agree as follows:

1. SCOPE AND PURPOSE

This Agreement provides for Customer-Generator to interconnect and operate solar electric generation for the Customer-Generator or designated agent of the Customer-Generator sized no larger than for the energy requirements of all eligible Benefitting Accounts (as defined in Schedule NEMVMASH) but with a maximum total size of no larger than one MW or 1,000 kW (Renewable Electric Generation Facility) that is located at a Single Delivery Point[1] with other individually metered PG&E Benefitting Accounts the will be allocated the benefits of the Renewable Electric Generation Facility as described in NEMV, that meets all the applicability requirements in Schedule NEMV, and that operates in parallel with Pacific Gas and Electric Company's (PG&E) Distribution System

The purpose of this Agreement is to allow the Customer-Generator to interconnect solar electric generation with PG&E's Electric System, subject to the provisions of this Agreement and PG&E's Rate Schedule NEMVMASH. Customer-Generator has elected to interconnect and operate its solar electric Generation in parallel with PG&E's Electric System, to offset part or all of the Eligible Low Income Development's own electrical requirements at the affiliated service points. Customer-Generator shall comply at all times with this Agreement as well as with all applicable laws, tariffs and applicable requirements of the Public Utilities Commission of the State of California.

2. SUMMARY AND DESCRIPTION OF CUSTOMER-GENERATOR'S GENERATING FACILITY AND DESIGNATION OF OTHERWISE-APPLICABLE RATE SCHEDULE

2.1 A description of the Generating Facility, including a summary of its significant components and a single-line diagram showing the general arrangement of how Customer-Generator's Generating Facility and loads are interconnected with PG&E's Electric System, is attached to and made a part of this Agreement. (This description is supplied by Customer-Generator as Appendix A).

2.2 Generating Facility identification number: _____ (Assigned by PG&E).

2.3 Customer-Generator's electric service agreement ID number: _____ (Assigned by PG&E).

2.4 Name and address used by PG&E to locate the electric service agreement ID number used to interconnect the Generating Facility with PG&E's Electric System:

Name: _____

Address: _____

City/Zip Code: _____

[1] Customer-owned line extensions that deliver power to other meters on the same property are not considered separate SDPs.

† Information collected on this form is used in accordance with PG&E's Privacy Policy. The Privacy Policy is available at pge.com/privacy.

2.5 The Generating Facility's expected date of Initial Operation is _____.
The expected date of Initial Operation shall be within two years of the date of this Agreement.

3. DOCUMENTS INCLUDED AND DEFINED TERMS

3.1 This Agreement includes the following exhibits that are specifically incorporated herein and made a part of this Agreement.

Appendix A Description of Generating Facility and Single-Line Diagram (Supplied by Customer-Generator).

Appendix B A Copy of *PG&E's Agreement for Installation or Allocation of Special Facilities* (Forms 79-255, 79-280, 79-702) or *Agreements to Perform Any Tariff Related Work (62-4527*), if applicable (Formed by the Parties).

Appendix C NEMV, NEM2V, NEMVMASH or NEM2VMSH Storage (if applicable)

In addition, PG&E Electric Tariff Rules and Rates, including but not limited to Electric Rules 2, 14, 15, 16, and 21, Schedule NEMVMASH, and Customer-Generator's otherwise-applicable rate schedule, available at PG&E's website at www.pge.com or by request, are specifically incorporated herein and made part of this Agreement.

3.2 When initially capitalized, whether in the singular or in the plural, the terms used herein shall have the meanings assigned to them either in this Agreement or in PG&E's Electric Rule 21, Section C.

4. TERM AND TERMINATION

4.1 This Agreement shall become effective as of the last date entered in Section 17 below. The Agreement shall continue in full force and effect until the earliest date that one of the following events occurs:

(a) The Parties agree in writing to terminate the Agreement.

(b) Unless otherwise agreed in writing by the Parties, at 12:01 A.M. on the day following the date the electric service agreement ID number through which Customer-Generator's Generating Facility is interconnected to PG&E is closed or terminated.

(c) At 12:01 A.M. on the 61st day after Customer-Generator or PG&E provides written Notice pursuant to Section 10 below to the other Party of Customer-Generator's or PG&E's intent to terminate this Agreement.

4.2 Customer-Generator may elect to terminate this Agreement pursuant to the terms of Section 4.1(c) for any reason. PG&E may elect to terminate this Agreement pursuant to the terms of Section 4.1(c) for one or more of the following reasons:

(a) A change in applicable rules, tariffs, or regulations, as approved or directed by the Commission, or a change in any local, state or federal law, statute or regulation, either of which materially alters or otherwise affects PG&E's ability or obligation to perform PG&E's duties under this Agreement; or,

(b) Customer-Generator fails to take all corrective actions specified in PG&E's Notice that Customer-Generator's Generating Facility is out of compliance with the terms of this Agreement within the time frame set forth in such Notice; or,

(c) Customer-Generator abandons the Generating Facility. PG&E shall deem the Generating Facility to be abandoned if PG&E determines, in its sole opinion, the Generating Facility is nonoperational and Customer-Generator does not provide a substantive response to PG&E Notice of its intent to terminate this Agreement as a result of Customer-Generator's apparent abandonment of the Generating Facility affirming Customer-Generator's intent and ability to continue to operate the Generating Facility; or,

(d) Customer-Generator's Generating Facility ceases to meet all applicable safety and performance standards set out in Section 5.

4.3 Notwithstanding any other provisions of this Agreement, PG&E shall have the right to unilaterally file with the Commission, pursuant to the Commission's rules and regulations, an application to terminate this Agreement.

4.4 Any agreements attached to and incorporated into this Agreement shall terminate concurrently with this Agreement unless the Parties have agreed otherwise in writing.

5. GENERATING FACILITY REQUIREMENTS

5.1 Customer-Generator's Generating Facility must meet all applicable safety and performance standards established by the National Electrical Code, the Institute of Electrical and Electronics Engineers, and accredited testing laboratories such as Underwriters Laboratories and, where applicable, rules of the Commission regarding safety and reliability including Rule 21.

5.2 Customer-Generator shall: (a) maintain the Generating Facility and Interconnection Facilities in a safe and prudent manner and in conformance with all applicable laws and regulations including, but not limited to, Section 5.1, and (b) obtain any governmental authorizations and permits required for the construction and operation of the Generating Facility and Interconnection Facilities. Customer-Generator shall reimburse PG&E for any and all losses, damages, claims, penalties, or liability it incurs as a result of Customer-Generator's failure to obtain or maintain any governmental authorizations and permits required for construction and operation of Customer-Generator's Generating Facility.

5.3 Customer-Generator shall not commence parallel operation of the Generating Facility until PG&E has provided express written approval. Such approval shall normally be provided no later than thirty (30) business days following PG&E's receipt of:
(1) a completed *Rule 21 Generator Interconnection Application* (Form 79-1174-02), including all supporting documents and payments as described in the Application;
(2) a signed and completed *Eligible Low Income Development Virtual Net Energy Metering (NEMVMASH) Interconnection Agreement for Multifamily Affordable Housing with Solar Generation Totaling 1 MW or Less* (Form 79-1195); and
(3) a copy of the Customer-Generator's final inspection clearance from the governmental authority having jurisdiction over the Generating Facility.
Such approval shall not be unreasonably withheld. PG&E shall have the right to have representatives present at the Commissioning Test as defined in Rule 21. Customer-Generator shall notify PG&E at least five (5) business days prior to the initial testing.

5.4 In order to promote the safety and reliability of the customer Generating Facility, the Customer-Generator certifies that as a part of this interconnection request for NEMVMASH, that all major solar system components are on the verified equipment list maintained by the California Energy Commission and certifies that other equipment, as determined by PG&E, has safety certification from a nationally recognized testing laboratory.

5.5 Customer-Generator certifies as a part of this interconnection request for NEMVMASH that

(i) a warranty of at least 10 years has been provided on all equipment and on its installation, or

(ii) a 10-year service warranty or executed "agreement" has been provided ensuring proper maintenance and continued system performance.

5.6 Customers on this tariff must pay for the interconnection of their Generation Facilities as provided in Electric Rule 21, pursuant to Decision 16-01-044.

5.7 For Customer-Generator applications received on or after September 9, 2017, the Customer-Generator certifies that their inverter-based Generating Facilities fully comply with Section Hh of Rule 21, including configuration of protective settings and default settings, in accordance with the specifications therein.

Distribution Provider may require a field verification of the Customer Generator inverter. Customer-Generator further agrees to cooperate fully with any such request and make their inverter available to the Distribution Provider for such verification. Customer-Generator understands that in the event the inverter is not set in accordance with Section Hh of Rule 21, Customer-Generator will need to cease operation of generating facility until verification is confirmed by Distribution Provider. (Solar Inverter models and firmware versions that comply with Rule 21 Section Hh can be found at http://www.gosolarcalifornia.org/equipment/inverters.php.)

Verification of inverter model's compliance with such requirements shall be provided by the Customer-Generator upon request by PG&E in accordance with PG&E's Electric Rule 21.

An "existing inverter" is defined as an inverter that is a component of an existing Generating Facility that meets one or more of the following conditions:

(a) it is already approved by PG&E for interconnection prior to September 9, 2017

(b) the Customer-Generator has submitted the interconnection application prior to September 9, 2017,

(c) the Customer-Generator provides evidence of having applied for an electrical permit for the Generating Facility installation that is dated prior to September 9, 2017 and submitted a complete interconnection application2 no later than March 31, 2018, or

(d) the Customer-Generator provides evidence of a final inspection clearance from the governmental authority having jurisdiction over the Generating Facility prior to September 9, 2017.

[2] A complete application consists all of the following without deficiencies:
1. A completed Interconnection Application including all supporting documents and required payments
2. A completed signed Interconnection Agreement
3. Evidence of the Customer-Generator final inspection clearance from the governmental authority having jurisdiction over the generating system.

All "existing inverters" are not required to be Smart Inverters and are only subject to Section H of Rule 21. Customer-Generator replacing an "existing inverter" certifies it is being replaced with either:

(i) inverter equipment that complies with Section Hh of Rule 21, (encouraged); or
(ii) a conventional inverter that is of the same size and equivalent ability to that of the inverter being replaced, as allowed in Rule 21 Section H.3.d.ii.

6. INTERCONNECTION FACILITIES

6.1 Customer-Generator and/or PG&E, as appropriate, shall provide Interconnection Facilities that adequately protect PG&E's Electric System, personnel, and other persons from damage or injury, which may be caused by the operation of Customer-Generator's Generating Facility.

6.2 Customer-Generator shall be solely responsible for the costs, design, purchase, construction, permitting, operation, and maintenance of the Interconnection Facilities that Customer-Generator owns.

6.3 If the provisions of PG&E's Electric Rule 21, or any other tariff or rule approved by the Commission, require PG&E to own and operate a portion of the Interconnection Facilities, Customer-Generator and PG&E shall promptly execute an Special Facilities Agreement that establishes and allocates responsibility for the design, installation, operation, maintenance, and ownership of the Interconnection Facilities. This Special Facilities Agreement shall be attached to and made a part of this Agreement as Appendix B.

7. LIMITATION OF LIABILITY

Each Party's liability to the other Party for any loss, cost, claim, injury, liability, or expense, including reasonable attorney's fees, relating to or arising from any act or omission in its performance of this agreement, shall be limited to the amount of direct damage actually incurred. In no event shall either Party be liable to the other Party for any indirect, special, consequential, or punitive damages of any kind whatsoever.

8. INSURANCE

Customer-Generator Facility is required to comply with standards and rules set forth in Section 5 and provide the following for insurance policies in place.

To the extent that Customer-Generator has currently in force property insurance and commercial general liability or personal liability insurance, Customer-Generator agrees that it will maintain such insurance in force for the duration of this Agreement in no less amounts than those currently in effect. Pacific Gas and Electric Company shall have the right to inspect or obtain a copy of the original policy or policies of insurance prior to commencing operation. As long as Customer-Generator meets the requirements of this section, Customer-Generator shall not be required to purchase any additional liability insurance.

❑ I have insurance. I hereby certify that there is presently insurance coverage in the amount of

$_____ for the Schedule NEMVMASH Generating Facility location.

Insuring Company's Name: _____

Insurance Policy # _____

❑ I do not have insurance. I hereby certify that there is presently $0 (zero) dollars of insurance for the Schedule NEMVMASH Generating Facility location.

9. INDEMNITY FOR FAILURE TO COMPLY WITH INSURANCE PROVISIONS

9.1 If Customer-Generator fails to comply with the insurance provisions of this Agreement, Customer-Generator shall, at its own cost, defend, save harmless and indemnify PG&E, its directors, officers, employees, agents, assignees, and successors in interest from and against any and all loss, liability, damage, claim, cost, charge, demand, or expense of any kind or nature (including attorney's fees and other costs of litigation) resulting from the death or injury to any person or damage to any property, including the personnel and property of the utility, to the extent that the utility would have been protected had Customer-Generator complied with all such insurance provisions. The inclusion of this Section 9.1 is not intended to create any expressed or implied right in Customer-Generator to elect not to provide any such required insurance.

9.2 The provisions of this Section 9 shall not be construed to relieve any insurer of its obligations to pay any insurance claims in accordance with the provisions of any valid insurance policy.

10. NOTICES

10.1 Any written notice, demand, or request required or authorized in connection with this Agreement (Notice) shall be deemed properly given if delivered in person or sent by first class mail, postage prepaid, to the person specified below:

If to PG&E:

Pacific Gas and Electric Company
Attention: Electric Generation Interconnection - Contract Management
245 Market Street
Mail Code N7L
San Francisco, California 94105-1702

If to Customer-Generator:

Customer-Generator Name: _____

Address: _____

City: _____

Phone: ( ) _____

FAX: ( ) _____

10.2 A Party may change its address for Notices at any time by providing the other Party notice of the change in accordance with Section 10.1.

10.3 The Parties may also designate operating representatives to conduct the daily communications, which may be necessary or convenient for the administration of this Agreement. Such designations, including names, addresses, and phone numbers may be communicated or revised by one Party's Notice to the other.

11. REVIEW OF RECORDS AND DATA

11.1 PG&E shall have the right to review and obtain copies of Customer-Generator's operations and maintenance records, logs, or other information such as Generating Facility availability, maintenance outages, circuit breaker operation requiring manual reset, relay targets and unusual events pertaining to Customer-Generator's Generating Facility or its interconnection to PG&E.

11.2 Customer-Generator authorizes to release to the California Energy Commission (CEC) information regarding Customer-Generator's facility, including customer name and Generating Facility location, size, and operational characteristics, as requested from time to time pursuant to the CEC's rules and regulations.

12. ASSIGNMENT

Customer-Generator shall not voluntarily assign its rights nor delegate its duties under this Agreement without PG&E's written consent. Any assignment or delegation Customer-Generator makes without PG&E's written consent shall not be valid. PG&E shall not unreasonably withhold its consent to Customer-Generator's assignment of this Agreement.

13. NON-WAIVER

None of the provisions of this Agreement shall be considered waived by a Party unless such waiver is given in writing. The failure of a Party to insist in any one or more instances upon strict performance of any of the provisions of this Agreement or to take advantage of any of its rights hereunder shall not be construed as a waiver of any such provisions or the relinquishment of any such rights for the future, but the same shall continue and remain in full force and effect.

14. GOVERNING LAW, JURISDICTION OF COMMISSION, INCLUSION OF PG&E's TARIFF SCHEDULES AND RULES

14.1 This Agreement shall be interpreted, governed, and construed under the laws of the State of California as if executed and to be performed wholly within the State of California without giving effect to choice of law provisions that might apply to the law of a different jurisdiction.

14.2 This Agreement shall, at all times, be subject to such changes or modifications by the Commission as it may from time to time direct in the exercise of its jurisdiction.

14.3 The interconnection and services provided under this Agreement shall at all times be subject to the terms and conditions set forth in the Tariff Schedules and Rules applicable to the electric service provided by PG&E, which Tariff Schedules and Rules are hereby incorporated into this Agreement by this reference.

14.4 Notwithstanding any other provisions of this Agreement, PG&E shall have the right to unilaterally file with the Commission, pursuant to the Commission's rules and regulations, an application for change in rates, charges, classification, service, tariff or rule or any agreement relating thereto.

15. AMENDMENT AND MODIFICATION

This Agreement can only be amended or modified by a writing signed by both Parties.

16. ENTIRE AGREEMENT

This Agreement, including any incorporated Tariff Schedules and Rules, contains the entire Agreement and understanding between the Parties, their agents, and employees as to the subject matter of this Agreement. Each party also represents that in entering into this Agreement, it has not relied on any promise, inducement, representation, warranty, agreement or other statement not set forth in this Agreement or in the incorporated Tariff Schedules and Rules.

17. SIGNATURES

IN WITNESS WHEREOF, the Parties hereto have caused this Agreement to be executed by their duly authorized representatives. This Agreement is effective as of the last date set forth below.

	PACIFIC GAS AND ELECTRIC COMPANY

VIRTUAL NET ENERGY METERING (NEMV) INTERCONNECTION AGREEMENT FOR SOLAR (PV) OR WIND GENERATION TOTALING 1 MW OR LESS

This *Virtual Net Energy Metering (NEMV) Interconnection Agreement for Solar (PV) or Wind Generation Totaling 1 MW or Less,* (Agreement) is entered into by and between _____ (Customer-Generator), and Pacific Gas and Electric Company (PG&E), a California Corporation. Customer-Generator and PG&E are sometimes also referred to in this Agreement jointly as "Parties" or individually as "Party." In consideration of the mutual promises and obligations stated in this Agreement and its attachments, the Parties agree as follows:

1. SCOPE AND PURPOSE

This Agreement provides for Customer-Generator to interconnect and operate a multi-tenant or multi-meter Eligible NEMV installation on a single Premises, as defined in Electric Rule 1 for the Customer-Generator or designated agent of the Customer-Generator who interconnects a single solar photovoltaic and/or wind generating facility (Renewable Electric Generation Facility) sized no larger than 1 MW for the energy requirements of all eligible Benefitting Accounts (as defined in Schedule NEMV) of the past year that is on a single Premises, as defined in Electric Rule 1 [1] with other individually metered PG&E Benefitting Accounts that will be allocated the benefits of the Renewable Electric Generation Facility as described in NEMV, that meets all the applicability requirements in Schedule NEMV, and that operates in parallel with Pacific Gas and Electric Company's (PG&E) Electric System.

The purpose of this Agreement is to allow the Customer-Generator to interconnect the Renewable Electric Generation Facility with PG&E's Electric System, subject to the provisions of this Agreement and PG&E's Rate Schedule NEMV. Customer-Generator has elected to interconnect and operate its Renewable Electric Generation Facility in parallel with PG&E's Electric System, primarily to offset part or all of the NEMV Arrangement's own electrical requirements of the Benefitting Accounts at the affiliated service. Customer-Generator shall comply at all times with this Agreement as well as with all applicable laws, tariffs and applicable requirements of the Public Utilities Commission of the State of California.

2. SUMMARY AND DESCRIPTION OF CUSTOMER-GENERATOR'S GENERATING FACILITY AND DESIGNATION OF OTHERWISE-APPLICABLE RATE SCHEDULE

2.1 A description of the Generating Facility, including a summary of its significant components and a single-line diagram showing the general arrangement of how Customer-Generator's Generating Facility and loads are interconnected with PG&E's Electric System, is attached to and made a part of this Agreement. (This description is supplied by Customer-Generator as Appendix A).

2.2 Generating Facility identification number: _____ (Assigned by PG&E).

2.3 Customer-Generator's electric service agreement ID number: _____ (Assigned by PG&E).

2.4 Name and address used by PG&E to locate the electric service agreement ID number used to interconnect the Generating Facility with PG&E's Electric System:

Name: _____

Address: _____

City/Zip Code: _____

2.5 The Generating Facility's expected date of Initial Operation is _____

The expected date of Initial Operation shall be within two years of the date of this Agreement.

3. DOCUMENTS INCLUDED AND DEFINED TERMS

3.1 This Agreement includes the following exhibits that are specifically incorporated herein and made a part of this Agreement.

[1] From Electric Rule2, a PREMISES is defined as all of the real property and apparatus employed in a single enterprise on an integral parcel of land undivided, excepting in the case of industrial, agricultural, oil field, resort enterprises, and public or quasi-public institutions, by a dedicated street, highway or public thoroughfare or railway. Automobile parking lots constituting a part of and adjacent to a single enterprise may be separated by an alley from the remainder of the Premises served.

Appendix A Description of Generating Facility and Single-Line Diagram (Supplied by Customer-Generator).

Appendix B A Copy of *PG&E's Agreement for Installation or Allocation of Special Facilities* (Forms 79-255, 79-280, 79-702) or *Agreements to Perform Any Tariff Related Work (62-4527*), if applicable (Formed by the Parties).

Appendix C Customer-Generator Affidavit Warranting That NEMV Arrangement Is Sized to Load.

Appendix D NEMV Storage (if applicable) - Applicants adding storage pursuant to Schedules NEMV, NEM2V, NEMVMASH, and NEM2VMSH under the Special Condition for storage must include proper documentation per PG&E's Distribution Interconnection Handbook (DIH).

In addition, PG&E Electric Tariff Rules and Rates, including but not limited to Electric Rules 2, 14, 15, 16, and 21, Schedule NEMV, and Customer-Generator's otherwise-applicable rate schedule, available at PG&E's website at www.pge.com or by request, are specifically incorporated herein and made part of this Agreement.

3.2 When initially capitalized, whether in the singular or in the plural, the terms used herein shall have the meanings assigned to them either in this Agreement or in PG&E's Electric Rule 21, Section C.

4. TERM AND TERMINATION

4.1 This Agreement shall become effective as of the last date entered in Section 17 below. The Agreement shall continue in full force and effect until the earliest date that one of the following events occurs:

(a) The Parties agree in writing to terminate the Agreement.

(b) Unless otherwise agreed in writing by the Parties, at 12:01 A.M. on the day following the date the electric service agreement ID number through which Customer-Generator's Generating Facility is interconnected to PG&E is closed or terminated.

(c) At 12:01 A.M. on the 61st day after Customer-Generator or PG&E provides written Notice pursuant to Section 10 below to the other Party of Customer-Generator's or PG&E's intent to terminate this Agreement.

4.2 Customer-Generator may elect to terminate this Agreement pursuant to the terms of Section 4.1(c) for any reason. PG&E may elect to terminate this Agreement pursuant to the terms of Section 4.1(c) for one or more of the following reasons:

(a) A change in applicable rules, tariffs, or regulations, as approved or directed by the Commission, or a change in any local, state or federal law, statute or regulation, either of which materially alters or otherwise affects PG&E's ability or obligation to perform PG&E's duties under this Agreement; or,

(b) Customer-Generator fails to take all corrective actions specified in PG&E's Notice that Customer-Generator's Generating Facility is out of compliance with the terms of this Agreement within the time frame set forth in such Notice; or,

(c) Customer-Generator abandons the Generating Facility. PG&E shall deem the Generating Facility to be abandoned if PG&E determines, in its sole opinion, the Generating Facility is nonoperational and Customer-Generator does not provide a substantive response to PG&E Notice of its intent to terminate this Agreement as a result of Customer-Generator's apparent abandonment of the Generating Facility affirming Customer-Generator's intent and ability to continue to operate the Generating Facility; or,

(d) Customer-Generator's Generating Facility ceases to meet all applicable safety and performance standards set out in Section 5.

4.3 Notwithstanding any other provisions of this Agreement, PG&E shall have the right to unilaterally file with the Commission, pursuant to the Commission's rules and regulations, an application to terminate this Agreement.

4.4 Any agreements attached to and incorporated into this Agreement shall terminate concurrently with this Agreement unless the Parties have agreed otherwise in writing.

5. GENERATING FACILITY REQUIREMENTS

5.1 Customer-Generator's Generating Facility must meet all applicable safety and performance standards established by the National Electrical Code, the Institute of Electrical and Electronics Engineers, and accredited testing laboratories such as Underwriters Laboratories and, where applicable, rules of the Commission regarding safety and reliability including Rule 21.

5.2 Customer-Generator shall: (a) maintain the Generating Facility and Interconnection Facilities in a safe and prudent manner and in conformance with all applicable laws and regulations including, but not limited to, Section 5.1, and (b) obtain any governmental authorizations and permits required for the construction and operation of the Generating Facility and Interconnection Facilities. Customer-Generator shall reimburse PG&E for any and all losses, damages, claims, penalties, or liability it incurs as a result of Customer-Generator's failure to obtain or maintain any governmental authorizations and permits required for construction and operation of Customer-Generator's Generating Facility.

5.3 Customer-Generator shall not commence parallel operation of the Generating Facility until PG&E has provided express written approval. Such approval shall normally be provided no later than thirty (30) business days following PG&E's receipt of:
(1) a completed *Rule 21 Generator Interconnection Application* (Form 79-1174-02), including all supporting documents and payments as described in the Application;
(2) a signed and completed *Virtual Net Energy Metering (NEMV) Interconnection Agreement for Solar (PV) or Wind Generation Totaling 1 MW or Less* (Form 79-1196); and
(3) a copy of the Customer-Generator's final inspection clearance from the governmental authority having jurisdiction over the Generating Facility.
Such approval shall not be unreasonably withheld. PG&E shall have the right to have representatives present at the Commissioning Test as defined in Rule 21. Customer-Generator shall notify PG&E at least five (5) business days prior to the initial testing.

5.4 In order to promote the safety and reliability of the customer Generating Facility, the Customer-Generator certifies that as a part of this interconnection request for NEMV, that all major solar system components are on the verified equipment list maintained by the California Energy Commission and certifies that other equipment, as determined by PG&E, has safety certification from a nationally recognized testing laboratory.

5.5 Customer-Generator certifies as a part of this interconnection request for NEMV that

(i) a warranty of at least 10 years has been provided on all equipment and on its installation, or

(ii) a 10-year service warranty or executed "agreement" has been provided ensuring proper maintenance and continued system performance.

5.6 Customers on this tariff must pay for the interconnection of their Generation Facilities as provided in Electric Rule 21, pursuant to Decision 16-01-044.

5.7 For Customer-Generator applications received on or after September 9, 2017, the Customer-Generator certifies that their inverter-based Generating Facilities fully comply with Section Hh of Rule 21, including configuration of protective settings and default settings, in accordance with the specifications therein.

Distribution Provider may require a field verification of the Customer-Generator inverter. Customer-Generator further agrees to cooperate fully with any such request and make their inverter available to the Distribution Provider for such verification. Customer-Generator understands that in the event the inverter is not set in accordance with Section Hh of Rule 21, Customer-Generator will need to cease operation of generating facility until verification is confirmed by Distribution Provider. (Solar Inverter models and firmware versions that comply with Rule 21 Section Hh can be found at http://www.gosolarcalifornia.org/equipment/inverters.php.)

Verification of inverter model's compliance with such requirements shall be provided by the Customer-Generator upon request by PG&E in accordance with PG&E's Electric Rule 21.

An "existing inverter" is defined as an inverter that is a component of an existing Generating Facility that meets one or more of the following conditions:

(a) it is already approved by PG&E for interconnection prior to September 9, 2017

(b) the Customer-Generator has submitted the interconnection application prior to September 9, 2017,

(c) the Customer-Generator provides evidence of having applied for an electrical permit for the Generating Facility installation that is dated prior to September 9, 2017 and submitted a complete interconnection application[2] no later than March 31, 2018, or

(d) the Customer-Generator provides evidence of a final inspection clearance from the governmental authority having jurisdiction over the Generating Facility prior to September 9, 2017.

All "existing inverters" are not required to be Smart Inverters and are only subject to Section H of Rule 21. Customer-Generator replacing an "existing inverter" certifies it is being replaced with either:

(i) inverter equipment that complies with Section Hh of Rule 21, (encouraged); or

(ii) a conventional inverter that is of the same size and equivalent ability to that of the inverter being replaced, as allowed in Rule 21 Section H.3.d.ii.

6. INTERCONNECTION FACILITIES

6.1 Customer-Generator and/or PG&E, as appropriate, shall provide Interconnection Facilities that adequately protect PG&E's Electric System, personnel, and other persons from damage or injury, which may be caused by the operation of Customer-Generator's Generating Facility.

6.2 Customer-Generator shall be solely responsible for the costs, design, purchase, construction, permitting, operation, and maintenance of the Interconnection Facilities that Customer-Generator owns.

6.3 If the provisions of PG&E's Electric Rule 21, or any other tariff or rule approved by the Commission, require PG&E to own and operate a portion of the Interconnection Facilities, Customer-Generator and PG&E shall promptly execute an Special Facilities Agreement that establishes and allocates responsibility for the design,

[2] A complete application consists all of the following without deficiencies:

1. A completed Interconnection Application including all supporting documents and required payments
2. A completed signed Interconnection Agreement
3. Evidence of the Customer-Generator final inspection clearance from the governmental authority having jurisdiction over the generating system.

installation, operation, maintenance, and ownership of the Interconnection Facilities. This Special Facilities Agreement shall be attached to and made a part of this Agreement as Appendix B.

7. LIMITATION OF LIABILITY

Each Party's liability to the other Party for any loss, cost, claim, injury, liability, or expense, including reasonable attorney's fees, relating to or arising from any act or omission in its performance of this agreement, shall be limited to the amount of direct damage actually incurred. In no event shall either Party be liable to the other Party for any indirect, special, consequential, or punitive damages of any kind whatsoever.

8. INSURANCE

Customer-Generator Facility is required to comply with standards and rules set forth in Section 5 and provide the following for insurance policies in place.

To the extent that Customer-Generator has currently in force property insurance and commercial general liability or personal liability insurance, Customer-Generator agrees that it will maintain such insurance in force for the duration of this Agreement in no less amounts than those currently in effect. Pacific Gas and Electric Company shall have the right to inspect or obtain a copy of the original policy or policies of insurance prior to commencing operation. As long as Customer-Generator meets the requirements of this section, Customer-Generator shall not be required to purchase any additional liability insurance.

❑ I have insurance. I hereby certify that there is presently insurance coverage in the amount of $_____ for the Schedule NEMV Generating Facility location.

Insuring Company's Name: _____

Insurance Policy # _____

❑ I do not have insurance. I hereby certify that there is presently $0 (zero) dollars of insurance for the Schedule NEMV Generating Facility location.

9. INDEMNITY FOR FAILURE TO COMPLY WITH INSURANCE PROVISIONS

9.1 If Customer-Generator fails to comply with the insurance provisions of this Agreement, Customer-Generator shall, at its own cost, defend, save harmless and indemnify PG&E, its directors, officers, employees, agents, assignees, and successors in interest from and against any and all loss, liability, damage, claim, cost, charge, demand, or expense of any kind or nature (including attorney's fees and other costs of litigation) resulting from the death or injury to any person or damage to any property, including the personnel and property of the utility, to the extent that the utility would have been protected had Customer-Generator complied with all such insurance provisions. The inclusion of this Section 9.1 is not intended to create any expressed or implied right in Customer-Generator to elect not to provide any such required insurance.

9.2 The provisions of this Section 9 shall not be construed to relieve any insurer of its obligations to pay any insurance claims in accordance with the provisions of any valid insurance policy.

10. NOTICES

10.1 Any written notice, demand, or request required or authorized in connection with this Agreement (Notice) shall be deemed properly given if delivered in person or sent by first class mail, postage prepaid, to the person specified below:

If to PG&E:

Pacific Gas and Electric Company
Attention: Electric Generation Interconnection - Contract Management

245 Market Street
Mail Code N7L
San Francisco, California 94105-1702

If to Customer-Generator:

Customer-Generator Name: _____

Address: _____

City: _____

Phone: (_____) _____

FAX: (_____) _____

10.2 A Party may change its address for Notices at any time by providing the other Party notice of the change in accordance with Section 10.1.

10.3 The Parties may also designate operating representatives to conduct the daily communications, which may be necessary or convenient for the administration of this Agreement. Such designations, including names, addresses, and phone numbers may be communicated or revised by one Party's Notice to the other.

11. REVIEW OF RECORDS AND DATA

11.1 PG&E shall have the right to review and obtain copies of Customer-Generator's operations and maintenance records, logs, or other information such as Generating Facility availability, maintenance outages, circuit breaker operation requiring manual reset, relay targets and unusual events pertaining to Customer-Generator's Generating Facility or its interconnection to PG&E.

11.2 Customer-Generator authorizes to release to the California Energy Commission (CEC) information regarding Customer-Generator's facility, including customer name and Generating Facility location, size, and operational characteristics, as requested from time to time pursuant to the CEC's rules and regulations.

12. ASSIGNMENT

Customer-Generator shall not voluntarily assign its rights nor delegate its duties under this Agreement without PG&E's written consent. Any assignment or delegation Customer-Generator makes without PG&E's written consent shall not be valid. PG&E shall not unreasonably withhold its consent to Customer-Generator's assignment of this Agreement.

13. NON-WAIVER

None of the provisions of this Agreement shall be considered waived by a Party unless such waiver is given in writing. The failure of a Party to insist in any one or more instances upon strict performance of any of the provisions of this Agreement or to take advantage of any of its rights hereunder shall not be construed as a waiver of any such provisions or the relinquishment of any such rights for the future, but the same shall continue and remain in full force and effect.

14. GOVERNING LAW, JURISDICTION OF COMMISSION, INCLUSION OF PG&E's TARIFF SCHEDULES AND RULES

14.1 This Agreement shall be interpreted, governed, and construed under the laws of the State of California as if executed and to be performed wholly within the State of California without giving effect to choice of law provisions that might apply to the law of a different jurisdiction.

14.2 This Agreement shall, at all times, be subject to such changes or modifications by the Commission as it may from time to time direct in the exercise of its jurisdiction.

14.3 The interconnection and services provided under this Agreement shall at all times be subject to the terms and conditions set forth in the Tariff Schedules and Rules applicable to the electric service provided by PG&E, which Tariff Schedules and Rules are hereby incorporated into this Agreement by this reference.

14.4 Notwithstanding any other provisions of this Agreement, PG&E shall have the right to unilaterally file with the Commission, pursuant to the Commission's rules and regulations, an application for change in rates, charges, classification, service, tariff or rule or any agreement relating thereto.

15. AMENDMENT AND MODIFICATION

This Agreement can only be amended or modified by a writing signed by both Parties.

16. ENTIRE AGREEMENT

This Agreement, including any incorporated Tariff Schedules and Rules, contains the entire Agreement and understanding between the Parties, their agents, and employees as to the subject matter of this Agreement. Each party also represents that in entering into this Agreement, it has not relied on any promise, inducement, representation, warranty, agreement or other statement not set forth in this Agreement or in the incorporated Tariff Schedules and Rules.

17. SIGNATURES

IN WITNESS WHEREOF, the Parties hereto have caused this Agreement to be executed by their duly authorized representatives. This Agreement is effective as of the last date set forth below.

	PACIFIC GAS AND ELECTRIC COMPANY

LOCAL GOVERNMENT RENEWABLE ENERGY SELF-GENERATION BILL CREDIT TRANSFER (RES-BCT) RE-ALLOCATION REQUEST

This LOCAL GOVERNMENT RENEWABLE ENERGY SELF-GENERATION BILL CREDIT TRANSFER (RES-BCT) REALLOCATION REQUEST allows for a Local Government to request changes to their existing RES-BCT Arrangement in accordance with Rate Schedule RES-BCT. Account reallocation may not occur more frequently than once per year and upon providing PG&E with a minimum of 60 days' notice. Once complete, please submit this form to the Local Government's assigned PG&E Customer Care Representative.

Complete the information below:

Note 1) There must be no more than 50 Benefiting Accounts in an Arrangement.

Note 2) For each row:

- **Account Type** - check the one box corresponding to the type of account (that is, Generating or Benefiting Account). There must be at least one Generating Account and one Benefiting Account listed. Every row (account) should have one and only one of these 2 boxes checked. *(Required).* A Rule 21 Application and Interconnection Agreement as described in Section A of the RES-BCT Application will need to be submitted for the Generating Facility at each Generating Account listed below. In the "Designated Account…" column, designate the ONE account to which PG&E should apply any remaining true-up credit as described in the RES-BCT Special Condition 2(h). It may not be the generator account.
- **Account Address -** Provide an address, including unit number, for all Accounts. *(Required)*
- **PG&E Service Agreement Number -** Enter the PG&E Service Agreement number for all accounts. *(Required)*
- **Otherwise Applicable Rate Schedule** – Enter the PG&E Otherwise Applicable Rate Schedule (OAS) for all accounts. All account must take service on a time-of-use rate schedule. *(Required)*
- **Bill Credit Allocation Percentage –** For each Generating and Benefiting Account listed, enter the Bill Credit Allocation Percentage to the nearest whole percentage. The total of all Bill Credit Allocation Percentages must equal 100%.

If any additional Bill Credit pursuant to RES-BCT Special Condition 2 (c),(d) and (g) remains, PG&E will review the true up bills for the Generating Account and Benefiting Accounts to determine if any charges for the generation component of the energy charge remain to be credited. If yes, PG&E will apply the remaining Bill Credit to the Designated Account. Local Governments are encouraged to not allocate more Bill Credit to an account than will be used annually.

Electric Sample Form No. 79-1198-02 Sheet 1
Interconnection Agreement for Net Energy Metering (NEM2) and
Renewable Electrical Generating Facility Sized Greater than 1,000 kW

Please Refer to Attached
Sample Form

(Continued)

INTERCONNECTION AGREEMENT FOR NET ENERGY METERING (NEM2) AND RENEWABLE ELECTRICAL GENERATING FACILITY SIZED GREATER THAN 1,000 KW

This *Interconnection Agreement for Net Energy Metering (NEM2) and Renewable Electrical Generating Facility Sized Greater than 1,000 kW* (Agreement)[1] is entered into by and between _____ (Customer-Generator), and Pacific Gas and Electric Company (PG&E), a California Corporation. Customer-Generator and PG&E are sometimes also referred to in this Agreement jointly as "Parties" or individually as "Party." In consideration of the mutual promises and obligations stated in this Agreement and its attachments, the Parties agree as follows:

1. SCOPE AND PURPOSE

This Agreement provides for Customer-Generator to interconnect and operate a Generating Facility in parallel with PG&E's Electric System to serve the electrical loads connected to the electric service agreement ID number that PG&E uses to interconnect Customer-Generator's Generating Facility. Customer-Generator's Generating Facility is intended primarily to offset part or all of the Customer-Generator's own electrical requirements. Consistent with, and in order to effectuate, the provisions of Sections 2827, and 2827.7 of the California Public Utilities Code and PG&E's electric rate Schedule NEM2 (NEM2), Parties enter into this Agreement. This Agreement applies to the Customer-Generator's Generating Facilities identified below with the specified characteristics and generating capacity, and does not allow interconnection or operation of facilities different than those described.

2. SUMMARY AND DESCRIPTION OF CUSTOMER-GENERATOR'S GENERATING FACILITY AND DESIGNATION OF OTHERWISE-APPLICABLE RATE SCHEDULE

2.1 A description of the Generating Facility, including a summary of its significant components and a single-line diagram showing the general arrangement of how Customer-Generator's Generating Facility and loads are interconnected with PG&E's Electric System, is attached to and made a part of this Agreement.

2.2 Generating Facility identification number: _____ (Assigned by PG&E).

2.3 Customer-Generator's electric service agreement ID number: _____ (Assigned by PG&E).

2.4 Name and address used by PG&E to locate the electric service agreement ID number used to interconnect the Generating Facility with PG&E's Electric System:

Name: _____

Address: _____

City/Zip Code: _____

[1] Additional forms are available on PG&E's website at http://www.pge.com/gen).

2.5 The Gross Nameplate Rating of the Generating Facility is: _____ kW.

2.6 The Net Nameplate Rating of the Generating Facility is _____ kW.

2.7 The purpose of securing the Competition Transition Charge exemption available under Section 372 of the California Public Utilities Code (PUC), Producer hereby declares that the portion of the Generating Facility that is generating in a combined heat and power mode ☐ does / ☐ does not meet the requirements for Cogeneration as such term is used in Section 216.6 of the California Public Utilities Code.

2.8 Customer-Generator's otherwise-applicable rate schedule as of the execution of this Agreement _____.

2.9 The Generating Facility's expected date of Initial Operation is _____.
The expected date of Initial Operation shall be within two years of the date of this Agreement.

2.10 The Producer certifies that their inverter-based Generating Facilities will upon receiving permission to operate from PG&E fully comply with Section Hh of Rule 21 that is in effect at the time the application is received, including configuration of protective settings and default settings, in accordance with the specifications therein.

Distribution Provider may require a field verification of the Customer-Generator's inverter. Customer-Generator further agrees to cooperate fully with any such request and make their inverter available to the Distribution Provider for such verification. Customer-Generator understands that in the event the inverter is not set in accordance with Section Hh of Rule 21, Customer-Generator will need to cease operation of generating facility until verification is confirmed by Distribution Provider.

(Solar Inverter models and firmware versions that comply with Rule 21 Section Hh can be found at https://www.energy.ca.gov/programs-and-topics/topics/renewable-energy/solar-equipment-lists.)

Verification of compliance with such requirements shall be provided by the Customer-Generator upon request by PG&E in accordance with PG&E's Electric Rule 21.

An "existing inverter" is defined as an inverter that is a component of an existing Generating Facility that meets one or more of the following conditions:

(a) it is already approved by PG&E for interconnection prior to September 9, 2017

(b) the Customer-Generator has submitted the interconnection application prior to September 9, 2017,

(c) the Customer-Generator provides evidence of having applied for an electrical permit for the Generating Facility installation that is dated prior to September 9, 2017 and submitted a complete interconnection application[2] no later than March 31, 2018, or

[2] A complete application consists all of the following without deficiencies:
1. A completed Interconnection Application including all supporting documents and required

(d) the Customer-Generator provides evidence of a final inspection clearance from the governmental authority having jurisdiction over the Generating Facility prior to September 9, 2017.

All "existing inverters" are not required to be Smart Inverters and are only subject to Section H of Rule 21. Customer-Generator replacing an "existing inverter" certifies it is being replaced with either:

(i) inverter equipment that complies with Section Hh of Rule 21, (encouraged); or

(ii) a conventional inverter that is of the same size and equivalent ability to that of the inverter being replaced, as allowed in Rule 21 Section H.3.d.ii.

3. DOCUMENTS INCLUDED AND DEFINED TERMS

3.1 This Agreement includes the following exhibits that are specifically incorporated herein and made a part of this Agreement.

Attachment A Additional Terms and Conditions for Projects Requiring Interconnection Facilities and/or Upgrades to PG&E's Distribution and/or Transmission System

Attachment B Final Study Report Including Description and Costs of the Generating Facility, Interconnection Facilities, Metering Equipment, Distribution and/or Network Upgrades and Cost Responsibility

Attachment C Expected Date of Initial Operation

Attachment D NEM2V or NEM2VMSH Storage (when applicable)

Attachment E NEM2 Load Aggregation Customer-Generator Declaration Warranting NEM2 Aggregation Is Located on Same or Adjacent or Contiguous Property to Generator Parcel (when applicable)

Attachment F Addendum for Net Energy Metering Multiple Tariff (when applicable)

Attachment G Producer's Warranty that the Generating Facility is a "Cogeneration Facility" Pursuant to Section 216.6 of the California Public Utilities Code (when applicable)

Attachment H Producer's Warranty that the Generating Facility is an Eligible Biogas Electrical Generating Facility Pursuant to Section 2827.9 of the California Public Utilities Code (when applicable)

payments,
2. A completed signed Interconnection Agreement,
3. Evidence of the Customer-Generator final inspection clearance from the governmental authority having jurisdiction over the generating system.

Attachment I Schedule NEM2 Customer-Generator Warranty that it Meets the Requirements for an Eligible Customer-Generator and is an Eligible Renewable Electrical Generation Facility Pursuant to Section 2827.1 of the California Public Utilities Code (when applicable)

Attachment J Operating Requirements for Energy Storage Device(s) (when applicable)

Attachment K NEMFC Customer Agreement Starting January 1, 2017 Until California Air Resources Board Emission Standard is Established (when applicable)

In addition, PG&E Electric Tariff Rules and Rates, including but not limited to Electric Rules 2, 14, 15, 16, and 21, Schedule NEM2, and Customer-Generator's otherwise-applicable rate schedule, available at PG&E's website at www.pge.com or by request, are specifically incorporated herein and made part of this Agreement.

3.2 When initially capitalized, whether in the singular or in the plural, the terms used herein shall have the meanings assigned to them either in this Agreement or in PG&E's Electric Rule 21, Section C.

4. CUSTOMER BILLING AND PAYMENT

Customer-Generator initially selected Pacific Gas and Electric Company's electric rate schedule referenced in Section 2.7 of this Agreement as its otherwise-applicable rate schedule. Customer-Generator understands that they will be billed according to the otherwise-applicable rate schedule and Schedule NEM2.

5. TERM AND TERMINATION

5.1 This Agreement shall become effective as of the last date entered in Section 17 below. The Agreement shall continue in full force and effect until the earliest date that one of the following events occurs:

(a) The Parties agree in writing to terminate the Agreement.

(b) Unless otherwise agreed in writing by the Parties, at 12:01 A.M. on the day following the date the electric service agreement ID number through which Customer-Generator's Generating Facility is interconnected to PG&E is closed or terminated.

(c) At 12:01 A.M. on the 61st day after Customer-Generator or PG&E provides written Notice pursuant to Section 10 below to the other Party of Customer-Generator's or PG&E's intent to terminate this Agreement.

5.2 Customer-Generator may elect to terminate this Agreement pursuant to the terms of Section 5.1(c) for any reason. PG&E may elect to terminate this Agreement pursuant to the terms of Section 5.1(c) for one or more of the following reasons:

(a) A change in applicable rules, tariffs, or regulations, as approved or directed by the Commission, or a change in any local, state or federal law, statute or regulation, either of which materially alters or otherwise affects PG&E's ability or obligation to perform PG&E's duties under this Agreement; or,

(b) Customer-Generator fails to take all corrective actions specified in PG&E's Notice that Customer-Generator's Generating Facility is out of compliance with the terms of this Agreement within the time frame set forth in such Notice; or,

(c) Customer-Generator abandons the Generating Facility. PG&E shall deem the Generating Facility to be abandoned if PG&E determines, in its sole opinion, the Generating Facility is nonoperational and Customer-Generator does not provide a substantive response to PG&E Notice of its intent to terminate this Agreement as a result of Customer-Generator's apparent abandonment of the Generating Facility affirming Customer-Generator's intent and ability to continue to operate the Generating Facility; or,

(d) Customer-Generator's Generating Facility ceases to meet all applicable safety and performance standards set out in Section 6.

5.3 Notwithstanding any other provisions of this Agreement, PG&E shall have the right to unilaterally file with the Commission, pursuant to the Commission's rules and regulations, an application to terminate this Agreement.

5.4 Any agreements attached to and incorporated into this Agreement shall terminate concurrently with this Agreement unless the Parties have agreed otherwise in writing.

6. GENERATING FACILITY REQUIREMENTS

6.1 Customer-Generator's Generating Facility must meet all applicable safety and performance standards established by the National Electrical Code, the Institute of Electrical and Electronics Engineers, and accredited testing laboratories such as Underwriters Laboratories and, where applicable, rules of the Commission regarding safety and reliability including Rule 21.

6.2 Customer-Generator shall: (a) maintain the Generating Facility and Interconnection Facilities in a safe and prudent manner and in conformance with all applicable laws and regulations including, but not limited to, Section 6.1, and (b) obtain any governmental authorizations and permits required for the construction and operation of the Generating Facility and Interconnection Facilities. Customer-Generator shall reimburse PG&E for any and all losses, damages, claims, penalties, or liability it incurs as a result of Customer-Generator's failure to obtain or maintain any governmental authorizations and permits required for construction and operation of Customer-Generator's Generating Facility.

6.3 Customer-Generator shall not commence parallel operation of the Generating Facility until PG&E has provided express written approval. Such approval shall normally be provided no later than thirty (30) business days following PG&E's receipt of: (1) a completed *Generating Facility Interconnection Application for Non-Export or Certain Net Energy Metered Generating Facilities* (Form 79-1174-02), including all supporting documents and payments as described in the Application; (2) a signed and completed *Interconnection Agreement for Net Energy Metering (NEM2) and Renewable Generating Facility Sized Greater than 1,000 kW* (Form 79-1198-02); and (3) a copy of the Customer-Generator's final inspection clearance from the governmental authority having jurisdiction over the Generating Facility. Such approval shall not be unreasonably withheld. PG&E shall have the right to have representatives present at the Commissioning Test as defined in Rule 21. Customer-Generator shall notify PG&E at least five (5) business days prior to the initial testing.

6.4 In order to promote the safety and reliability of the customer Generating Facility, the Customer-Generator certifies that as a part of this interconnection request for NEM2, that all major solar system components are on the verified equipment list maintained by the California Energy Commission and certifies that other equipment, as determined by PG&E, has safety certification from a nationally recognized testing laboratory.

6.5 Customer-Generator certifies as a part of this interconnection request for NEM2 that

(i) a warranty of at least 10 years has been provided on all equipment and on its installation, or

(ii) a 10-year service warranty or executed "agreement" has been provided ensuring proper maintenance and continued system performance.

6.6 Customers on this tariff must pay for the interconnection of their Generation Facilities as provided in Electric Rule 21, pursuant to Decision 16-01-044.

7. LIMITATION OF LIABILITY

Each Party's liability to the other Party for any loss, cost, claim, injury, liability, or expense, including reasonable attorney's fees, relating to or arising from any act or omission in its performance of this agreement, shall be limited to the amount of direct damage actually incurred. In no event shall either Party be liable to the other Party for any indirect, special, consequential, or punitive damages of any kind whatsoever.

8. INSURANCE

Customer-Generator Facility is required to comply with standards and rules set forth in Section 6 and provide the following for insurance policies in place.

Customer-Generator shall furnish the required certificates and all endorsements to PG&E prior to Parallel Operation.

The certificate shall provide thirty (30) calendar days' written notice to PG&E prior to cancellation, termination, alteration, or material change of such insurance.

PG&E shall have the right to inspect or obtain a copy of the original policy or policies of insurance.

8.1 If at any time during this agreement the Customer-Generator fails to meet the requirements in Section 6 and is not self-insured under Section 8.3, the following insurance shall apply:

Customer-Generator shall procure and maintain a commercial general liability insurance policy at least as broad as the Insurance Services Office (ISO) commercial general liability coverage "occurrence" form; or, if Customer-Generator is an individual, then liability coverage with respect to premises and use at least as broad as the ISO homeowners' or personal liability Insurance occurrence policy form, or substitute, providing equivalent coverage no less than the following limits, based on generator size:

(a) Two million dollars ($2,000,000) for each occurrence if the Gross Nameplate Rating of the Generating Facility is greater than one hundred (100) kW; or

(b) One million dollars ($1,000,000) for each occurrence if the Gross Nameplate

Rating of the Generating Facility is greater than twenty (20) kW and less than or equal to one hundred (100) kW; or

(c) Five hundred thousand dollars ($500,000) for each occurrence if the Gross Nameplate Rating of the Generating Facility is twenty (20) kW or less;

(d) Two hundred thousand dollars ($200,000) for each occurrence if the Gross Nameplate Rating of the Generating Facility is ten (10) kW or less and the Generating Facility is connected to an account receiving residential service from PG&E.

The insurance shall, by endorsement:

(a) Add PG&E as an additional insured;

(b) State that coverage provided is primary and is not in excess to or contributing with any insurance or self-insurance maintained by PG&E.

(c) Contain a severability of interest clause or cross-liability clause.

8.2 If Customer-Generator's Generating Facility is connected to an account receiving residential service from PG&E and the requirement of Section 8.1 prevents Customer-Generator from obtaining the insurance required in this Section, then upon Customer-Generator's written Notice to PG&E in accordance with Section 10.1, the requirements of Section 8.1 may be waived.

8.3 Customer-Generator may self-insure with approval from PG&E. Evidence of an acceptable plan to self-insure, at least thirty (30) calendar days' prior to operations shall be submitted. Customer-Generators such as state agencies that self-insure under this section are exempt from Section 9.1.

If Customer-Generator ceases to self-insure to the level required hereunder, or if Customer-Generator is unable to provide continuing evidence of Customer-Generator's ability to self-insure, Customer-Generator agrees to immediately obtain the coverage required under agreement.

8.4 All required certificates, endorsements or letters of self-insurance shall be issued and submitted via email or fax to the following:

Pacific Gas and Electric Company
c/o EXIGIS LLC
support@exigis.com
Fax: 646-755-3327

9. INDEMNITY FOR FAILURE TO COMPLY WITH INSURANCE PROVISIONS

9.1 If Customer-Generator fails to comply with the insurance provisions of this Agreement, Customer-Generator shall, at its own cost, defend, save harmless and indemnify PG&E, its directors, officers, employees, agents, assignees, and successors in interest from and against any and all loss, liability, damage, claim, cost, charge, demand, or expense of any kind or nature (including attorney's fees and other costs of litigation) resulting from the death or injury to any person or damage to any property, including the personnel and property of the utility, to the extent that the utility would have been protected had Customer-Generator complied with all such insurance provisions. The inclusion of this Section 9.1 is not intended to create any expressed or implied right in Customer-Generator to elect not to provide any such required insurance.

9.2 The provisions of this Section 9 shall not be construed to relieve any insurer of its obligations to pay any insurance claims in accordance with the provisions of any valid insurance policy.

10. NOTICES

10.1 Any written notice, demand, or request required or authorized in connection with this Agreement (Notice) shall be deemed properly given if delivered in person or sent by first class mail, postage prepaid, to the person specified below:

If to PG&E:
Pacific Gas and Electric Company
Attention: Electric Generation Interconnection - Contract Management
245 Market Street
Mail Code N7L
San Francisco, California 94105-1702

If to Customer-Generator:

Customer-Generator Name: _____

Address: _____

City: _____

Phone: (____) _____

FAX: (____) _____

10.2 A Party may change its address for Notices at any time by providing the other Party notice of the change in accordance with Section 10.1.

10.3 The Parties may also designate operating representatives to conduct the daily communications, which may be necessary or convenient for the administration of this Agreement. Such designations, including names, addresses, and phone numbers may be communicated or revised by one Party's Notice to the other.

11. REVIEW OF RECORDS AND DATA

11.1 PG&E shall have the right to review and obtain copies of Customer-Generator's operations and maintenance records, logs, or other information such as Generating Facility availability, maintenance outages, circuit breaker operation requiring manual reset, relay

targets and unusual events pertaining to Customer-Generator's Generating Facility or its interconnection to PG&E.

11.2 Customer-Generator authorizes to release to the California Energy Commission (CEC) information regarding Customer-Generator's facility, including customer name and Generating Facility location, size, and operational characteristics, as requested from time to time pursuant to the CEC's rules and regulations.

12. ASSIGNMENT

Customer-Generator shall not voluntarily assign its rights nor delegate its duties under this Agreement without PG&E's written consent. Any assignment or delegation Customer-Generator makes without PG&E's written consent shall not be valid. PG&E shall not unreasonably withhold its consent to Customer-Generator's assignment of this Agreement.

13. NON-WAIVER

None of the provisions of this Agreement shall be considered waived by a Party unless such waiver is given in writing. The failure of a Party to insist in any one or more instances upon strict performance of any of the provisions of this Agreement or to take advantage of any of its rights hereunder shall not be construed as a waiver of any such provisions or the relinquishment of any such rights for the future, but the same shall continue and remain in full force and effect.

14. GOVERNING LAW, JURISDICTION OF COMMISSION, INCLUSION OF PG&E's TARIFF SCHEDULES AND RULES

14.1 This Agreement shall be interpreted, governed, and construed under the laws of the State of California as if executed and to be performed wholly within the State of California without giving effect to choice of law provisions that might apply to the law of a different jurisdiction.

14.2 This Agreement shall, at all times, be subject to such changes or modifications by the Commission as it may from time to time direct in the exercise of its jurisdiction.

14.3 The interconnection and services provided under this Agreement shall at all times be subject to the terms and conditions set forth in the Tariff Schedules and Rules applicable to the electric service provided by PG&E, which Tariff Schedules and Rules are hereby incorporated into this Agreement by this reference.

14.4 Notwithstanding any other provisions of this Agreement, PG&E shall have the right to unilaterally file with the Commission, pursuant to the Commission's rules and regulations, an application for change in rates, charges, classification, service, tariff or rule or any agreement relating thereto.

15. AMENDMENT AND MODIFICATION

This Agreement can only be amended or modified by a writing signed by both Parties.

16. ENTIRE AGREEMENT

This Agreement, including any incorporated Tariff Schedules and Rules, contains the entire Agreement and understanding between the Parties, their agents, and employees as to the subject matter of this Agreement. Each party also represents that in entering into this Agreement, it has

not relied on any promise, inducement, representation, warranty, agreement or other statement not set forth in this Agreement or in the incorporated Tariff Schedules and Rules.

17. SIGNATURES

IN WITNESS WHEREOF, the Parties hereto have caused this Agreement to be executed by their duly authorized representatives. This Agreement is effective as of the last date set forth below.

ATTACHMENT A

Additional Terms and Conditions for Projects Requiring Interconnection Facilities and/or Upgrades to PG&E's Distribution and/or Transmission System

Section 1. Cost Responsibility for Interconnection Facilities and Distribution Upgrades

1.1. Interconnection Facilities

1.1.1. The Interconnection Customer shall pay for the cost of the Interconnection Facilities itemized in Attachment B of this Agreement. The Distribution Provider shall provide a best estimate cost, including overheads, for the purchase and construction of its Interconnection Facilities and provide a detailed itemization of such costs. Costs associated with Interconnection Facilities may be shared with other entities that may benefit from such facilities by agreement of the Interconnection Customer, such other entities, and the Distribution Provider.

1.1.2. The Interconnection Customer shall be responsible for its share of all reasonable expenses, including overheads, associated with (1) owning, operating, maintaining, repairing, and replacing its own Interconnection Facilities, and (2) operating, maintaining, repairing, and replacing the Distribution Provider's Interconnection Facilities.

1.2. Distribution Upgrades

The Distribution Provider shall design, procure, construct, install, and own the Distribution Upgrades described in Attachment B of this Agreement. If the Distribution Provider and the Interconnection Customer agree, the Interconnection Customer may construct Distribution Upgrades that are located on land owned by the Interconnection Customer. The actual cost of the Distribution Upgrades, including overheads, shall be directly assigned to the Interconnection Customer.

Section 2. Cost Responsibility for Network Upgrades

2.1. Applicability

No portion of this Section 5 shall apply unless the interconnection of the Generating Facility requires Network Upgrades.

2.2. Network Upgrades

The Distribution Provider or the Distribution Owner shall design, procure, construct, install, and own the Network Upgrades described in Attachment B of this Agreement. If the Distribution Provider and the Interconnection Customer agree, the Interconnection Customer may construct Network Upgrades that are located on land owned by the Interconnection Customer. Unless the Distribution Provider elects to pay for Network Upgrades, the actual cost of the Network Upgrades, including overheads, shall be borne by the Interconnection Customer unless Section 2.2.1 directs otherwise.

2.2.1. Repayment of Amounts Advanced for Network Upgrades

To the extent that the CAISO Tariff provides for cash repayment to interconnection customers for contribution to the cost of Network Upgrades, the Interconnection Customer shall be entitled to a cash repayment, equal to the total amount paid to the Distribution Provider and Affected System operator, if any, for Network Upgrades, including any tax gross-up or other tax-related payments associated with the Network Upgrades, and not otherwise refunded to the Interconnection Customer, to be paid to the Interconnection Customer on a dollar-for-dollar basis for the non-usage sensitive portion of transmission charges, as payments are made under the Distribution Provider's Tariff and Affected System's Tariff for transmission services with respect to the Generating Facility. Any repayment shall include interest calculated in accordance with the methodology set forth in FERC's regulations at 18 C.F.R. §35.19a(a)(2)(iii) from the date of any payment for Network Upgrades through the date on which the Interconnection Customer receives a repayment of such payment pursuant to this subparagraph. The Interconnection Customer may assign such repayment rights to any person. To the extent that the CAISO Tariff does not provide for cash repayment to interconnection customers for contribution to the cost of Network Upgrades, Interconnection Customer is not entitled to a cash repayment for amounts paid to the Distribution Provider and Affected System operator for Network Upgrades, and no cash repayment shall be made pursuant to this Agreement.

2.2.1.1. If the Interconnection Customer is entitled to a cash repayment

pursuant to Section 2.2.1, the Interconnection Customer, the Distribution Provider, and any applicable Affected System operators may adopt any alternative payment schedule that is mutually agreeable so long as the Distribution Provider and said Affected System operators take one of the following actions no later than five years from the Commercial Operation Date: (1) return to the Interconnection Customer any amounts advanced for Network Upgrades not previously repaid, or (2) declare in writing that the Distribution Provider or any applicable Affected System operators will continue to provide payments to the Interconnection Customer on a dollar-for-dollar basis for the non-usage sensitive portion of transmission charges, or develop an alternative schedule that is mutually agreeable and provides for the return of all amounts advanced for Network Upgrades not previously repaid; however, full reimbursement shall not extend beyond twenty (20) years from the commercial operation date.

2.2.1.2. If the Generating Facility fails to achieve commercial operation, but it

or another generating facility is later constructed and requires use of the Network Upgrades, the Distribution Provider and Affected System operator shall at that time reimburse the Interconnection Customer for the amounts advanced for the Network Upgrades if the Interconnection Customer is entitled to a cash repayment pursuant to Section 2.2.1. Before any such reimbursement can occur, the Interconnection Customer, or the entity that ultimately constructs the generating facility, if different, is responsible for identifying the entity to which reimbursement must be made.

2.3. Rights Under Other Agreements

Notwithstanding any other provision of this Agreement, nothing herein shall be construed as relinquishing or foreclosing any rights, including but not limited to firm transmission rights, capacity rights, transmission congestion rights, or transmission credits, that the Interconnection Customer shall be entitled to, now or in the future, under any other agreement or tariff as a result of, or otherwise associated with, the transmission capacity, if any, created by the Network Upgrades, including the right to obtain cash reimbursements or transmission credits for transmission service that is not associated with the Generating Facility.

Section 3. Billing, Payment, Milestones, and Financial Security

3.1. Billing and Payment Procedures and Final Accounting

3.1.1. The Distribution Provider shall bill the Interconnection Customer for the design, engineering, construction, and procurement costs, including any applicable taxes, of Interconnection Facilities and Upgrades contemplated by this Agreement on a monthly basis, or as otherwise agreed by the Parties. The Interconnection Customer shall pay each bill within 30 calendar days of receipt, or as otherwise agreed to by the Parties.

3.1.2. Within three months of completing the construction and installation of the Distribution Provider's Interconnection Facilities and/or Upgrades described in the Attachments to this Agreement, the Distribution Provider shall provide the Interconnection Customer with a final accounting report of any difference between (1) the Interconnection Customer's cost responsibility for the actual cost of such facilities or Upgrades, and (2) the Interconnection Customer's previous aggregate payments to the Distribution Provider for such facilities or Upgrades. If the Interconnection Customer's cost responsibility exceeds its previous aggregate payments, the Distribution Provider shall invoice the Interconnection Customer for the amount due and the Interconnection Customer shall make payment to the Distribution Provider within 30 calendar days. If the Interconnection Customer's previous aggregate payments exceed its cost responsibility under this Agreement, the Distribution Provider shall refund to the Interconnection Customer an amount equal to the difference within 30 calendar days of the final accounting report.

3.2. Expected Date of Initial Operation

Interconnection Customer may request Distribution Provider to construct, and Distribution Provider shall construct, using Reasonable Efforts to accommodate Interconnection Customer's Expected Date of Initial Operation If a Party anticipates that it will be unable to meet a milestone for any reason other than a Uncontrollable Force Event, it shall immediately notify the other Party of the reason(s) for not meeting the milestone and propose the earliest reasonable alternate date by which it can attain this and future milestones. .

3.3. Financial Security Arrangements

For projects studied under the Fast Track Interconnection Review Process, no more than 120 Calendar Days after the Effective Date of this agreement, the Interconnection Customer shall provide the Distribution Provider, at the Interconnection Customer's option, a guarantee, a surety bond, letter of credit or other form of security that is reasonably acceptable to the Distribution Provider and is consistent with the Uniform Commercial Code of the jurisdiction where the Point of Interconnection is located.

For projects studied under the Detailed Study Interconnection Review Process, The Interconnection Customer is obligated to provide all necessary Interconnection Financial Security required under Rule 21 Section F.4.

Regardless of Review Process, such security for payment shall be in an amount sufficient to cover the costs for constructing, designing, procuring, and installing the applicable portion of the Distribution Provider's Interconnection Facilities and Upgrades and shall be reduced on a dollar-for-dollar basis for payments made to the Distribution Provider under this Agreement during its term.

In addition:

3.3.1. The guarantee must be made by an entity that meets the creditworthiness requirements of the Distribution Provider, and contain terms and conditions that guarantee payment of any amount that may be due from the Interconnection Customer, up to an agreed-to maximum amount.

3.3.2. The letter of credit or surety bond must be issued by a financial institution or insurer reasonably acceptable to the Distribution Provider and must specify a reasonable expiration date.

Section 4. Taxes

4.1. Applicable Tax Laws and Regulation

The Parties agree to follow all applicable tax laws and regulations, consistent with CPUC policy and Internal Revenue Service requirements.

4.1.1 In the application of IRS Notice 2016-36, any Income Tax Component of Contribution (ITCC) for Interconnection Facilities, Distribution Upgrades and Network Upgrades (based on the enclosed estimates) will be billed to the Interconnection Customer and collected by the Distribution Provider as per Section 3.1.1. The Distribution Provider shall true-up the final ITCC charges based on actual final costs and will either refund any excess ITCC collected by the Distribution Provider or bill the Interconnection Customer the additional ITCC charges that are required.

4.2. Maintenance of Tax Status

Each Party shall cooperate with the other to maintain the other Party's tax status. Nothing in this Agreement is intended to adversely affect the Distribution Provider's tax exempt status with respect to the issuance of bonds including, but not limited to, local furnishing bonds.

Section 5. Environmental Releases

Each Party shall notify the other Party, first orally and then in writing, of the release of any hazardous substances, any asbestos or lead abatement activities, or any type of remediation activities related to the Generating Facility or the Interconnection Facilities, each of which may reasonably be expected to affect the other Party. The notifying Party shall (1) provide the notice as soon as practicable, provided such Party makes a good faith effort to provide the notice no later than 24 hours after such Party becomes aware of the occurrence, and (2) promptly furnish to the other Party copies of any publicly available reports filed with any governmental authorities addressing such events.

Section 6. Subcontractors

Nothing in this Agreement shall prevent a Party from utilizing the services of any subcontractor as it deems appropriate to perform its obligations under this Agreement; provided, however, that each Party shall require its subcontractors to comply with all applicable terms and conditions of this Agreement in providing such services and each Party shall remain primarily liable to the other Party for the performance of such subcontractor.

6.1 The creation of any subcontract relationship shall not relieve the hiring Party of any of its obligations under this Agreement. The hiring Party shall be fully responsible to the other Party for the acts or omissions of any subcontractor the hiring Party hires as if no subcontract had been made; provided, however, that in no event shall the Distribution Provider be liable for the actions or inactions of the Interconnection Customer or its subcontractors with respect to obligations of the Interconnection Customer under this Agreement. Any applicable obligation imposed by this Agreement upon the hiring Party shall be equally binding upon, and shall be construed as having application to, any subcontractor of such Party.

6.2 The obligations under this article will not be limited in any way by any limitation of subcontractor's insurance.

ATTACHMENT B

Final Study Report Including Description and Costs of the Generating Facility, Interconnection Facilities, Metering Equipment, Distribution and/or Network Upgrades and Cost Responsibility

Final study report includes equipment, including the Generating Facility, Interconnection Facilities, and metering equipment itemized and identified as being owned by the Interconnection Customer, the Distribution Provider, or the Distribution Owner. The Distribution Provider will provide a best estimate itemized cost, including overheads, of its Interconnection Facilities and metering equipment, and a best estimate itemized cost of the annual operation and maintenance expenses associated with its Interconnection Facilities and metering equipment. Additionally, NEM program specific information relating to the Interconnection Customer's Generating Facility and any associated arrangements (i.e. NEM2, NEM2A, NEM2MT, NEM2V, NEM2VMSH (1 SDP), and NEMVMSH (DEV)) will be set forth in this attachment.

Final study report includes description of Upgrades and provides an itemized best estimate of the cost, including overheads, of the Upgrades and annual operation and maintenance expenses associated with such Upgrades. The Distribution Provider shall functionalize Upgrade costs and annual expenses as either transmission or distribution related.

ATTACHMENT C

Expected Date of Initial Operation

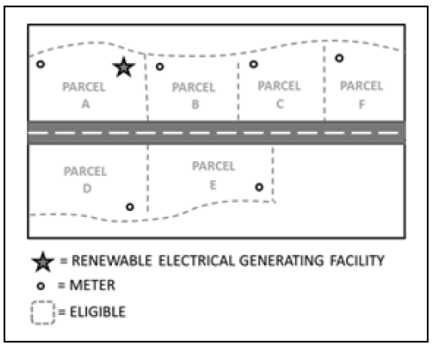
Expected Date of Initial Operation: _____

For the Interconnection Customer _____ Date _____

ATTACHMENT D

NEM2V or NEM2VMSH Storage (when applicable)

Applicants adding storage pursuant to Schedules NEM2V or NEM2VMSH under the Special Condition for storage must include proper documentation per PG&E's Distribution Interconnection Handbook (DIH).



ATTACHMENT E

NEM Load Aggregation Customer-Generator Declaration Warranting NEM2 Aggregation Is Located on Same or Adjacent or Contiguous Property to Generator Parcel (when applicable)

In accordance with Schedule NEM2, I, Customer-Generator represent and warrant under penalty of perjury that:

1. The total annual output in kWh of the generator is less than or equal to 100% of the annual aggregated electrical load in kWh of the meters associated with the generator account, including the load on the generating account itself (before being offset by the generator); and
2. Each of the aggregated account meters associated with this NEM2 generator account are located either:
   a. on the property where the renewable electrical generation facility is located, or
   b. are located within an unbroken chain of contiguous parcels that are all solely owned, leased or rented by the customer-generator. For purposes of Load Aggregation, parcels that are divided by a street, highway, or public thoroughfare are considered contiguous, provided they are within an unbroken chain of otherwise contiguous parcels that are all solely owned leased or rented by the customer-generator.

   For example, assume there are five parcels (A, B, C, D, E, and F) that form a cluster of contiguous parcels and D and E are separated from A, B, C and F by a street, highway, or public thoroughfare. For the purposes of participating in Load Aggregation, all five parcels are considered contiguous, provided they are otherwise contiguous and all are solely owned, leased or rented by the customer-generator. Refer to the diagram at left (for illustrative purposes only.)

3. PG&E reserves the right to request a parcel map to confirm the property meets the requirements of item 2 above; and
4. Customer-Generator agrees to notify PG&E if there is any change of status that makes any of the participating meters ineligible for meter aggregation to ensure that only eligible meters are participating; PG&E will require an updated Attachment and Declaration form; and
5. Upon request by PG&E, I agree to provide documentation that all aggregated meters meet the requirements of Rate Schedule NEM2 Special Condition 6 including but not limited to parcel maps and ownership records.

ATTACHMENT F

Addendum for Net Energy Metering Multiple Tariff (when applicable)

This Addendum represents mutual agreement between PG&E and Customer to provide for an interim arrangement to accommodate interconnection under Interconnection Agreement for Net Energy Metering (NEM2) and Renewable Electrical Generating Facility Sized Greater Than 1,000 kW consistent with the multiple tariff treatment provided in PG&E Schedule NEM, Special Condition 4 (NEMMT). The Parties enter into this Addendum pursuant to Rule 21 Section H.1.f.

1. **MULTIPLE TARIFF GENERATING FACILITY DESCRIPTION**

1.1. In addition to the requirements of Electric Rule 21 and the GIA, Customer will abide by the requirements in the interconnection and operation of its Generating Facility described below.

1.2. The Gross Nameplate Rating of the Generating Facility is:

1.2.1. Eligible Generator(s):

Biomass	NEM1: NEM2:	_____kW _____kW	Digester gas	NEM1: NEM2:	_____kW _____kW
Solar thermal	NEM1: NEM2:	_____kW _____kW	Municipal solid waste	NEM1: NEM2:	_____kW _____kW
Photovoltaic	NEM1: NEM2:	_____kW _____kW	Landfill gas	NEM1: NEM2:	_____kW _____kW
Wind	NEM1: NEM2:	_____kW _____kW	Ocean wave	NEM1: NEM2:	_____kW _____kW
Geothermal	NEM1: NEM2:	_____kW _____kW	Ocean thermal	NEM1: NEM2:	_____kW _____kW
Fuel cell	NEM1: NEM2:	_____kW _____kW	Tidal current	NEM1: NEM2:	_____kW _____kW
Small hydroelectric generation	NEM1: NEM2:	_____kW _____kW	Storage/Batteries (NEM eligible only) _____amp hours _____ inverter kW	NEM1: NEM2:	_____kW _____kW

1.2.2. Non-Eligible Generator(s): _____ kW

1.2.3. Total Gross Nameplate Rating of the Generating Facility: _____ kW

1.3. The Net Nameplate Rating of the Generating Facility is:

1.3.1. Eligible Generator(s):

Biomass	NEM1: NEM2:	_____kW _____kW	Digester gas	NEM1: NEM2:	_____kW _____kW
Solar thermal	NEM1: NEM2:	_____kW _____kW	Municipal solid waste	NEM1: NEM2:	_____kW _____kW
Photovoltaic	NEM1: NEM2:	_____kW _____kW	Landfill gas	NEM1: NEM2:	_____kW _____kW
Wind	NEM1: NEM2:	_____kW _____kW	Ocean wave	NEM1: NEM2:	_____kW _____kW
Geothermal	NEM1: NEM2:	_____kW _____kW	Ocean thermal	NEM1: NEM2:	_____kW _____kW
Fuel cell	NEM1: NEM2:	_____kW _____kW	Tidal current	NEM1: NEM2:	_____kW _____kW
Small hydroelectric generation	NEM1: NEM2:	_____kW _____kW	Storage/Batteries (NEM eligible only) _____amp hours _____ inverter kW	NEM1: NEM2:	_____kW _____kW

1.3.2. Non-Eligible Generator(s): _____kW

1.3.3. Total Net Nameplate Rating of the Generating Facility: _____ kW

1.4. The maximum level of power that may be exported by the Generating Facility to PG&E's Electric System is expected to be:

Biomass	NEM1: NEM2:	_____kW _____kW	Digester gas	NEM1: NEM2:	_____kW _____kW
Solar thermal	NEM1: NEM2:	_____kW _____kW	Municipal solid waste	NEM1: NEM2:	_____kW _____kW
Photovoltaic	NEM1: NEM2:	_____kW _____kW	Landfill gas	NEM1: NEM2:	_____kW _____kW
Wind	NEM1: NEM2:	_____kW _____kW	Ocean wave	NEM1: NEM2:	_____kW _____kW
Geothermal	NEM1: NEM2:	_____kW _____kW	Ocean thermal	NEM1: NEM2:	_____kW _____kW
Fuel cell	NEM1: NEM2:	_____kW _____kW	Tidal current	NEM1: NEM2:	_____kW _____kW
Small hydroelectric generation	NEM1: NEM2:	_____kW _____kW	Storage/Batteries (NEM eligible only) _____amp hours _____ inverter kW	NEM1: NEM2:	_____kW _____kW

1.4.1. Non-Eligible Generator(s): _____ kW

1.4.2. Total maximum level of power that may be exported by the Generating Facility:

_____ kW

ATTACHMENT G

Producer's Warranty that the Generating Facility is a "Cogeneration Facility" Pursuant to Section 216.6 of the California Public Utilities Code (when applicable)

For the purpose of securing the Competition Transition Charge exemption available under Section 372 of the PU Code, Producer hereby declares that the Generating Facility meets the requirements for Cogeneration as such term is used in Section 216.6 of the PU Code (Cogeneration Requirements).

Producer warrants that, beginning on the date of Initial Operation and continuing throughout the term of this Agreement, the Generating Facility shall continue to meet the Cogeneration Requirements. If Producer becomes aware that its Generating Facility has ceased to meet the Cogeneration Requirements, Producer shall promptly provide PG&E with Notice of such change pursuant to Section 9.1 of the Agreement. If at any time during the term of this Agreement PG&E determines in its reasonable discretion that Producer's Generating Facility may no longer meet the Cogeneration Requirements, PG&E may require Producer to provide evidence that the Generating Facility continues to meet the Cogeneration Requirements within 15 business days of PG&E's request for such evidence. Additionally, PG&E may periodically (typically, once per year) inspect Producer's Generating Facility and/or require documentation from Producer to monitor the Generating Facility's compliance with the Cogeneration Requirements. If PG&E determines in its reasonable judgment that Producer either failed to provide evidence in a timely manner or that it provided insufficient evidence that its Generating Facility continues to meet the Cogeneration Requirements, then the Cogeneration status of the Generating Facility shall be deemed ineffective until such time as Producer again demonstrates to PG&E's reasonable satisfaction that the Generating Facility meets the requirements for a Cogeneration facility (the Cogeneration Status Change).

PG&E shall revise its records and the administration of this Agreement to reflect the Cogeneration Status Change and provide Notice to Producer of the Cogeneration Status Change pursuant to Section 9.1 of this Agreement. Such Notice shall specify the effective date of the Cogeneration Status Change. This date shall be the first day of the calendar year for which PG&E determines in its reasonable discretion that the Generating Facility first ceased to meet the Cogeneration Requirements. PG&E shall invoice the Producer's electric service account through which the Generating Facility is Interconnected with PG&E's Electric System for Competition Transition Charges (CTCs) that were not previously billed during the period between the effective date of the Status Change and the date of the Notice in reliance upon Producer's representations that the Generating Facility complied with the Cogeneration Requirements and therefore was eligible for the exemption from CTCs available under Section 372 of the PU Code.

Any amounts to be paid or refunded by Producer, as may be invoiced by PG&E pursuant to the terms of this warranty, shall be paid to PG&E within 30 days of Producer's receipt of such invoice.

ATTACHMENT H

Producer's Warranty that the Generating Facility is an Eligible Biogas Electrical Generating Facility Pursuant to Section 2827.9 of the California Public Utilities Code (when applicable)

Producer has declared that the Generating Facility meets the requirements for an Eligible Biogas Electrical Generating Facility, as defined in Section 2827.9 of the California Public Utilities Code (Eligibility Requirements).

Producer warrants that, beginning on the date of Initial Operation and continuing throughout the term of this Agreement, its Generating Facility shall continue to meet the Eligibility Requirements. If Producer becomes aware that the Generating Facility has ceased to meet the Eligibility Requirements, Producer shall promptly provide PG&E with Notice of such change pursuant to Section 9.1 of the Agreement. If at any time during the term of this Agreement PG&E determines in its reasonable discretion that Producer's Generating Facility may no longer meet the Eligibility Requirements, PG&E may require Producer to provide evidence that the Generating Facility continues to meet the Eligibility Requirements within 15 business days of PG&E's request for such evidence. Additionally, PG&E may periodically (typically, once per year) inspect Producer's Generating Facility and/or require documentation from Producer to monitor the Generating Facility's compliance with the Eligibility Requirements. If PG&E determines in its reasonable judgment that Producer either failed to provide evidence in a timely manner or that it provided insufficient evidence that its Generating Facility continues to meet the Eligibility Requirements, then the Distributed Energy Resources Generation status of the Generating Facility shall be deemed ineffective until such time as Producer again demonstrates to PG&E's reasonable satisfaction that the Generating Facility meets the requirements for a Distributed Energy Resources Generation facility (the Eligibility Status Change).

PG&E shall revise its records and the administration of this Agreement to reflect the Eligibility Status Change and provide Notice to Producer of the Eligibility Status Change pursuant to Section 9.1 of this Agreement. Such Notice shall specify the effective date of the Eligibility Status Change. This date shall be the first day of the calendar year for which PG&E determines in its reasonable discretion that the Generating Facility first ceased to meet the Eligibility Requirements. PG&E shall invoice the Producer for any tariff charges that were not previously billed during the period between the effective date of the Eligibility Status Change and the date of the Notice in reliance upon Producer's representations that the Generating Facility complied with the Eligibility Requirements and therefore was eligible for the rate treatment available under the Net Energy Metering provisions of PG&E's Schedule NEM-BIO, Experimental Biogas Net Energy Metering.

Any amounts to be paid or refunded by Producer, as may be invoiced by PG&E pursuant to the terms of this warranty, shall be paid to PG&E within 30 days of Producer's receipt of such invoice.

ATTACHMENT I

Schedule NEM2 Customer-Generator Warranty that it Meets the Requirements for an Eligible Customer-Generator and is an Eligible Renewable Electrical Generation Facility Pursuant to Section 2827.1 of the California Public Utilities Code (when applicable)

(This Affidavit needs to be completed and submitted to PG&E by the Customer-Generator every time a new NEM2 interconnection agreement for a Renewable Electrical Generation Facility is executed or whenever there is a change in ownership of the Generating Facility).

Check Type of Renewable Electrical Generation Facility:

☐ biomass	☐ geothermal	☐ municipal solid waste
☐ solar thermal	☐ fuel cell	☐ landfill gas
☐ small hydroelectric generation	☐ ocean wave	☐ digester gas
☐ ocean thermal	☐ tidal current	☐ Storage/Batteries _____amp hours _____inverter kWh

NEM2 Customer-Generator (Customer) declares that:

(1) It meets the requirements to be an “Eligible Customer-Generator” and it’s Generating Facility.

(2) (a) meets the requirements of an “Renewable Electrical Generation Facility”, as defined in Section 2827(b)(5) of the California Public Utilities Code and
(b) satisfies the definitions of the renewable resource for the Renewable Electrical Generation Facility in the latest version of the California Energy Commission’s (CEC’s) Renewables Portfolio Standard (RPS) Eligibility Guidebook and the Overall Program Guidebook. [3] (Eligibility Requirements).

[3] The RPS Guidebooks can be found at: https://www.energy.ca.gov/programs-and-topics/programs/renewables-portfolio-standard

Included in these eligibility requirements (check as applicable) pursuant to Public Utilities Code section 2827(b)(5) and Public Resource Code Section 25741 paragraph 1(a):

☐ If the Renewable Electrical Generation Facility is a fuel cell, or otherwise uses renewable biogas or otherwise, Eligible Customer-Generator warrants that the fuel cell is powered solely with renewable fuel.

☐ If the Renewable Electrical Generation Facility is a Small hydroelectric generating facility, customer warrants that it will not cause an adverse impact on instream beneficial uses, nor cause a change in the volume or timing of streamflow).

If the Customer uses biogas or a renewable fuel as the fuel for their Renewable Electrical Generation Facility:

☐ Eligible Customer-Generator warrants that the Renewable Electrical Generation Facility is powered solely with renewable fuel.

Eligible Customer-Generator warrants that, beginning on the date of Initial Operation and continuing throughout the term of this Agreement, Eligible Customer-Generator and the Generating Facility shall continue to meet the Eligibility Requirements. If Eligible Customer-Generator or the Generating Facility ceases to meet the Eligibility Requirements, Eligible Customer-Generator shall promptly provide PG&E with Notice of such change pursuant to Section 11 of this Agreement. If at any time during the term of this Agreement PG&E determines, at its reasonable discretion, that Eligible Customer-Generator or Generating Facility may no longer meet the Eligibility Requirements, PG&E may require Eligible Customer-Generator to provide evidence, that Eligible Customer-Generator and/or Generating Facility continues to meet the Eligibility Requirements, within 20 business days of PG&E's request for such evidence. Additionally, PG&E may periodically (typically, once per year) inspect Producer's Generating Facility and/or require documentation from Eligible Customer-Generator to monitor the Generating Facility's compliance with the Eligibility Requirements – PG&E will provide a minimum of 10 business days notice to the Eligible Customer-Generator should PG&E decide an inspection is required. If PG&E determines in its reasonable judgment that Eligible Customer-Generator either failed to provide evidence in a timely manner or that it provided insufficient evidence that its Generating Facility continues to meet the Eligibility Requirements, then the Eligibility Status shall be deemed ineffective until such time as Eligible Customer-Generator again demonstrates to PG&E's reasonable satisfaction that Eligible Customer-Generator meets the requirements for an Eligible Customer–Generator and/or the Generating Facility meets the requirements for a Eligible electrical generating facility (the Eligibility Status Change).

PG&E shall revise its records and the administration of this Agreement to reflect the Eligibility Status Change and provide Notice to Eligible Customer-Generator of the Eligibility Status Change pursuant to Section 11 of this Agreement. Such Notice shall specify the effective date of the Eligibility Status Change. This date shall be the first day of the calendar year for which PG&E determines in its reasonable discretion that the Eligible Customer-Generator and/or Generating Facility first ceased to meet the Eligibility Requirements. PG&E shall invoice the Eligible Customer-Generator for any tariff charges that were not previously billed during the period between the effective date of the Eligibility Status Change and the date of the Notice in reliance upon Eligible Customer-Generator's representations that Eligible Customer-Generator and/or Generating Facility complied with the Eligibility Requirements and therefore was eligible for the rate treatment available under the Net Energy Metering provisions of PG&E's Schedule NEM2 Net Energy Metering Service for Eligible Customer-Generators.

Any amounts to be paid or refunded by Eligible Customer-Generator, as may be invoiced by PG&E pursuant to the terms of this warranty, shall be paid to PG&E within 30 days of Eligible Customer-Generator's receipt of such invoice.

Unless otherwise ordered by the CPUC, this Agreement at all times shall be subject to such modifications as the CPUC may direct from time to time in the exercise of its jurisdiction.

I certify the above is true and correct,

Customer-Generator Signature: _____

ATTACHMENT J

Operating Requirements for Energy Storage Device(s) (when applicable)

The following Operating Requirement(s) apply to the charging functions of the Generating Facility:

☐ Producer's storage device(s) will not consume power from Distribution Provider's Distribution System at any time.

☐ Producer's storage device(s) will not cause the Host Load to exceed its normal peak demand. Normal peak demand is defined as the highest amount of power required from the Distribution System by Producer's complete facilities without the influence or use of the energy storage device(s).

☐ To avoid upgrades or other technical mitigation items identified in the interconnection process, Producer has chosen the following Generating Facility operating constraint(s):

For the annual period between _____ [Month/Day] and _____ [Month/Day]

And during the hours of _____

The storage device(s) will consume no more than a total of ___ kW from the Distribution System.

This operating constraint voids the need for the following specific mitigation scope:

No other charging function limitation is required for this Generating Facility except the requirements above. Producer will be responsible for the costs of the corresponding upgrades or other technical mitigations if at any time the Producer elects to forego or violates the operating requirement.

Consistent with current load service Rules, Distribution Provider is not required to reserve capacity for load. Producer is responsible to contact the utility for any modification to its equipment or change in operations that may result in increased load demand per Electric Rule 3.C.

If any operating requirement is specified above, Distribution Provider reserves the right to ask for data at the 15-minute interval level at any time to verify that the operating requirement is being met. Distribution Provider will make such request via a written notice no more than once per calendar quarter. Producer must provide such data within 30 Calendar Days of the written request.

If the Generating Facility fails to adhere to the operating requirements at any time, it will be disconnected immediately in accordance with Rule 21 Section D.9 and not reconnected until an approved mitigation (e.g., supervising controls) is in place as determined by Distribution Provider.

ATTACHMENT K

NEMFC Customer Agreement Starting January 1, 2017 Until California Air Resources Board Emission Standard is Established (when applicable)

Starting January 1, 2017, Customer applying for Schedule NEMFC, as revised pursuant to Assembly Bill 1637 (2016), agree as follows:

That their Eligible Fuel Cell Electrical Generating Facility must meet the reduction in greenhouse gas emissions standard to be established as required by the California Public Utilities (PU) Code Section 2827.10.

Since the applicable standards are not yet released by the California Air Resources Board (ARB) and/or approved as may be needed by the California Public Utilities Commission (CPUC), Customer agrees and understands that their approval for participation in NEMFC is contingent on their system meeting the new standard within three months of when the new standard becomes available. Specifically, I, Customer, understand and agree that if my fuel cell generator does not meet the ARB emission standard I will not be eligible for NEMFC.

Specifically, I will be responsible for the following:

1. Payment of all interconnection costs, including fees, studies, system upgrades, and any other pertinent interconnection costs.
2. Payment of the following nonbypassable charges on all departed load served by the fuel cell installed at my premises including but not limited to,
   a. Public Purpose Program Charges;
   b. Nuclear Decommissioning;
   c. Department of Water Resources Bond Charges; and
   d. Competition Transition Charge;
   e. Other charges that the CPUC determines are to be charged on departed load and for which there is no exception for fuel cells pursuant to Schedule E-DCG.
3. I understand that I may be required to take service on standby tariff pursuant to Schedule S and pursuant to PU Code Section 2827.10(f)(2)(A).
4. I further understand that I will not be eligible for Rate Schedule NEMFC and will no longer receive any credit for any exports to the grid.

Electric Sample Form No. 79-1199 Sheet 1
Agreement and Customer Authorization
Non-Export Standalone Energy Storage of 30 Kilowatts or Less

Please Refer to Attached Sample Form (N) (N)

(Continued)

AGREEMENT AND CUSTOMER AUTHORIZATION
Non-Export Stand-Alone Energy Storage of 30 Kilowatts or Less

1. SCOPE AND PURPOSE

The purpose of this *Non-Export Stand-Alone Energy Storage of 30 Kilowatts or Less Agreement* (Agreement) is to allow the Customer identified below to interconnect and operate a Non-Export Energy Storage Generating Facility (Generating Facility) in parallel with Pacific Gas and Electric Company's (PG&E) Distribution System. Customer has elected to interconnect and operate its Generating Facility to serve the electrical loads connected to the electric service agreement ID identified below. Customer shall comply at all times with this Agreement as well as with all applicable laws, tariffs and requirements of the California Public Utilities Commission (CPUC).

2. CUSTOMER AND GENERATING FACILITY

a. A description of the Generating Facility, including a summary of its significant components and a single-line diagram showing the general arrangement of how Customer's Generating Facility and loads are interconnected with PG&E's Distribution System, are attached to and made a part of this Agreement. (Supplied by Customer as Appendix A).

b. Generating Facility identification number: _____ (Assigned by PG&E).

c. Customer's electric service agreement ID number: _____ (Assigned by PG&E).

d. Customer name and address used by PG&E to locate the electric service account used to interconnect the Generating Facility with PG&E's Distribution System:

Name: _____

Address: _____

City/Zip Code: _____

e. The Gross Nameplate Rating of the inverter connected to the Generating Facility is: _____ kW.

f. The Net Nameplate Rating of the Generating Facility is _____ kW.

g. The expected annual energy production of the Generating Facility is _____ kWh.

3. DOCUMENTS INCLUDED; DEFINED TERMS

a. This Agreement includes the following exhibits which are specifically incorporated herein and made a part of this Agreement.

Appendix A - Description of Generating Facility and Single-Line Diagram (Supplied by Customer).

Appendix B - Web-site references to Rules 2 and 21 and other selected rules and tariffs of PG&E (Supplied by PG&E).

Appendix C - A Copy of PG&E's Agreement for Installation or Allocation of Special Facilities for Parallel Operation of Nonutility-Owned Generation and/or Electrical Standby Service (Form 79-280) (Special Facility Agreement), if applicable, (Formed by the Parties).

Appendix D - Operating Requirements for Energy Storage Device(s).

b. When initially capitalized, whether in the singular or in the plural, the terms used herein shall have the meanings assigned to them either in this Agreement or in PG&E's Rule 21, Section C.

4. GENERATING FACILITY, OPERATION AND CERTIFICATION REQUIREMENTS

a. The electric power produced by Customer's Generating Facility shall be used solely to serve electrical loads connected to the electric service account that PG&E uses to interconnect Customer's Generating Facility. Customer shall attempt in good faith to regulate the electric power output of Customer's Generating Facility so as to prevent the flow of electric energy from the Generating Facility to PG&E's electric system. Unless otherwise agreed upon in writing by the Parties, this Agreement does not provide for, nor otherwise require PG&E to receive, purchase, transmit, distribute, or store the electrical power produced by Customer's Generating Facility.

b. Distribution Provider may provide requirements that must be met by the Customer prior to initiating Parallel Operation with PG&E's Distribution System and throughout the term of this Agreement, including but not limited to the requirements set forth in Appendix C of this Agreement.

5. AUTHORIZED CONTACT INFORMATION

This section is required if Customer is authorizing a third party to act on Customer's behalf.

Company Name	Contact Person
Contact Phone Number	Email

❑ **By checking this box and signing this Agreement, I (Customer) authorize PG&E to release my PG&E Electric Account information to the Company above limited to kilowatt hour (kWh) usage, operational characteristics, and other information related to my Generating Facility application. Company is also authorized to submit an Interconnection Request and act on my behalf with regard to the interconnection and receive copies of this executed Interconnection Agreement and the Permission to Operate Letter when issued.**

6. PERMISSION TO OPERATE

Customer may not operate their generator while interconnected to the PG&E system until receiving written permission from PG&E. Unauthorized Parallel Operation could result in injury to persons and/or damage to equipment and/or property for which the Customer may be liable.

7. SAFETY

Customer shall meet all applicable safety and performance standards established by the National Electrical Code, the Institute of Electrical and Electronics Engineers, accredited testing laboratories such as Underwriters Laboratories and, where applicable, PG&E's Electric Rule 21, and other rules approved by the CPUC regarding safety and reliability. A Customer with a solar or wind-turbine electrical generating system, or a hybrid system of both, that meets those standards and rules shall not be required to install additional controls, perform or pay for additional tests, or purchase additional liability insurance.

8. SAFE OPERATION OF GENERATING FACILITY

Notwithstanding any other provision of this Agreement, if at any time PG&E determines that the Customer's Facility, or its operation, may endanger (a) the public, (b) PG&E personnel, or (c) the safe and reliable operation of PG&E's electrical system, PG&E shall have the right to disconnect the Facility from PG&E's system. Customer's Facility shall remain disconnected until such time as PG&E is satisfied that the unsafe condition(s) have been corrected.

9. AC DISCONNECT SWITCH

PG&E recommends that a customer installing an inverter-based generator consider also installing an AC Disconnect Switch to facilitate maintenance of the Customer's equipment (i.e. inverter, PV arrays, etc.). If an AC Disconnect Switch is not installed, the revenue meter may be temporarily removed by PG&E due to an emergency or maintenance on PG&E's system to isolate the Customer's generator from the electric distribution system. Removal of the revenue meter will result in loss of electrical service to the Customer's facility or residence. AC Disconnect Switch requirements are available in PG&E's Greenbook www.pge.com/greenbook.

10. LIMITATION OF LIABILITY

PG&E's and Customer's (Individually Party or together Parties) liability to the other Party for any loss, cost, claim, injury, liability, or expense, including reasonable attorney's fees, relating to or arising from any act or omission in its performance of this Agreement, shall be limited to the amount of direct damage actually incurred. In no event shall either Party be liable to the other Party for any indirect, special, consequential, or punitive damages of any kind whatsoever.

11. GOVERNING LAW

This Agreement shall be interpreted, governed, and construed under the laws of the State of California as if executed and to be performed wholly within the State of California.

12. GOVERNING AUTHORITY

This Agreement shall at all times be subject to such changes or modification by the CPUC as said Commission may, from time to time, direct in the exercise of its jurisdiction.

13. TERM OF AGREEMENT

This Agreement shall become effective as of the date of PG&E's issuance of the permission to operate letter after receipt of all applicable fees, required documents, and this completed Agreement. This Agreement shall continue in full force and effect until terminated by either Party providing 30-days prior written notice to the other Party, or when a new Customer takes service with PG&E operating this approved generating facility.

14. STALE AGREEMENT

If this agreement is still pending one year from the date it is received by PG&E and Customer has not met all of the requirements, PG&E will close this application and Customer will be required to submit a new Agreement and Application should Customer wish to interconnect their energy storage Generating Facility.

15. SMART INVERTERS

15.1 The Producer certifies that their inverter-based Generating Facilities will upon receiving permission to operate from PG&E fully comply with Section Hh of Rule 21 that is in effect at the time the application is received, including configuration of protective settings and default settings, in accordance with the specifications therein.

Distribution Provider may require a field verification of the Customer inverter. Customer further agrees to cooperate fully with any such request and make their inverter available to the Distribution Provider for such verification. Customer understands that in the event the inverter is not set in accordance with Section Hh

of Rule 21, Customer will need to cease operation of generating facility until verification is confirmed by Distribution Provider. (Solar Inverter models and firmware versions that comply with Rule 21 Section Hh can be found at http://www.gosolarcalifornia.org/equipment/inverters.php.

Verification of inverter model's compliance with such requirements shall be provided by the Customer upon request by PG&E in accordance with PG&E's Electric Rule 21.

An "existing inverter" is defined as an inverter that is a component of an existing Generating Facility that meets one or more of the following conditions:

(a) it is already approved by PG&E for interconnection prior to September 9, 2017

(b) the Customer has submitted the interconnection application prior to September 9, 2017,

(c) the Customer provides evidence of having applied for an electrical permit for the Generating Facility installation that is dated prior to September 9, 2017 and submitted a complete interconnection application1 no later than March 31, 2018, or

(d) the Customer provides evidence of a final inspection clearance from the governmental authority having jurisdiction over the Generating Facility prior to September 9, 2017.

All "existing inverters" are not required to be Smart Inverters and are only subject to Section H of Rule 21. Customer replacing an "existing inverter" certifies it is being replaced with either:

(i) inverter equipment that complies with Section Hh of Rule 21, (encouraged); or

(ii) a conventional inverter that is of the same size and equivalent ability to that of the inverter being replaced, as allowed in Rule 21 Section H.3.d.ii.

AGREEMENT AND CUSTOMER AUTHORIZATION
Non-Export Stand-Alone Energy Storage of 30 Kilowatts or Less

IMPORTANT INFORMATION FOR CUSTOMERS – BE SURE TO READ THIS ENTIRE DOCUMENT BEFORE SIGNING – THIS IS A LEGALLY BINDING CONTRACT – READ IT CAREFULLY.

THIS FORM MUST BE SIGNED BY AN EXISTING PG&E CUSTOMER.

Under Pacific Gas and Electric Company's (PG&E's) privacy policies, which can be found at [www.pge.com/about/company/privacy/customer], PG&E generally does not sell or disclose personal information about you, such as your name, address, phone number, or electric account and billing information, to third parties unless you expressly authorize us to do so. The purpose of this form is to allow you, the customer, to exercise your right to choose whether to disclose your personal electricity usage data and other personal information to a third party. Once you authorize a third party to access personal information about you, you are responsible for ensuring that the third party safeguards the personal information from further disclosure without your consent.

By signing below, I declare under penalty of perjury under the laws of the State of California that:

1) **The information provided in this Agreement is true and correct.**

2) **By completing the fields and checking the box in Section 4, I authorize the identified third party (Company) to receive my information and act on my behalf, which includes submitting or revising my Interconnection Application.**

3) **I have read in its entirety and agree to all the terms and conditions in this Interconnection Agreement and agree to comply with PG&E's Electric Rule 21.**

_____
(Print Customer Name as it appears on the PG&E Bill)

_____
(Signature)

_____
(Print name and title of signee, applicable if customer is a Company)
(e.g. John Doe, Manager)

_____
(Date)

Note: PG&E will accept electronic signatures that are verified by qualified Third Parties such as, Adobe EchoSign, e-SignLive, and DocuSign for this Agreement if the Agreement is completed in its entirety before signing.

To confirm project approval, the Customer should retain a copy of this signed agreement and a copy of the Permission to Operate (PTO) letter from PG&E authorizing the Customer to operate the Generating Facility after PG&E deems satisfactory compliance with all Rule 21 requirements.

APPENDIX A

DESCRIPTION OF GENERATING FACILITY AND SINGLE-LINE DIAGRAM

(Provided by Customer)

APPENDIX B

RULES "2" AND "21"

(Note: PG&E's electric Rules "2" and "21" may be subject to such changes or modifications by the Commission as the Commission may, from time to time, direct in the exercise of its jurisdiction. PG&E's tariffs, including Rules "2" and "21" can be accessed via the PG&E website at **www.pge.com/tariffs**. Upon request, PG&E can provide copies to Customer of Rules "2" and "21.")

APPENDIX C (If Applicable)

RULE 21 "SPECIAL FACILITIES" AGREEMENT
(Formed between the Parties)

APPENDIX D

OPERATING REQUIREMENTS FOR ENERGY STORAGE DEVICE(S)

The following Operating Requirement(s) apply to the charging functions of the Generating Facility:

- ❑ Customer's storage device(s) will not consume power from Distribution Provider's Distribution System at any time.
- ❑ Customer's storage device(s) will not cause the Host Load to exceed its normal peak demand. Normal peak demand is defined as the highest amount of power required from the Distribution System by Customer's complete facilities without the influence or use of the energy storage device(s).
- ❑ To avoid upgrades or other technical mitigation items identified in the interconnection process, Customer has chosen the following Generating Facility operating constraint(s):

  For the annual period between _____ [Month/Day] and _____ [Month/Day]

  And during the hours of _____

  The storage device(s) will consume no more than a total of ___ kW from the Distribution System.

  This operating constraint voids the need for the following specific mitigation scope:

No other charging function limitation is required for this Generating Facility except the requirements above. Customer will be responsible for the costs of the corresponding upgrades or other technical mitigations if at any time the Customer elects to forego or violates the operating requirement.

Consistent with current load service Rules, Distribution Provider is not required to reserve capacity for load. Customer is responsible to contact the utility for any modification to its equipment or change in operations that may result in increased load demand per Electric Rule 3.C.

If any operating requirement is specified above, Distribution Provider reserves the right to ask for data at the 15-minute interval level at any time to verify that the operating requirement is being met. Distribution Provider will make such request via a written notice no more than once per calendar quarter. Customer must provide such data within 30 Calendar Days of the written request.

If the Generating Facility fails to adhere to the operating requirements at any time, it will be disconnected immediately in accordance with Rule 21 Section D.9 and not reconnected until an approved mitigation (e.g., supervising controls) is in place as determined by Distribution Provider.

This Interconnection Agreement ("Agreement" or "GIA") is made and entered into this _____ day of _____, 20__, by _____ ("Distribution Provider"), and _____ ("Interconnection Customer") each hereinafter sometimes referred to individually as "Party" or both referred to collectively as the "Parties."

Distribution Provider Information

[Contact information to be supplied]

Interconnection Customer Information

[Contact information to be supplied]

Interconnection Customer Application No: _____

WHEREAS, Interconnection Customer proposes to interconnect to the Distribution System;

WHEREAS, the basis for the Parties entering into this Agreement is that Interconnection Customer is a Qualifying Facility ("QF") and will sell all of its exports to the grid to the Distribution Provider under a power purchase agreement ("PPA") entered into pursuant to the Public Utility Regulatory Policies Act of 1978 ("PURPA"); or

WHEREAS, the basis for the Parties entering into this Agreement is:

_____

(Insert Description or N/A)

THEREFORE, in consideration of the mutual covenants set forth herein, the Parties agree as follows:

Article 1. Scope and Limitations of Agreement

1.1. Applicability

This Agreement shall be used for an interconnection governed by the Distribution Provider's California Public Utilities Commission-("CPUC") approved Electric Rule 21 ("Rule 21") of a Generating Facility that sells all of its exports to the grid to the Distribution Provider. This Agreement is not applicable to NEM Producers, Non-Export Producers and non-compensated exporting Producers.

1.2. Purpose

This Agreement incorporates in its entirety the Distribution Provider's California Public Utilities Commission ("CPUC") approved Electric Rule 21 ("Rule 21"), subject to any modifications the CPUC may direct in the exercise of its jurisdiction. This Agreement governs the terms and conditions under which the Interconnection Customer's Generating Facility will interconnect with, and operate in parallel with, the Distribution Provider's Distribution System. In the event of inconsistency between this Agreement and the terms of Rule 21, the provisions of the latter shall control.

1.3. No Agreement to Purchase of Deliver Power

This Agreement does not constitute an agreement to purchase or deliver the Interconnection Customer's power. The purchase or delivery of power and other services that the Interconnection Customer may require will be covered under separate agreements, if any. The Interconnection Customer will be responsible for separately making all necessary arrangements (including scheduling) for delivery of electricity.

1.4. Limitations

Nothing in this Agreement is intended to affect any other agreement between the Distribution Provider and the Interconnection Customer.

1.5. Responsibilities of the Parties

1.5.1. The Parties shall perform all obligations of this Agreement in accordance with all Applicable Laws and Regulations, Operating Requirements, and Good Utility Practice.

1.5.2. The Interconnection Customer shall construct, interconnect, operate and maintain its Generating Facility and construct, operate, and maintain its Interconnection Facilities in accordance with the applicable manufacturer's recommended maintenance schedule, and in accordance with this Agreement, and with Good Utility Practice.

1.5.3. The Distribution Provider shall construct, operate, and maintain its Distribution System, Transmission System, Interconnection Facilities, Distribution Upgrades and Network Upgrades in accordance with this Agreement, and with Good Utility Practice.

1.5.4. The Interconnection Customer agrees to construct its facilities or systems in accordance with applicable specifications that meet or exceed those provided by the National Electrical Safety Code, the American National Standards Institute, IEEE, Underwriter's Laboratory, and Operating Requirements in effect at the time of construction and other applicable national and state codes and standards. The Interconnection Customer agrees to design, install, maintain, and operate its Generating Facility so as to reasonably minimize the likelihood of a disturbance adversely affecting or impairing the system or equipment of the Distribution Provider and any Affected Systems. The Interconnection Customer shall comply with the Distribution Provider's Interconnection Handbook. In the event of a conflict between the terms of this GIA and the terms of the Distribution Provider's Interconnection Handbook, the terms in this GIA shall govern.

1.5.5. Each Party shall operate, maintain, repair, and inspect, and shall be fully responsible for the facilities that it now or subsequently may own unless otherwise specified in the Attachments to this Agreement. Each Party shall be responsible for the safe installation, maintenance, repair and condition of their respective lines and appurtenances on their respective sides of the point of change of ownership. The Distribution Provider and the Interconnection Customer, as appropriate, shall provide Interconnection Facilities that adequately protect the Distribution Provider's Transmission System, Distribution System, personnel, and other persons from damage and injury. The allocation of responsibility for the design, installation, operation, maintenance and ownership of Interconnection Facilities shall be delineated in the Attachments to this Agreement.

1.5.6. The Distribution Provider shall coordinate with Affected Systems to support the interconnection.

1.5.7. The Interconnection Customer shall maintain QF status during the term of this Agreement.

1.6. Parallel Operation Obligations

Once the Generating Facility has been authorized to commence parallel operation, the Interconnection Customer shall abide by all rules and procedures pertaining to the parallel operation of the Generating Facility in the applicable balancing authority area, including, but not limited to; 1) the rules and procedures concerning the operation of generation set forth in Rule 21 or by the applicable system operator(s) for the Distribution Provider's Distribution System and; 2) the Operating Requirements set forth in Attachment 5 of this Agreement.

1.7. Metering

The Interconnection Customer shall be responsible for the Distribution Provider's reasonable and necessary cost for the purchase, installation, operation, maintenance, testing, repair, and replacement of metering and data acquisition equipment specified in Attachments 2 and 3 of this Agreement. The Interconnection Customer's metering (and data acquisition, as required) equipment shall conform to applicable industry rules and Operating Requirements. Nothing in this provision replaces or alters the metering requirements in the Interconnection Customer's PPA.

1.8. Reactive Power

1.8.1. The Interconnection Customer shall design its Generating Facility to maintain a composite power delivery at continuous rated power output at the Point of Interconnection and the Generating Facility shall be capable of operating within a power factor range of 0.9 leading to 0.9 lagging, unless the Distribution Provider has established different requirements that apply to all similarly situated generators in the balancing authority area on a comparable basis. Operation outside this range is acceptable provided the reactive power of the Generating Facility is used to meet the reactive power needs of the Host Loads or that reactive power is otherwise provided under tariff by Distribution Provider. The Interconnection Customer shall notify Distribution Provider if it is using the Generating Facility for power factor correction. Unless otherwise agreed upon by the Interconnection Customer and Distribution Provider, Generating Facilities shall automatically regulate power factor, not voltage, while operating in parallel with Distribution Provider's Distribution System.

1.9. Capitalized Terms

Capitalized Terms used herein shall have the meanings specified in the Glossary of Terms in Attachment 1 or the body of this Agreement.

1.10. Smart Inverters

Producer certifies that their inverter-based Generating Facilities will upon receiving permission to operate from PG&E fully comply with Section Hh of Rule 21 that is in effect at the time the application is received, including configuration of protective settings and default settings, in accordance with the specifications therein.

Distribution Provider may require a field verification of the Interconnection Customer's inverter. Interconnection Customer further agrees to cooperate fully with any such request and make their inverter available to the Distribution Provider for such verification. Interconnection Customer understands that in the event the inverter is not set in accordance with Section Hh of Rule 21, Interconnection Customer will need to cease operation of generating facility until verification is confirmed by Distribution Provider.

(Smart inverter models and firmware versions that comply with Rule 21 Section Hh can be found at http://www.gosolarcalifornia.org/equipment/inverters.php.)

Verification of compliance with such requirements shall be provided by the Interconnection Customer upon request by PG&E in accordance with PG&E's Electric Rule 21.

An "existing inverter" is defined as an inverter that meets one or more of the following conditions:

(a) it is already approved by PG&E for interconnection prior to September 9, 2017

(b) the Interconnection Customer has submitted the interconnection application prior to September 9, 2017,

(c) the Interconnection Customer provides evidence of having applied for an electrical permit for the Generating Facility installation that is dated prior to September 9, 2017 and submitted a complete interconnection application[1] no later than March 31, 2018, or

(d) the Interconnection Customer provides evidence of a final inspection clearance from the governmental authority having jurisdiction over the Generating Facility prior to September 9, 2017.

All "existing inverters" are not required to be Smart Inverters and are only subject to Section H of Rule 21. Interconnection Customer replacing an "existing inverter" certifies it is being replaced with either:

(i) inverter equipment that complies with Section Hh of Rule 21, (encouraged); or

(ii) a conventional inverter that is of the same size and equivalent ability to that of the inverter being replaced, as allowed in Rule 21 Section H.3.d.ii.

Article 2. Inspection, Testing, Authorization, and Right of Access

2.1. Equipment Testing and Inspection

2.1.1. Pursuant to Rule 21, the Interconnection Customer shall test and inspect its Generating Facility and Interconnection Facilities prior to

[1] A complete application consists all of the following without deficiencies:
1. A completed Interconnection Application including all supporting documents and required payments,
2. A completed signed Interconnection Agreement,
3. Evidence of the Interconnection Customer final inspection clearance from the governmental authority having jurisdiction over the generating system.

interconnection. The Interconnection Customer shall notify the Distribution Provider of such activities no fewer than five Business Days (or as may be agreed to by the Parties) prior to such testing and inspection. Testing and inspection shall occur on a Business Day. The Distribution Provider may, at its own expense, send qualified personnel to the Generating Facility site to inspect the interconnection and observe the testing. The Interconnection Customer shall provide the Distribution Provider a written test report when such testing and inspection is completed.

2.1.2. The Distribution Provider shall provide the Interconnection Customer written acknowledgment that it has received the Interconnection Customer's written test report. Such written acknowledgment shall not be deemed to be or construed as any representation, assurance, guarantee, or warranty by the Distribution Provider of the safety, durability, suitability, or reliability of the Generating Facility or any associated control, protective, and safety devices owned or controlled by the Interconnection Customer or the quality of power produced by the Generating Facility.

2.2. Authorization Required Prior to Parallel Operation

2.2.1. The Distribution Provider shall use Reasonable Efforts to list applicable parallel operation requirements in Attachment 5 of this Agreement. Additionally, the Distribution Provider shall notify the Interconnection Customer of any changes to these requirements as soon as they are known. The Distribution Provider shall make Reasonable Efforts to cooperate with the Interconnection Customer in meeting requirements necessary for the Interconnection Customer to commence parallel operations by the in-service date.

2.2.2. The Interconnection Customer shall not operate its Generating Facility in parallel with the Distribution Provider's Distribution System without prior written authorization of the Distribution Provider. The Distribution Provider will provide such authorization once the Distribution Provider receives notification that the Interconnection Customer has complied with all applicable parallel operation requirements. Such authorization shall not be unreasonably withheld, conditioned, or delayed.

2.3. Right of Access

2.3.1. Upon reasonable notice, the Distribution Provider may send a qualified person to the premises of the Interconnection Customer at or immediately before the time the Generating Facility first operates in parallel to inspect the interconnection, and observe the commissioning of the Generating Facility (including any required testing), startup, and operation for a period of up to three (3) Business Days after initial start-up of the unit. In addition, the Interconnection Customer shall notify the Distribution Provider at least five (5) Business Days prior to conducting any on-site verification testing of the Generating Facility.

2.3.2. Following the initial inspection process described above, at reasonable hours, and upon reasonable notice, or at any time without notice in the event of an emergency or hazardous condition, the Distribution Provider shall have access to the Interconnection Customer's premises for any reasonable purpose in connection with the performance of the obligations imposed on it by this Agreement or if necessary to meet its legal obligation to provide service to its customers.

2.3.3. Costs associated with this Article are subject to the relevant provisions of Rule 21.

Article 3. Effective Date, Term, Termination, and Disconnection

3.1. Effective Date

This Agreement shall become effective upon execution by the Parties.

3.2. Term of Agreement

This Agreement shall become effective on the Effective Date and shall remain in effect for a period of _____ years from the Effective Date or such other longer period as the Parties may agree and shall be automatically renewed for each successive one-year period thereafter, unless terminated earlier in accordance with article 3.3 of this Agreement.

3.3. Termination

No termination shall become effective until the Parties have complied with all Applicable Laws and Regulations applicable to such termination.

3.3.1. 1The Interconnection Customer may terminate this Agreement at any time by giving the Distribution Provider twenty (20) Business Days written notice.

3.3.2. Either Party may terminate this Agreement after Default pursuant to article 7.6.

3.3.3. In addition, if the basis for Rule 21 applicability for this interconnection is based on the Interconnection Customer maintaining QF status and selling all its exports to the grid to Distribution Provider under a PURPA PPA, then this provision applies and Distribution Provider may terminate this Agreement if Interconnection Customer fails to maintain its QF status for the term of this Agreement or upon termination of Interconnection Customer's PURPA PPA.

3.3.3.1. If Section 3.3.3 applies, Interconnection Customer is responsible for maintaining QF status and must notify Distribution Provider sixty (60) Calendar Days in advance of Interconnection Customer failing to maintain its QF status, selling to a third-party, or termination of its PURPA PPA. If Interconnection Customer fails to provide such notice, it is wholly responsible for any penalties incurred from any Governmental Authority or the California Independent System Operator Corporation ("CAISO"), including penalties and charges incurred by the Distribution Provider, as a result of this failure to notify the Distribution Provider.

3.3.3.2. If Interconnection Customer is no longer eligible for a Rule 21 interconnection, then Distribution Provider may terminate this Agreement.

3.3.4. Upon termination of this Agreement, the Generating Facility will be disconnected from the Distribution Provider's Distribution System. All costs required to effectuate such disconnection shall be borne by the terminating Party, unless such termination resulted from the non-terminating Party's Default of this GIA or such non-terminating Party otherwise is responsible for these costs under this GIA.

3.3.5. The termination of this Agreement shall not relieve either Party of its liabilities and obligations, owed or continuing at the time of the termination.

3.3.6. The provisions of this article shall survive termination or expiration of this Agreement.

3.3.7. If the Generating Facility no longer falls within the scope and description provided in Section 1.1 of this Agreement, this Agreement is terminated.

3.4. Temporary Disconnection

Temporary disconnection shall continue only for so long as reasonably necessary under Good Utility Practice.

3.4.1. Emergency Conditions

"Emergency Condition" shall mean a condition or situation: (1) that in the judgment of the Party making the claim is imminently likely to endanger life or property; or (2) that, in the case of the Distribution Provider, is imminently likely (as determined in a non-discriminatory manner) to cause a material adverse effect on the security of, or damage to the Distribution System, the Distribution Provider's Interconnection Facilities or any Affected Systems(s); or (3) that, in the case of the Interconnection Customer, is imminently likely (as determined in a non-discriminatory manner) to cause a material adverse effect on the security of, or damage to, the Generating Facility or the Interconnection Customer's Interconnection Facilities. Under Emergency Conditions, the Distribution Provider may immediately suspend interconnection service and temporarily disconnect the Generating Facility. The Distribution Provider shall notify the Interconnection Customer promptly when it becomes aware of an Emergency Condition that may reasonably be expected to affect the Interconnection Customer's operation of the Generating Facility. The Interconnection Customer shall notify the Distribution Provider promptly when it becomes aware of an Emergency Condition that may reasonably be expected to affect the Distribution Provider's Distribution System or any Affected Systems. To the extent information is known, the notification shall describe the Emergency Condition, the extent of the damage or deficiency, the expected effect on the operation of both Parties' facilities and operations, its anticipated duration, and the necessary corrective action.

3.4.2. Routine Maintenance, Construction, and Repair

The Distribution Provider may interrupt interconnection service or curtail the output of the Generating Facility and temporarily disconnect the Generating Facility from the Distribution Provider's Distribution System when necessary for routine maintenance, construction, and repairs on the Distribution Provider's Distribution System and/or Transmission System. The Distribution Provider shall provide the Interconnection Customer with five Business Days notice prior to such interruption. The Distribution Provider shall use Reasonable Efforts to coordinate such reduction or temporary disconnection with the Interconnection Customer.

3.4.3. Forced Outages

During any forced outage, the Distribution Provider may suspend interconnection service to effect immediate repairs on the Distribution Provider's Distribution System and/or Transmission System. The Distribution Provider shall use Reasonable Efforts to provide the Interconnection Customer with prior notice. If prior notice is not given, the Distribution Provider shall, upon request, provide the Interconnection Customer written documentation after the fact explaining the circumstances of the disconnection.

3.4.4. Adverse Operating Effects

The Distribution Provider shall notify the Interconnection Customer as soon as practicable if, based on Good Utility Practice, operation of the Generating Facility may cause disruption or deterioration of service to other customers served from the same electric system, or if operating the Generating Facility could cause damage to the Distribution Provider's Distribution System or Affected Systems. Supporting documentation used to reach the decision to disconnect shall be provided to the Interconnection Customer upon request. If, after notice, the Interconnection Customer fails to remedy the adverse operating effect within a reasonable time, the Distribution Provider may disconnect the Generating Facility. The Distribution Provider shall provide the Interconnection Customer with five Business Day notice of such disconnection, unless the provisions of article 3.4.1 apply.

3.4.5. Modification of the Generating Facility

The Interconnection Customer must receive written authorization from the Distribution Provider before making any change to the Generating Facility that may have a material impact on the safety or reliability of the Distribution System and/or the Transmission System. Such authorization shall not be unreasonably withheld. Modifications shall be done in accordance with Good Utility Practice. If the Interconnection Customer makes such modification without the Distribution Provider's prior written authorization, the latter shall have the right to temporarily disconnect the Generating Facility.

3.4.6. Reconnection

The Parties shall cooperate with each other to restore the Generating Facility, Interconnection Facilities, and the Distribution Provider's Distribution System and/or Transmission System to their normal operating state as soon as reasonably practicable following a temporary disconnection.

Article 4. Cost Responsibility for Interconnection Facilities and Distribution Upgrades

4.1. Interconnection Facilities

4.1.1. The Interconnection Customer shall pay for the cost of the Interconnection Facilities itemized in Attachment 2 of this Agreement. The Distribution Provider shall provide a best estimate cost, including overheads, for the purchase and construction of its Interconnection Facilities and provide a detailed itemization of such costs. Costs associated with Interconnection Facilities may be shared with other entities that may benefit from such

facilities by agreement of the Interconnection Customer, such other entities, and the Distribution Provider.

4.1.2. The Interconnection Customer shall be responsible for its share of all reasonable expenses, including overheads, associated with (1) owning, operating, maintaining, repairing, and replacing its own Interconnection Facilities, and (2) operating, maintaining, repairing, and replacing the Distribution Provider's Interconnection Facilities.

4.2. Distribution Upgrades

The Distribution Provider shall design, procure, construct, install, and own the Distribution Upgrades described in Attachment 6 of this Agreement. If the Distribution Provider and the Interconnection Customer agree, the Interconnection Customer may construct Distribution Upgrades that are located on land owned by the Interconnection Customer. The actual cost of the Distribution Upgrades, including overheads, shall be directly assigned to the Interconnection Customer.

Article 5. Cost Responsibility for Network Upgrades

5.1. Applicability

No portion of this Article 5 shall apply unless the interconnection of the Generating Facility requires Network Upgrades.

5.2. Network Upgrades

The Distribution Provider or the Distribution Owner shall design, procure, construct, install, and own the Network Upgrades described in Attachment 6 of this Agreement. If the Distribution Provider and the Interconnection Customer agree, the Interconnection Customer may construct Network Upgrades that are located on land owned by the Interconnection Customer. Unless the Distribution Provider elects to pay for Network Upgrades, the actual cost of the Network Upgrades, including overheads, shall be borne by the Interconnection Customer unless Section 5.2.1 directs otherwise.

5.2.1. Repayment of Amounts Advanced for Network Upgrades

To the extent that the CAISO Tariff, currently Section 12.3.2 of Appendix Y, provides for cash repayment to interconnection customers for contribution to the cost of Network Upgrades, the Interconnection Customer shall be entitled to a cash repayment, equal to the total amount paid to the Distribution Provider and Affected System operator, if any, for Network Upgrades, including any tax gross-up or other tax-related payments associated with the Network Upgrades, and not otherwise refunded to the Interconnection Customer, to be paid to the Interconnection Customer on a dollar-for-dollar basis for the non-usage sensitive portion of

transmission charges, as payments are made under the Distribution Provider's Tariff and Affected System's Tariff for transmission services with respect to the Generating Facility. Any repayment shall include interest calculated in accordance with the methodology set forth in FERC's regulations at 18 C.F.R. §35.19a(a)(2)(iii) from the date of any payment for Network Upgrades through the date on which the Interconnection Customer receives a repayment of such payment pursuant to this subparagraph. The Interconnection Customer may assign such repayment rights to any person. To the extent that the CAISO Tariff does not provide for cash repayment to interconnection customers for contribution to the cost of Network Upgrades, Interconnection Customer is not entitled to a cash repayment for amounts paid to the Distribution Provider and Affected System operator for Network Upgrades, and no cash repayment shall be made pursuant to this Agreement.

5.2.1.1. If the Interconnection Customer is entitled to a cash repayment pursuant to Article 5.2.1, the Interconnection Customer, the Distribution Provider, and any applicable Affected System operators may adopt any alternative payment schedule that is mutually agreeable so long as the Distribution Provider and said Affected System operators take one of the following actions no later than five years from the Commercial Operation Date: (1) return to the Interconnection Customer any amounts advanced for Network Upgrades not previously repaid, or (2) declare in writing that the Distribution Provider or any applicable Affected System operators will continue to provide payments to the Interconnection Customer on a dollar-for-dollar basis for the non-usage sensitive portion of transmission charges, or develop an alternative schedule that is mutually agreeable and provides for the return of all amounts advanced for Network Upgrades not previously repaid; however, full reimbursement shall not extend beyond twenty (20) years from the commercial operation date.

5.2.1.2. If the Generating Facility fails to achieve commercial operation, but it or another generating facility is later constructed and requires use of the Network Upgrades, the Distribution Provider and Affected System operator shall at that time reimburse the Interconnection Customer for the amounts advanced for the Network Upgrades if the Interconnection Customer is entitled to a cash repayment pursuant to Article 5.2.1. Before any such reimbursement can occur, the Interconnection Customer, or the entity that ultimately constructs the generating facility, if different, is responsible for identifying the entity to which reimbursement must be made.

5.3. [Intentionally Omitted]

5.4. Rights Under Other Agreements

Notwithstanding any other provision of this Agreement, nothing herein shall be construed as relinquishing or foreclosing any rights, including but not limited to firm transmission rights, capacity rights, transmission congestion rights, or transmission credits, that the Interconnection Customer shall be entitled to, now or in the future, under any other agreement or tariff as a result of, or otherwise associated with, the transmission capacity, if any, created by the Network Upgrades, including the right to obtain cash reimbursements or transmission credits for transmission service that is not associated with the Generating Facility.

Article 6. Billing, Payment, Milestones, and Financial Security

6.1. Billing and Payment Procedures and Final Accounting

6.1.1. The Distribution Provider shall bill the Interconnection Customer for the design, engineering, construction, and procurement costs, including any applicable taxes, of Interconnection Facilities and Upgrades contemplated by this Agreement on a monthly basis, or as otherwise agreed by the Parties. The Interconnection Customer shall pay each bill within 30 calendar days of receipt, or as otherwise agreed to by the Parties.

6.1.2. Within twelve months of completing the construction and installation of the Distribution Provider's Interconnection Facilities and/or Upgrades described in the Attachments to this Agreement, the Distribution Provider shall provide the Interconnection Customer with a final accounting report of any difference between (1) the Interconnection Customer's cost responsibility for the actual cost of such facilities or Upgrades, and (2) the Interconnection Customer's previous aggregate payments to the Distribution Provider for such facilities or Upgrades. If the Interconnection Customer's cost responsibility exceeds its previous aggregate payments, the Distribution Provider shall invoice the Interconnection Customer for the amount due and the Interconnection Customer shall make payment to the Distribution Provider within 30 calendar days. If the Interconnection Customer's previous aggregate payments exceed its cost responsibility under this Agreement, the Distribution Provider shall refund to the Interconnection Customer an amount equal to the difference within 30 calendar days of the final accounting report.

6.2. Milestones

The Parties shall agree on milestones for which each Party is responsible and list them in Attachment 4 of this Agreement. A Party's obligations under this provision may be extended by agreement. If a Party anticipates that it will be unable to meet a milestone for any reason other than a Uncontrollable Force Event, it shall immediately notify the other Party of the reason(s) for not meeting the milestone and (1) propose the earliest reasonable alternate date by which it can attain this and future milestones, and (2) requesting appropriate amendments to Attachment 4. The Party affected by the failure to meet a milestone shall not unreasonably

withhold agreement to such an amendment unless it will suffer significant uncompensated economic or operational harm from the delay, (2) attainment of the same milestone has previously been delayed, or (3) it has reason to believe that the delay in meeting the milestone is intentional or unwarranted notwithstanding the circumstances explained by the Party proposing the amendment.

6.3. Financial Security Arrangements

At least 20 Business Days prior to the commencement of the design, procurement, installation, or construction of a discrete portion of the Distribution Provider's Interconnection Facilities and Upgrades, the Interconnection Customer shall provide the Distribution Provider, at the Interconnection Customer's option, a guarantee, a surety bond, letter of credit or other form of security that is reasonably acceptable to the Distribution Provider and is consistent with the Uniform Commercial Code of the jurisdiction where the Point of Interconnection is located. Such security for payment shall be in an amount sufficient to cover the costs for constructing, designing, procuring, and installing the applicable portion of the Distribution Provider's Interconnection Facilities and Upgrades and shall be reduced on a dollar-for-dollar basis for payments made to the Distribution Provider under this Agreement during its term. In addition:

6.3.1. The guarantee must be made by an entity that meets the creditworthiness requirements of the Distribution Provider and contain terms and conditions that guarantee payment of any amount that may be due from the Interconnection Customer, up to an agreed-to maximum amount.

6.3.2. The letter of credit or surety bond must be issued by a financial institution or insurer reasonably acceptable to the Distribution Provider and must specify a reasonable expiration date.

Article 7. Assignment, Liability, Indemnity, Uncontrollable Force, Consequential Damages, and Default

7.1. Assignment

This Agreement may be assigned by either Party upon fifteen (15) Business Days prior written notice and opportunity to object by the other Party; provided that:

7.1.1. Either Party may assign this Agreement without the consent of the other Party to any affiliate of the assigning Party with an equal or greater credit rating and with the legal authority and operational ability to satisfy the obligations of the assigning Party under this Agreement, provided that the Interconnection Customer promptly notifies the Distribution Provider of any such assignment;

7.1.2. The Interconnection Customer shall have the right to assign this Agreement, without the consent of the Distribution Provider, for collateral security purposes to aid in providing financing for the Generating Facility, provided that the Interconnection Customer will promptly notify the Distribution Provider of any such assignment.

7.1.3. Any attempted assignment that violates this article is void and ineffective. Assignment shall not relieve a Party of its obligations, nor shall a Party's obligations be enlarged, in whole or in part, by reason thereof. An assignee is responsible for meeting the same financial, credit, and insurance obligations as the Interconnection Customer. Where required, consent to assignment will not be unreasonably withheld, conditioned or delayed.

7.2. Limitation of Liability

Each Party's liability to the other Party for any loss, cost, claim, injury, liability, or expense, including reasonable attorney's fees, relating to or arising from any act or omission in its performance of this Agreement, shall be limited to the amount of direct damage actually incurred. In no event shall either Party be liable to the other Party for any indirect, special, consequential, or punitive damages, except as authorized by this Agreement.

7.3. Indemnity

7.3.1. This provision protects each Party from liability incurred to third parties as a result of carrying out the provisions of this Agreement. Liability under this provision is exempt from the general limitations on liability found in article 7.2.

7.3.2. The Parties shall at all times indemnify, defend, and hold the other Party harmless from, any and all damages, losses, claims, including claims and actions relating to injury to or death of any person or damage to property, demand, suits, recoveries, costs and expenses, court costs, attorney fees, and all other obligations by or to third parties, arising out of or resulting from the other Party's action or failure to meet its obligations under this Agreement on behalf of the indemnifying Party, except in cases of gross negligence or intentional wrongdoing by the indemnified Party.

7.3.3. If an indemnified person is entitled to indemnification under this article as a result of a claim by a third party, and the indemnifying Party fails, after notice and reasonable opportunity to proceed under this article, to assume the defense of such claim, such indemnified person may at the expense of the indemnifying Party contest, settle or consent to the entry of any judgment with respect to, or pay in full, such claim.

7.3.4. If an indemnifying party is obligated to indemnify and hold any indemnified person harmless under this article, the amount owing to the indemnified

person shall be the amount of such indemnified person's actual loss, net of any insurance or other recovery.

7.3.5. Promptly after receipt by an indemnified person of any claim or notice of the commencement of any action or administrative or legal proceeding or investigation as to which the indemnity provided for in this article may apply, the indemnified person shall notify the indemnifying party of such fact. Any failure of or delay in such notification shall not affect a Party's indemnification obligation unless such failure or delay is materially prejudicial to the indemnifying party.

7.4. Consequential Damages

Other than as expressly provided for in this Agreement, neither Party shall be liable under any provision of this Agreement for any losses, damages, costs or expenses for any special, indirect, incidental, consequential, or punitive damages, including but not limited to loss of profit or revenue, loss of the use of equipment, cost of capital, cost of temporary equipment or services, whether based in whole or in part in contract, in tort, including negligence, strict liability, or any other theory of liability; provided, however, that damages for which a Party may be liable to the other Party under another agreement will not be considered to be special, indirect, incidental, or consequential damages hereunder.

7.5. Uncontrollable Force

7.5.1. As used in this article, an Uncontrollable Force Event shall mean "any act of God, labor disturbance, act of the public enemy, war, insurrection, riot, fire, storm, flood, earthquake, explosion, breakage or accident to machinery or equipment, any curtailment, order, regulation or restriction imposed by governmental, military or lawfully established civilian authorities, or any other cause beyond the reasonable control of the Distribution Provider or Interconnection Customer which could not be avoided through the exercise of Good Utility Practice. An Uncontrollable Force Event does not include an act of negligence or intentional wrongdoing by the Party claiming Uncontrollable Force."

7.5.2. If an Uncontrollable Force Event prevents a Party from fulfilling any obligations under this Agreement, the Party affected by the Uncontrollable Force Event (Affected Party) shall promptly notify the other Party, either in writing or via the telephone, of the existence of the Uncontrollable Force Event. The notification must specify in reasonable detail the circumstances of the Uncontrollable Force Event, its expected duration, and the steps that the Affected Party is taking to mitigate the effects of the event on its performance. The Affected Party shall keep the other Party informed on a continuing basis of developments relating to the Uncontrollable Force Event until the event ends. The Affected Party will be entitled to suspend or modify its performance of obligations under this Agreement (other than the obligation to make payments) only to the extent that the effect of the

Uncontrollable Force Event cannot be mitigated by the use of Reasonable Efforts. The Affected Party will use Reasonable Efforts to resume its performance as soon as possible.

7.6. Default

7.6.1. No Default shall exist where such failure to discharge an obligation (other than the payment of money) is the result of an Uncontrollable Force Event as defined in this Agreement or the result of an act or omission of the other Party. Upon a Default, the non-defaulting Party shall give written notice of such Default to the defaulting Party. Except as provided in article 7.6.2, the defaulting Party shall have 60 calendar days from receipt of the Default notice within which to cure such Default; provided however, if such Default is not capable of cure within 60 calendar days, the defaulting Party shall commence such cure within 20 calendar days after notice and continuously and diligently complete such cure within six months from receipt of the Default notice; and, if cured within such time, the Default specified in such notice shall cease to exist.

7.6.2. If a Default is not cured as provided in this article, or if a Default is not capable of being cured within the period provided for herein, the non-defaulting Party shall have the right to terminate this Agreement by written notice at any time until cure occurs, and be relieved of any further obligation hereunder and, whether or not that Party terminates this Agreement, to recover from the defaulting Party all amounts due hereunder, plus all other damages and remedies to which it is entitled at law or in equity. The provisions of this article will survive termination of this Agreement.

Article 8. Insurance

8.1. General Liability and Additional Insurance

The Interconnection Customer shall, at its own expense, maintain in force general liability insurance without any exclusion for liabilities related to the interconnection undertaken pursuant to this Agreement. The amount of such insurance shall be sufficient to insure against all reasonably foreseeable direct liabilities given the size and nature of the generating equipment being interconnected, the interconnection itself, and the characteristics of the system to which the interconnection is made. The Interconnection Customer shall obtain additional insurance only if necessary as a function of owning and operating a generating facility. Such insurance shall be obtained from an insurance provider authorized to do business in California. Certification that such insurance is in effect shall be provided upon request of the Distribution Provider, except that the Interconnection Customer shall show proof of insurance to the Distribution Provider no later than ten (10) Business Days prior to the anticipated Parallel Operation date. An Interconnection Customer of sufficient credit-worthiness may propose to self-insure for such liabilities, and such a proposal shall not be unreasonably rejected.

8.2. Maintenance of Insurance

The Distribution Provider agrees to maintain general liability insurance or self-insurance consistent with the Distribution Provider's commercial practice. Such insurance or self-insurance shall not exclude coverage for the Distribution Provider's liabilities undertaken pursuant to this Agreement.

8.3. Notification

The Parties further agree to notify each other whenever an accident or incident occurs resulting in any injuries or damages that are included within the scope of coverage of such insurance, whether or not such coverage is sought.

Article 9. Confidentiality

9.1. Definition of Confidential Information

The confidentiality provisions applicable to this Agreement are set forth in Section D.7, Confidentiality of Rule 21 and in the following provisions included in this Article.

9.1.1. Release of Confidential Information

Neither Party shall release or disclose Confidential Information to any other person, employees, consultants, or to parties who may be or considering providing financing to or equity participation with Interconnection Customer, or to potential purchasers or assignees of Interconnection Customer, on a need-to-know basis in connection with these procedures, unless such person has first been advised of the confidentiality provisions of this Article and has agreed to comply with such provisions. Notwithstanding the foregoing, a Party providing Confidential Information to any person shall remain primarily responsible for any release of Confidential Information in contravention of this Article.

9.1.2. Rights

Each Party retains all rights, title, and interest in the Confidential Information that each Party discloses to the other Party. The disclosure by each Party to the other Party of Confidential Information shall not be deemed a waiver by either Party or any other person or entity of the right to protect the Confidential Information from public disclosure.

9.1.3. No Warranties

By providing Confidential Information, neither Party makes any warranties or representations as to its accuracy or completeness. In addition, by supplying Confidential Information, neither Party obligates itself to provide any particular information or Confidential Information to the other Party nor to enter into any further agreements or proceed with any other relationship or joint venture.

9.1.4. Standard of Care

Each Party shall use at least the same standard of care to protect Confidential Information it receives as it uses to protect its own Confidential Information from unauthorized disclosure, publication or dissemination; however, in no case shall a Party use less than reasonable care in protecting Confidential Information. Each Party may use Confidential Information solely to fulfill its obligations to the other Party under this Agreement or its regulatory requirements.

9.1.5. Order of Disclosure

If a court or a Government Authority or entity with the right, power, and apparent authority to do so requests or requires either Party, by subpoena, oral deposition, interrogatories, requests for production of documents, administrative order, or otherwise, to disclose Confidential Information, that Party shall provide the other Party with prompt notice of such request(s) or requirement(s) so that the other Party may seek an appropriate protective order or waive compliance. Notwithstanding the absence of a protective order or waiver, the Party may disclose such Confidential Information which, in the opinion of its counsel, the Party is legally compelled to disclose. Each Party will use Reasonable Efforts to obtain reliable assurance that confidential treatment will be accorded any Confidential Information so furnished.

9.1.6. Remedies

The Parties agree that monetary damages would be inadequate to compensate a Party for the other Party's Breach of its obligations under this Article. Each Party accordingly agrees that the other Party shall be entitled to equitable relief, by way of injunction or otherwise, if the first Party Breaches or threatens to Breach its obligations under this Article, which equitable relief shall be granted without bond or proof of damages, and the receiving Party shall not plead in defense that there would be an adequate remedy at law. Such remedy shall not be deemed an exclusive remedy for the Breach of this Article but shall be in addition to all other remedies available at law or in equity. The Parties further acknowledge and agree that the covenants contained herein are necessary for the protection of legitimate business interests and are reasonable in scope. No Party,

however, shall be liable for indirect, incidental, or consequential or punitive damages of any nature or kind resulting from or arising in connection with this Article.

Article 10. Disputes

10.1. Dispute Resolution

Any dispute arising between the Parties regarding a Party's performance of its obligations under this Agreement or requirements related to the interconnection of the Generating Facility shall be resolved according to the procedures in Rule 21.

Article 11. Taxes

11.1. Applicable Tax Laws and Regulation

The Parties agree to follow all applicable tax laws and regulations, consistent with CPUC policy and Internal Revenue Service requirements.

11.2. Maintenance of Tax Status

Each Party shall cooperate with the other to maintain the other Party's tax status. Nothing in this Agreement is intended to adversely affect the Distribution Provider's tax-exempt status with respect to the issuance of bonds including, but not limited to, local furnishing bonds.

Article 12. Miscellaneous

12.1. Governing Law, Regulatory Authority, and Rules

The validity, interpretation and enforcement of this Agreement and each of its provisions shall be governed by the laws of the State of California (where the Point of Interconnection is located), without regard to its conflicts of law principles. This Agreement is subject to all Applicable Laws and Regulations. Each Party expressly reserves the right to seek changes in, appeal, or otherwise contest any laws, orders, or regulations of a Governmental Authority.

12.2. Amendment

The Parties may amend this Agreement by a written instrument duly executed by both Parties.

12.3. No Third-Party Beneficiaries

This Agreement is not intended to and does not create rights, remedies, or benefits of any character whatsoever in favor of any persons, corporations, associations,

or entities other than the Parties, and the obligations herein assumed are solely for the use and benefit of the Parties, their successors in interest and where permitted, their assigns.

12.4. Waiver

12.4.1. The failure of a Party to this Agreement to insist, on any occasion, upon strict performance of any provision of this Agreement will not be considered a waiver of any obligation, right, or duty of, or imposed upon, such Party.

12.4.2. Any waiver at any time by either Party of its rights with respect to this Agreement shall not be deemed a continuing waiver or a waiver with respect to any other failure to comply with any other obligation, right, duty of this Agreement. Termination or default of this Agreement for any reason by Interconnection Customer shall not constitute a waiver of the Interconnection Customer's legal rights to obtain an interconnection from the Distribution Provider. Any waiver of this Agreement shall, if requested, be provided in writing.

12.5. Entire Agreement

This Agreement, including all Attachments, and any incorporated tariffs or Rules, constitutes the entire agreement between the Parties with reference to the subject matter hereof, and supersedes all prior and contemporaneous understandings or agreements, oral or written, between the Parties with respect to the subject matter of this Agreement. There are no other agreements, representations, warranties, or covenants which constitute any part of the consideration for, or any condition to, either Party's compliance with its obligations under this Agreement.

12.6. Multiple Counterparts

This Agreement may be executed in two or more counterparts, each of which is deemed an original, but all constitute one and the same instrument.

12.7. No Partnership

This Agreement shall not be interpreted or construed to create an association, joint venture, agency relationship, or partnership between the Parties or to impose any partnership obligation or partnership liability upon either Party. Neither Party shall have any right, power or authority to enter into any agreement or undertaking for, or act on behalf of, or to act as or be an agent or representative of, or to otherwise bind, the other Party.

12.8. Severability

If any provision or portion of this Agreement shall for any reason be held or adjudged to be invalid or illegal or unenforceable by any court of competent jurisdiction or other Governmental Authority, (1) such portion or provision shall be

deemed separate and independent, (2) the Parties shall negotiate in good faith to restore insofar as practicable the benefits to each Party that were affected by such ruling, and (3) the remainder of this Agreement shall remain in full force and effect.

12.9. Security Arrangements

Infrastructure security of electric system equipment and operations and control hardware and software is essential to ensure day-to-day reliability and operational security. All public utilities are expected to meet basic standards for system infrastructure and operational security, including physical, operational, and cyber-security practices.

12.10. Environmental Releases

Each Party shall notify the other Party, first orally and then in writing, of the release of any hazardous substances, any asbestos or lead abatement activities, or any type of remediation activities related to the Generating Facility or the Interconnection Facilities, each of which may reasonably be expected to affect the other Party. The notifying Party shall (1) provide the notice as soon as practicable, provided such Party makes a good faith effort to provide the notice no later than 24 hours after such Party becomes aware of the occurrence, and (2) promptly furnish to the other Party copies of any publicly available reports filed with any governmental authorities addressing such events.

12.11. Subcontractors

Nothing in this Agreement shall prevent a Party from utilizing the services of any subcontractor as it deems appropriate to perform its obligations under this Agreement; provided, however, that each Party shall require its subcontractors to comply with all applicable terms and conditions of this Agreement in providing such services and each Party shall remain primarily liable to the other Party for the performance of such subcontractor.

12.11.1. The creation of any subcontract relationship shall not relieve the hiring Party of any of its obligations under this Agreement. The hiring Party shall be fully responsible to the other Party for the acts or omissions of any subcontractor the hiring Party hires as if no subcontract had been made; provided, however, that in no event shall the Distribution Provider be liable for the actions or inactions of the Interconnection Customer or its subcontractors with respect to obligations of the Interconnection Customer under this Agreement. Any applicable obligation imposed by this Agreement upon the hiring Party shall be equally binding upon, and shall be construed as having application to, any subcontractor of such Party.

12.11.2. The obligations under this article will not be limited in any way by any limitation of subcontractor's insurance.

12.12. CPUC Modification

Unless otherwise ordered by the CPUC, this Agreement at all times shall be subject to such modifications as the CPUC may direct from time to time in the exercise of its jurisdiction.

12.13. Review of Records and Data

12.13.1. The Distribution Provider shall have the right to review and obtain copies of Interconnection Customer's operations and maintenance records, logs, or other information such as, unit availability, maintenance outages, circuit breaker operation requiring manual reset, relay targets and unusual events pertaining to Interconnection Customer's Generating Facility or its interconnection with Distribution Provider's Distribution System.

12.13.2. The Interconnection Customer authorizes the Distribution Provider to release to the California Energy Commission ("CEC"), the CAISO, and/or the CPUC information regarding the Generating Facility, including the Interconnection Customer's name and location, and the size, location and operational characteristics of the Generating Facility, as requested from time to time pursuant to the CEC's, CAISO's, or CPUC's rules and regulations.

Article 13. Notices

13.1. General

Unless otherwise provided in this Agreement, any written notice, demand, or request required or authorized in connection with this Agreement ("Notice") shall be deemed properly given if delivered in person, delivered by recognized national currier service, or sent by first class mail, postage prepaid, to the person specified below:

If to the Interconnection Customer:
[Contact information to be supplied]

If to the Distribution Provider:
[Contact information to be supplied]

13.2. Billing and Payment

Billings and payments shall be sent to the addresses set out below:

Interconnection Customer:
[Contact information to be supplied]

Distribution Provider
[Contact information to be supplied]

13.3. Alternative Forms of Notice

Any notice or request required or permitted to be given by either Party to the other and not required by this Agreement to be given in writing may be so given by telephone, facsimile or e-mail to the telephone numbers and e-mail addresses set out below:

If to the Interconnection Customer:
[Contact information to be supplied]

If to the Distribution Provider:
[Contact information to be supplied]

13.4. Designated Operating Representative

The Parties may also designate operating representatives to conduct the communications which may be necessary or convenient for the administration of this Agreement. This person will also serve as the point of contact with respect to operations and maintenance of the Party's facilities.

Interconnection Customer's Operating Representative:
[Contact information to be supplied]

Distribution Provider's Operating Representative:
[Contact information to be supplied]

13.5. Changes to the Notice Information

Either Party may change this information by giving five Business Days written notice prior to the effective date of the change.

Article 14. Signatures

IN WITNESS WHEREOF, the Parties have caused this Agreement to be executed by their respective duly authorized representatives.

(Interconnection Customer Name)	*(Distribution Provider Name)*
(Signature)	*(Signature)*
(Print Name)	*(Print Name)*
(Title)	*(Title)*
(Date)	*(Date)*

Glossary of Terms

Affected System - An electric system other than the Distribution Provider's Distribution System that may be affected by the proposed interconnection, including but not limited to the Transmission System.

Applicable Laws and Regulations - All duly promulgated applicable federal, state and local laws, regulations, rules, ordinances, codes, decrees, judgments, directives, or judicial or administrative orders, permits and other duly authorized actions of any Governmental Authority.

Business Day - Monday through Friday, excluding Federal and State Holidays.

Contact Information – Contact information will include the name of business, contact name, business address including city, state and zip, phone number, e-mail address, and any other pertinent information that may be required to communicate with the Parties.

Default - The failure of a breaching Party to cure its breach under the Agreement.

Distribution Owner - The entity that owns, leases or otherwise possesses an interest in the portion of the Distribution System at the Point of Interconnection and may be a Party to the Agreement to the extent necessary.

Distribution Provider - The public utility (or its designated agent) that owns, controls, or operates transmission or distribution facilities used for the transmission of electricity and provides distribution service to the Interconnection Customer. The term Distribution Provider should be read to include the Distribution Owner when the Distribution Owner is separate from the Distribution Provider.

Distribution System - Those non-CAISO transmission and distribution facilities, owned, controlled and operated by the Distribution Provider that are used to provide distribution service, which facilities and equipment are used to transmit electricity to ultimate usage points such as homes and industries directly from nearby generators or from interchanges with higher voltage transmission networks which transport bulk power over longer distances. The voltage levels at which Distribution Systems operate differ among areas.

Distribution Upgrades - The additions, modifications, and upgrades to the Distribution Provider's Distribution System at or beyond the Point of Interconnection to facilitate interconnection of the Generating Facility. Distribution Upgrades do not include Interconnection Facilities.

Generating Facility -The Interconnection Customer's device for the production or storage of electricity identified in Attachment 2 of the Agreement but shall not include the Interconnection Customer's Interconnection Facilities.

Good Utility Practice - Any of the practices, methods and acts engaged in or approved by a significant portion of the electric industry during the relevant time period, or any of the practices, methods and acts which, in the exercise of reasonable judgment in light of the facts known at the time the decision was made, could have been expected to accomplish the desired result at a

reasonable cost consistent with good business practices, reliability, safety and expedition. Good Utility Practice is not intended to be limited to the optimum practice, method, or act to the exclusion of all others, but rather to be acceptable practices, methods, or acts generally accepted in the region.

Governmental Authority - Any federal, state, local or other governmental regulatory or administrative agency, court, commission, department, board, or other governmental subdivision, legislature, rulemaking board, tribunal, or other governmental authority having jurisdiction over the Parties, their respective facilities, or the respective services they provide, and exercising or entitled to exercise any administrative, executive, police, or taxing authority or power; provided, however, that such term does not include the Interconnection Customer, the Distribution Provider, or any Affiliate thereof.

Interconnection Customer - Any entity, including the Distribution Provider, Distribution Owner or any of the affiliates or subsidiaries of either, that proposes to interconnect its Generating Facility with the Distribution Provider's Distribution System. The definition of “Interconnection Customer” in this Agreement is intended to be identical to and used interchangeably with the definition of “Producer” in Rule 21.

Interconnection Facilities - The Distribution Provider's Interconnection Facilities and the Interconnection Customer's Interconnection Facilities. Collectively, Interconnection Facilities include all facilities and equipment between the Generating Facility and the Point of Interconnection, including any modification, additions or upgrades that are necessary to physically and electrically interconnect the Generating Facility to the Distribution Provider's Distribution System. Interconnection Facilities are sole use facilities and shall not include Distribution Upgrades or Network Upgrades.

Interconnection Handbook - A handbook, developed by the Distribution Provider and posted on the Distribution Provider’s website or otherwise made available by the Distribution Provider, describing the technical and operational requirements for wholesale generators and loads connected to the Distribution System, as such handbook may be modified or superseded from time to time. In the event of a conflict between the terms of this Agreement and the terms of the Distribution Provider’s Interconnection Handbook, the terms in this Agreement shall govern.

Network Upgrades - Additions, modifications, and upgrades to the Distribution Provider's Transmission System required at or beyond the point at which the Distribution System connects to the Distribution Provider’s Transmission System to accommodate the interconnection of the Generating Facility to the Distribution Provider’s Distribution System. Network Upgrades do not include Distribution Upgrades.

Operating Requirements - Any operating and technical requirements that may be applicable due to Regional Transmission Organization, the CAISO, balancing authority area, or the Distribution Provider's requirements, including those set forth in the Agreement.

Party or Parties - The Distribution Provider, Distribution Owner, Interconnection Customer, Producer or any combination of the above.

Point of Interconnection - The point where the Interconnection Facilities connect with the Distribution Provider's Distribution System.

Reasonable Efforts - With respect to an action required to be attempted or taken by a Party under the Agreement, efforts that are timely and consistent with Good Utility Practice and are otherwise substantially equivalent to those a Party would use to protect its own interests.

Transmission System - Those facilities owned by the Distribution Provider that have been placed under the CAISO's operational control and are part of the CAISO Grid.

Upgrades - The required additions and modifications to the Distribution Provider's Distribution System and Transmission System at or beyond the Point of Interconnection. Upgrades may be Network Upgrades or Distribution Upgrades. Upgrades do not include Interconnection Facilities.

RULE 21 GENERATOR INTERCONNECTION AGREEMENT FOR EXPORTING GENERATING FACILITIES — ATTACHMENT B —

Description and Costs of the Generating Facility, Interconnection Facilities and Metering Equipment

Equipment, including the Generating Facility, Interconnection Facilities, and metering equipment shall be itemized and identified as being owned by the Interconnection Customer, the Distribution Provider, or the Distribution Owner. The Distribution Provider will provide a best estimate itemized cost, including overheads, of its Interconnection Facilities and metering equipment, and a best estimate itemized cost of the annual operation and maintenance expenses associated with its Interconnection Facilities and metering equipment.

Additional Operating Requirements for the Distribution Provider's Distribution System and Affected Systems Needed to Support the Interconnection Customer's Needs

The Distribution Provider shall also provide requirements that must be met by the Interconnection Customer prior to initiating parallel operation with the Distribution Provider's Distribution System.

Distribution Provider's Description of its Upgrades and Cost Responsibility

The Distribution Provider shall describe Upgrades and provide an itemized best estimate of the cost, including overheads, of the Upgrades and annual operation and maintenance expenses associated with such Upgrades. The Distribution Provider shall functionalize Upgrade costs and annual expenses as either transmission or distribution related.

Electric Sample Form No. 79-1204 Sheet 1
Pilot Pedestal Program Application

Please Refer to Attached Sample Form

(Continued)

PILOT PEDESTAL PROGRAM APPLICATION FORM 79-1204

_____ (Customer Name), AN INDIVIDUAL (Applicant) has requested **PACIFIC GAS AND ELECTRIC COMPANY (PG&E),** a California corporation to perform the tariff schedule related work as located and described in paragraph 11 herein. PG&E agrees to perform the requested work and furnish all necessary labor, equipment, materials, and related facilities required therefore, subject to the following conditions:

1. Participation in the PG&E pilot pedestal program is limited to the following residential customers:

    a. Property owner is requesting temporary service for a property that was impacted by the Camp Fire and is located in a residential area where PG&E plans to underground services.

    b. Service can be fulfilled with a 125 amp service pedestal.

    c. Temporary service is requested before PG&E completes planned undergrounding of distribution assets in the area where the property is located.

2. Whenever part or all the requested work is to be furnished or performed upon property other than that specified in the Application, Applicant shall first procure from such owners all necessary rights-of-way and/or permits in a form satisfactory to PG&E and without cost to PG&E.

3. Applicant shall be responsible to pay all taxes applicable to receiving the asset and service provided through this contract.

4. Property owner must file an application for temporary service with PG&E that qualifies for a fee waiver due to a disaster under PG&E's Electric Rule 13. In order to properly track this request, the property owner cannot receive this free asset and service if they have another party (i.e. contractor) apply for service on their behalf.

5. PG&E shall not incur any expenses associated with the removal or retirement of the assets provided in this contract after installation is complete. Exceptions are when the customer changes to permanent service. At the time permanent service is installed PG&E will disconnect the service pedestal on behalf of the customer and leave the service pedestal on the property. Customer retains ownership of the pedestal and any connections made to the pedestal. If the customer does not switch to permanent service, PG&E is not responsible for removal of the service pedestal.

6. Applicant will own, operate, and maintain all assets provided in this contract at the location where PG&E terminates the cable at the meter pedestal termination facilities. Ownership transfers to the applicant at the time the electric meter is first energized. The applicant shall pay the costs of the repair or replacement of any part of the work which develops defects after the manufacturer's warranty period.

7. When customer is ready for permanent service, the customer must file an application for permanent service with PG&E. When the PG&E crews arrive to install the permanent service, PG&E will disconnect the temporary service pedestal from service. The customer will remain the owner of the pedestal and be responsible for disposing of it.

8. The location and requested work are described as follows: PG&E and licensed contractors retained by PG&E will install a temporary electric service pedestal at the location on the property where the existing gas stub (for properties that previously were served with gas) entered the property. Pedestals will be set a minimum of 10' into property and maximum footage of 20' unless PG&E agrees otherwise in writing at PG&E's sole discretion. Pedestals are supplied by PG&E and will be installed to manufacturer's specifications with no external connections. Several plugs are available, any additional circuits required must be installed by the Applicant's electrician.

9. The Pilot Pedestal Program will come to an end once the planned underground construction is complete in all residential neighborhoods impacted by the Camp Fire neighborhoods. PG&E may also suspend or terminate the pilot program at any time to evaluate the pilot program. Once the pilot program is suspended or terminated, current rules governing temporary service under Rule 13 would apply.

10. This Agreement has been submitted to the California Public Utilities Commission (CPUC) for review and is pending CPUC approval. If the CPUC approves this Agreement without change, this executed Agreement will continue to be in effect according to the terms outlined in this Agreement. If the CPUC does modify this Agreement, the applicant and PG&E agree that those changes will be automatically incorporated herein and applicant agrees to sign the new CPUC approved Agreement if requested by PG&E. If the request is made and the applicant does not comply expeditiously, the pedestal application may be paused by PG&E.

11. Applicant shall indemnify and hold harmless PG&E, its officers, agents and employees, contractors against all loss, damage, expense and liability resulting from injury to death of any person, including but not limited to, employees of PG&E, property of PG&E, Applicant or any third party, arising out of or in any way connected with the performance of this agreement, however caused, except to the extent caused by the active negligence or willful misconduct of PG&E, its officers,

agents, and employees. Applicant will, on PG&E's request, defend any suit asserting a claim covered by this indemnity. Applicant will pay all costs that may be incurred by PG&E in enforcing this indemnity, including reasonable attorney's fees.

12. This agreement shall at all times be subject to such modifications as the California Public Utilities Commission may direct from time to time in the exercise of its jurisdiction.

13. **LOCATION**: (Customer address)_____

Eligible Low-Income Development Virtual Net Energy Metering (NEM2VSOM) Interconnection Agreement For The Solar On Multifamily Affordable Housing (SOMAH) Program With Solar Generation Totaling 1 Mw Or Less

Please Refer to Attached Sample Form

(Continued)

ELIGIBLE LOW-INCOME DEVELOPMENT VIRTUAL NET ENERGY METERING (NEM2VSOM) INTERCONNECTION AGREEMENT FOR THE SOLAR ON MULTIFAMILY AFFORDABLE HOUSING (SOMAH) PROGRAM WITH SOLAR GENERATION TOTALING 1 MW OR LESS

Pacific Gas and Electric Company®

This *Eligible Low-Income Development Virtual Net Energy Metering (NEM2VSOM) Interconnection Agreement for Solar on Multifamily Affordable Housing (SOMAH) Program with Solar Generation Totaling 1 MW or Less*, (Agreement) is entered into by and between _____ (Customer-Generator), and Pacific Gas and Electric Company (PG&E), a California Corporation. Customer-Generator and PG&E are sometimes also referred to in this Agreement jointly as "Parties" or individually as "Party." In consideration of the mutual promises and obligations stated in this Agreement and its attachments, the Parties agree as follows:

1. SCOPE AND PURPOSE

This Agreement provides for Customer-Generator to interconnect and operate solar electric generation for the Customer-Generator or designated agent of the Customer-Generator sized no larger than for the energy requirements of all eligible Benefitting Accounts (as defined in Schedule NEM2VSOM).

The purpose of this Agreement is to allow the Customer-Generator to interconnect solar electric generation with PG&E's Electric System, subject to the provisions of this Agreement and PG&E's Rate Schedule NEM2VSOM. Customer-Generator has elected to interconnect and operate its solar electric Generation in parallel with PG&E's Electric System, to offset part or all of the Eligible Low-Income Development's own electrical requirements at the affiliated service points. Customer-Generator shall comply at all times with this Agreement as well as with all applicable laws, tariffs and applicable requirements of the Public Utilities Commission of the State of California.

2. SUMMARY AND DESCRIPTION OF CUSTOMER-GENERATOR'S GENERATING FACILITY AND DESIGNATION OF OTHERWISE-APPLICABLE RATE SCHEDULE

2.1 A description of the Generating Facility, including a summary of its significant components and a single-line diagram showing the general arrangement of how Customer-Generator's Generating Facility and loads are interconnected with PG&E's Electric System, is attached to and made a part of this Agreement. (This description is supplied by Customer-Generator as Appendix A).

2.2 Generating Facility identification number: _____ (Assigned by PG&E).

2.3 Customer-Generator's electric service agreement ID number: _____ (Assigned by PG&E).

2.4 Name and address used by PG&E to locate the electric service agreement ID number used to interconnect the Generating Facility with PG&E's Electric System:

Name: _____

Address: _____

City/Zip Code: _____

2.5 The Generating Facility's expected date of Initial Operation is _____.

The expected date of Initial Operation shall be within two years of the date of this Agreement.

3. DOCUMENTS INCLUDED AND DEFINED TERMS

3.1 This Agreement includes the following exhibits that are specifically incorporated herein and made a part of this Agreement.

Appendix A Description of Generating Facility and Single-Line Diagram (Supplied by Customer-Generator).

Appendix B A Copy of *PG&E's Agreement for Installation or Allocation of Special Facilities* (Forms 79-255, 79-280, 79-702) or *Agreements to Perform Any Tariff Related Work (62-4527*), if applicable (Formed by the Parties).

Appendix C NEMV, NEM2V, NEMVMASH, NEM2VMSH or NEM2VSOM Storage (if applicable)

In addition, PG&E Electric Tariff Rules and Rates, including but not limited to Electric Rules 2, 14, 15, 16, and 21, Schedule NEM2VSOM, and Customer-Generator's otherwise-applicable rate schedule, available at PG&E's website at www.pge.com or by request, are specifically incorporated herein and made part of this Agreement.

3.2 When initially capitalized, whether in the singular or in the plural, the terms used herein shall have the meanings assigned to them either in this Agreement or in PG&E's Electric Rule 21, Section C.

4. TERM AND TERMINATION

4.1 This Agreement shall become effective as of the last date entered in Section 17 below. The Agreement shall continue in full force and effect until the earliest date that one of the following events occurs:

(a) The Parties agree in writing to terminate the Agreement.

(b) Unless otherwise agreed in writing by the Parties, at 12:01 A.M. on the day following the date the electric service agreement ID number through which Customer-Generator's Generating Facility is interconnected to PG&E is closed or terminated.

(c) At 12:01 A.M. on the 61st day after Customer-Generator or PG&E provides written Notice pursuant to Section 10 below to the other Party of Customer-Generator's or PG&E's intent to terminate this Agreement.

4.2 Customer-Generator may elect to terminate this Agreement pursuant to the terms of Section 4.1(c) for any reason. PG&E may elect to terminate this Agreement pursuant to the terms of Section 4.1(c) for one or more of the following reasons:

(a) A change in applicable rules, tariffs, or regulations, as approved or directed by the Commission, or a change in any local, state or federal law, statute or regulation, either of which materially alters or otherwise affects PG&E's ability or obligation to perform PG&E's duties under this Agreement; or,

(b) Customer-Generator fails to take all corrective actions specified in PG&E's Notice that Customer-Generator's Generating Facility is out of compliance with the terms of this Agreement within the time frame set forth in such Notice; or,

(c) Customer-Generator abandons the Generating Facility. PG&E shall deem the Generating Facility to be abandoned if PG&E determines, in its sole opinion, the Generating Facility is nonoperational and Customer-Generator does not provide a substantive response to PG&E Notice of its intent to terminate this Agreement as a result of Customer-Generator's apparent abandonment of the Generating Facility affirming Customer-Generator's intent and ability to continue to operate the Generating Facility; or,

(d) Customer-Generator's Generating Facility ceases to meet all applicable safety and performance standards set out in Section 5.

4.3 Notwithstanding any other provisions of this Agreement, PG&E shall have the right to unilaterally file with the Commission, pursuant to the Commission's rules and regulations, an application to terminate this Agreement.

4.4 Any agreements attached to and incorporated into this Agreement shall terminate concurrently with this Agreement unless the Parties have agreed otherwise in writing.

5. GENERATING FACILITY REQUIREMENTS

5.1 Customer-Generator's Generating Facility must meet all applicable safety and performance standards established by the National Electrical Code, the Institute of Electrical and Electronics Engineers, and accredited testing laboratories such as Underwriters Laboratories and, where applicable, rules of the Commission regarding safety and reliability including Rule 21.

5.2 Customer-Generator shall: (a) maintain the Generating Facility and Interconnection Facilities in a safe and prudent manner and in conformance with all applicable laws and regulations including, but not limited to, Section 5.1, and (b) obtain any governmental authorizations and permits required for the construction and operation of the Generating Facility and Interconnection Facilities. Customer-Generator shall reimburse PG&E for any and all losses, damages, claims, penalties, or liability it incurs as a result of Customer-Generator's failure to obtain or maintain any governmental authorizations and permits required for construction and operation of Customer-Generator's Generating Facility.

5.3 Customer-Generator shall not commence parallel operation of the Generating Facility until PG&E has provided express written approval. Such approval shall normally be provided no later than thirty (30) business days following PG&E's receipt of: (1) a completed *Rule 21 Generator Interconnection Application* (Form 79-1174-02), including all supporting documents and payments as described in the Application; (2) a signed and completed *Eligible Low Income Development Virtual Net Energy Metering (NEM2VSOM) Interconnection Agreement for Solar on Multifamily Affordable Housing (SOMAH) Program with Solar Generation Totaling 1 MW or Less* (Form 79-1206-02); and (3) a copy of the Customer-Generator's final inspection clearance from the governmental authority having jurisdiction over the Generating Facility. Such approval shall not be unreasonably withheld. PG&E shall have the right to have representatives present at the Commissioning Test as defined in Rule 21. Customer-Generator shall notify PG&E at least five (5) business days prior to the initial testing.

5.4 In order to promote the safety and reliability of the customer Generating Facility, the Customer-Generator certifies that as a part of this interconnection request for NEM2VSOM, that all major solar system components are on the verified equipment list maintained by the California Energy Commission and certifies that other equipment, as determined by PG&E, has safety certification from a nationally recognized testing laboratory.

5.5 Customer-Generator certifies as a part of this interconnection request for NEM2 that

(i) a warranty of at least 10 years has been provided on all equipment and on its installation, or

(ii) a 10-year service warranty or executed "agreement" has been provided ensuring proper maintenance and continued system performance.

5.6 Customers on this tariff must pay for the interconnection of their Generation Facilities as provided in Electric Rule 21, pursuant to Decision 16-01-044.

5.7 For Customer-Generator applications received on or after September 9, 2017, the Customer-Generator certifies that their inverter-based Generating Facilities fully comply with Section Hh of Rule 21, including configuration of protective settings and default settings, in accordance with the specifications therein.

Distribution Provider may require a field verification of the Customer Generator inverter. Customer-Generator further agrees to cooperate fully with any such request and make their inverter available to the Distribution Provider for such verification. Customer-Generator understands that in the event the inverter is not set in accordance with Section Hh of Rule 21, Customer-Generator will need to cease operation of generating facility until verification is confirmed by Distribution Provider. (Solar Inverter models and firmware versions that comply with Rule 21 Section Hh can be found at to https://www.energy.ca.gov/programs-and-topics/topics/renewable-energy/solar-equipment-lists.)

Verification of inverter model's compliance with such requirements shall be provided by the Customer-Generator upon request by PG&E in accordance with PG&E's Electric Rule 21.

An "existing inverter" is defined as an inverter that is a component of an existing Generating Facility that meets one or more of the following conditions:

(a) it is already approved by PG&E for interconnection prior to September 9, 2017
(b) the Customer-Generator has submitted the interconnection application prior to September 9, 2017,
(c) the Customer-Generator provides evidence of having applied for an electrical permit for the Generating Facility installation that is dated prior to September 9, 2017 and submitted a complete interconnection application[1] no later than March 31, 2018, or
(d) the Customer-Generator provides evidence of a final inspection clearance from the governmental authority having jurisdiction over the Generating Facility prior to September 9, 2017.

All "existing inverters" are not required to be Smart Inverters and are only subject to Section H of Rule 21. Customer-Generator replacing an "existing inverter" certifies it is being replaced with either:

(i) inverter equipment that complies with Section Hh of Rule 21, (encouraged); or
(ii) a conventional inverter that is of the same size and equivalent ability to that of the inverter being replaced, as allowed in Rule 21 Section H.3.d.ii.

[1]A complete application consists all of the following without deficiencies:
1. A completed Interconnection Application including all supporting documents and required payments
2. A completed signed Interconnection Agreement
3. Evidence of the Customer-Generator final inspection clearance from the governmental authority having jurisdiction over the generating system.

6. INTERCONNECTION FACILITIES

6.1 Customer-Generator and/or PG&E, as appropriate, shall provide Interconnection Facilities that adequately protect PG&E's Electric System, personnel, and other persons from damage or injury, which may be caused by the operation of Customer-Generator's Generating Facility.

6.2 Customer-Generator shall be solely responsible for the costs, design, purchase, construction, permitting, operation, and maintenance of the Interconnection Facilities that Customer-Generator owns.

6.3 If the provisions of PG&E's Electric Rule 21, or any other tariff or rule approved by the Commission, require PG&E to own and operate a portion of the Interconnection Facilities, Customer-Generator and PG&E shall promptly execute an Special Facilities Agreement that establishes and allocates responsibility for the design, installation, operation, maintenance, and ownership of the Interconnection Facilities. This Special Facilities Agreement shall be attached to and made a part of this Agreement as Appendix B.

7. LIMITATION OF LIABILITY

Each Party's liability to the other Party for any loss, cost, claim, injury, liability, or expense, including reasonable attorney's fees, relating to or arising from any act or omission in its performance of this agreement, shall be limited to the amount of direct damage actually incurred. In no event shall either Party be liable to the other Party for any indirect, special, consequential, or punitive damages of any kind whatsoever.

8. INSURANCE

Customer-Generator Facility is required to comply with standards and rules set forth in Section 5 and provide the following for insurance policies in place.

To the extent that Customer-Generator has currently in force property insurance and commercial general liability or personal liability insurance, Customer-Generator agrees that it will maintain such insurance in force for the duration of this Agreement in no less amounts than those currently in effect. Pacific Gas and Electric Company shall have the right to inspect or obtain a copy of the original policy or policies of insurance prior to commencing operation. As long as Customer-Generator meets the requirements of this section, Customer-Generator shall not be required to purchase any additional liability insurance.

❑ I have insurance. I hereby certify that there is presently insurance coverage in the amount of $_____ for the Schedule NEM2VSOM Generating Facility location.

Insuring Company's Name: _____

Insurance Policy # _____

❑ I do not have insurance. I hereby certify that there is presently $0 (zero) dollars of insurance for the Schedule NEM2VSOM Generating Facility location.

9. INDEMNITY FOR FAILURE TO COMPLY WITH INSURANCE PROVISIONS

9.1 If Customer-Generator fails to comply with the insurance provisions of this Agreement, Customer-Generator shall, at its own cost, defend, save harmless and indemnify PG&E, its directors, officers, employees, agents, assignees, and successors in interest from and against any and all loss, liability, damage, claim, cost, charge, demand, or expense of any kind or nature (including attorney's fees and other costs of litigation) resulting from the death or injury to any person or damage to any property, including the personnel and property of the utility, to the extent that the utility would have been protected had Customer-Generator complied with all such insurance provisions. The inclusion of this Section 9.1 is not intended to create any expressed or implied right in Customer-Generator to elect not to provide any such required insurance.

9.2 The provisions of this Section 9 shall not be construed to relieve any insurer of its obligations to pay any insurance claims in accordance with the provisions of any valid insurance policy.

10. NOTICES

10.1 Any written notice, demand, or request required or authorized in connection with this Agreement (Notice) shall be deemed properly given if delivered in person or sent by first class mail, postage prepaid, to the person specified below:

If to PG&E:

Pacific Gas and Electric Company
Attention: Electric Generation Interconnection - Contract Management
245 Market Street
Mail Code N7L
San Francisco, California 94105-1702

If to Customer-Generator:

Customer-Generator Name: _____

Address: _____

City: _____

Phone: ( ) _____

FAX: ( ) _____

10.2 A Party may change its address for Notices at any time by providing the other Party notice of the change in accordance with Section 10.1.

10.3 The Parties may also designate operating representatives to conduct the daily communications, which may be necessary or convenient for the administration of this Agreement. Such designations, including names, addresses, and phone numbers may be communicated or revised by one Party's Notice to the other.

11. REVIEW OF RECORDS AND DATA

11.1 PG&E shall have the right to review and obtain copies of Customer-Generator's operations and maintenance records, logs, or other information such as Generating Facility availability, maintenance outages, circuit breaker operation requiring manual reset, relay targets and unusual events pertaining to Customer-Generator's Generating Facility or its interconnection to PG&E.

11.2 Customer-Generator authorizes to release to the California Energy Commission (CEC) information regarding Customer-Generator's facility, including customer name and Generating Facility location, size, and operational characteristics, as requested from time to time pursuant to the CEC's rules and regulations.

12. ASSIGNMENT

Customer-Generator shall not voluntarily assign its rights nor delegate its duties under this Agreement without PG&E's written consent. Any assignment or delegation Customer-Generator makes without PG&E's written consent shall not be valid. PG&E shall not unreasonably withhold its consent to Customer-Generator's assignment of this Agreement.

13. NON-WAIVER

None of the provisions of this Agreement shall be considered waived by a Party unless such waiver is given in writing. The failure of a Party to insist in any one or more instances upon strict performance of any of the provisions of this Agreement or to take advantage of any of its rights hereunder shall not be construed as a waiver of any such provisions or the relinquishment of any such rights for the future, but the same shall continue and remain in full force and effect.

14. GOVERNING LAW, JURISDICTION OF COMMISSION, INCLUSION OF PG&E's TARIFF SCHEDULES AND RULES

14.1 This Agreement shall be interpreted, governed, and construed under the laws of the State of California as if executed and to be performed wholly within the State of California without giving effect to choice of law provisions that might apply to the law of a different jurisdiction.

14.2 This Agreement shall, at all times, be subject to such changes or modifications by the Commission as it may from time to time direct in the exercise of its jurisdiction.

14.3 The interconnection and services provided under this Agreement shall at all times be subject to the terms and conditions set forth in the Tariff Schedules and Rules applicable to the electric service provided by PG&E, which Tariff Schedules and Rules are hereby incorporated into this Agreement by this reference.

14.4 Notwithstanding any other provisions of this Agreement, PG&E shall have the right to unilaterally file with the Commission, pursuant to the Commission's rules and regulations, an application for change in rates, charges, classification, service, tariff or rule or any agreement relating thereto.

15. AMENDMENT AND MODIFICATION

This Agreement can only be amended or modified by a writing signed by both Parties.

16. ENTIRE AGREEMENT

This Agreement, including any incorporated Tariff Schedules and Rules, contains the entire Agreement and understanding between the Parties, their agents, and employees as to the subject matter of this Agreement. Each party also represents that in entering into this Agreement, it has not relied on any promise, inducement, representation, warranty, agreement or other statement not set forth in this Agreement or in the incorporated Tariff Schedules and Rules.

17. SIGNATURES

IN WITNESS WHEREOF, the Parties hereto have caused this Agreement to be executed by their duly authorized representatives. This Agreement is effective as of the last date set forth below.

AGREEMENT FOR INSTALLATION OR ALLOCATION OF SPECIAL FACILITIES

At the request of _____
(Applicant), PACIFIC GAS AND ELECTRIC COMPANY (PG&E) hereby agrees, as an accommodation, to install at the Applicant's expense within a reasonable time, or allocate for Applicant's use at

_____

_____
State of California, certain facilities consisting of _____(Special Facilities), at an estimated total additional installed cost of $ _____ over and above the cost of standard facilities which PG&E would normally provide or allocate for regular service in accordance with its tariffs on file with and authorized by the California Public Utilities Commission (Commission), subject to the following terms and conditions:

1. Applicant shall pay to PG&E, on demand and in advance of construction by PG&E, the initial sum of:

   (a) $ _____ (Advance) which consists of a credit of $ _____ for that portion of the facilities provided by and conveyed to PG&E by the Applicant, and Applicant's payment of $ _____ representing PG&E's additional costs for Special Facilities; plus,

   (b) $ _____ (Rearrangement) a non-refundable amount representing PG&E's cost of rearranging existing facilities to accommodate the installation of the Special Facilities.

2. Applicant shall also pay to PG&E, in addition to the monthly rates and charges for service, at the option of PG&E, either:

   (a) A monthly charge for the Special Facilities of $ _____ (Cost of Ownership Charge) representing the continuing ownership costs of the Special Facilities (_____% per month) as determined in accordance with the applicable percentage rate established in the Special Facilities section of PG&E's applicable Gas or Electric Rule No. 2, copy attached; or,

   (b) $ _____ (Equivalent One-Time Payment) which is the present worth of the monthly ownership costs (%) for the Special Facilities in perpetuity. Refunds and adjustments, if any, of the Advance and Equivalent One-Time Payment will be made in accordance with paragraph 13. Interest at the rate of _____% annually will be added to the unamortized balance of the Equivalent One-Time Payment on each anniversary of the date the Special Facilities are first made available, as such date is established in PG&E's records, before the current year's Cost of Ownership Charges are deducted.

   The monthly Cost of Ownership Charge shall commence on the date the Special Facilities are first available for Applicant's use, as such date is established in PG&E's records. PG&E will notify Applicant, in writing, of such commencement date.

3. The annual ownership cost used to determine the Equivalent One-Time Payment or used to determine the monthly charges in paragraph 2 above shall automatically increase or decrease without formal amendment to this agreement if the Commission should subsequently authorize a higher or lower percentage rate for monthly costs of ownership for Special Facilities as stated in Rule No. 2, effective with the date of such authorization. Thereafter, such revised annual ownership cost shall also be used to determine the unamortized balance of the Equivalent One-Time Payment, as provided in paragraph 13.(a).

Pacific Gas and Electric Company

AGREEMENT FOR INSTALLATION OR ALLOCATION OF SPECIAL FACILITIES

4. Where it is necessary to install Special Facilities on Applicant's premises, Applicant hereby grants to PG&E:
   (a) the right to make such installation on Applicant's premises along the shortest practical route thereon and of sufficient width to provide legal clearance from all structures now or hereafter erected on Applicant's premises for any facilities of PG&E; and,
   (b) the right of ingress to and egress from Applicant's premises at all reasonable hours for any purposes reasonably connected with the operation and maintenance of the Special Facilities.
5. Where formal rights of way or easements are required on and over Applicant's property or the property of others for the installation of the Special Facilities, Applicant understands and agrees that PG&E shall not be obligated to install the Special Facilities unless and until any necessary permanent rights of way or easements, satisfactory to PG&E, are granted without cost to PG&E.
6. PG&E shall not be responsible for any delay in completion of the installation of the Special Facilities resulting from shortage of labor or materials, strike, labor disturbance, war, riot, weather conditions, governmental rule, regulation or order, including orders or judgments of any court or Commission, delay in obtaining necessary rights of way and easements, act of God, or any other cause or condition beyond the control of PG&E. PG&E shall have the right, in the event it is unable to obtain materials or labor for all of its construction requirements, to allocate materials and labor to construction projects which it deems, in its sole discretion, most important to serve the needs of its customers, and any delay in construction hereunder resulting from such allocation shall be deemed to be a cause beyond PG&E's control.
7. In the event that PG&E is prevented from completing the installation of the Special Facilities for reasons beyond its control within twelve (12) months following the date of this Agreement, PG&E shall have the right to terminate this Agreement upon thirty (30) days' written notice to Applicant.
8. If this Agreement is terminated as set forth in paragraph 7, the provisions of paragraph 13 shall be applicable, based on that portion of the Special Facilities then completed, if any, including charges for any expense incurred by PG&E for any engineering, surveying, right of way acquisition expenses and other associated expenses incurred by PG&E for that portion of the Special Facilities not installed or, in PG&E's sole judgment, not useful in supplying permanent service to PG&E's other customers.
9. Special Facilities provided by PG&E hereunder shall at all times be and remain the property of PG&E.
10. As provided in PG&E's applicable Electric Rule 14 or Gas Rules 14 and 21, copies attached, Applicant understands that PG&E does not gurantee electric or gas service to be free from outages, interruptions or curtailments and that the charges for the Special Facilities represent the additional cost associated with providing the Special Facilities rather than for a guaranteed level of service or reliability.
11. If it becomes necessary for PG&E to alter or rearrange the Special Facilities, including, but not limited to the conversion of overhead facilities to underground, Applicant shall be notified of such necessity and shall be given the option to either terminate this Agreement in accordance with paragraphs 12 and 13, or to pay PG&E additional Special Facilities consisting of:
    (a) A facility termination charge for that portion of the Special Facilities which is being removed because of alteration or rearrangement. Such charge to be determined in the same manner as described in paragraph 13; plus,
    (b) An additional Advance and/or rearrangement costs, if any, for any new Special Facilities requested which shall be determined in the same manner as described in paragraph 1; plus,
    (c) A revised Equivalent One-Time Payment or monthly charge based on the total net estimated additional installed costs of all new and remaining Special Facilities. Such revised Equivalent One-Time Payment or monthly charge shall be determined in the same manner as described in paragraphs 2 and 3.

12. This Agreement shall be effective when executed by the parties hereto and shall remain in effect until terminated by either party on at least thirty (30) days' advance written notice.
13. Upon discontinuance of the use of any Special Facilities due to termination of service, termination of this Agreement, or otherwise:
    (a) Applicant shall pay to PG&E on demand (in addition to all other monies to which PG&E may be legally entitled by virtue of such termination) a facility termination charge defined as the estimated installed cost, plus the estimated removal cost, less the estimated salvage value for the Special Facilities to be removed, as determined by PG&E in accordance with its standard accounting practices. PG&E shall deduct from the facility termination charge the Advance plus the unamortized balance of the Equivalent One-Time Payment previously paid, if any. If the Advance paid plus the unamortized balance of the Equivalent One-Time Payment is greater than the facility termination charge, PG&E shall refund the difference, without interest, to the Applicant;
    (b) PG&E shall be entitled to remove and shall have a reasonable time in which to remove any portion of the Special Facilities located on the Applicant's premises;
    (c) PG&E may, at its option, alter, rearrange, convey or retain in place any portion of the Special Facilities located on other property off Applicant's premises. Where all or any portion of the Special Facilities located off Applicant's premises are retained in place and used by PG&E to provide permanent service to other customers, an equitable adjustment will be made in the facility termination charge.
14. Applicant may, with PG&E's written consent, assign this Agreement if the assignee thereof will agree in writing to perform Applicant's obligations hereunder. Such assignment will be deemed to include, unless otherwise specified therein, all of Applicant's rights to any refunds which might become due upon discontinuance of the use of any Special Facilities.
15. This agreement shall be subject to all of PG&E's applicable tariffs on file with and authorized by the Commission and shall at all times be subject to such changes or modifications as the Commission may direct from time to time in the exercise of its jurisdiction.

Dated this _____ day of _____, 20____.

This agreement is effective when accepted and executed by PG&E.

Agreement for Installation or Allocation of Special Facilities for Parallel Operation of NonUtility-Owned Generation and/or Electrical Standby Service[1] (Electric Rules 2 and 21)

At the request of _____, (Applicant), **PACIFIC GAS AND ELECTRIC COMPANY (PG&E)** hereby agrees to furnish at Applicant's expense within a reasonable time certain facilities consisting of _____ (Special Facilities). Such Special Facilities are expected to be necessary on or about _____ for the interconnection of Applicant's electric generating plant with PG&E's system and/or PG&E's delivery of electrical standby service to Applicant's premises at _____, County of _____, State of California.

1. This Agreement includes Appendix A, Detail of Special Facilities Charges, which is attached and incorporated herein by reference. Appendix A may be revised or superseded by mutual written agreement and without formal amendment of the remainder of this agreement.

2. Applicant shall pay PG&E, on demand prior to commencement of any work by PG&E, an initial charge equal to the sum of the amounts which are specified in Appendix A.

3. Applicant also shall pay PG&E any applicable monthly rates and charges for service under PG&E's tariff schedules plus an ownership charge, either (a) or (b) below as specified in Appendix A, namely:

   (a) COST-OF-OWNERSHIP CHARGE representing PG&E's continuing monthly cost of financing (if applicable), owning and maintaining Special Facilities; or

   (b) An EQUIVALENT ONE-TIME CHARGE which is equal to the present worth of the monthly COST-OF-OWNERSHIP CHARGE in perpetuity. The COST-OF-OWNERSHIP CHARGE shall commence on the date Special Facilities are first available for Applicant's use, as such date is established in PG&E's records. PG&E will notify Applicant, in writing, of such commencement date. The EQUIVALENT ONE-TIME CHARGE (if applicable) shall be payable by Applicant to PG&E on demand.

4. The ownership charge set forth in paragraphs 3(a) or 3(b) herein is determined in accordance with the applicable percentage rates established in the Special Facilities section of PG&E's electric Rule 2, copy attached. Should the California Public Utilities Commission (Commission) subsequently authorize higher or lower percentage rates, the monthly COST-OF-OWNERSHIP CHARGE shall automatically increase or decrease without formal amendment to Appendix A as of the effective date of the Commission's authorization.

5. Where it is necessary to install Special Facilities on Applicant's premises, Applicant hereby grants to PG&E:

   (a) the right to make such installation on Applicant's premises along the shortest practical route thereon with sufficient legal clearance from all structures now or hereafter erected on Applicant's premises; and

   (b) the right of ingress and egress from Applicant's premises at all reasonable hours for any purposes reasonably connected with the operation and maintenance of Special Facilities.

6. Where formal rights of way or easements are required on or over property of Applicant or the property of others for the installation of Special Facilities, Applicant agrees that PG&E shall obtain them at Applicant's expense, or if Applicant and PG&E agree otherwise, Applicant shall obtain any necessary permanent rights of way or easements, satisfactory to and without cost to PG&E.

7. PG&E shall not be responsible for any delay in completion of the installation of Special Facilities resulting from shortage of labor or materials, strike, labor disturbance, war, riot, weather conditions, governmental rule, regulation or order, including orders or judgments of any court or regulatory agency, delay in obtaining necessary rights of way and easements, acts of God, or any other cause or condition beyond the control of PG&E, nor shall PG&E be liable for incidental, indirect, special, punitive, or consequential damages for any such delay. PG&E shall have the right, if for one of the above reasons it is unable to obtain materials or labor for all of its construction requirements, to allocate materials and labor to construction projects which it deems, in its sole discretion, most important to serve the needs of its customers, and any delay in construction, hereunder resulting from such allocation shall be deemed to be a cause beyond PG&E's control. In any event, PG&E's total liability for any delay in the completion of the installation of Special Facilities shall not exceed the amount of Special Facilities Charges paid by Applicant.

† Information collected on this form is used in accordance with PG&E's Privacy Policy.
The Privacy Policy is available at pge.com/privacy.

8. In the event that PG&E is prevented from completing the installation of Special Facilities for reasons beyond its control after twelve (12) months following the date of this Agreement, PG&E shall have the right to supersede this Agreement subject to Applicant's election as provided below upon at least thirty (30) days' written notice to Applicant and adjust any amounts paid or required to be paid by Applicant hereunder that may be due based on that portion of the Special Facilities then completed, if any, utilizing the estimated costs developed by PG&E for this Agreement. Such a superseding agreement, if any, shall be in substantially the same form as this agreement, be executed by both parties hereto, and shall provide that costs be allocated to the portion of the Special Facilities then completed, if any, consistent with those costs estimated by PG&E for this agreement. If Applicant elects not to execute a superseding agreement, this agreement shall be terminated and the provisions of paragraph 11 herein shall be applied to that portion of Special Facilities then completed, if any. Applicant also shall reimburse PG&E for any expenses it may have incurred for engineering, surveying, right of way acquisition and other work associated with that portion of Special Facilities not installed

9. If it becomes necessary for PG&E to alter rearrange or make addition to Special Facilities in order to maintain parallel operation of Applicant's generation or electrical standby service to Applicant's premises, Applicant shall be notified, in writing, of such necessity and shall be given the option to either terminate this Agreement upon thirty (30) days' written notice to PG&E, or to pay to PG&E additional Special Facilities charges consisting of:

   (a) a facility termination charge for that portion of Special Facilities which is being removed because of alteration, rearrangement or addition to Special Facilities. Such charge to be determined in the same manner as described in paragraph 11 herein; plus,

   (b) an additional ADVANCE and/or REARRANGEMENT CHARGE, if any for any new Special Facilities which shall be applied in the same manner as prescribed in paragraph 2 herein; plus,

   (c) a revised monthly COST-OF-OWNERSHIP CHARGE or EQUIVALENT ONE-TIME CHARGE based on the estimated installed costs of all new and remaining Special Facilities. Such revised monthly COST-OF-OWNERSHIP CHARGE or EQUIVALENT ONE-TIME CHARGE shall be applies in the same manner as prescribed in paragraph 3 herein.

10. This Agreement shall become effective when executed by the parties hereto and, except as provided for in paragraphs 8 and 9 herein, shall remain in force until one of the following events occurs:

   (a) a power purchase, parallel operation, electrical standby service or other form of agreement no longer exists between Applicant and PG&E which would occasion the need for Special Facilities; or

   (b) the ownership of Special Facilities or any portion thereof is deeded to a public authority; or

   (c) Applicant fails to pay the monthly COST-OF-OWNERSHIP CHARGE prescribed in the Agreement, if applicable.

   Either party shall provide the other at least thirty (30) days' written notice of termination pursuant to this paragraph.

11. Upon termination of the Agreement for any reason:

   (a) Applicant shall pay to PG&E on written demand (in addition to all other monies to which PG&E may be legally entitled by virtue of such termination) a facility termination charge defined as the estimated installed cost, plus the estimated removal cost less the estimated salvage value for any Special Facilities which can be removed, all as determined by PG&E in accordance with its standard accounting practices. PG&E shall deduct from the facility termination charge the ADVANCE plus the unamortized balance of the EQUIVALENT ONE-TIME CHARGE previously paid, if any. If the ADVANCE paid plus the unamortized balance of the EQUIVALENT ONE-TIME CHARGE, if any, is greater than the facility termination charge, PG&E shall refund the difference, without interest to Applicant; and

   (b) PG&E shall be entitled to remove and shall have a reasonable time in which to remove any portion of the Special Facilities located on the Applicant's premises; and

   (c) PG&E may, at its option, alter, rearrange, convey or retain in place any portion of the Special Facilities located on other property off Applicant's premises. Where all or any portion of the Special Facilities located off Applicant's premises are retained in place in anticipation of providing permanent service to customers of PG&E, an equitable adjustment shall be made in the facility termination charge.

Agreement for Installation or Allocation of Special Facilities for Parallel Operation of NonUtility-Owned Generation and/or Electrical Standby Service (Electric Rules 2 and 21)

12. In the event any of the Special Facilities are used during the term of this Agreement to provide permanent service to customers of PG&E, an adjustment shall be made in accordance with PG&E's electric Rule 21, copy attached.

13. Special Facilities shall at all times be the property of PG&E.

14. As provided in PG&E's electric Rule 14, copy attached, PG&E does not guarantee electrical standby service to be free from outages, interruptions or curtailments and the charges for Special Facilities represent PG&E's cost associated with providing Special Facilities rather than for a guaranteed level of service or reliability.

15. Applicant may, with PG&E's written consent, assign this Agreement if the assignee thereof will agree in writing to perform Applicant's obligations hereunder. Such assignment will be deemed to include, unless otherwise specified therein, all of Applicant's rights to any refunds which might become due upon discontinuance of the use of any Special Facilities.

16. This Agreement shall be subject to all of PG&E's applicable tariffs on file with and authorized by the Commission, and shall at all times be subject to such changes or modifications as the Commission may direct from time to time in the exercise of its jurisdiction.

CDx/Acct#:_____
_____

This is an agreement between Pacific Gas and Electric Company (PG&E), a California corporation, and _____ (Customer), a(n) _____. This agreement will be herein referred to as "Agreement".

Customer has requested PG&E to provide standby service at Customer's premises at _____, County of_____ California, under one of the standby options designated below:

[ ] **Option 1 – PG&E Standby Through Non-PG&E Supply Facilities –** Standby service for customers whose supply requirements would otherwise be delivered through PG&E owned facilities (including Independent System Operator controlled transmission facilities), are regularly and completely supplied through facilities not owned by PG&E.

The non-utility owned generating facilities have a total rated capacity of approximately _____kVA.

All PG&E power deliveries will be made under Schedule S or Schedule SB -- *Standby Service*.

[ ] **Option 2 – PG&E Standby When Service is from Another Utility –** Standby service for customers who regularly take electric service from another public utility but desire PG&E to reserve its generation, transmission or distribution capacity for their use:

Customer currently is supplied regular electric service from another utility's generation, transmission, or distribution system; Customer may be alternately served by PG&E by means of a double-throw switch. Both PG&E and the other utility have consented to this arrangement. Customer's maximum demand from electric equipment on his premises is _____kW.

All PG&E power deliveries will be made under Schedule S or Schedule SB.

This option is closed to all new customers after January 19, 2001.

[ ] **Option 3 – PG&E Standby for Non-Continuous/Irregular PG&E Supply –** Standby service for customers who require PG&E to reserve transmission or distribution capacity and stand ready at all times to deliver electricity on an irregular or non-continuous basis:

Customer has a) a premise which is normally, in part but not in whole, served by non-utility owned generation facilities with a total rated capacity of less than 50 percent of Customer's maximum demand for that premise, or b) a premise which qualifies for back-up service under the provisions of Special Condition 7 of Schedule S or Schedule SB (See Option 4) but chooses not to elect Option 4 or currently lacks the necessary on-site metering to bill Option 4 properly, or c) electrical equipment

which is used on an irregular or non-continuous basis. The total rated capacity of Customer's generation facilities or irregularly utilized equipment is _____ kVA.

Customer will be billed for all PG&E power deliveries on the otherwise applicable rate schedule; however, Special Conditions 1 through 6 and 8, 9, and 10 of Schedule S or Schedule SB will also apply to Customer's service.

[ ] **Option 4 – PG&E Supplemental (Back-up and Maintenance) Standby Service –** Standby service for customers who do not meet the criteria described in Option 1 and 2 above, but elect to receive back-up and maintenance portion of their total standby requirements under the provisions of Special Condition 7 of Schedule S or Schedule SB:

At least 50 percent of Customer's maximum electric demand is served by a non-utility owned generator, and all necessary metering has been installed (by May 1, 1994, or the effective date of the contract) by PG&E to separately measure Customers net on-site generation and on-site load requirements. Customer would otherwise, except for such generation, qualify for service under Schedule E-19 (mandatory), E-20, B-19 or B-20.

Customer will be billed for the back-up and maintenance portion of the premises' total service requirements under the provisions of Special Condition 7 of Schedule S or Schedule SB, and for its ordinary supplemental power requirements (on-site load in excess of the capability of the customer's non-utility owned generation) under the provisions of the otherwise applicable rate schedule. All back-up and maintenance power deliveries by PG&E will be billed in accordance with Schedule S or Schedule SB. The total rated capacity of Customer's generation is kVA.

[ ] **Option 5 – PG&E Standby for Station Load Self-Supply –** Standby service for customers, whose supply requirements would otherwise be delivered through PG&E owned facilities (including Independent System Operator controlled transmission facilities), where the customers' Station Power requirements are regularly supplied through generating units in accord with the customer's CAISO-approved Station Power Portfolio (SPP), as described under the provisions of Special Condition 15 of Schedule S or Schedule SB .

PU Code 353 exemption:

Standby service for customers who qualify for exemption under PU Code 353 and elect to take this exemption.

[ ] *Customers does NOT qualify for PU Code 353 exemption*

[ ] Customers with supplemental power requirements:

*For customers with supplemental power requirements (on-site load in excess of the capability of the customer's non-utility owned generation) under the provisions of the otherwise applicable rate schedule, Special Conditions 1 through 7 of Schedule S or Schedule SB will **not** apply. (Option 3)*

[ ] Customers with excess generation:

For those customers who operate electric generation equipment capable of serving their entire load and elect to take this exemption, Special Condition 1 (reservation capacity) will

***not** apply. All other applicable charges of Schedule S or Schedule SB will apply. (Options 1, 2 and 4)*

Terms and Conditions

1. Customer has requested PG&E to stand ready at all times to deliver or supply and deliver electric energy to Customer's premises on an as-needed basis. Such standby service shall be provided to Customer in accordance with and subject to PG&E's applicable rates and rules as established from time to time by, and on file with, the California Public Utilities Commission (Commission).

2. PG&E shall be granted, without cost to it, all necessary rights-of-way and easements, satisfactory to PG&E, in both location and form of document, to establish such service.

3. All necessary service facilities to accommodate Customer's load shall be furnished by PG&E and Customer as specified in electric line extension and service rules or the otherwise appropriate extension agreements. Any necessary extensions and reinforcements of PG&E's distribution and transmission facilities that are furnished by PG&E at Customer's expense in accordance with either a separate line extension or special facilities agreement, in accordance with the applicable tariffs.

4. All facilities furnished by PG&E to provide electric service at all times shall be and remain the property of PG&E notwithstanding that they may be affixed to Customer's property. PG&E may remove such facilities upon termination of the Agreement.

5. During the term of this Agreement, Customer grants to PG&E the right to operate, maintain, replace, and repair PG&E's facilities on Customer's premises necessary to provide standby service hereunder and all rights necessary for access to and from such facilities at all reasonable times.

6. All standby electric service provided shall be _____ phase, 60 hertz, alternating current at an electromotive force of approximately ___ volts. Allowable variations in this frequency and voltage are specified in PG&E's electric Rule 2. The delivery point for PG&E's standby service shall be considered the point where conductors owned, or under license by Customer, contact PG&E's conductors, or as otherwise designated by applicable rules.

7. The initial reserved capacity for standby service shall be ___kW (Reservation Capacity) and shall be billed monthly at the rate described in the "Rates" section of Schedule S or Schedule SB.

   If the Customer is already receiving standby service from PG&E under a preceding contract, that contracted or reserved capacity, or the amount of capacity to which that contract has been subsequently ratcheted, shall automatically become the Customer's Reservation Capacity, until the ratchet period ends unless the Reservation Capacity has been increased in accordance with the preceding paragraph.

8. Customer elects to receive any backup and maintenance service that is to be billed under the provisions of Schedule S or Schedule SB under the following terms: _____ Firm Service Only.

9. If Customer has a generator and wishes to operate that generator in parallel with PG&E's system, Customer must also execute either a power purchase agreement, or parallel operation agreement, or applicable interconnection agreement with PG&E. Interconnection and operation of all non-utility owned generation paralleling with PG&E's system will be treated in accordance with electric Rule

21. Customers may need to meet those requirements as imposed by other governing entities having jurisdiction including the Independent System Operator and the Western Systems Coordinating Council.

10. Customer shall pay PG&E the monthly charges for the standby service provided hereunder at any established office of PG&E.

11. The initial term of this Agreement shall be for a period of one (1) year from the date the standby service under this Agreement is first made available to Customer as such date is established in PG&E's records and shall continue thereafter from year to year. Customer may terminate this Agreement at the expiration of the initial or any subsequent one-year term, or PG&E may terminate this Agreement in accordance with its tariffs, provided that written notice of such termination is given to the other party at least thirty (30) days prior to such termination date.

12. Customer may, with PG&E's written consent, assign this Agreement to a subsequent owner of the premises if the assignee will, in writing; agree to perform the obligations of the Agreement.

13. This Agreement shall, at all times, be subject to such changes or modifications by the Commission as it may from time to time direct in the exercise of its jurisdiction.

Agreement for Installation or Allocation of Special Facilities for Parallel Operation of Nonutility-Owned Generation and/or Electrical Standby Service*

APPENDIX – A
Detail of Special Facilities Charges

Dated:_____

I. Applicability

The application of charges specified herein are pursuant to the provisions of this Agreement between_____ _____ (Applicant) and Pacific Gas and Electric Company (PGandE) and shall be a part thereof and in effect until superseded by mutual written agreement.

II. Initial Charge

A. Net cost of all Special Facilities $_____

B. Less the cost of "removable and reusable" Special Facilities which are provided, installed and financed by PGandE pursuant to Rule No. 21 $(_____)[1]

C. ADVANCE equal to PG&E's estimated installed Cost of Special Facilities which are financed by Applicant, including in lieu of cash payment, a credit for that portion of Special Facilities furnished and deeded to PG&E by Applicant (line A + line B) $(_____)[1]

D. Less PG&E's estimate of the cost of Special Facilities provided, installed and deeded to PG&E by Applicant (includes costs of design and administration by PG&E) $(_____)

E. Plus the costs of design, administration and inspection by PG&E of Special Facilities provided, installed and deeded to PG&E by Applicant $_____

F. Plus REARRANGEMENT CHARGE which is equal to PG&E's estimated cost of rearranging existing facilities to accommodate the installation of Special Facilities $_____

G. Plus CIAC Tax if applicable (line C + line E+ line F x Applicable CIAC Tax[2] of (_____%) $_____

H. Initial Charge (does not include monthly Cost-of-Ownership Charge--see below $_____

III. Installed Cost of PGandE's Existing Facilities Allocated to Applicant's Use $_____[1]

* This agreement at all times shall be subject to such modifications as the California Public Utilities Commission may direct from time to time in the exercise of its jurisdiction.

1 Used in calculation of the monthly COST OF OWNERSHIP CHARGE or EQUIVALENT ONE-TIME CHARGE.

2 See the Income Tax Component of Contribution Provision in the Electric Preliminary Statement for the current applicable CIAC tax rate.

SUPPLEMENTAL AGREEMENT FOR AS-AVAILABLE CAPACITY

This supplemental agreement is made between _____ (Applicant), and PACIFIC GAS AND ELECTRIC COMPANY (PG&E), a California Corporation, and shall be made part of the_____ (Agreement), dated _____ between these two parties.

RECITALS:

Applicant recognizes that PG&E is required by its California Public Utilities Commission (Commission) authorized tariffs to design its gas and electric facilities to provide adequate capacity to meet the maximum demands of Applicant's loads during normal, non-emergency, conditions. It is also understood that to achieve this degree of service reliability at Applicant's business facility, which is located at_____ _____(Site), reinforcement work must be done to PG&E's existing system at a substantial cost to both parties. Therefore, PG&E and Applicant agree as follows:

AGREEMENT:

1. In lieu of reinforcing PG&E's existing system to fully accommodate loads at Site, Applicant agrees to accept a lower level of service reliability than would normally be available if PG&E's design criteria was met. This decreased reliability may manifest itself through the curtailment or interruption of gas or electric supply to the Applicant.

2. PG&E's ability to serve Applicant's load will be determined by Equipment which, at all times, will limit the gas or electric demand supplied to the Site to the capacity immediately available on PG&E's system. Equipment will be installed at Applicant's expense and as a special facility (Form 79-255). PG&E system conditions that will cause the Equipment to operate are set forth as follows:

   _____
   _____
   _____
   _____
   ____ Applicant may be subject to additional curtailments as provided by PG&E's gas and electric Rule 14 and Agreement.

3. Applicant understands that all of the conditions and provisions specified in other agreements with PG&E remain in effect and that interruption or curtailment, due to the presence of the Equipment, does not excuse any of the charges associated with their applicable rate schedules.

4. Applicant agrees that PG&E is not liable for any physical damage or property damage caused by the presence or operation of the Equipment.

5. Termination of either this supplemental agreement or the original Agreement shall constitute the termination of both, with Applicant being subject to any applicable minimum or termination charges as specified in the tariffs or Agreement.

† Information collected on this form is used in accordance with PG&E's Privacy Policy. The Privacy Policy is available at pge.com/privacy.

SUPPLEMENTAL AGREEMENT FOR AS AVAILABLE CAPACITY

6. Applicant may assign this supplemental agreement, only if PG&E consents in writing and the assignee agrees in writing to the conditions herein, and assignment occurs in conjunction with assignment of Agreement.

7. This supplemental agreement shall be subject to all of PG&E's applicable tariff schedules on file and authorized by the Commission and shall at all times be subject to such changes or modifications as the Commission may direct from time to time in the exercise of its jurisdiction.

TRANSMISSION LOAD OPERATING AGREEMENT

THIS LOAD OPERATING AGREEMENT (the "Agreement") is effective as of the date last executed by the parties hereto by and between PACIFIC GAS AND ELECTRIC COMPANY ("PG&E"), a California corporation, and _____ ("Load Entity") a _____. PG&E and the Load Entity are sometimes referred to collectively as the "parties" and individually as the "party."

RECITALS

A. PG&E and the Load Entity have made arrangements under PG&E's tariffs for an interconnection and power deliveries between the PG&E Transmission System and the Load Entity's substation facility, _____, located at _____ (the "Interconnection Facility.")

B. Among other things, this Load Operating Agreement obligates the Load Entity to operate its Substation in a safe and prudent manner.

C. As part of this obligation, it is important that the Load Entity stay in close contact with PG&E system operators.

D. This Agreement sets up operating responsibilities and associated procedures for communications between the Load Entity and PG&E system operators. The Agreement also establishes procedures for safe work on electric systems and routine test procedures.

† Information collected on this form is used in accordance with PG&E's Privacy Policy. The Privacy Policy is available at pge.com/privacy.

AGREEMENT

THEREFORE, in consideration of the rights and responsibilities set forth herein, the parties agree as follows:

1. DEFINITIONS

When underlined, the following terms shall have the following meanings:

"Clearance Point" -- The points that isolate equipment from possible sources of energy.

"Designated PG&E Switching Center" -- The PG&E location identified in Paragraph 9 of this Agreement, with operational jurisdiction over the Load Entity's Substation. The Designated PG&E Switching Center is staffed 24 hours a day.

"Emergency" -- An abnormal condition or situation that adversely affects, or potentially may adversely affect, PG&E's Electric System Integrity.

"Interconnection Facilities" -- All apparatus installed to interconnect and deliver power between the PG&E system and the Load Entity's substation. Interconnection Facilities include, but are not limited to, connection, transformation, switching, metering, and communications equipment, as well as any necessary additions, modifications and reinforcements to the PG&E system necessitated as a result of interconnecting the Load Entity's Facility to the PG&E system. Interconnection Facilities also include control and safety equipment to protect (1) the PG&E system and its customers from faults occurring at the Load Entity's Facility and substation, and (2) the Load Entity's Facility and substation from faults occurring on the PG&E system or on the system of others to which the PG&E system is directly or indirectly connected.

"Non-Test" -- A procedure used in connection with work on a live line or near an energized circuit. In a Non-Test, PG&E will require that the Load Entity contact the Designated PG&E Switching Center before re-energizing a circuit following an automatic trip.

"PG&E Electric System Integrity" -- The state of operation of PG&E's electric system in a manner that is deemed to minimize the risk of injury to persons and/or property and enable PG&E to provide adequate and reliable electric service to its customers.

2. TERM OF AGREEMENT

This Agreement shall be binding upon execution by both parties. It shall terminate thirty days after the date on which the Load Entity's substation facility ceases to be interconnected to the PG&E electric system. This Agreement may also be terminated by mutual written consent of the parties.

3. RESPONSIBILITY AND AUTHORITY

3.1 The Load Entity understands and agrees that it must satisfy the applicable interconnection requirements described in the PG&E Interconnection Handbook (or its successor) before the Load Entity's Substation can operate in parallel with the PG&E system.

3.2 It is the responsibility of the Load Entity to implement the operating guidelines contained in this Agreement. The Load Entity shall ensure that its operating personnel are familiar with the procedures and guidelines in this Agreement.

3.3 The Designated PG&E Switching Center is authorized to disconnect the Load Entity from the PG&E electric system if the Load Entity fails to meet the requirements set forth in this Agreement. Prior to PG&E disconnecting the Load Entity, PG&E shall provide written notice to the Load Entity detailing the Load Entity's failure to adhere to such requirements and provide the Load Entity thirty (30) days to correct such

deficiency. PG&E reserves the right to immediately disconnect the Load Entity should such deficiencies, as determined by PG&E, cause immediate or imminent hazards to the safety of the Public or PG&E's employees.

3.4 The Load Entity understands that the voltage of PG&E's electric transmission system is not regulated and may vary widely. The voltage levels will fluctuate depending on system operation and system conditions. In accordance with the PG&E Interconnection Handbook, the Load Entity shall install and maintain the necessary equipment to maintain proper power factor and voltage at the point of interconnection.

3.5 Power factor correction is the responsibility of the Load Entity. When the Load Entity is receiving power from the PG&E system, metered power factors outside acceptable ranges may result in additional charges, as specified in PG&E's tariffs and operating standards.

3.6 If PG&E provides assistance in the operation or maintenance of the Load Entity's Substation without a written agreement, PG&E assumes no liability for any loss or damage, direct, indirect or consequential, arising from or related to any services PG&E may provide. PG&E reserves the right to charge the Load Entity for all such services.

4. OPERATION OF INTERCONNECTION FACILITIES AND SUBSTATION

4.1 The Load Entity shall maintain operating communications with the Designated PG&E Switching Center. The operating communications shall include, but not be limited to, system paralleling or separation, scheduled and unscheduled shutdowns, and equipment clearances.

4.2 All oral operating communications shall be conducted through the Designated PG&E Switching Center. The Load Entity agrees to maintain direct phone service so that PG&E can give instructions to the Load Entity or its designated operator.

4.3 The Load Entity agrees to notify the Designated PG&E Switching Center of the following:

a. The current names and 24-hour phone numbers of the personnel responsible for operating and maintaining the Load Entity's Substation.

b. Any Emergency situation, or any request that PG&E de-energize a portion of the system under its control.

c. Any changes in the mechanical or electric condition of the Load Entity's Substation that may affect the reliability of the Load Entity's service or the PG&E electric system.

d. Immediately upon discovery, any miss operation or inoperable condition of a PG&E-required interconnection relay, circuit breaker, or other protective device.

e. Immediately upon discovery, any operation of a PG&E-required interconnection relay, circuit breaker, or other protective device. Relay targets that caused the circuit breaker or protective device to operate.

f. Plans to manually parallel or separate from the PG&E system and the times of actual manual parallels and separations. Emergency separations shall be reported as soon as conditions permit.

4.4 Under normal conditions, the Load Entity shall give as much advance notice as possible (a minimum of 168 hours if connected to 230 kV or 120 hours if connected to 115 kV or below is requested) to the Designated PG&E Switching Center when planning to perform work that may affect PG&E's electric system. At a minimum, the notice shall include:

a. Nature of the work to be performed.

b. Date and time work will begin.

c. Date and time work will be completed.

d. Apparatus to be cleared and the Clearance Points required.

e. Name and telephone number of the person in charge of the work.

f. Whether or not protective grounds will be installed.

4.5 If the Load Entity wishes to perform work on its own facilities which would normally be energized by PG&E-controlled source(s) of energy, the Load Entity may request that PG&E open, lock and tag PG&E's associated disconnect device to isolate the Load Entity's facilities from PG&E source(s) of energy. PG&E will also establish the disconnect device(s) as an open Clearance Point(s) and install "Man on Line" tags (see PG&E's General Operating Instructions)

4.6 PG&E assumes no responsibility for equipment energized by the Load Entity's substation or by any other means. The Load Entity agrees that any work it performs is at its own risk. The Load Entity shall take all necessary steps to ensure that work is conducted in compliance with all applicable federal, state and local laws and regulations and in a manner that does not endanger the safety of persons or equipment.

4.7 The Load Entity must open its interconnection disconnect switch if PG&E requests a Clearance Point. A qualified PG&E employee will observe that the switch is open, lock it open with a PG&E lock, and attach a filled-out "Man-on-Line" tag to indicate it is a Clearance Point.

4.8 In an Emergency, the Load Entity agrees to expeditiously open the interconnection disconnect switch upon notification from the PG&E Designated Switching Center.

4.9 Under normal conditions, PG&E will give advance notice of plans to perform work, which will affect the Load Entity's access to the PG&E system. PG&E reserves the right to charge the Load Entity the additional cost for work performed during times other than normal business hours (Non-Holidays, Monday through Friday, 8:00 A.M. to 5:00 P.M.) when the schedule of such work is negotiable, as determined by PG&E. PG&E will provide the Load Entity with an estimate of the additional cost and if the Load Entity still desires the work to be

performed during non-normal business hours and PG&E does perform the work, PG&E shall charge the Load Entity the actual costs of the work, the amount of which shall not exceed the cost estimate.

4.10 Under Emergency conditions, the Designated PG&E Switching Center may without notice and at anytime interrupt service to the Load Entity's Facility if a situation exists which may adversely affect PG&E Electric System Integrity or upon any emergency request that PG&E de-energize a portion of the system under its control.

5. MAINTENANCE OF INTERCONNECTION EQUIPMENT OWNED BY THE LOAD ENTITY

5.1 The Load Entity agrees to maintain all PG&E-required Interconnection Facilities' devices in service, with relay settings as recorded on PG&E's "Relay Test Report". Proposed changes in relay settings must be submitted in writing to PG&E for approval. Any modification of the existing interconnection or protection scheme requires PG&E's prior written approval.

5.2 PG&E required Interconnection Facilities owned by the Load Entity shall be periodically tested and maintained at the manufacturer's accepted specifications, but at least every four years, by qualified personnel. Copies of equipment test reports shall be forwarded to PG&E for review.

6. EQUIPMENT OWNED BY THE LOAD ENTITY FOR RELIABILITY, OPERABILITY OR PARALLEL OPERATION.

This provision applies where the Load Entity is interconnected to the PG&E transmission system.

In the interest of safety, all customers must notify PG&E before operating ANY generation sources capable of parallel operation, or operating equipment that maintains current reliability or operability of PG&E's electrical system, which are interconnected to the Load Entity's

substation, the Load Entity's electrical system, or the PG&E electrical system. The Load Entity agrees to comply with the requirements identified in the PG&E Interconnection Handbook for all such equipment and generation sources capable of parallel operation with PG&E's electrical system.

Standby Generator

Please check the appropriate line:

_____ The Load Entity has installed a standby generator.

_____ The Load Entity does not have and does not plan to install a standby generator.

_____ While the Load Entity does not currently have a standby generator installed, it plans to install a standby generator in the future. The Load Entity will notify the Designated PG&E Switching Center before operating this generator in parallel with the PG&E system.

Line Selector Switches

Unlike the PG&E electric distribution system, the PG&E transmission system does not have multiple feeds. If the line serving the Load Entity's substation is out of service due to line outages or planned maintenance, then service to the Load Entity may also be interrupted. Please refer to Electric Rule 14, Shortage of Supply and Interruption of Delivery. Where PG&E or the Load Entity has installed line selector switches for reliability, maintenance or operability they will be operated in compliance Sections 3 and 4 in this Agreement.

Please check the appropriate line:

_____ PG&E has installed transmission line selector switches.

_____ The Load Entity installed transmission line switches.

_____ The Load Entity has NOT installed transmission line switches, and does not plan on installing line selector switches

Should PG&E, in the future, determine that transmission line selector switches are required, to be installed on the PG&E transmission system to which the tap serving the Load Entity's facility is connected, in order to maintain current reliability or operability of PG&E's transmission system, the material and installation cost of the switches shall be at PG&E's expense.

Should PG&E, in the future, determine that the switches are NOT required, and the Load Entity chooses to request the switches to be installed on PG&E's Transmission System, and that such switches would solely benefit the Load Entity's service reliability, ability to restore service or prevent service interruption to the Load Entity, PG&E will install them as a Special Facility.

7. REFERENCES

The following reference materials are available for use by the Load Entity and its operating personnel. Copies may be requested from the Designated PG&E Switching Center:

7.1 **PG&E Standard Practice No. S1466**-- A booklet listing all the standard operating orders followed by PG&E system operators.

7.2 **PG&E Standard Practice No. S1403** -- A document describing approved PG&E clearance procedures and instructions for obtaining clearances.

7.3 **PG&E Interconnection Handbook**

7.4 **Electric Rules 2, and 14**

8. GENERAL PROVISIONS

8.1 Choice of Laws: This Agreement shall be governed by and construed in accordance with the laws of the State of California, excluding any choice of law rules that direct the application of the laws of another jurisdiction.

8.2 Modification: This Agreement may be amended or modified only by a written instrument signed by the authorized representatives of both the parties.

8.3 Captions: Captions are included herein for ease of reference only. The captions are not intended to affect the meaning of the contents or scope of this Agreement.

8.4 Non-waiver: Failure by either party to enforce any right or obligation with respect to any matter arising in connection with this Agreement shall not constitute a waiver as to that matter or any other matter.

8.5 Interpretation: This Agreement is not intended to modify any PG&E or ISO tariff or rule filed with the California Public Utilities Commission or Federal Energy Regulatory Commission. In case of conflict between this Agreement and any PG&E or ISO tariff or rule, the tariff or rule shall govern. This agreement represents the entire understanding between the parties hereto relating to the operation of the Load Entity's substation, and supersedes any and all prior proposals or agreements, whether written or oral, that may exist between the parties. Where there is conflict or inconsistency with the express terms in this Agreement and any documents referenced by this Agreement excluding the above

referenced PG&E and ISO tariffs, the terms of this Agreement shall supersede such conflicting terms.

8.6 DISPUTE RESOLUTION: IF A DISPUTE ARISES OUT OF OR RELATING TO THIS AGREEMENT, OR THE BREACH THEREOF, AND IF SAID DISPUTE CANNOT BE SETTLED THROUGH DIRECT DISCUSSIONS, THE PARTIES AGREE TO THE FIRST ENDEAVOR IN GOOD FAITH TO SETTLE THE DISPUTE IN AN AMICABLE MANNER WITHIN THIRTY (30) DAYS OF SUBMISSION TO MEDIATION UNDER THE MEDIATION RULES OF THE AMERICAN ARBITRATION ASSOCIATION BEFORE SEEKING RECOURSE IN A JUDICIAL FORUM. THE MEDIATION SHALL BE INITIATED BY THE WRITTEN REQUEST OF EITHER PARTY AND SHALL BE COMMENCED WITHIN FIFTEEN (15) DAYS OF RECEIPT OF SUCH NOTICE. THE PARTIES SHALL SHARE EQUALLY IN ANY EXPENSES INCURRED AS A RESULT OF THE MEDIATION.

9. NAME AND ADDRESS OF KEY PERSONNEL:

The Transmission Load Entity: _____

_____

_____

Phone: _____

Fax: _____

Designated PG&E Switching Center: _____Switching Center

(Address)

Phone: _____

Fax: _____

A party may change or supplement the addresses above by written notice to the other party. The Load Entity agrees to keep the Designated PG&E Switching Center informed of any change in its notice address.

10. CPUC AUTHORITY

This Agreement shall at all times be subject to such changes or modifications by the Public Utilities Commission of the State of California as said Commission may, from time to time, direct in the exercise of its jurisdiction.

11. SIGNATURES

IN WITNESS WHEREOF, the parties have caused this Agreement to be executed by their duly authorized representatives, and it is effective as of the last date set forth below.

Acceptable Forms of Documentation

In order to resolve your disputed claim, you will need to provide one (1) form of identification from Category I (if US citizen) or Category II (if non US citizen) and two (2) forms of proof of residency from Category III. You may choose from the list of acceptable documentation below:

Category I—Acceptable forms of identification for U.S. Citizen	Category II—Acceptable forms of identification for non U.S. Citizen

• Driver's License
• State ID
• Passport
• Social Security Card
• Military ID
• Military DD214 Form
• Military Selective Service Card
• Birth Certificate (not a hospital record)
• Native American Reservation ID
• ID from place of employment
• Current Student ID
	• Country ID
	• Driver's License
	• Military ID
	• Passport
	• US Immigration and Naturalization Service (INS) department documents:
	  • I-94 (Refugee arrival document) form
	  • I-688B (Employment Authorization Card)
	  • I-766 (employment Authorization approval) document
	  • US Government issued VISA (Document will state that it is a VISA)
	Note: Alien Registration Card is not acceptable.

☐ **Two (2) separate sources are required as proof** of residency from **Category III**.
☐ **Proof of residency documents must cover the entire time period of the disputed charges.**
☐ You may choose from the list of acceptable documentation below:

Category III—Proof of Residency	
• Mortgage Statement or Title of Ownership • Official Rental/Lease Agreement* • Electric bill • Gas bill • Cable bill • Water bill	• Local Telephone bill (not a bill from a long distance provider, cellular or paging company) • Home owner's or renter's insurance or monthly statements • Auto insurance or monthly statements • Health insurance or monthly statements (not a medical card) • Life insurance or monthly statements • Prison movement documentation
***We will not accept rental receipts.** The Rental/Lease agreement must be from a management company or owner.	

Please return copies of the following to PG&E Fraud Department:

1. Completed copy of pages 1 through 5 of this form

ELECTRONIC DATA INTERCHANGE (EDI) – TRADING PARTNER AGREEMENT

THIS ELECTRONIC DATA INTERCHANGE TRADING PARTNER AGREEMENT (the "Agreement") is made as of _____, 20_____ by and between _____ _____, a _____ ("Trade Partner"), and Pacific Gas and Electric Company ("PG&E"), a California Corporation.

RECITALS

Trade Partner and PG&E desire to participate in the electronic transmittal and receipt data in agreed formats in substitution for conventional paper-based documents and to ensure such transactions are not legally invalid or unenforceable as a result of the use of available electronic technologies for the mutual benefits of the parties.

NOW THEREFORE, the parties, intending to be legally bound agree as follows:

1. **Section 1 - Prerequisites**

1.1. **Documents Standards:** Each party shall electronically transmit to or receive from the other party each of the transaction sets listed in the Appendix (collectively "Documents"), Documents include billings for utility service and payments which are (1) the electronically transmitted information delivered to Trade Partner from PG&E or to PG&E from Trade Partner, and (2) the non-electronically transmitted utility billings and payments transmitted during testing periods or equipment failures. All Documents shall be transmitted in accordance with the standards set forth in the Appendix.

1.2. **Scope of the Agreement** This Agreement shall govern and apply to all Documents and information related to transactions electronically transmitted from either party to the other.

1.3. **Third-Party Service Providers**

1.3.1. Documents will be transmitted electronically to each party either directly or through any third-party service provider ("Provider") with which either party may contract on its own behalf. Either party may modify its election to use, not use or change its Provider upon thirty (30) days prior written notice.

1.3.2. Each party shall be responsible for the costs and performance of any Provider with which it contracts, unless otherwise set forth in the Appendix.

1.4. **System Operations** Each party, at its own expense, shall provide and maintain the equipment, software, services and testing necessary to effectively and reliably transmit and receive Documents.

1.5. **Security Procedures** Each party shall properly use those security procedures, including those specified in the Appendix, if any, which are reasonably sufficient to ensure that all transmissions of Documents are authorized and to protect its business records and data from improper access.

1.6. **Signatures** Each party shall adopt as its signature an electronic identification consisting of symbol(s) or code(s), which are affixed to or contained in each Document transmitted by such party (“Signatures"). Each party agrees that any Signature of such party affixed to or contained in any transmitted Document shall be sufficient to verify such party originated such Document. Neither party shall disclose to any unauthorized person the Signatures of the other party.

2. **Section 2 - Transmissions**

2.1. **Proper Receipt** Documents shall not be deemed to have been properly received, and no Document shall give rise to any obligation, until accessible to the receiving party. Notwithstanding anything contained in this Agreement, electronic transfers by Trade Partner of funds denominated in U.S. currency to pay its PG&E billings for utility service will be credited against its utility bills when received by PG&E as provided in the Agreement.

2.2. **Verification** Upon proper receipt of any Document or any information related to the transaction, the receiving party shall properly transmit a functional acknowledgment in return within twenty-four (24) hours of receipt of any Document or any information related to the transaction, unless otherwise specified in the Appendix. A functional acknowledgment shall constitute conclusive evidence a Document has been properly received, A functional acknowledgment is not an acceptance or a status report.

2.3. **Acceptance** If acceptance of a Document is required by the Appendix, any such Document which has been properly received shalt not give rise to any obligation unless and until the party initially transmitting such Document has properly received in return an Acceptance Document (as specified in the Appendix).

2.4. **Garbled Transmissions** If any properly transmitted Document is received in an unintelligible or garbled form the receiving party shall promptly notify the originating party (if identifiable from the received Document) in a reasonable manner. In the absence of such a notice, the originating party's records of the contents of such Document shall control, unless the identity of the originating party cannot be determined from the receiving Document.

3. **Section 3 - Transaction Terms**

3.1. **Terms and Conditions** This Agreement is to be considered part of any other written agreement incorporating it or referenced in the Appendix. Any transaction made pursuant to this Agreement and (any related communication) shall also be subject to the terms and conditions included in PG&E's applicable tariffs that may be approved by the CPUC from time to time. The parties acknowledge that the terms and conditions set forth in the tariffs may be inconsistent, or in conflict, but agree that any conflict or dispute that arises between the parties in connection with any such transaction will be resolved as if such transaction had been effected through application of the tariffs.

3.2. **Confidentiality** Documents and other communications related to transactions under the Agreement shall maintain the same confidential or non-confidential status (whichever is applicable) as they would have in the form of paper records.

3.3. **Validity, Enforceability**

3.3.1. This Agreement has been executed by the parties to evidence their mutual intent to create binding purchase and sale obligations pursuant to the electronic transmission and receipt of Documents specifying certain of the applicable terms.

3.3.2. The parties agree that correspondence and documents electronically transmitted pursuant to this Agreement shall be construed to be in conformance with all customer billing requirements set forth in PG&E's tariffs as approved by the California Public Utilities Commission (CPUC) for all purposes. Notwithstanding anything contained in Sections 2.1 or 2.3 herein, utility bills are due and payable as soon as PG&E initiates transmission to Trade Partner and will be considered past due If not paid within fifteen (15) days for non-residential accounts and nineteen (19) days for residential accounts after the date PG&E initiates the transmission. The Trade Partner will be governed by the payment requirements specified in PG&E's Gas and Electric Rules 8 and 11 and Gas Rule 23 (where applicable).

3.3.3. Any Document and any information related to the transaction properly transmitted pursuant to this Agreement shall be considered in connection with any transaction, any other written agreement described in Section 3.1, or this Agreement, to be a "writing" or "in writing" and any such Document when containing, or to which there is affixed, a Signature ("Signed Documents") shall be deemed for all purposes to have been "signed" and to constitute an "original" when printed from electronic flies or records established and maintained in the normal course of business.

3.3.4. The conduct of the parties pursuant to this Agreement including the use of Signed Documents properly transmitted pursuant to this Agreement shall, for all legal purposes, evidence a course of performance accepted by the parties in furtherance of this Agreement and any other agreement described in Section 3.1.

3.3.5. The parties agree not to contest the validity or enforceability of Signed Documents under the provisions of any applicable law relating to whether certain agreements are in writing and signed by the party to be bound thereby. Signed Documents, if introduced as evidence on paper in any judicial, arbitration, mediation or administrative proceedings, will be admissible as between the parties to the same extent and under the same conditions as other business records originated and maintained in documentary form. Neither party shall contest the admissibility of copies of Signed Documents under either the business records exception to the hearsay rule or the best evidence rule on the basis that the Signed Documents were not originated or maintained in documentary form.

4. Section 4 - Miscellaneous

4.1. **Headings** Headings or titles of the provisions hereof are for convenience only and shall have no effect on the provisions of this Agreement.

4.2. **Termination** This Agreement shall remain In effect until terminated by either party with not less than thirty (30) days prior written notice, which notice shall specify the effective date of termination; provided, however, that any termination shall not affect the respective obligations or rights of the parties arising under any Documents or otherwise under this Agreement prior to the effective date of termination.

4.3. **Severability** Any provision of this Agreement which is determined to be invalid or unenforceable will be ineffective to the extent of such determination without invalidating the remaining provisions of this Agreement or affecting the validity or enforceability of such remaining provisions.

4.4. **Entire Agreement** This Agreement and the Appendix constitute the complete agreement of the parties relating to the matters specified in this Agreement and supersede all prior representations or agreements, whether oral or written, with respect to such matters. No oral modification or waiver of any of the provisions of this Agreement shall be binding on either party. No obligation to enter into any transaction is to be implied from the execution or delivery of this Agreement. This Agreement is for the benefit of, and shall be binding upon, the parties and their respective successors and assigns.

4.5. **Assignment** This Agreement or any rights or obligations hereunder, shall not be assigned by either party without the express written approval of the other party. Any assignment made without such consent shall be null and void. Performance of the Trade Partner's obligation under any transaction or billings for utility service may not be assigned by the *Trade* Partner without PG&E's express written approval: provided that such assignment shah not relieve the Trade Partner of any of its obligations under this Agreement. Any assignment which does not comply with the provisions of this section 4.5 shall be null and void.

4.6. **Conflict of Interests/Business Ethics** Trade Partner shall exercise reasonable care and diligence to prevent any actions or conditions which could result in a conflict with PG&E's interest. Trade

Partner or its employees shall not offer or cause to be offered gifts, entertainment, payments, loans or other services, benefits or consideration of more than a nominal value to PG&E's employees, their families, vendors, subcontractors or other third parties. Trade Partner shall immediately notify PG&E of any and all violations of this clause upon becoming aware of such violation.

4.7. **Non-Waiver** The waiver by either party of any breach of any term, covenant or condition contained in this Agreement or in a utility service billing, or any default in the payment of any obligation of any utility service billing rendered to the Trade Partner pursuant to this Agreement shall not be deemed to be a waiver of any other breach or default of the same or any other term, covenant, condition or obligation. Nor shall any waiver of any incident of breach or default in payment constitute a continuing waiver of the same.

4.8. **Governing Law and Tariffs** This agreement shall be governed by and interpreted in accordance with the laws of the State of California and PG&E's tariffs filed with the California Public Utilities Commission (CPUC). This Agreement shall at all times be subject to any changes or modifications by the CPUC as said Commission may, from time to time, direct in the exercise of its jurisdiction.

4.9. **Force Majeure** No party shall be liable for any failure to perform its obligations in connection with any transaction or any Document, where such failure results from any act of God or other cause beyond such party's reasonable control (including, without limitation, any mechanical, electronic or communications failure) which prevents such party from transmitting or receiving any Documents.

4.10. **EXCLUSION OF DAMAGES** NEITHER PARTY SHALL BE LIABLE TO THE OTHER FOR ANY SPECIAL. INCIDENTAL, EXEMPLARY OR CONSEQUENTIAL DAMAGES ARISING FROM OR AS A RESULT OF ANY DELAY, OMISSION, OR ERROR IN THE ELECTRONIC TRANSMISSION OR RECEIPT OF ANY DOCUMENTS PURSUANT TO THIS AGREEMENT. EVEN IF SUCH PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

4.11. **Notices**

4.11.1. Transmittal of Notices of Discontinuance of Service for Nonpayment. If Trade Partner's account becomes past due, notice of discontinuance of service for non-payment shall be given by mailing conventional CPUC-approved paper-based documents to the Trade Partner at the address specified herein via U.S. Mail, First Class, with postage prepaid.

If Trade Partner is an authorized Core Transportation Agent (CTA) providing aggregation service under PG&E's Gas Rule 23, a copy of the notice of discontinuance of service for non-payment sent to Trade Partner will also be given to each customer in the Trade Partner's Core Transportation Group by mailing conventional CPUC-approved paper-based documents via U.S. Mail, First Class, with postage prepaid.

4.11.2. Transmittal of CPUC-Required Notices to Trade Partner. One copy of each notice PG&E is required to provide to the Trade Partner under applicable CPUC tariffs, rules, regulations or decisions, shall be mailed to the Trade Partner at the address specified herein via U.S. Mail, First Class, with postage prepaid.

If Trade Partner is an authorized Core Transportation Agent (CTA) providing aggregation service under PG&E's Gas Rule 23, a copy of each notice PG&E is required to provide to individual customers in the Trade Partner's Core Transportation Group under applicable CPUC tariffs, rules, regulations, or decisions, shall be mailed directly by PG&E to each customer via U.S. Mail, First Class, with postage prepaid.

4.11.3. Transmittal of All Other Notices. All other notices given herein shall be m writing and shall be given by certified, registered or first class mail or special delivery, postage prepaid, to the persons specified below:

TERMS AND CONDITIONS FOR TESTING PERIOD. To facilitate the process of evaluating the feasibility of the EDI service, Trade Partner and PG&E may enter into a test of the EDI service.

By entering into a test, PG&E and Trade Partner agree to the following:

1. Test Period: The test period will be for a period of one hundred eighty (180) days or less and will commence with the date of the initial transmission of documents from PG&E to the Trade Partner's electronic mailbox.
2. Test Accounts: Trade Partner agrees to convert six (6) to twenty (20) of their PG&E customer accounts for the purpose of this test. Trade Partner understands and agrees that this conversion could necessitate the removal of these accounts from other optional billing or payment programs offered by PG&E.
3. Transaction Sets Each party agrees to send and receive test documents using the transaction sets listed in the "Documents" section of this Appendix.
4. Personnel Services PG&E will provide, without charge, a maximum of sixteen (16) hours of assistance to the Trade Partner's designated EDI technical support staff. Upon Trade Partner's request, PG&E is willing to provide additional assistance beyond the initial sixteen (16) hours, at the rate of $_____per hour. Trade Partner will be billed monthly for services rendered hereunder. Each invoice wilt be payable upon receipt.
5. Termination The test may be terminated by either party at any time by giving written notification to the person(s) listed in Section 4.11.3 of this agreement and will be effective upon receipt.

APPLICATION AND AGREEMENT FOR ELECTRIC AND/OR NATURAL GAS FACILITIES WHERE FULL ADVANCE PAYMENT IS REQUIRED Rule 13 - Temporary Service

To Pacific Gas and Electric Company:

The undersigned Applicant hereby requests you to deliver ❑electric energy and/or ❑ natural gas to and for the equipment hereinafter described, at the location shown on Exhibit A, in accordance with the applicable rates and rules of PG&E.

In consideration of PG&E's acceptance of this application and the installation of facilities to supply temporary electric and/or natural gas service, Applicant hereby agrees to the following:

1. PG&E has made available for inspection its applicable rates and rules. Applicant agrees to comply therewith, and with any changes or modifications thereof which may be authorized from time to time by the Public Utilities Commission of the State of California
2. Applicant's attention has been directed to the rate schedules applicable to the service herein described, and Applicant has elected to take and pay for service under Schedule _____for a maximum period of _____months. As specified in this schedule, Applicant elects the following optional provisions:
3. Applicant agrees to pay, in advance to PG&E, prior to the installation thereof, the estimated cost installed plus the estimated cost of removal, less the estimated salvage of the facilities installed to provide the service herein applied for, which cost is agreed to be the sum of _____Dollars ($_____).
4. The amount of refund upon reclassification of Applicant's facilities from temporary to permanent will be made on the basis of the extension and/or service rule in effect at the time temporary service is reclassified to permanent. No interest shall be paid on any amount advanced.
5. Applicant hereby grants to PG&E a right-of-way for any electric and/or natural gas lines which it may be necessary to build in, on, under or over Applicant's premise for the purpose of making delivery hereunder. Where Applicant requests facilities which are in addition to, or in substitution for, the standard facilities which PG&E normally would install, the extra cost thereof shall be paid by Applicant under the provisions of PG&E's Gas or Electric Rule 2.
6. In the event Applicant, prior to reclassification, materially increases or decreases his electric service and/or natural gas requirements from those installed hereunder and a change is made in PG&E's facilities, settlement shall be made for the installation and removal cost of the facilities removed. A new temporary service agreement shall be entered into providing for the modified service required by Applicant.
7. This contract shall at all times be subject to such changes or modifications by the Public Utilities Commission of the State of California as said Commission may, from time to time, direct in the exercise of its jurisdiction.

JOB #:_____

CUSTOMER-OWNED STREETLIGHTS PG&E POLE CONTACT AGREEMENT

_____(Applicant) has elected to enter into this Agreement with PACIFIC GAS AND ELECTRIC COMPANY, a California corporation (PG&E).

PG&E owns, operates and maintains overhead electric distribution facilities located in geographic areas within the political jurisdiction of Applicant.

Applicant desires to enter into an agreement with PG&E that will (a) allow having that portion of the Applicant's existing streetlights to contact PG&E's distribution poles, and (b) specify conditions for future installation, operation, maintenance, use or removal of Applicant's streetlights. PG&E is willing to permit Applicant to have such pole contacts under the following terms and conditions:

1. **POLE CONTACT PERMISSION**.

   a. **Existing Streetlights** PG&E hereby gives Applicant general permission under the terms and conditions herein stated to contact, replace, operate, maintain, and use existing luminaires, lamps, photocells, support arms and service wiring facilities (hereinafter Equipment) installed on poles owned by PG&E or jointly owned by PG&E and others. Such permission covers all existing lights owned by the Applicant that are mounted on PG&E-owned poles, based on the most current billing records as of the date of this Agreement. However, specific permission for such streetlights must be in the form of pole Contact Permits for specific locations.

   b. **New Streetlights**. Applicant or Its contractor shall not install any new or additional equipment on PG&E's poles without first securing PG&E's written approval in the form of a Contact Permit for specific locations. Within thirty (30) days of receipts of the application, PG&E will either grant the permit or deny the permit and specify why the action cannot be taken. Upon the receipt of each such approved Contact Permit, Applicant shall have the right to install, operate, maintain and use the additional equipment on the poles specified in such permit and under the terms and conditions specified in this Agreement, (thereafter included as Equipment), which shall be considered a part of each such permit without regard to whether this Agreement Is referred to in each Contact Permit.

2. **POLE CONTACT PERMITS**. PG&E will provide Contact Permits in the form attached and marked Exhibit A to Applicant for the specific locations involved, and shall charge no pole contact fee for each electric distribution pole covered under this contact Agreement unless such a fee Is permitted in the future under authorization by the California Public Utilities Commission (Commission).

3. **PRIOR POLE CONTACT AGREEMENT**. This Agreement shall supersede any previous pole contact agreement between PG&E and the Applicant insofar as it may pertain to street lighting.

4. **PG&E REQUIREMENTS**. Facilities installed under this Agreement shall be subject to all of the provisions of the General Orders of the Commission, and PG&E's applicable tariff schedules on file with and authorized by the Commission and further shall at all times be subject to such changes or modifications as the Commission may, from time to time, direct in the exercise of Its jurisdiction.

5. **SERVICE DELIVERY**. PG&E will supply electrical energy and service to streetlight equipment owned by Applicant in accordance with the provisions of rate Schedule LS-2 for customer-owned street and highway lighting.

† Information collected on this form is used in accordance with PG&E's Privacy Policy. The Privacy Policy is available at pge.com/privacy.

6. **WORK ON POLES**. Any person working on applicant-owned Equipment mounted on PG&E owned poles must be qualified to work on such Equipment in the vicinity of PG&E's energized conductors (i.e., Qualified Electrical Worker or performing work under the supervision of a Qualified Electrical Worker. See Title 8, Electrical Safety Orders, Section 2949). Any contractor used by Applicant to perform work on the Equipment contacting PG&E's distribution facilities shall be one previously approved by PG&E as qualified to perform such work, and shall meet the insurance requirements outlined in this Agreement. Upon request, PG&E will supply a list of approved contractors to Applicant.

   All work on Applicant's Equipment installed on PG&E's poles shall be performed by Applicant's personnel or contractor operating from either a ladder or bucket truck. Direct climbing of PG&E-owned poles by Applicant's personnel or contractor is prohibited, unless access requires pole climbing by Applicant's authorized personnel qualified to climb.

7. **SAFETY PRECAUTIONS**. Applicant and PG&E shall perform all work in compliance with applicable federal, state and local laws, rules and regulations. Applicant shall inform all persons doing work on PG&E's facilities and insure that all work of non-PG&E employees is planned and conducted in a manner to safeguard persons and property from injury. Work performed in areas adjacent to PG&E's energized electric facilities also shall be performed in accordance with PG&E's established safety rules and practices, as shown on PG&E's Engineering Standard identified as Exhibit B attached, or as directed by PG&E. In no case shall Applicant have work performed above the height of the 120/240 volt secondary conductors on PG&E's facilities.

8. **INSURANCE REQUIREMENTS**. Applicant shall provide evidence to PG&E of insurance or self-insurance to secure the payment of Worker's Compensation in compliance with the Labor Code of California and, where applicable, shall secure payment of liability under any other similar applicable law. Upon request. Applicant shall provide PG&E evidence of insurance or self-insurance and shall cause any contractor performing work under this Agreement to procure end maintain in effect during the term of his work bodily injury liability insurance with limits of not less than $2,000,000 combined single limit (including automobile) for bodily injury and property damage as a result of any one occurrence. Such contractor's insurance must be satisfactory to PG&E and shall guarantee Applicant's performance of the above indemnity obligation and shall also be endorsed to (a) include PG&E as an additional named insured insofar as this Agreement is concerned, (b) contain a cross-liability clause, and (c) provide that written notice shall be given to PG&E at least thirty (30) days prior to cancellation or material change in the form of such policies or endorsements. Upon request, Applicant will furnish PG&E with original copies of the policies and endorsements, PG&E shall have the right to inspect the original policies of such insurance.

9. **REARRANGEMENT FOR INSTALLATION**. If any rearrangement of or addition to PG&E's existing electric distribution facilities is required to permit Applicant to install Equipment on PG&E's poles, PG&E shall notify Applicant of the nature and PG&Es estimated cost of such work. If Applicant finds such cost acceptable, it shall notify PG&E by letter, including a purchase order number or equivalent authorization to reimburse PG&E for the cost of such work. PG&E shall, thereafter, complete the work within a reasonable time and bill Applicant.

10. **OTHER REARRANGEMENTS**. Should PG&E find it necessary to perform any work (removal, replacement or relocation) on its distribution poles on which Applicant maintains its Equipment, and such work is (a) requested by local governmental agencies, (b) requested by the State of California Department of Transportation (CalTrans), (c) needed to replace deteriorated poles, (d) caused by an emergency (storm damage, accidents, etc.), or (e) caused by the actions of a third party or parties outside of PG&E's control, Applicant shall, at its own expense, rearrange its Equipment as necessary, or remove, relocate, replace, or transfer its Equipment to substitute poles, if available, as designated by PG&E. PG&E will give Applicant thirty (30) days written notice for such necessary work, except in the case of an emergency, said notice may be delayed but for not more than (10) days after commencement of the emergency work. In the event that Applicant does not perform its work prior to

PG&E's scheduled work, or in cases of emergency, PG&E may at the expense of Applicant perform such work or other associated work in connection with the Equipment that may be required for the operating needs of PG&E.

11. **SERVICE CONNECTION/DISCONNECTION**. Connection or disconnection of Applicant's service wires to PG&E's secondary conductors will be performed only by PG&E. This work shall be performed at Applicant's expense based on the flat cost table attached as Exhibit C. This table is subject to change and use by PG&E annually under this agreement, without formal amendment to this Agreement.

12. **EQUIPMENT REMOVAL** Applicant or its contractor may remove its Equipment from any poles hereunder upon giving ten (10) days advance written notice to PG&E; provided, however, in case of an emergency, said notice may be delayed but for not more than (10) days after commencement of the emergency work. Such notice shall be given by executing a Notice of Contract Removal in the form attached hereto as Exhibit D.

13. **EQUIPMENT ABANDONMENT**. Abandonment of any Equipment under this Agreement, at a location by Applicant shall terminate all of its rights and privileges at that location. Abandonment shall be presumed if any Equipment is not used for a three (3) month period, unless Applicant notifies PG&E in writing of a specific temporary period of disuse of its Equipment. In such instances, the Equipment will not be considered abandoned until three (3) months after the temporary disuse period has lapsed. After the expiration of such period, PG&E shall have the right to remove and retain possession of the Equipment, provided that at least thirty (30) days prior to such removal or possession, PG&E has mailed to Applicant written notice of its intention, and Applicant has neither responded nor commenced using the Equipment. PG&E has the right to collect from Applicant all expenses incurred for removal of such Equipment. Equipment shall not be considered in disuse for any period in which it is inoperable due to failure of electrical service to it, or failure of any component requiring repair or replacement until a reasonable opportunity has been given to Applicant to effect the repair or replacement. Nor shall Equipment be considered disused if It becomes inoperable and this condition is not made known to the Applicant in a timely manner.

14. **INDEMNIFICATION**. Applicant shall indemnify and hold harmless PG&E, its officers, agents and employees, against all loss, damage, expense and liability resulting from injury to or death of parson, including but not limited to employees of PG&E, Applicant, or any third party, or any damage to property, including but not limited to, property of PG&E, Applicant, or any third party, arising out of or in any way connected with the performance of this Agreement and any and all construction activities however caused, except to the extent caused by the active negligence or willful misconduct of PG&E, its officers, agents and employees. Applicant will pay any cost that may be incurred by PG&E in enforcing this indemnity, including reasonable attorneys' fees.

15. **GENERAL WAIVER**. Should either party fail to enforce any specific provision of this Agreement, it shall not be deemed a general waiver or relinquishment by that party of any provision in this agreement-

16. **PAYMENT FOR WORK.** Any amount due from Applicant to PG&E for work performed under the provisions of this Agreement are payable in advance of PG&E commencing work, however, where prohibited by law, Applicant may pay the amount within a period of (30) days after the work Is completed.

17. **TERM OF AGREEMENT**. Notwithstanding any other provisions hereof, this Agreement shall be and remain in effect for an initial period of ten (10) years from the date of this Agreement, and shall extend thereafter for successive terms of one (1) year each, unless otherwise terminated by either party on not less than twelve (12) months advance written notice to the other party at the expiration of the initial or any subsequent term.

18. **OBLIGATION AFTER TERMINATION**. Any termination of Applicant's rights end privileges under this Agreement shall not relieve Applicant of any obligations, whether of indemnity or otherwise, which has accrued prior to such termination or completion of removal of Applicant's equipment, whichever Is later, or which arises out of an occurrence happening prior thereto.

19. **ASSIGNMENT**. Applicant may assign this Agreement, in whole or part, only if PG&E consents in writing and the party to whom the Agreement Is assigned (Assignee) agrees in writing to perform the obligations of Applicant hereunder and to be bound by this Agreement in all respects. Assignment of this Agreement shall not release Applicant from any of the obligations under this Agreement unless such a release is specifically agreed to in writing this Agreement unless such a release is specifically agreed to in writing by PG&E and the Assignee. Such assignment, unless otherwise, provided therein, shall be deemed to include Applicant's right to any refunds then unpaid or which may thereafter become payable.

20. **COMMISSION JURISDICTION**. This Agreement shall be subject to all of PG&E's tariff schedules on file with and authorized by the Commission and shall at all times be subject to such changes or modifications as the Commission may direct from time to time in the exercise of its jurisdiction. These may include, but are not limited to changes or modifications to monthly cost of ownership charges (higher or lower percentage rates), extension rules, and rate schedules.

Electric Sample Form No. 79-948 Sheet 1
Electric Service Provider (ESP) Service Agreement

Please Refer to Attached Sample Form

ELECTRIC SERVICE PROVIDER (ESP) SERVICE AGREEMENT

This Electric Service Provider (ESP) Service Agreement (this "Agreement") is made and entered into as of this ____ day of _____, _____, by and between "_____ _____" ("ESP"), a _____ _____ organized and existing under the laws of the state of _____, and "Pacific Gas and Electric Company" ("PG&E"), a corporation organized and existing under the laws of the state of California. From time to time, ESP and PG&E shall be individually referred to herein as a "Party" and collectively as the "Parties."

Section 1: General Description of Agreement

1.1 This Agreement is a legally binding contract. The Parties named in this Agreement are bound by the terms set forth herein and otherwise incorporated herein by reference. This Agreement shall govern the business relationship between the Parties hereto by which ESP shall offer electrical energy services, including, but not limited to, account maintenance and billing services, electrical meter installation, meter reading services and/or any other services that may be approved by the California Public Utilities Commission ("CPUC") in Direct Access transactions with customers in PG&E's service territory ("Direct Access Services"). Each Party, by agreeing to undertake specific activities and responsibilities for or on behalf of customers, acknowledges that each Party shall relieve and discharge the other Party of the responsibility for said activities and responsibilities with respect to those customers. Except where explicitly defined herein (including Attachment A hereto) the definitions controlling this Agreement are contained in PG&E's applicable rules or in the relevant direct access tariff.

1.2 The form of this Agreement has been developed as part of the CPUC regulatory process, was intended to conform to CPUC directions, was filed and approved by the CPUC for use between PG&E and ESPs and may not be waived, altered, amended or modified, except as provided herein or in the relevant direct access tariff, or as may otherwise be authorized by the CPUC.

Section 2: Representations

2.1 Each Party represents that it is and shall remain in compliance with all applicable laws and tariffs, including applicable CPUC requirements.

† Information collected on this form is used in accordance with PG&E's Privacy Policy. The Privacy Policy is available at pge.com/privacy.

2.2 Each person executing this Agreement for the respective Parties expressly represents and warrants that he or she has authority to bind the entity on whose behalf this Agreement is executed.

2.3 Each Party represents that (a) it has the full power and authority to execute and deliver this Agreement and to perform its terms and conditions; (b) the execution, delivery and performance of this Agreement have been duly authorized by all necessary corporate or other action by such Party; and (c) this agreement constitutes such Party's legal, valid and binding obligation, enforceable against such Party in accordance with its terms.

2.4 Each Party shall (a) exercise all reasonable care, diligence and good faith in the performance of its duties pursuant to this Agreement; and (b) carry out its duties in accordance with applicable recognized professional standards in accordance with the requirements of this Agreement.

Section 3: Term of Service

The term of this Agreement shall commence on the date of execution by both Parties hereto (the "Effective Date") and shall terminate on the earlier of (a) the date ESP informs PG&E that it is no longer operating as an ESP in PG&E's service territory; (b) the earlier termination pursuant to Section 4 hereof; or (c) the effective date of a new ESP Service Agreement between the Parties hereto. Notwithstanding the Effective Date of this Agreement, the ESP acknowledges that it may only offer Direct Access Services to customers effective January 1, 1998, or such other date as may be directed by the CPUC for commencement of such services by ESPs, and only after it has complied with all provisions of this Agreement and PG&E's applicable tariffs.

Section 4: Events of Default and Remedy for Default

4.1 An Event of Default under this Agreement shall include either Party's material breach of any provision of this Agreement, including those incorporated by reference herein, and failure to cure such breach within thirty (30) calendar days of receipt of written notice thereof from the non-defaulting Party; or such other period as may be provided by this Agreement or PG&E's direct access tariff.

4.2 In the event of such an Event of Default, the non-defaulting Party shall be entitled (a) to exercise any and all remedies available under PG&E's direct access tariff; (b) to the extent not inconsistent with PG&E's direct access tariff, to exercise any and all remedies provided for by law or in equity; and (c) in the event of a material Event of Default, to terminate this Agreement upon written notice to the other Party, which shall be effective upon the receipt thereof.

4.3 Breach by any Party hereto of any provision of PG&E's direct access tariff shall be governed by applicable provisions contained therein and each Party will retain all rights granted thereunder.

Section 5: Billing, Metering and Payment

5.1 Billing options and metering services which are available to ESP shall be as described in PG&E's direct access tariff, as stated in PG&E's Electric Rule 22. Billing and metering options applicable to a particular customer shall be designated in the Direct Access Service Request submitted by the ESP for such customer.

5.2 PG&E will bill and the ESP agrees to pay PG&E for all services and products provided by PG&E in accordance with the terms and conditions set forth in PG&E's direct access tariff, as stated in PG&E's Electric Rule 22 and PG&E's rate schedules. Any services provided by the ESP to PG&E shall be by separate agreement between the Parties and are not a subject of this Agreement.

Section 6: Limitation of Liability

Each Party's liability to the other Party for any loss, cost, claim, injury, liability, or expense, including reasonable attorneys' fees, relating to or arising from any act or omission in its performance of this Agreement, shall be limited to the amount of direct damage actually incurred, except as provided for in this Section. In no event shall either Party be liable to the other Party for any indirect, special, consequential, or punitive damages of any kind whatsoever, whether in contract, tort or strict liability, except in the event of an action covered by the Indemnification provisions of Section 7 of this Agreement, in which event this Section 6 shall not be applicable.

Section 7: Indemnification

7.1 To the fullest extent permitted by law, and subject to the limitations set forth in Section 6 of this Agreement, each Party (the "Indemnifying Party") shall indemnify and hold harmless the other Party, and its current and future direct and indirect parent companies, affiliates and their shareholders, officers, directors, employees, agents, servants and assigns (collectively, the "Indemnified Party") and at the Indemnified Party's option, the Indemnifying Party shall defend the Indemnified Party from and against any and all claims and/or liabilities for losses, expenses, damage to property, injury to or death of any person, including, but not limited to, the Indemnified Party's employees and its affiliates' employees, subcontractors and subcontractors' employees, or any other liability incurred by the Indemnified Party, including reasonable expenses, legal and otherwise, which shall include reasonable attorneys' fees, caused wholly or in part by any negligent, grossly negligent or willful act or omission by the Indemnifying Party, its officers, directors, employees, agents or assigns arising out of this Agreement, except to the extent
caused wholly or in part by any negligent, grossly negligent or willful act or omission of the Indemnified Party.

7.2 If any claim covered by Section 7.1 is brought against the Indemnified Party, then the Indemnifying Party shall be entitled to participate in, and unless in the opinion of counsel for the Indemnified Party a conflict of interest between the Parties may exist with respect to such claim, assume the defense of such claim, with counsel reasonably acceptable to the Indemnified Party. If the Indemnifying Party does not assume the defense of the Indemnified Party, or if a conflict precludes the Indemnifying Party from assuming the defense, then the Indemnifying Party shall reimburse the Indemnified Party on a monthly basis for the Indemnified Party's defense through separate counsel of the Indemnified Party's choice. Even if the Indemnifying Party assumes the defense of the Indemnified Party with acceptable counsel, the Indemnified Party, at its sole option, may participate in the defense, at its own expense, with counsel of its own choice without relieving the Indemnifying Party of any of its obligations hereunder. In no event shall either Party be liable to the other Party for any indirect, special, consequential, or punitive damages of any kind whatsoever, whether in contract, tort or strict liability.

7.3 The Indemnifying Party's obligation to indemnify under this Section 7 shall survive termination of this Agreement, and shall not be limited in any way by any limitation on the amount or type of damages, compensation or benefits payable by or for the Indemnifying Party under any statutory scheme, including, without limitation, under any Worker's Compensation Acts, Disability Benefit Acts or other Employee Benefit Acts.

Section 8: Assignment and Delegation

8.1 Neither Party to this Agreement shall assign any of its rights or obligations under this Agreement, except with the prior written consent of the other Party, which consent shall not be unreasonably withheld or delayed. No assignment of this Agreement shall relieve the assigning Party of any of its obligations under this Agreement until such obligations have been assumed by the assignee. When duly assigned in accordance with the foregoing, this Agreement shall be binding upon and shall inure to the benefit of the assignee and the assignor shall be relieved of its rights and obligations. Any assignment in violation of this Section 8 shall be void.

8.2 Notwithstanding the provisions of this Section 8, either Party may subcontract its duties under this Agreement to a subcontractor, provided that the subcontracting Party shall remain fully responsible as a principal and not as a guarantor for performance of any subcontracted duties, shall serve as the point of contact between its subcontractor and the other Party, and shall provide the other Party with thirty (30) calendar days' prior written notice of any such subcontracting, which notice shall include such information about the subcontractor as the other Party shall reasonably require, and provided further that each Party may subcontract its obligation to provide Metering or Meter Reading Services under this Agreement only to subcontractors who have complied with all certification or registration requirements described in applicable law, CPUC rules and PG&E's direct access tariff . If either Party subcontracts any of its duties hereunder, it shall cause its subcontractors to perform in a manner which is in conformity with that Party's obligations under this Agreement.

Section 9: Independent Contractors

Each Party shall perform its obligations under this Agreement (including any obligations performed by a Party's designees as permitted under Section 8 of this Agreement) as an independent contractor.

Section 10: Entire Agreement

This Agreement consists of, in its entirety, this Electric Service Provider Service Agreement and all attachments hereto, all Direct Access Service Requests submitted pursuant to this Agreement and PG&E's direct access tariff. This Agreement supersedes all other agreements or understandings, written or oral, between the Parties related to the subject matter hereof. This Agreement may be modified from time to time only by an instrument in writing, signed by both Parties.

Section 11: Nondisclosure

11.1 Neither Party may disclose any Confidential Information obtained pursuant to this Agreement to any third party, including affiliates of such Party, without the express prior written consent of the other Party. As used herein, the term "Confidential Information" shall include, but not be limited to, all business, financial, and commercial information pertaining to the Parties, customers of either or both Parties, suppliers for either Party, personnel of either Party, any trade secrets, and other information of a similar nature, whether written or in intangible form that is marked proprietary or confidential with the appropriate owner's name. Confidential Information shall not include information known to either Party prior to obtaining the same from the other Party, information in the public domain, or information obtained by a Party from a third party who did not, directly or indirectly, receive the same from the other Party to this Agreement or from a party who was under an obligation of confidentiality to the other Party to this Agreement or information developed by either Party independent of any Confidential Information. The receiving Party shall use the higher of the standard of care that the receiving Party uses to preserve its own confidential information or a reasonable standard of care to prevent unauthorized use or disclosure of such Confidential Information. Each receiving Party shall, upon termination of this Agreement or at any time upon the request of the disclosing Party, promptly return or destroy all Confidential Information of the disclosing Party then in its possession.

11.2 Notwithstanding the preceding, Confidential Information may be disclosed to any governmental, judicial or regulatory authority requiring such Confidential Information pursuant to any applicable law, regulation, ruling, or order, provided that: (a) such Confidential Information is submitted under any applicable provision, if any, for confidential treatment by such governmental, judicial or regulatory authority; and (b) prior to such disclosure, the other Party is given prompt notice of the disclosure requirement so that it may take whatever action it deems appropriate, including intervention in any proceeding and the seeking of any injunction to prohibit such disclosure.

Section 12: Enforceability

If any provision of this Agreement or the application thereof, is to any extent held invalid or unenforceable, the remainder of this Agreement and the application thereof, other than those provisions which have been held invalid or unenforceable, shall not be affected and shall continue in full force and effect and shall be enforceable to the fullest extent permitted by law or in equity.

Section 13: Notices

13.1 Except as otherwise provided in this Agreement, any notices under this Agreement shall be in writing and shall be effective upon delivery if delivered by (a) hand; (b) U.S. Mail, first class postage pre-paid, or (c) facsimile, with confirmation of receipt to the Parties as follows:

If the notice is to ESP:

Contact Name: _____

Business Address: _____

_____

_____

Facsimile: _____

If the notice is to PG&E:

Contact Name: _____

Business Address: _____

_____

_____

_____

13.2 Each Party shall be entitled to specify as its proper address any other address in the United States upon written notice to the other Party.

13.3 Each Party shall designate on Attachment A the person(s) to be contacted with respect to specific operational matters relating to Direct Access service. Each Party shall be entitled to specify any change to such person(s) upon written notice to the other Party.

Section 14: Time of Essence

The Parties expressly agree that time is of the essence for all portions of this Agreement.

Section 15: Dispute Resolution

15.1 The form of this Agreement has been filed with and approved by the CPUC as part of PG&E's applicable tariffs. Except as provided in Section 15.2 and 15.3, any dispute arising between the Parties relating to interpretation of the provisions of this Agreement or to the performance of PG&E's obligations hereunder (including the performance of Billing Services, Metering Services and MDMA Services by PG&E) shall be reduced to writing and referred to the Parties' representatives identified on Attachment A for resolution. Should such a dispute arise, the parties shall be required to meet and confer in an effort to resolve their dispute. Pending resolution, the Parties shall proceed diligently with the performance of their respective obligations under this Agreement, except if this Agreement has been terminated under Section 4.2. If the Parties fail to reach an agreement within a reasonable period of time, the matter shall, upon demand of either Party, be submitted to resolution before the CPUC in accordance with the CPUC's rules, regulations and procedures applicable to resolution of such disputes.

15.2 Any dispute arising between the Parties relating to interpretation of the provisions of this Agreement or to the performance of the ESP's obligations hereunder (including the performance of Billing Services, Metering Services and MDMA Services by the ESP) shall be reduced to writing and referred to the Parties' representatives identified on Attachment A for resolution. Should such a dispute arise, the parties shall be required to meet and confer in an effort to resolve their dispute. Pending resolution,

the Parties shall proceed diligently with the performance of their respective obligations under this Agreement, except if this Agreement has been terminated under Section 4.2. If the Parties fail to reach an agreement within a reasonable period of time, the parties may mutually agree to pursue mediation or arbitration to resolve such issues.

15.3 Notwithstanding the provisions of Paragraph 15.1 and 15.2 above: (a) all disputes between the Parties relating to the payment by the ESP of any PG&E fees or charges shall be subject to the provisions of PG&E's applicable tariffs governing disputes over customer bills; (b) all disputes between the Parties regarding Competition Transition Charges payable by direct access customers or the ESP on behalf of such customers shall be subject to the provisions of PG&E's applicable tariffs; and (c) PG&E may pursue available remedies for unauthorized electrical use by the ESP in a court of competent jurisdiction.

15.4 If the dispute involves a request for damages, parties are notified that the Commission has no authority to award damages. To resolve such issues, the parties may mutually agree to pursue mediation or arbitration to resolve such issues, or if no agreement is reached, to pursue other legal remedies that are available to the parties.

Section 16: Applicable Law and Venue

This Agreement shall be interpreted, governed by and construed in accordance with the laws of the State of California, and shall exclude any choice of law rules that direct the application of the laws of another jurisdiction, irrespective of the place of execution or of the order in which the signatures of the parties are affixed or of the place or places of performance. Except for matters and disputes with respect to which the CPUC is the initial proper venue for dispute resolution pursuant to applicable law or this Agreement, the federal and state courts located in San Francisco County, California shall constitute the sole proper venue for resolution of any matter or dispute hereunder, and the Parties submit to the exclusive jurisdiction of such courts with respect to such matters and disputes.

Section 17: Force Majeure

Neither Party shall be liable for any delay or failure in the performance of any part of this Agreement (other than obligations to pay money) due to any event of force majeure or other cause beyond its reasonable control, including but not limited to, unusually severe weather, flood, fire, lightning, epidemic, quarantine restriction, war, sabotage, act of a public enemy, earthquake, insurrection, riot, civil disturbance, strike, work stoppage caused by jurisdictional and similar disputes, restraint by court order or public authority, or action or non-action by or inability to obtain authorization or approval from any governmental authority, or any combination of these causes, which by the exercise of due diligence and foresight such Party could not reasonably have been expected to avoid and which by the exercise of due diligence is unable to overcome. It is agreed that upon the Party so affected giving written notice and reasonably full particulars of such force majeure to the other Party within a reasonable time after the cause relied on, then the obligations of the Party, so far as

they are affected by the event of force majeure, shall be suspended during the continuation of such inability and circumstance and shall, so far as possible, be remedied with all reasonable dispatch. In the event of force majeure, as described herein, both Parties shall take all reasonable steps to comply with this Agreement and PG&E's applicable tariffs despite occurrence of a force majeure event.

Section 18: Unauthorized Use of Energy (Energy Theft)

18.1 The ESP represents and warrants that for each of its Customers, and at all times during which it provides Direct Access services as an Electric Service Provider, the ESP shall completely, accurately, and in a timely manner account for each of its Customer's loads with a duly authorized Scheduling Coordinator. Load data not accounted for in this manner may provide grounds for termination of this Agreement. For verification purposes only, PG&E shall have complete access to the identity of the Scheduling Coordinator and the load data provided to it by the ESP. Such information is to remain confidential, and shall not be disclosed to any unauthorized person.

18.2 PG&E shall notify the ESP immediately and the ESP shall notify PG&E immediately of any suspected unauthorized energy use. The Parties agree to preserve any evidence of unauthorized energy use. Once unauthorized energy use is suspected, PG&E, in its sole discretion, may take any or all of the actions permitted under PG&E's applicable tariffs.

Section 19: Not a Joint Venture

Unless specifically stated in this Agreement to be otherwise, the duties, obligations, and liabilities of the Parties are intended to be several and not joint or collective. Nothing contained in this Agreement shall ever be construed to create an association, trust, partnership or joint venture or to impose a trust or partnership duty, obligation, or liability on or with regard to either Party. Each Party shall be liable individually and severally for its own obligations under this Agreement.

Section 20: Conflicts Between this Agreement and PG&E's Direct Access Tariff

Should a conflict exist or develop between the provisions of this Agreement and PG&E's direct access tariff, as approved by the CPUC, the provisions of PG&E's direct access tariff shall prevail.

Section 21: Amendments or Modifications

21.1 Except as provided in Section 21.2, no amendment or modification shall be made to this Agreement, in whole or in part, except by an instrument in writing executed by authorized representatives of the Parties, and no amendment or modification shall be made by course of performance, course of dealing or usage of trade.

21.2 This Agreement may be subject to such changes or modifications as the CPUC may from time to time direct or necessitate in the exercise of its jurisdiction, and the Parties may amend the Agreement to conform to changes directed or necessitated by the CPUC. In the event the Parties are unable to agree on the required changes or modifications to this Agreement, their dispute shall be resolved in accordance with the provisions of Section 15 hereof or, in the alternative, ESP may elect to terminate this Agreement upon written notice to PG&E, which shall be effective upon the receipt thereof. PG&E retains the right to unilaterally file with the CPUC, pursuant to the CPUC's rules and regulations, an application for a change in PG&E's rates, charges, classification, service or rules, or any agreement relating thereto.

Section 22: Billing Options Offered to End-Use Customers by ESP

Check which billing options (as described in PG&E's direct access tariff) ESP intends to provide its Customers under this Agreement.

_____ **Consolidated Billing by PG&E.**

_____ **Consolidated Billing by the ESP.**

If ESP is selecting this billing option, (a) ESP must submit a credit application on the form supplied by PG&E; and (b) the only method for notifying ESP of PG&E charges will be electronic**.**

_____ **Separate PG&E and ESP Bills.**

ESP may change these elections from time to time in compliance with the relevant direct access tariff upon prior written notice to PG&E. The Direct Access Service Request (DASR) for each Direct Access customer will specify which billing option will apply to that customer. If ESP specifies in any DASR any billing option that has not been checked above, the DASR will be rejected.

Section 23: Meter Options Offered to End-Use Customers by ESP

Check which meter options (as described in PG&E's direct access tariff) ESP will offer for some or all of its Customers served under this Agreement.

_____ ESP will provide Hourly Meters.

_____ ESP will offer Hourly Meter Installation Services.

_____ ESP will offer Hourly Meter Reading Services.

ESP may change these elections from time to time in compliance with PG&E's direct access tariff upon prior written notice to PG&E. The Direct Access Service Request (DASR) for each Direct Access customer will specify which metering option will apply to that Customer. If ESP specifies in any Direct Access Service Request any metering option that has not been checked above, the DASR will be rejected.

Section 24: Audits

24.1 PG&E and the ESP shall each retain such specific records as may be required to support the accuracy of meter data provided in their respective consolidated billings. When either Party reasonably believes that errors related to metering or billing activity may have occurred, a Party may request the production of such documents as may be required to verify the accuracy of such metering and consolidated billing. Such documents shall be provided within ten (10) business days of such request. In the event the requesting Party, upon review of such documents, continues to believe that the other Party's duty to accurately meter and provide consolidated billing for usage has been breached, the requesting Party may direct that an audit be conducted. PG&E and the ESP shall designate their own employee representative or their contracted representative to audit the other party's records.

24.2 Any such audit shall be undertaken by PG&E, the ESP, or their contracted representative at reasonable times without interference with the audited Party's business operations, and in compliance with the audited Party's security procedures. PG&E and the ESP agree to cooperate fully with any such audit.

24.3 Specific records to support the accuracy of meter data provided in the consolidated billings may require examination of billing and metering support documentation maintained by subcontractors. PG&E and the ESP shall include a similar clause in their agreements with their subcontractors reserving the right to designate their own employee representative, or their contracted representative to audit records related to consolidated billing to Direct Access Customers.

24.4 The auditing Party will notify the audited Party in writing of any exception taken as

a result of an audit. The audited Party shall refund the amount of any undisputed exception to the auditing Party within ten (10) days. If the audited Party fails to make such payment, the audited Party agrees to pay interest, accruing monthly, at a rate equal to the prime rate plus two percent (2%) of Bank of America NT&SA, San Francisco, or any successor institution, in effect from time to time, but not to exceed the maximum contract rate permitted by the applicable usury laws of the State of California. Interest will be computed from the date of written notification of exceptions to the date the audited Party reimburses the auditing Party for any exception. The cost of such audit shall be paid by the auditing Party; provided, however, that in the event an audit verifies overcharges of five percent (5%) or more, then the audited Party shall reimburse the auditing Party for the cost of the audit.

24.5 This right to audit shall extend for a period of three (3) years following the date of final payment under this Agreement. Each party and each subcontractor shall retain all necessary records and documentation for the entire length of this audit period.

Section 25: Miscellaneous

25.1 Unless otherwise stated in this Agreement: (a) any reference in this Agreement to a section, subsection, attachment or similar term refers to the provisions of this Agreement; (b) a reference to a section includes that section and all its subsections; and (c) the words “include,” “includes,” and “including” when used in this Agreement shall be deemed in each case to be followed by the words “without limitation.” The Parties agree that the normal rule of construction to the effect that any ambiguities are to be resolved against the drafting Party shall not be employed in the interpretation of this Agreement

25.2 The provisions of this Agreement are for the benefit of the Parties and not for any other person or third party beneficiary. The provisions of this Agreement shall not impart rights enforceable by any person, firm or organization other than a Party or a successor or assignee of a Party to this Agreement.

25.3 The descriptive headings of the various sections of this Agreement have been inserted for convenience of reference only and shall in no way define, modify or restrict any of the terms and provisions thereof.

25.4 Any waiver at any time by either Party of its rights with respect to a default under this Agreement, or with respect to any other matter arising in connection with this Agreement, shall not be deemed a waiver with respect to any other or subsequent default or matter and no waiver shall be considered effective unless in writing.

25.5 Each Party shall be responsible for paying its own attorneys' fees and other costs associated with this Agreement, except as provided in Sections 6 and 7 hereof. If a dispute exists hereunder, the prevailing Party, as determined by the CPUC, or as may otherwise be determined by the dispute resolution procedure contained in Section 15 hereof, if used, or by a court of law, shall be entitled to reasonable attorneys' fees and costs.

25.6 To the extent that the CPUC has a right under then-current law to audit either Party's compliance with this Agreement or other legal or regulatory requirements pertaining to Direct Access transactions that Party shall cooperate with such audits. Nothing in this Section shall be construed as an admission by either Party with respect to the right of the CPUC to conduct such audits or the scope thereof.

25.7 Except as otherwise provided in this Agreement, all rights of termination, cancellation or other remedies in this Agreement are cumulative. Use of any remedy shall not preclude any other remedy in this Agreement.

The Parties have executed this Agreement on the dates indicated below, to be effective upon the later date.

ATTACHMENT A

A. Definitions:

Billing Services - The consolidated billing services described in PG&E's direct access tariff which are provided by PG&E and/or ESP.

Consolidated ESP Bill - The consolidated bill prepared and presented by ESP to an end-use customer which includes the customer's ESP Charges and PG&E Charges.

Consolidated PG&E Bill - The consolidated bill prepared and presented by PG&E to an end-use customer which includes the Customer's ESP Charges and PG&E Charges.

Direct Access Customer - An end-use customer located within PG&E's service territory who purchases Direct Access Services through the ESP.

ESP Charges - Charges for Direct Access Services provided by the ESP.

Metering Services - The meter installation, maintenance and related services described in PG&E's direct access tariff which are provided by PG&E and/or ESP.

Meter Reading Services - The meter reading and related services described in PG&E's direct access tariff which are provided by PG&E and/or ESP.

PG&E Charges - Charges (a) for services provided by PG&E; or (b) which are energy-related and which are approved by the CPUC or the Federal Energy Regulatory Commission (including any Competition Transition Charges or Fixed Transition Amount Charges owing to PG&E or its affiliates, as those terms are defined under the California Public Utilities Code). Fixed Transition Amount Charges are also referred to as Trust Transfer Amount (TTA) Charges.

Departing Load Competition Transition Charge Agreement

Please Refer to Attached Sample Form

DEPARTING LOAD COMPETITION TRANSITION CHARGE AGREEMENT

This is an agreement, between _____, (Customer), and PACIFIC GAS AND ELECTRIC COMPANY (PG&E), hereinafter referred to individually as (Party) and collectively as (Parties). This agreement will be herein referred to as "Agreement".

RECITALS

A. On December 20, 1995, the California Public Utilities Commission ("CPUC"), issued D. 95-12-063 (as modified by D. 96-01-009) which, among other things, authorized PG&E to collect retail transition costs associated with electric restructuring. In its order, the Commission ruled that the Competition Transition Charge ("CTC") will be nonbypassable and will apply to retail customers of record on or after December 20, 1995.

B. On September 23, 1996, Governor Wilson signed into law Assembly Bill (AB) 1890 (Statutes 1996, Ch. 854, codified primarily in various sections of the Public Utilities Code), which also affected the restructuring of the electric industry in California, including the collection of retail transition costs and other nonbypassable charges. Among other things, AB 1890 establishes:

   (i) a nonbypassable CTC (Public Utilities Code Sections 367-368, 375-376);

   (ii) certain exemptions to the CTC (Sections 372, 374);

   (iii) nonbypassable charges for nuclear decommissioning (Section 379), recovery of Rate Reduction Bond principal, interest, and ongoing costs (Section 840(d)), and public purpose program costs (Sections 381-383) (hereinafter referred to as "other nonbypassable charges"); and

   (iv) CTC responsibility for existing retail customers and for new electric consumers or loads located in PG&E's service territory as it existed on December 20, 1995, except for those new or incremental loads that might be met through a direct transaction and the transaction does not require the use of transmission or distribution facilities owned by PG&E (Section 369).

C. On June 11, 1997, the CPUC issued D. 97-06-060 adopting a CTC Procedure for Departing Loads (hereinafter referred to as the "Departing Load CTC") and accepting the Departing Load CTC as an amendment to PG&E's Electric Tariff Preliminary Statement.

D. Under the Departing Load CTC, customers that meet the requirements of Departing Load, as that term is defined in the Departing Load CTC Procedure, are required to make payments according to a Departing Load CTC Statement (which includes payments for CTC and other applicable nonbypassable charges) and to execute a Departing Load CTC agreement five days before such Customer discontinues or reduces purchases of electricity from PG&E and has its load or the reduced portion of its load met by an alternate supplier of electricity.

† Information collected on this form is used in accordance with PG&E's Privacy Policy. The Privacy Policy is available at pge.com/privacy.

E. Customer's premises and its current electrical load requirements are located at _____, County of _____, California. Customer's PG&E account number (if applicable) is _____.

AGREEMENT

In consideration of the promises and mutual covenants and agreements contained herein, the Parties agree as follows:

1. Customer agrees that it is responsible for payment of its share of CTC and other nonbypassable charges as determined by the CPUC pursuant to Decision 97-06-060 and related orders in the Restructuring Proceeding.

2. Customer agrees to make ongoing monthly payments based on the Reference Period Load Profile described in customer's Departing Load CTC Statement (which includes payments for CTC and/or other applicable nonbypassable charges), a copy of which is attached hereto as Exhibit A, and assessed at the same rates of payment for CTC and/or other nonbypassable charges as are applicable each month under the electric rate schedule specified in that Departing Load CTC Statement, unless customer elects to supply reliable current metering information pursuant to the provisions in Section 5E of the Amended Preliminary Statement, and so indicates this election by initialing here:

   [ ] Customer elects to make CTC and/or other nonbypassable charge payments based on current metering information

   Customer shall pay to PG&E the monthly charge within 20 days of receipt of invoice.

3. Customer further agrees to make post-2001 CTC and/or other nonbypassable charge payments on either a final lump sum basis to become due and payable on or before April 1, 2002, or according to such other post-2001 periodic payments arrangements as are determined by a future CPUC proceeding addressing post-2001 CTC and other nonbypassable charge responsibility. Customer shall continue to pay all invoices to PG&E within 20 days of receipt of invoice.

4. The Agreement shall be effective as of the date that it is fully executed by Customer and PG&E, and will remain in effect until such time that Customer has paid to PG&E its full share of CTC and other nonbypassable charges as established by the CPUC.

5. This Agreement shall, at all times, be subject to such changes or modifications by the Commission as it may from time to time direct in that exercise of its jurisdiction.

6. Any waiver at any time by either Party of its rights with respect to a default under this Agreement, or with respect to any other matter arising under this Agreement, shall not be deemed a waiver with respect to any subsequent default or matter arising in connection therewith. Any delay in asserting any right shall not be deemed a waiver of such right.

7. The Parties do not intend to create rights in, or to grant remedies to, any third party as a beneficiary of this Agreement or of any duty, covenant, obligation or undertaking herein.

8. Should any provision of this Agreement for any reason be declared invalid or unenforceable by final and unappealable order of any court or regulatory body having jurisdiction, such decision shall not affect the validity of the remaining portions, and the remaining portions shall remain in full force and effect as if this Agreement had been executed without the invalid portion.

9. This Agreement shall be interpreted, governed by, and construed under the laws of the State of California.

10. Ambiguities or uncertainties in the wording of this Agreement shall not be construed for or against either Party, but shall be construed in a manner that most accurately reflects the rulings and policy objectives of the CPUC in its orders establishing the CTC.

11. The signatories hereto represent that they have been appropriately authorized to enter into this Agreement.

Amendment to PG&E's Departing Load Competition Transition Charge Agreement for Subsequently Obtained CTC Exemption

Please Refer to Attached Sample Form

AMENDMENT TO PG&E'S DEPARTING LOAD COMPETITION TRANSITION CHARGE AGREEMENT FOR SUBSEQUENTLY OBTAINED CTC EXEMPTION

This Amendment to Pacific Gas and Electric Company's Departing Load Competition Transition Charge Agreement (the Agreement) between Pacific Gas and Electric Company (PG&E) and _____ (Customer) amends the Pacific Gas and Electric Company's Departing Load Competition Transition Charge Agreement entered into on or about _____ between Customer and PG&E.

RECITALS

A. Customer and PG&E have previously entered into a Departing Load Competition Transition Charge Agreement, approved by the California Public Utilities Commission (the Commission), pursuant to the CTC procedure for departing loads approved by the Commission as amendments to PG&E's electric tariff preliminary statement.

B. Subsequent to executing the Departing Load Competition Transition Charge Agreement, Customer obtained an exemption from the Competition Transition Charge.

C. On _____, PG&E received a Notice of Assertion of CTC Exemption from Customer.

AGREEMENT

In consideration of the promises and mutual covenants and agreements contained herein, the parties agree as follows:

1. The Effective Date of the CTC Exemption is _____.

2. After the Effective Date of the CTC Exemption, Customer shall not be responsible for, and PG&E shall not bill Customer for, monthly payments of Customer's share of CTC.

3. Nothing in this Amendment relieves Customer of its obligation to pay CTC obligations incurred by Customer and billed by PG&E prior to the Effective Date of the CTC Exemption.

4. Nothing in this Amendment affects Customer's obligation to pay other nonbypassable charges under the Agreement or to make post-2001 CTC and/or other nonbypassable charge payments as provided in paragraph 3 of the Agreement.

5. This Amendment shall, at all times, be subject to such changes or modifications by the Commission as it may from time to time direct in the exercise of its jurisdiction.

6. Any waiver at any time by either Party of its rights with respect to a default under this Amendment, or with respect to any other matter arising under this Amendment, shall not be deemed a waiver with respect to any subsequent default or matter arising in connection therewith. Any delay in asserting any right shall not be deemed a waiver of such right.

7. The Parties do not intend to create rights in, or to grant remedies to, any third party as a beneficiary of this Amendment or of any duty, covenant, obligation or undertaking herein.

8. Should any provision of this Amendment for any reason be declared invalid or unenforceable by final and unappealable order of any court or regulatory body having jurisdiction, such decision shall not affect the validity of the remaining portions, and the remaining portions shall remain in full force and effect as if this Amendment had been executed without the invalid portion.

9. This Amendment shall be interpreted, governed by, and construed under the laws of the State of California.

10. Ambiguities or uncertainties in the wording of this Amendment shall not be construed for or against either Party, but shall be construed in a manner that most accurately reflects the rulings and policy objectives of the CPUC in its orders establishing the CTC.

11. The signatories hereto represent that they have been appropriately authorized to enter into this Amendment.

ELECTRIC DISTRIBUTION SERVICE LINE LEASE AGREEMENT

THIS SERVICE LINE LEASE ("**Lease**") is made and entered into as of _____, 20__, by and between Pacific Gas and Electric Company ("**PG&E**" or "**Landlord**"), and _____Irrigation District, a "Section 374 Irrigation District" as that term is defined in PG&E Rate Schedule E-EXEMPT, ("_____**ID**" or "**Tenant**"). This Lease form has been pre-approved by the California Public Utilities Commission ("**CPUC")**.

RECITALS

A. On September 17, 1998, the CPUC issued Resolution E-3531 approving, with modifications, PG&E's request in Advice Letter 1738-E to add a special condition to PG&E Schedule E-Exempt for electric customers which select certain irrigation districts as their energy service provider (ESP) and which take direct access service from PG&E.

B. Among other things, Resolution E-3531 directed PG&E to file a standard lease of service drop facilities to be used by the Section 374 irrigation districts whose customers take service under PG&E Schedule E-Exempt, which standard lease was to be pre-approved by the CPUC after it has been reviewed by the Energy Division.

C. This Lease form has been reviewed by the Energy Division and pre-approved by the CPUC, and no further regulatory approvals are required, under California Public Utilities Code Section 851 or under any other statute or CPUC decision, for PG&E to lease Electric Service Lines as defined below to Tenant under the terms of this Lease.

D. This Lease constitutes an agreement for maintaining and repairing Electric Service Lines as required by Special Condition 2(i) of PG&E Schedule E-Exempt.

E. The provision of distribution service by PG&E and the sale of electricity by Tenant to Customer as defined below are retail transactions, subject to the CPUC's jurisdiction.

NOW, THEREFORE, LANDLORD AND TENANT AGREE AS FOLLOWS:

1. PURPOSE OF AGREEMENT

This Lease is intended for use by Irrigation Districts which (a) agree to act as ESPs under the direct access program established by the CPUC, (b) have executed the Energy Service Provider (ESP) Service Agreement (ESP

Landlord's Initials

Tenant's Initials

Service Agreement) approved by the CPUC as PG&E Form No. 79-948, and (c) will be serving PG&E's direct access electric customers under Special Condition 2 of PG&E's Rate Schedule E-EXEMPT.

2. TARIFFS GOVERN

2.1. Unless otherwise indicated below, PG&E's electric rules and tariffs, including Electric Rule 22 and the ESP Service Agreement, apply. Should a conflict develop between this Lease and Special Condition 2 of PG&E's Rate Schedule E-EXEMPT, Special Condition 2 of Rate Schedule E-EXEMPT shall govern. Should a conflict develop between this Lease and PG&E's Electric Rule 22 or the ESP Service Agreement [Form No. 79-948], the terms and conditions of this Lease shall govern.

2.2. Tenant is not required to comply with PG&E's Electric Rule 22(D)(2).

3. DEFINITIONS

- **"Customer"** is defined as a PG&E direct access customer taking service under Special Condition 2 of Schedule E-EXEMPT.
- **"FERC"** is defined as the Federal Energy Regulatory Commission, or any successor thereto.
- **"Service Line(s)"** are defined as those certain electric conductors or cables which extend between points of interconnection at PG&E's electric facilities and a termination point at or in the customer-owned underground service termination enclosure or at the customer-owned overhead termination point, and any agreed upon appurtenant materials.
- **"Legal Requirements"** shall mean all existing and future laws, ordinances, codes, rules, regulations, directives or requirements of any governmental authority not under the control of Tenant or of any fire insurance underwriter or rating bureau, whether or not foreseeable, including but not limited to the Americans with Disabilities Act of 1990 ("ADA"), Title 24, and all building code, energy conservation, public utility, electricity, environmental, seismic, handicap, fire, health and safety laws and regulations.
- **"Work"** shall mean all operation, construction, maintenance, additions, removals, rearrangements, relocations, repairs, improvements or replacements to Service Lines (including, but not limited to, replacement of materials at the end of their useful lives.)

Landlord's Initials

Tenant's Initials

4. LEASE OF SERVICE LINES

4.1. Landlord hereby leases to Tenant, and Tenant hereby leases from Landlord, the Service Lines described with particularity in an executed Electric Service Lines Lease Appendix, in substantially the form of Exhibit A hereto ("Lease Appendix"), each of which incorporates the terms of this Lease within it by reference, and any number of which may be separately executed between Landlord and Tenant during the term of this Lease, and all of which taken together with the body of this Lease shall constitute the Lease.

4.2. Landlord shall deliver possession of the Service Lines to Tenant in a condition consistent with the CPUC's General Order 95 for overhead Service Lines and General Order 128 for underground Service Lines. For each separate Lease Appendix, the Service Line(s) shall be delivered on the later of the date set forth in the Lease Appendix for delivery or the direct access switch date for the applicable customer account, determined in accordance with PG&E's Electric Rule 22.

5. TERM; TERMINATION

5.1. Subject to the provisions of this Section 5, the term of this Lease shall commence upon execution by both parties hereto. The term for the lease of a particular Service Line shall commence upon execution of the Lease Appendix for the applicable Service Line.

5.2. This Lease (including all Lease Appendices) shall terminate upon the earlier of:

a. March 31, 2002.

b. Termination of Tenant's ESP Service Agreement with PG&E, unless Tenant's ESP Service Agreement is simultaneously replaced with a new ESP Service Agreement.

c. Twelve months after the earlier of (1) the execution of an interconnection agreement between Tenant and Landlord or (2) issuance of a final order by FERC ordering Landlord to enter into an interconnection agreement with Tenant; provided that this Lease shall not terminate based on this subsection if (1) Tenant is actively engaged in the process of constructing or purchasing distribution facilities that will be used to serve customers eligible for CTC exemptions and (2) Tenant provides a signed affidavit attesting to this fact to Landlord, with a copy to the Director of the Energy Division of the CPUC. The twelve months after execution

Landlord's Initials

Tenant's Initials

of an interconnection agreement or after issuance of a final FERC order as used in this subsection refers to an interconnection agreement or FERC order pertaining to the distribution facilities which are the subject of the interconnection agreement or FERC order.

d. Issuance of a final order by FERC denying Tenant's application for an order for an interconnection agreement.

e. Termination of this Lease pursuant to Section 16 below.

f. Thirty days after Landlord receives written notice of termination from Tenant.

5.3. An individual Lease Appendix shall terminate upon the earlier of:

a. Tenant ceasing to be the ESP for the Customer served by the Service Line covered by that Lease Appendix.

b. The Customer ceasing to be a "Direct Access customer" of PG&E as that phrase is used in PG&E's Electric Rule 22.A.3.

c. Termination of this Lease pursuant to either Section 5.2 or Section 16.

d. Thirty days after Landlord receives written notice of termination from Tenant.

e. Twelve months after the earlier of (1) the execution of an interconnection agreement between Tenant and Landlord pertaining to the distribution facilities which are the subject of the Lease Appendix or (2) issuance of a final order by FERC ordering Landlord to enter into an interconnection agreement with Tenant pertaining to the distribution facilities which are the subject of the Lease Appendix; provided that the Lease Appendix shall not terminate based on this subsection if (1) Tenant is actively engaged in the process of constructing or purchasing distribution facilities that will be used to serve customers eligible for CTC exemptions and (2) Tenant provides a signed affidavit attesting to this fact to Landlord, with a copy to the Director of the Energy Division of the CPUC.

5.4. At any time following the execution of this Lease, it shall terminate automatically upon any written direction or order to that effect by the CPUC, the FERC, or any other governmental or regulatory body (other than Tenant itself) having jurisdiction over Landlord, Tenant, the

Landlord's Initials

Tenant's Initials

Service Lines, or this Lease. Upon such termination, possession of the Service Lines shall immediately revert to PG&E. PG&E is not obligated to provide notice to Tenant or Customer of termination under this section, but shall make its best efforts to do so in writing, pursuant to the terms of Section 20 herein, within ten (10) business days of the date of termination under this section.

5.5. Following termination of this Lease, or of any Lease Appendix under this lease, electric distribution service to the Customer(s) shall be provided as directed by the Customer(s). If no direction is provided by the Customer(s), such service shall be provided by PG&E according to the terms and conditions of its tariffs and rules as of such date.

6. USE

6.1. The Service Lines shall be used by Tenant solely to deliver electric energy as an ESP to a Customer under Schedule E-EXEMPT.

6.2. Tenant's use of the Service Lines shall not ripen into any title, or right in or to the Service Lines beyond those expressly granted by this Lease, and as to those only for the Term hereof, and Tenant shall not make any claim of right or title, nor resist nor assail Landlord's title to the Service Lines based on this Lease or Tenant's use hereunder.

7. RENT

As consideration for this Lease of the Service Lines, Tenant shall pay to Landlord the sum of the rents set forth in each applicable Lease Appendix ("**Rent**"). Such Rent is due and payable monthly on or before ***[date]*** in the form of ***[form]*** and shall be delivered by ***[mail/courier/wire transfer/etc]*** to ***[name, address at PG&E].*** Lack of an invoice shall not excuse payment of Rent. Failure to timely make any payment under this section shall be considered breach of a material term of this Lease.

8. OPERATION AND MAINTENANCE

Landlord shall be solely responsible for operation of the Service Lines and for performance of maintenance upon the Service Lines. Operation of and maintenance upon the Service Lines shall be performed in accordance with Landlord's tariffs and rules, all Legal Requirements (as defined in Section 3) and with the standards set forth in CPUC General Orders 95, 128 and 165. Landlord shall be responsible for operation in violation of this section to any governmental or regulatory body with jurisdiction over such matters, and shall indemnify and hold Tenant harmless for same, as set forth in the terms of Section 15 herein.

Landlord's Initials

Tenant's Initials

9. INSURANCE

9.1. Tenant shall at all times during the Term maintain the following insurance coverage. Tenant is also responsible for its contractors maintaining sufficient limits of the same coverage.

a. Workers' Compensation insurance indicating compliance with any applicable labor codes, acts, laws or statutes, state or federal, where work is performed.

b. Employers' Liability insurance in an amount not less than $1,000,000 for injury or death each accident.

c. Commercial general liability coverage which shall be at least as broad as the Insurance Services Office (ISO) Commercial General Liability Coverage "occurrence" form , with no coverage deletions, and including fire legal liability. The limit shall not be less than $5,000,000 each occurrence for bodily injury, property damage and personal injury. Coverage shall: (a) by "Additional Insured" endorsement add as insureds PG&E, its directors, officers, agents and employees with respect to liability arising out of work performed for Tenant by any party other than Landlord, and (b) be endorsed to specify that Tenant's insurance is primary and that any insurance or self-insurance maintained by Landlord shall not contribute with it.

d. Before the delivery of any Service Lines under this Lease, Tenant shall furnish Landlord with certificates of insurance and endorsements of all required insurance. The documentation shall state that coverage shall not be canceled except after thirty (30) days prior written notice has been given to Landlord. The documentation must be signed by a person authorized by that insurer to bind coverage on its behalf and shall be submitted to:

Pacific Gas and Electric Company
Insurance Department – B24H
P.O. Box 770000
San Francisco, CA 94177

A copy of all such insurance documents shall be sent to Landlord pursuant to Section 20 herein. Landlord may inspect the original policies or require complete certified copies at any

time. Upon request, Tenant shall furnish Landlord the same evidence of insurance for its contractors.

9.2. All policies of insurance to be carried by either party hereunder shall be issued by an insurer licensed to do business in the State of California with a rating of at lease A- (VIII) in Best's Insurance Reports, or equivalent; provided that so long as the Landlord hereunder is PG&E or a Permitted Transferee, and so long as the Tenant hereunder is _____, PG&E, its Permitted Transferee or Tenant shall be entitled to self-insure for the insurance coverage required to be carried by such party herein.

9.3. Tenant shall use its best efforts to cause each insurance policy referenced in section 9.1 and obtained by it, (i) to provide that the insurer waives all right of recovery by way of subrogation against Landlord in connection with any injury or damage covered by such policy, and (ii) to include: (1) a waiver of the insurer's right of subrogation against Landlord and (2) an express agreement that such policy shall not be invalidated if the insured waives the right of recovery against any party responsible for a casualty covered by the policy before the casualty. Each such policy, if any, shall name Landlord as a named additional insured. Landlord shall promptly endorse to the order of Tenant, without recourse, any instrument for the payment of money under or with respect to the policy of which Tenant is the owner or original or primary insured, and shall have no right in or to such payment.

10. TAXES

Landlord shall pay all taxes, assessments (general or special), fees, impositions, franchises, surcharges, and charges levied upon the Service Lines or the land in or on which the Service Lines are situated, upon any work required to access the Service Lines (including without limitation cutting into streets), and upon any personal property of Landlord, including without limitation all street, sidewalk, sewer, drainage or lighting improvement assessments, and all transit, housing, police, fire or other governmental service charges, fees, or assessments ("**Taxes**"). Tenant shall not take any action to create or assess any Taxes payable by Landlord on or after the execution date of this Lease.

11. COMPLIANCE WITH LEGAL REQUIREMENTS

11.1. Except for Tenant's obligations under section 11.2 below, Landlord shall, at its expense, promptly comply with all legal requirements affecting the Service Lines. Tenant shall not take any action to create or amend any legal requirements affecting the Service Lines or Landlord's obligations with respect to the Service Lines on or after the execution date of this Lease.

11.2. Tenant shall, at its expense, acquire and maintain any and all applicable licenses, permissions and certifications necessary for Tenant to use the Service Lines during the Term of this Lease.

12. WORK ON SERVICE LINES

12.1. Tenant may not make improvements or alterations to the Service Lines without the prior written approval of Landlord.

12.2. Landlord shall be solely responsible for all necessary or desirable Work. Such Work shall be the sole property of Landlord, and shall, at the time it is completed, become part of the Service Lines for purposes of this Lease. Landlord may comply with this section by undertaking such Work personally or through a contractor.

13. MECHANICS' LIENS

Neither Landlord or Tenant will permit any mechanics', materialmen's or other similar lien to be filed or claimed against the Service Lines or Landlord's or Tenant's interest therein by reason of any work, labor, material, services or supplies furnished or purportedly furnished to or for the Service Lines. If any such mechanics' or materialmen's lien should be filed or claimed against the Service Lines, then the party through whom such lien was filed or claimed shall fully discharge and release the same from the Service Lines by posting bond or otherwise; provided, however that either party may contest any such lien so long as the enforcement thereof is stayed.

14. COOPERATION WITH REGULATORY OR GOVERNMENTAL REQUEST

Tenant shall provide Landlord, within ten (10) calendar days of Landlord's transmittal of written request pursuant to Section 20 herein, with any information concerning the Service Lines which information is requested of Landlord by a governmental or regulatory body with jurisdiction over Landlord, Tenant, the Service Lines, or this Lease. Tenant's failure to perform under this section shall be deemed a material default of this Lease.

Landlord's Initials

Tenant's Initials

15. INDEMNITIES AND LIMITATIONS OF LIABILITY

The provisions of Section 6 (Limitation of Liability) and Section 7 (Indemnity) of the ESP Service Agreement shall apply to matters within the scope of this Lease, and said provisions are incorporated herein by reference.

16. DEFAULT

16.1. An Event of Default by Tenant under the ESP Service Agreement [Form No. 79-948] shall also be an Event of Default by Tenant under this Lease.

16.2. Failure of Tenant to pay Rent shall be considered a material breach of this Lease.

16.3. An Event of Default under this Lease shall mean either Party's material breach of any provision of this Lease, including those incorporated by reference herein, and failure to cure such breach within thirty (30) calendar days of receipt of written notice thereof from the non-defaulting Party.

16.4. In the event of such an Event of Default, the non-defaulting Party shall be entitled (a) to terminate this Lease upon written notice to the other Party, which shall be effective upon the receipt thereof, or (b) to exercise any and all remedies provided in law or in equity.

16.5. Acts performed or attempted by PG&E in a reasonable effort to comply with orders, regulations, rules or other directives of the CPUC, the FERC, or any other governmental or regulatory body having jurisdiction over Landlord, Tenant, the Service Lines, or this Lease shall explicitly not be deemed an Event of Default by PG&E under this Lease.

17. RIGHT OF ACCESS

PG&E, its employees, agents and invitees shall have access to the Service Lines, and any surrounding areas above, below, or around the Service Lines, to which access is necessary to perform PG&E's obligations under this Lease or under other Legal Requirements, twenty four (24) hours per day, seven (7) days per week, throughout the Term of this Lease and as long thereafter as Tenant has possession of the Service Lines under any theory of law or equity. Nothing in this Section 17 shall be construed as creating or continuing any duty of PG&E, or any right of Tenant.

Landlord's Initials

Tenant's Initials

18. REPRESENTATIONS AND WARRANTIES

18.1. Landlord represents and warrants to Tenant that:

a. Landlord possesses good and marketable title to the Service Lines;

b. Landlord has full right and lawful authority to execute this Lease upon the terms and conditions contained herein;

c. The provisions of this Lease do not or will not conflict with or violate the provisions of any existing or future agreements between Landlord and third parties;

d. There are no pending or, to the best of its knowledge, threatened claims or losses against the Service Lines or Landlord which would adversely affect Landlord's ability to perform its obligations under this Lease or Tenant's use of the Service Lines; and

e. On the Delivery Date the Service Lines will comply with all applicable Legal Requirements.

18.2. Tenant represents and warrants that it

a. Is a duly-formed Irrigation District authorized under the California Water Code to sell electricity to retail customers. This Lease applies to Tenant's activities only to the extent that such activities are permitted by the California Water Code and by the California Government Code.

b. Has the authority pursuant to Public Utilities Code section 374(a) to provide customers of PG&E exemptions from having to pay CTCs, up to the level established by Public Utilities Code section 374(a)(2) or by the California Energy Commission, as applicable.

c. Has obtained all necessary rights-of-way from all governmental granting authorities and private landowners as required for Tenant to lease the Service Lines.

d. Is authorized to lease Service Lines along or across the public roads, highways and waterways within its service territory or within the area in which it is leasing Service Lines.

e. Will maintain its status as an ESP during the term of this Lease, consistent with CPUC Resolution E-3531.

Landlord's Initials

Tenant's Initials

f. Has provided written certification to PG&E that Tenant meets the requirements of Public Utilities Code sections 394(a) and 366.5(a) and (b), without actually registering at the CPUC.

18.3. The parties' remedies for any false or inaccurate representations and warranties pursuant to this Section 18 shall survive the expiration or earlier termination of this Lease.

19. EMERGENCY

In the event of any casualty , emergency or other condition affecting the conduct of business relating to the Service Lines, Landlord and Tenant mutually agree to cooperate to restore such conduct as quickly as possible, including, without limitation, the filing of any necessary documents with governmental authorities, except that PG&E shall not, and shall not be required to, give any preference to restoring or maintaining service to the Service Lines over its obligations to other customers or with regard to other Service Lines.

20. NOTICES

Any notice to be given in connection with this Lease shall be in writing and may be served by personal delivery or be sent by certified mail, or by reputable courier service which provides written evidence of delivery, addressed as specified herein or to such other address as requested by either party in the manner specified herein. Facsimile numbers are given for convenience only; delivery by facsimile shall not be considered sufficient notice under this Lease. Notice shall be effective upon actual receipt or upon refusal to accept delivery.

21. END OF TERM

At the expiration or termination of this Lease Tenant shall surrender the Service Lines, subject to normal wear and tear and damage by the elements. Tenant shall, within thirty days after the expiration or earlier termination of this Lease, remove from the Service Lines any material or equipment installed by Tenant, provided that Tenant shall repair any damage caused by such removal. Such removal and repair shall be at Tenant's sole expense. Notwithstanding the above, Tenant shall not be required to remove any material or equipment installed by Tenant if Landlord and Tenant have entered into an interconnection agreement pursuant to which Tenant would be entitled to have such material or equipment attached to the Service Lines.

22. MISCELLANEOUS

22.1. Dispute Resolution.

a. Any dispute arising between the parties relating to the interpretation of the provisions of this Lease or to the performance of their obligations hereunder shall be reduced to writing and referred to the parties' representatives identified on Exhibit B for resolution. Should such a dispute arise, the parties shall be required to meet and confer in an effort to resolve their dispute. Pending resolution, the parties shall proceed diligently with the performance of their respective obligations under this agreement, except if this agreement has been terminated under Sections 5 or 16. If the parties failed to reach an agreement within 10 business days from the date the dispute is reduced to writing, or within such other time upon which the parties mutually agree, then the parties may mutually agree to pursue mediation or to arbitrate their dispute in accordance with Section 22.1.b below.

b. Any controversy or claim arising out of or relating to this Agreement, or the breach thereof, shall be settled by binding arbitration in accordance with the Commercial Arbitration Rules of the American Arbitration Association, or such other rules as the parties may mutually agree upon, and judgment upon the award rendered by the Arbitrator(s) may be entered in any court having jurisdiction. Review of the arbitration decision, if any, shall be in accordance with California Code of Civil Procedure

Sections 1285-1287.6, or any successor provisions. All arbitration proceedings shall be conducted in San Francisco, California. Each Party in any proceeding shall bear its own costs and attorney's fees.

c. Notwithstanding Section 22.1(a) and (b) above, if PG&E and Tenant have a dispute over the availability, applicability or amount of CTC exemptions generally, or if PG&E and Tenant disagree about whether a specific customer account would be exempt, either PG&E, Tenant or the customer may seek assistance in reaching informal dispute resolution from the Commission's Energy Division, or may seek mediation of any such dispute from the Commission's Administrative Law Judge Division. If the dispute is not resolved within 60 days of the request to pursue informal dispute resolution, PG&E, Tenant or the customer may file a Complaint at the Commission within the next 30 days (the parties may agree to extend this 30 day period, in order to allow for further negotiations or other resolution techniques). The Complaint shall state the facts supporting the claimed CTC exemption. While the complaint is pending, the customer shall continue to be responsible for making the monthly CTC and other nonbypassable charge payments on a timely basis, with such payments subject to future refund or other adjustment as appropriate if the Commission determines the exemption to apply.

22.2. Third Party Beneficiaries. The Customer is not, and no other person is, a third party beneficiary of or under this Lease.

22.3. Remedies Cumulative. The rights, elections and remedies of Landlord and Tenant contained in this Lease shall be cumulative, and no one of them shall be construed as exclusive of any of the others or of any right or remedy allowed at law or equity.

22.4. Waiver of Defaults. The waiver by either party of any default in the performance, or failure to insist on strict performance, by the other of any covenant contained herein shall not be construed to be a waiver of any preceding or subsequent default of the same or any other covenant contained herein.

22.5. Severability. Each provision of this Lease shall be considered separate and severable from every other provision of this Lease. If any provision of this Lease shall be held to be invalid by a court or

Landlord's Initials

Tenant's Initials

regulatory or administrative body having jurisdiction, it shall be adjusted rather than voided, if possible, in order to achieve the intent of the parties to the extent possible. In any event, the remaining provisions shall remain in effect and shall in no way be impaired thereby.

22.6. Governing Law; CPUC Jurisdiction. This Lease shall be governed by the laws of the State of California. This Lease shall at all times be subject to such changes or modifications as the CPUC may, from time to time, direct in the exercise of its jurisdiction.

22.7. Interpretation and Definitions. The language of this Lease shall be construed as a whole according to its fair meaning and not strictly for or against either party. The captions and headings by which the paragraphs of this Lease are identified are for convenience only and shall have no effect upon the interpretation of the Lease. Wherever the context so requires, the singular number shall include the plural, the plural shall refer to the singular, the neuter gender shall include the masculine and feminine genders, and the words “Customer,” and “person” shall include corporations, partnerships, associations and individuals. The word “party” means either Landlord or Tenant, and the word “parties” means both Landlord and Tenant. The words “include,” “includes,” and “including” are not used in any limiting sense, but rather by way of example or illustration.

22.8. No Assignment. Tenant shall not assign this Lease, or sublet the Service Lines, or any portion thereof.

22.9. Subordination. Tenant shall, upon Landlord’s request, in the future subordinate this Lease to any lien placed by Landlord upon the Service Lines from an institutional lender, or as required by the CPUC, the FERC, or any other governmental or regulatory body (other than Tenant) having jurisdiction over Landlord, Tenant, the Service Lines, or this Lease.

22.10. Force Majeure. Except for Tenant’s obligations to make payments hereunder, neither Party shall be liable for any failure to perform the terms of this Lease when such failure is due to "force majeure." The term "force majeure" shall mean acts of God, strikes, lockouts or industrial disputes or disturbances, civil disturbances, arrests and restraint from rules or people, interruptions by government or court orders, present and future valid orders of any regulatory body having proper jurisdiction, acts of the public enemy, wars, riots, blockades,

insurrections, inability to secure or delay in securing labor or materials (including delay in securing or inability to secure materials by reason of allocations promulgated by authorized governmental agencies), epidemics, landslides, lightning, earthquakes, fire, storm, floods, washouts, explosions, or any other cause, whether of the kind herein enumerated or otherwise, not reasonably within the control of the Party claiming "force majeure." The "force majeure" shall, so far as possible, be remedied with all reasonable dispatch. Notwithstanding the above requirement that any “force majeure” shall be remedied with all reasonable dispatch, the settlement of strikes or lockouts or industrial disputes or disturbances shall be entirely within the discretion of the Party having the difficulty. The Party claiming any failure to perform due to "force majeure" shall provide verbal notification thereof to the other Party as soon as practical after the occurrence of the "force majeure" event.

22.11. Exhibits. Exhibit A, the Electric Service Lines Lease Appendix, is attached hereto and incorporated by reference into this Lease.

22.12. Interest on Past Due Obligations. If any monetary payment under this Lease is not received by Landlord or Tenant when due, and interest is not otherwise provided or excluded under tariff, rule, regulation or other agreement between the parties, such payment shall bear interest from the due date until received by the appropriate party, at the lesser of (a) the rate set forth in PG&E’s Electric Rule 7 section (C), or (b) the maximum rate permitted by law. Any change in said interest rate shall become effective on the same date on which a change in PG&E’s Electric Rule 7 section (C) becomes effective, and PG&E shall not be required to give notice under this Lease of such change.

22.13. Further Assurances. Each party agrees to execute and deliver to the other party such further documents or instruments as may be necessary or appropriate in order to carry out the intentions of the parties as contained in this Lease.

22.14. Right To Request Changes. Nothing in this Lease shall in any way be deemed to limit or restrict PG&E’s or Tenant’s right to file with the CPUC, the FERC or any other regulatory agency for any changes in any applicable rate schedules, tariffs, or rules, or to seek any relief whatsoever from said regulatory agencies, including the right to request the CPUC to approve changes to this Lease.

Landlord’s Initials

Tenant’s Initials

22.15. Counterparts. This Lease may be executed in two or more counterparts, each of which shall be deemed an original, but all of which together shall constitute one and the same instrument.

22.16. Entire Agreement; Amendment. This Lease, together with PG&E's tariffs and rules relevant to this Lease, including Schedule E-EXEMPT, Electric Rule 22, Schedule DA and the ESP Service Agreement, constitute the entire agreement of the parties regarding the Service Lines. This Lease cannot be modified or amended in any respect except by a writing executed by Landlord and Tenant.

Landlord and Tenant have executed this Lease as of the day first written above.

- ☐ _____

REFERENCES

SA#_____

THIS DUAL SOCKET METERING AGREEMENT is made by **PACIFIC GAS AND ELECTRIC COMPANY**, a California corporation, (PG&E) and _____ _____ (Customer) (individually "Party" and jointly "the Parties").

The installation by PG&E of dual socket metering under this Agreement is pursuant to PG&E's electric tariff rules and rate schedules, of which this Agreement is a part. Customer agrees to abide by the requirements of PG&E's rules and rate schedules including the following terms and conditions:

1. Under this Agreement, PG&E shall perform all work necessary for installation at Customer's site(s) two meter sockets such that the PG&E meter can be installed and operated for purposes of Customer's bundled service and a second customer supplied meter (non-PG&E meter) can be installed in parallel with the PG&E meter to allow Customer access to its usage data (hereinafter "dual socket metering") The dual socket metering installed under this Agreement is located at various northern California locations and listed on Appendix A: "List of Customer Sites" which shall be updated from time-to-time by PG&E as sites are added or removed. Such updates shall not be considered an amendment to this Agreement and will not require the signature of either Party.

2. This Agreement shall be effective on _____, and shall continue from month to month unless terminated pursuant to the Parties' rights under this Agreement provided that, each party agrees to use reasonable efforts to give the non-terminating party at least 30 days' prior notice of any such termination.

    a. If Customer elects Direct Access at any time during the term of this Agreement for any of the sites listed in Appendix A hereto, the Agreement will terminate for those sites effective on the date the customer's service converts to Direct Access. Use of Customer's dual socket metering installed under this Agreement for Direct Access purposes shall be governed by the Direct Access tariffs.

    b. This Agreement shall be revoked in its entirety and terminated immediately if at any time during the term of the Agreement PG&E receives actual notice that such Agreement is prohibited by regulatory requirement, decision or order.

    c. If this Agreement or Customer's exercise of it at any time interferes with the operations, practices or service of PG&E to or for any of its Customers, PG&E will immediately revoke this Agreement in whole or in part, or will terminate this Agreement, as is necessary to end such interference.

    d. If Customer should default in performing any of the terms and conditions herein, or if Customer fails to conform to any new standards imposed by a legal or administrative body having jurisdiction, PG&E shall have the right to terminate this Agreement entirely.

† Information collected on this form is used in accordance with PG&E's Privacy Policy.
The Privacy Policy is available at pge.com/privacy.

*Automated Documents, Preliminary Statement, Part A

e. PG&E will bill Customer in advance of work performance, using its standard hourly tariffed labor rate, for its costs on a time-and-materials basis, or estimate thereof, for all costs associated with its performance of responsibilities under this Agreement, including labor, materials, shipping and administration costs. The scope of all work to be performed by PG&E under this Agreement will be specified according to Appendix B hereto (Work Performance Agreement). Revocation or termination of the Agreement in whole or in part shall not relieve Provider of any obligation (a) to pay charges incurred prior to such revocation, nor (b) to indemnify PG&E as provided in Section 14 herein. Customer agrees to pay an ownership cost, as specified in PG&E's Electric Rule 2, for all on-site dual socket metering facilities and equipment provided by PG&E hereunder. Customer agrees to pay on all advances or contributions any applicable Income Tax Component of Contributions (ITCC) at the rate set forth in PG&E's Preliminary Statement.

3. Installation of Dual Socket Metering:

a. At Customer's request that dual socket metering be installed, PG&E shall configure, and rewire as necessary, Customer's site to allow a second non-PG&E meter to be installed in addition to the PG&E meter. The configuration of the site to accommodate this capability shall be at PG&E's discretion and can include, but not be limited to, use of a dual socket adapter or rewiring of the site and installation of a second socket. If the Customer's panel needs to be modified, Customer shall have the work performed by qualified personnel in accordance with all applicable codes and laws. Except for any panel modification, all work to install dual socket capability, and installation of the non-PG&E meter, shall be done by PG&E. All dual socket metering equipment, except for the non-PG&E meter, will be the property of PG&E. Except for panel modification, neither Customer nor its agents will be permitted to perform any onsite metering work in connection with dual socket metering including installation of the non-PG&E meter, removal of the non-PG&E meter or sealing work.

b. The technical specifications of the non-PG&E meter shall be approved by PG&E before purchase by Customer. Once the non-PG&E meter has been approved by PG&E, Customer shall deliver the meter to PG&E prior to installation of dual socket capability.

c. All programming of the non-PG&E meter shall be performed by Customer or its agents provided that neither Customer nor its agents may remove the non-PG&E meter nor any PG&E seals at the site.

d. Prior to delivery of any non-PG&E meter to PG&E, PG&E will supply customer with a meter number to be affixed to the non-PG&E meter.

4. Retrieval of data from the non-PG&E meter

It is Customer's sole responsibility to install, provide, maintain and operate the communications infrastructure necessary to retrieve Customer's usage data from the non-PG&E meter. If retrieval requires a telephone line, Customer shall be responsible for the installation and operating costs of the telephone line. Such lines must be installed and in operating order prior to PG&E's installation of the dual socket metering at the Customer's site. Provided the line is operational, PG&E shall complete the connection to the non-PG&E meter.

5. Maintenance, testing, replacement, and removal of the Non-PG&E meter and dual socket metering

   All maintenance, testing, replacement, and removal of the non-PG&E meter and dual socket metering shall be performed by PG&E only at the request of Customer. Operation of telecommunications lines and equipment to allow data retrieval from the non-PG&E meter shall be Customer's sole responsibility. If any meter work or maintenance work at the Customer's request requires remote interrogation or programming of meter, the Customer shall provide PG&E with necessary software, tools and password for accessing meter data.

6. Abandonment or removal of non-PG&E meter

   If Customer wishes to terminate this agreement and remove the non-PG&E meter, it must provide PG&E with 30 days-notice. PG&E will remove the non-PG&E meter, at Customer's expense, and return it to Customer in the same condition as when it was removed. If Customer wishes to vacate the premises and transfer ownership of the non-PG&E meter to the new occupant of the site, the new occupant must execute an agreement with PG&E governing use of the meter prior to the change in title. If the new occupant has not executed a suitable agreement with PG&E, Customer agrees that unless Customer has made arrangements with PG&E to remove the non-PG&E meter at Customer's expense, the non-PG&E meter will be deemed abandoned and become the property of PG&E once Customer vacates the site.

7. PG&E shall make a reasonable attempt to provide the services described herein in a timely and expeditious manner. However, PG&E shall not be responsible for any delay in completion of its work resulting from any cause or condition beyond the control of PG&E. PG&E shall have the right to allocate material or labor resources to the construction or maintenance projects which it deems, in its sole discretion, most important to serve the needs of all of its customers. Any delay in service work for the Customer hereunder resulting from such allocation or reallocation of PG&E's resources shall be deemed to be beyond PG&E's control.

8. Customer is solely responsible for providing third-parties access to the non-PG&E meter and for usage of the dam by Customer or by third parties. Such access shall not interfere with PG&E's reading of the PG&E meter for billing purposes. PG&E shall not be liable to Customer for any unauthorized retrieval of or misuse by a third party of data from the non-PG&E meter.

9. PG&E shall at all times during this Agreement continue to carry nut all activities lawfully permitted or required under PG&E's tariffs, rules, CPUC regulations and requirements, and PG&E's business practices. Such activities shall include but not be limited to investigations of tampering or suspected energy theft and actions taken during emergencies or in the normal course of business. Customer agrees that PG&E shall not be obligated to perform such activities in any different manner from the way it performs these activities for customers without dual socket metering. Customer acknowledges that such activities by PG&E may affect the ability of Customer or a third-party to obtain data from the non-PG&E meter. Customer agrees that PG&E shall not be liable for any harm, detriment, or damage of any kind to Customer, or any other third party resulting from Customer or any third party being unable to access data from the non-PG&E meter.

10. This Agreement in no way relieves Customer from performing, nor obligates PG&E to perform construction and operation of Customer's communications network; negotiation or performance of any terms of any agreement between Customer and any third party regarding the frequency and accuracy of any interval usage data to be provided; communication of problems with such data delivery to Customer; or provision of back-up and emergency methods of data delivery to Customer in the event Customer's communications network fails.

11. Regardless of the manner in which the non-PG&E meter shall be attached to property owned by, or under lease to PG&E, the non-PG&E meter shall remain the property of the Customer and title shall remain in Customer. Customer's ownership of the non-PG&E meter shall not ripen into any title, or right in and to any PG&E property or equipment to which the non-PG&E meter is attached. Customer shall not permit any judgment or lien against it to encumber the non-PG&E meter and shall give PG&E immediate notice of any attempt to place a lien on the non-PG&E meter by any third person or party.

12. Customer shall not assign this Agreement to, nor permit the use of the non-PG&E meter by any third party without obtaining the prior express written consent of PG&E.

13. Limitation of Liability

    Each Party's liability to the other Party for any loss, cost, claim, injury, liability, or expense, including reasonable attorneys' fees, relating to or arising from any act or omission in its performance of this Agreement, shall be limited to the amount of direct damage actually incurred, except as provided for in this Section. In no event shall either Party be liable to the other Party for any indirect, special, consequential, or punitive damages of any kind whatsoever, whether in contract, tort or strict liability, except in the event of an action covered by the Indemnification provisions of Section 14 of this Agreement, in which event this Section 13 shall not be applicable.

14. Indemnification

    Customer shall indemnify, defend and bold harmless PG&E, its officers, directors, agents, and employees, from and against all claims, demands, losses, damages, costs, expenses, and legal liability connected with or resulting from injury to or death of persons, including but not limited to employees of PG&E, Customer, or either Party's contractors or subcontractors; -injury to property of PG&E, Customer, or any third party, or to natural resources, or violation of any local, state or federal law or regulation, including but not limited to environmental laws or regulations, or strict liability imposed by any law or regulation; arising out of, related to, or in any way connected with Customer's performance of this Agreement, however caused, regardless of any strict liability or negligence of PG&E, whether active or passive, excepting only such claims, demands, losses, damages, costs, expenses, liability or violation of law or regulation as may be caused by the active negligence or willful misconduct of PG&E, its officers, agents, or employees. Customer acknowledges that any claims, demands, losses, damages, costs, expenses, and legal liability that arise out of, result from, or are in any way connected with the release or spill of any legally designated hazardous material or waste as a result of the work performed under this Agreement are expressly within the scope of this indemnity, and that the costs, expenses, and legal liability for environmental investigations, monitoring, containment, abatement, removal, repair, cleanup, restoration, remedial work, penalties, and fines arising from the violation of any local, state, or federal law or regulation, attorney's fees, disbursements, and other response costs are expressly within the scope of this indemnity. Customer shall, on PG&E's request, defend any action, claim

or suit asserting a claim covered by this indemnity. Customer shall pay all costs that may be incurred by PG&E in enforcing this indemnity, including reasonable attorney's fees.

15. The waiver by either party of any default in performance, or the failure to insist on strict performance, by the other of any covenant or duty herein shall not be construed as a waiver of any preceding or subsequent defaults of the same or other covenant or duty.

16. Each provision in this Agreement shall be considered separate and severable from every other provision herein; if any provision shall be held to be invalid by a court or regulatory or administrative body having jurisdiction, it shall be adjusted rather than voided, if possible, in order to achieve the intent of the parties. In any event, the remaining provisions shall remain in effect and shall in no way be impaired thereby.

17. This Agreement shall be interpreted, governed by and construed in accordance with the laws of the State of California, and shall exclude any choice of law rules that direct the application of the laws of another jurisdiction, irrespective of the place of execution or of the order in which the signatures of the parties are affixed or of the place or places of performance. This Agreement shall at all times be subject to such changes and modifications by the California Public Utilities Commission as said Commission may direct, from time to time, in the exercise of its jurisdiction. Where the terms of this Agreement conflict with PG&E's filed tariffs or rules, PG&E's filed tariffs and rules govern. Except for matters and disputes with respect to which the Commission is the sole proper venue for dispute resolution pursuant to applicable law or this Agreement, the federal and state courts located in San Francisco County, California shall constitute the sole proper venue for resolution of any matter or dispute hereunder, and the Parties submit to the exclusive jurisdiction of such courts with respect to such matters and disputes.

18. If any monetary payment under this Agreement is not received by PG&E when due, such payment shall bear interest from the due date until received by PG&E at the lesser of (a) the rate set forth in PG&E's Electric Rule 7 section (c); or (b) the maximum rate permitted by law. Any change in said interest rate shall become effective on the same date on which a change in PG&E's Electric Rule 7 section (c) becomes effective.

19. This Agreement contains the entire agreement of the parties and cannot be modified or amended in any respect except by a writing executed by PG&E and Customer.

20. Any notice to be given in connection with this Agreement shall be in writing and may be served by personal delivery or be sent by certified mail, or by reputable courier service which provides written evidence of delivery, addressed as specified below, or to such other address as requested by either party in writing, in the manner specified herein. Delivery by facsimile shall not be considered sufficient notice under this Agreement. Notice shall be effective upon actual receipt or upon refusal to accept delivery.

21. PG&E provides the services hereunder as an accommodation to Provider and Customer and no warranty of merchantability of fitness for a particular use shall be implied by this Agreement.

Rep Ph.#:_____
Circuit # _____

_____,
a(n)_____ (Applicant), and Pacific Gas and Electric Company, a California Corporation (the Company), hereby agree to the following supplemental terms and conditions:

1. RATE SCHEDULE: Applicant must qualify for and receive service to Applicant's premises under an applicable PG&E Rate Schedule. Additionally, Applicant is subject to the provisions of Schedule E-OBMC, which is attached hereto and made a part hereof as Attachment A and any other applicable Company Electric Rate Schedule(s).

2. PLAN OPERATION: Applicant agrees to operate its Optional Binding Mandatory Curtailment (OBMC) Plan upon each and every notice from the Company for the entire duration of the Rotating Outage (RO).

3. APPLICANT RESPONSIBILITIES: Upon notice from the Company, Applicant is responsible to reduce its load such that the load on the entire circuit or dedicated substation serving the Applicant is at or below the required Maximum Load Level (MLL). Load reductions must be achieved as quickly as possible but no later than 15 minutes after the Applicant receives notification from PG&E. If Applicant's OBMC Plan is submitted for a group of customers on a particular circuit, Applicant is the lead customer for the OBMC Plan and shall guarantee the load reductions required to reach the MLLs and pay for all non-compliance penalties. Applicant is responsible to work and coordinate with the non-lead customer(s) on its circuit and represent the non-lead customers for the purposes of the OBMC Plan.

4. PARTICIPATION IN OTHER PG&E DEMAND RESPONSE PROGRAMS: Applicant may participate in another demand response program as specified in Schedule E-OBMC.

5. OBMC PLAN NOT A GUARANTEE: An OBMC Plan is not a guarantee against Applicant being subject to a rotating outage. Daily and emergency switching may cause the circuit to become subject to rotating outages. Applicant may not receive advance notice from the Company of such a rotating outage. Additionally, an OBMC Plan is applicable only to electrical emergencies requiring a rotating outage and it does not prevent Applicant from being subject to outages caused by other load shedding schemes.

   PG&E will make reasonable efforts to notify Applicant of circuit changes other than short-term or emergency circuit changes.

   Pursuant to Electric Rule 14, the Company does not guarantee continuity or sufficiency of supply and will not be liable for interruption or shortage or insufficiency of supply.

6. CIRCUIT AGGREGATION: Applicant may aggregate the load of two circuits for the purposes of participating in the OBMC program if Applicant has a single tax payer identification number and provided: (a) Applicant is the lead customer for both circuits; (b) Applicant has the ability to achieve required load reductions on the total load for the circuits; (c) Applicant agrees to achieve required load reductions on individual circuits subject to the aggregation as required by PG&E or the CAISO in response to geographic area constraints; and (d) Applicant commits that it has not, and will not, receive any payment from any customer on any OBMC circuit for any action related to the OBMC program. All provisions of this agreement and Schedule E-OBMC applicable to individual OBMC plans shall apply to the aggregated OBMC plan.

7. ANNUAL REVIEW: Applicant must update the OBMC Plan by March 15 of each year and confirm with the Company any changes to the previous version. Should Applicant fail to update the OBMC Plan by March 15 this agreement will be terminated.

† Information collected on this form is used in accordance with PG&E's Privacy Policy. The Privacy Policy is available at pge.com/privacy.

8. PARTICIPATION IN OBMC PLAN: The Applicant's OBMC Plan may become invalid over time due to circuit rearrangements or load additions, which result in the MLLs becoming unachievable. Therefore, the Applicant is not guaranteed the ability to participate in an OBMC Plan.

9. APPLICANT INFORMATION: Applicant's OBMC Plan must include the minimum information contained in the OBMC Plan Template, which is attached hereto as Appendix A. Applicant's OBMC plan must include the Applicant's name, PG&E account number, electric rate schedule, service address, mailing address, and contact information including contact name, e-mail address, and alphanumeric pager and facsimile numbers. Applicant's OBMC Plan must also include non-lead customer information including name(s), PG&E account number(s), service address(es), mailing address(es) and contact information.

   The Applicant's OBMC Plan shall include Applicant's load reduction plan that has been reviewed and approved by the Company. The load reduction plan shall indicate the specific quantifiable measures to be used by the Applicant and non-lead customers to reduce load to or below each MLL. The load reduction plan must include the load reduction measures to be utilized during different time periods of the year to achieve the required load reductions when seasonal load profile changes occur. Applicant is responsible for preparing and maintaining the load reduction plan.

10. BASELINE LOAD: The baseline load for the dedicated substation or PG&E circuit that provides service to the customer(s) is equal to the average recorded hourly usage amount (if available) for the same hours as the OBMC operation hours on the immediate past ten (10) similar days, either business days or weekends and holidays, excluding days when the customer was paid to reduce load under another PG&E demand response program and days when the OBMC program operated. See Schedule E-OBMC for further details. Each calendar year the Applicant may exclude the following periods from the 10-day baseline: (a) a period of 15 calendar days designated in advance both for ramp-up and ramp-down of operations during which period the baseline will be the hourly average circuit load for the most recent prior day; (b) up to 10 days as determined by the Applicant and designated in advance to accommodate conditions in the Applicant's operations that affect the 10-day baseline; and (c) up to two days as determined by the Applicant where unplanned outages or other events cause the circuit load to deviate substantially from normal conditions. The Applicant shall provide a minimum of 10 calendar days prior notice to PG&E when exercising option (a); a minimum of 7 calendar days prior notice to PG&E when exercising option (b); and notice to PG&E within one calendar day after the outage or event when exercising option (c). Applicant requests for the above exclusions must be received by PG&E in written or email format within the specified time frames or the requested exclusion will not be allowed. If Applicant requests an operation ramp-up period under option (a) above Applicant must also specify a commensurate operation ramp-down period occurring within one year of the ramp-up period. The 10-day baseline following the ramp-down period must be reduced a minimum of 25% from the 10-day baseline immediately prior to the ramp-down period. If Applicant fails to achieve a 25% reduction in the 10-day baseline following a ramp-down period Applicant will not be allowed future operation ramp-up periods for two years following the ramp-up period.

11. MAXIMUM LOAD LEVELS: Maximum Load Levels (MLLs) are established by the Company corresponding to each of the 5, 10, and 15 percent load reduction levels.

    The MLL for the 5 percent load reduction is equal to the product of the baseline times 0.95.
    The MLL for the 10 percent load reduction is equal to the product of the baseline times 0.90.
    The MLL for the 15 percent load reduction is equal to the product of the baseline times 0.85.

12. MEASURING EQUIPMENT TO VERIFY COMPLIANCE: Where the Applicant is on a dedicated circuit, compliance shall be determined from a telephone accessible electric revenue interval meter. Direct Access Applicants are required to allow the Company telephone access to its electric revenue meter for the purposes of determining OBMC operation compliance. Where the existing

meter is non-interval or is not compatible with the Company's current telephone based meter reading systems, the customer is required to pay for the installation of an interval meter or other required equipment. For bundled service applicants, or direct access applicants who elect to have the Company install the equipment, Electric Rule 2 shall apply. Where a meter is not currently being read via telephone, the Applicant shall coordinate and pay for the installation, and pay all ongoing costs of such necessary telephone equipment and service. The OBMC Plan shall not be approved by the Company until such metering has been installed and the data is able to be collected via telephone or until the Company is able to access the customer-owned meter.

Where the Applicant is served from a PG&E or Applicant owned substation, or is not on a dedicated circuit, or if the OBMC Plan includes a group of customers, compliance for the circuit or dedicated substation shall be determined from electronic recording equipment located in the PG&E substation. Where the circuit does not have electronic recording equipment to monitor its loads, the Applicant shall pay for the installation of the equipment as Special Facilities pursuant to Electric Rule 2. The OBMC Plan shall not be approved by the Company until such electronic recording equipment has been installed, made operational and the recorded load data accessible via telephone.

13. FAILURE TO COMPLY AND NON-COMPLIANCE PENALTIES: Failure to meet the MLLs established by an OBMC Plan within 15 minutes of notification by the Company shall result in a non-compliance penalty for the Applicant. The non-compliance penalty shall be equal to $6.00 per KWH times the average total load on the applicable circuit less the required MLL, as measured during each half-hour of the RO. Failure to pay these penalties may result in termination of electric service pursuant to Electric Rule 11. The Company shall, without liability, terminate any OBMC Plan immediately for failure to reduce circuit load levels to within five (5) percent of the required load reduction for the entire duration of the RO for a second time during a twelve (12) month period. Such termination shall occur if the Applicant and non-lead customers bound by the OBMC Plan have not met or are unable to meet the load relief criteria specified therein. If an OBMC Plan is terminated for non-compliance, participants in the plan shall not be permitted to participate in an OBMC Plan for a period of five (5) years from the date of termination.

14. TERM OF AGREEMENT AND TERMINATION OF AGREEMENT: This OBMC Agreement shall have an initial term of one (1) year but may be extended from year to year, after annual review, with the written approval of the Company. The annual term shall commence upon the effective start date specified in the Company approval letter.

    Except as specified in Section 13 above, the Applicant or the Company may terminate the OBMC Plan upon thirty (30) days' written notice prior to the end of the agreement term. If the Applicant or the Company terminates the OBMC Plan, the Applicant shall not be party to a subsequent OBMC Plan for a period of at least twelve (12) months. Upon termination, regardless of the cause, the circuit will be assigned a Rotating Outage Block (ROB), which may or may not be the same as when the OBMC Plan was initiated.

15. INSTALLATION OF FACILITIES: Applicant hereby grants to the Company permission to furnish, install, operate and maintain upon the property of Applicant, such facilities as the Company deems necessary for its performance under this Agreement including any work incident to rendering service under this Agreement. All facilities installed pursuant to this license shall be and remain the property of the Company. This license shall expire coincident with the expiration or termination of this Agreement and the Company shall have a reasonable period of time to remove facilities installed pursuant to this Agreement and license.

16. INDEMNIFICATION: The Applicant shall indemnify and hold harmless the Company against any and all claims or liabilities for losses, expenses, damage to property, injury to or death of any person or any other liability incurred by the Company, including reasonable expenses, legal and otherwise, caused wholly or in part by modifications to the OBMC program, circuit configuration, circuit loading, or operational conditions associated with rotating outages or other circuit outages or interruptions.

This indemnification shall only be inapplicable where the loss, damage, injury, or expense arises out of the sole negligence or willful misconduct of the Company.

17. ASSIGNMENT: Applicant may assign this Agreement only if the Company consents in writing and only if the party to whom the Agreement is assigned is otherwise eligible to take service under Schedule OBMC and agrees in writing to perform the obligations of Applicant hereunder and to be bound by this Agreement in all respects.

18. COMMISSION JURISDICTION: This Agreement shall be subject to all of the Company's tariff schedules on file with and authorized by the California Public Utilities Commission (Commission) and shall at all times be subject to such changes or modifications as the Commission may direct from time to time in the exercise of its jurisdiction.

AGREEMENT FOR UNMETERED ELECTRICAL SERVICE

This Agreement between _____ (Customer) and Pacific Gas and Electric Company (the Company) is to establish and govern the provisions of unmetered electric service provided by the Company at the locations reported for equipment described in the attachments to this Agreement and billing data reported monthly or annually as required by this Agreement and subject to review by the Company for unmetered status.

WHEREAS, in the Company's opinion, it would be impractical to install electric meters at the requested locations and for equipment installed subject to this Agreement; and

WHEREAS, the consumption of electricity at such locations and for such equipment can be reasonably determined from manufacturer's specifications and operating characteristics of the Customer where the load is 11 hour photo controlled or 24 hour constant and of *one hundred fifty (150) watts or less rated or average consumption* on any one service connection point; and

WHEREAS, pursuant to the Company's electric Preliminary Statement Part A.6.a, Customer and the Company agree that, in lieu of installing meters at each location, the Company shall provide unmetered electric service as provided herein.

NOW THEREFORE, in consideration of the terms and covenants contained herein, Customer and the Company hereby agree as follows:

1. Customer's equipment that is the subject of this Agreement, are identified in the data sheets set forth in Attachment A (Equipment). Each location will be considered a separate account and billed on the Company's regular monthly billing cycle for the applicable area. Each location will be evaluated for unmetered service separate from any other location. Billing of fixed usage will be done under the rate schedule indicated on Attachment A. Billing will be based on the methodology described in paragraph 3, below. This Agreement is for Equipment directly connected to the Company's distribution system, and is not available for equipment connected via a third party service, third party equipment, or through photo control adapters attached to Company-owned or third-party-owned street light facilities.

2. Each individual piece of Equipment shall constitute a separate unit for purposes of this Agreement. The method of determining the electric usage for each unit shall be as follows:

   a) Where a unit is controlled by a photo control, any such photo control must meet ANSI Standard C136.10, turn on value 1.0 foot candles and turn off value of 1.5 foot candles. Usage must be equal to or less than 150 watts rated or average consumption. It will be billed at 11 hours of photo controlled operating time per day.
   b) Where a unit is not photo controlled, the unit will be billed on a 24-hour basis. Usage must be equal to or less than 150 watts rated or average consumption.
   c) Customer shall provide the Company all of the information necessary to complete Attachment A, including without limitation, the description of the equipment model, type, unit and load, prior to the installation of any Equipment. To facilitate completion of Attachment A, third party testing results or metered results are required where Customer has no manufacturer data. Information to verify the number and location of all Equipment at each service location shall be reported as described in Attachment B.

† Information collected on this form is used in accordance with PG&E's Privacy Policy. The Privacy Policy is available at pge.com/privacy.

3. The monthly energy charge will be based on Equipment identified in Attachment A and the calculated kilowatt hours (kWh) applied to all locations for that equipment from the documented average consumption or rated input (not to exceed 150 watts) multiplied by either a) 731 hours per month (for 24-hour continuous usage) under paragraph 2b, above; or b) 335 hours per month (for photo controlled usage) under paragraph 2a, above. The monthly charge shall also include all other charges under the General Services rate schedule A-1 or B-1, including the single customer charge per location.

4 Pursuant to Section D of the Company's Electric Rule 3, Customer will promptly furnish the Company with notice of any changes in the connected or rated electrical loads or operating characteristics of such load for Equipment and each location for which service is provided under this Agreement, Attachment A shall be revised for the Equipment in question. As required in paragraph 6, Customers shall furnish the Company with information with a frequency and in a format acceptable to the Company, verifying and reconciling the Equipment at each service location, current installs and removals for the month or annually, including changes in Model or type of equipment. Any changes relating to the Model or type shall be reported as described in Attachment A. Any changes relating to the number or location of any Equipment and reflecting the net result of any installations or removals shall be reported as described in Attachment B. If it is determined that electrical load is connected that has not been accurately reported to the Company by Customer, such load will be billed in accordance with Electric Rules 17, 17.1, and 17.2 as applicable, and Customer shall pay the applicable charges for this electrical load, calculated in accordance with paragraphs 2 and 3, above. The Company reserves the right to field or bench test Customer's Equipment to verify the full rated input or average consumption. The Company reserves the right to review calibration records of Customer's test equipment used to provide measured load for previously existing grandfathered units. For load with photo controls, if photo control is discovered to be malfunctioning, billing will be based on 24-hour continuous load until such time it has been demonstrated to the Company's satisfaction that the control has been made operable.

5. Auditing will be conducted at the Company's sole discretion. Customer will provide a complete and accurate inventory and other information as required in paragraph 4 and in Attachment A and Attachment B. Customer shall provide access to Equipment and provide assistance to the Company as necessary to complete the audit. The Company shall have the right to collect the costs of the additional field verification work that would otherwise not be incurred in serving metered facilities.

6. As provided for in the Company's Electric Rule 11, Section A.1, billing will continue until such time that Customer informs the Company with 2 days prior written notice to: a) terminate billing: and b) as a condition of this Agreement, to make proper notification for scheduling the Company to de-energize Customer's Equipment.

7. Only duly authorized employees or agents of the Company may connect Customer's electrical loads to, or disconnect the same from, the Company's electric distribution facilities.

8. Neither this Agreement nor conditions of electric service hereunder shall constitute permission or authorization for any use or occupation of the Company's facilities or facilities of any third party by Customer. It shall be sole responsibility and obligation of Customer to secure any rights or permission that may be necessary for the placement and use of Customer's Equipment on private property or within the public right of way.

9. Service furnished in accordance with this Agreement shall in all respects be subject to Company's applicable tariffs on file with the California Public Utilities Commission and shall at times be subject to such changes or modifications by the California Public Utilities Commission as said Commission may, from time to time, direct in the exercise of its jurisdiction.

[1]Automated Document, Preliminary Statement Part A

10. Customer's Equipment shall be installed, maintained and operated at all times in accordance with all applicable laws, rules and regulations by any governmental authority with jurisdiction, including Commission's General Order 95. Customer will inform the Company as to the state, county, or local government authority with jurisdiction to approve installation of facilities to be energized, obtain proper inspection clearance or other approvals as required, and provide evidence of clearance to the Company. Where no state, county or local government authority has jurisdiction over Customer's installation, Customer will inform the Company of that fact and will provide the Company with a letter from Customer's qualified electrical engineer or engineering consultant authorizing Company to energize service to Customer's Equipment and indicating compliance with Customer's design criteria.

11. This Agreement may be cancelled by either party on thirty (30) days prior written notice to the other party, which shall result in termination of service, unless: a) a subsequent executed superseding agreement governing the terms of unmetered service has gone into effect prior to the termination of this Agreement; or b) a meter has been installed and the service has been transferred to metered status.

12. The Company may, at a later date, require metering of new, existing, additional, rearranged or relocated equipment that would otherwise register on its metering devices with then available practical technology, and decline to provide or continue unmetered service.

13. Nothing in this Agreement shall preclude the Company from requesting authority from the California Public Utilities Commission to implement an electric tariff for unmetered service. If an unmetered electric service tariff is approved for the Company, it shall apply to Customer's installations under this Agreement.

14. If Customer acquires additional unmetered facilities through merger, purchase, or other forms of acquisition, all such acquired unmetered facilities shall become subject to this Agreement, and billing will be adjusted as required by this Agreement. Customer must provide the information necessary to complete new Attachment A(s), if such additional unmetered facilities have not previously been identified to the Company. If Customer is acquired by a third party, assignment of this Agreement shall be subject to the provisions of paragraph 20.

15. The Company is authorized to revise the form of Attachment A and Attachment B at its sole discretion and at any time require additional information from Customer for the purpose of this Agreement, including without limitation, accurate data concerning equipment, maintaining accurate records, and promoting accurate and efficient billing.

16. All notices required herein shall be given in writing and delivered personally, by United States Postal Service or other nationally recognized courier service to the appropriate address below. Addresses may be changed by the Company or Customer as business needs change.

Customer:	_____	Pacific Gas and Electric Company
Address:	_____	Billing Revenue & Records
	_____	P.O. Box 8329
	_____	Stockton, CA 95208

[1]Automated Document, Preliminary Statement Part A

17. Customer's bill shall be mailed to the address listed below and in Attachment A.

Billing Name: _____
Address: _____
_____

Attn: _____

18. The waiver by either Party of any default in the performance, or failure to insist on strict performance, by the other or any covenant or condition contained herein shall not be construed to be a waiver of any preceding or subsequent default of the same or any other covenant contained herein.

19. Customer may, with the Company's written consent, assign this Agreement if the assignee agrees in writing to perform all of Customer's obligations hereunder. Such assignment will be deemed to include, unless otherwise specified therein, all of the Customer's rights to any refunds which might become due upon discontinuance of service contracted. Customer remains responsible for all obligations under this Agreement up to the effective date of the assignment. In lieu of an assignment, the Customer's successor in interest may retrofit the Equipment for metering under Company's existing tariffs.

APPROVED:

This agreement is effective when accepted and executed by PG&E.

Electric Sample Form No. 79-973 Sheet 1
Generating Facility Interconnection Agreement
For Non-Export Generating Facilities

Please Refer to Attached Sample Form

Pacific Gas and Electric Company®

GENERATING FACILITY INTERCONNECTION AGREEMENT FOR NON-EXPORT GENERATING FACILITIES

This *Generating Facility Interconnection Agreement for Non-Export Generating Facilities* (Agreement) is entered into by and between _____, a _____ (Producer), and Pacific Gas and Electric Company (PG&E) a California Corporation. Producer and PG&E are sometimes also referred to in this Agreement jointly as "Parties" or individually as "Party." In consideration of the mutual promises and obligations stated in this Agreement and its attachments, the Parties agree as follows:

1. SCOPE AND PURPOSE

This Agreement provides for Producer to interconnect and operate a Non-Export Generating Facility in parallel with PG&E's Distribution System to serve the electrical loads connected to the electric service account that PG&E uses to interconnect Producer's Generating Facility (or, where permitted under Section 218 of the California Public Utilities Code (PUC), the electric loads of an on-site or neighboring party lawfully connected to Producer's Generating Facility through Producer's circuits).

2. SUMMARY AND DESCRIPTION OF PRODUCER'S GENERATING FACILITY

2.1. A description of the Generating Facility, including a summary of its significant components and a single-line diagram showing the general arrangement of how Producer's Generating Facility and loads are interconnected with PG&E's Distribution System, are attached to and made a part of this Agreement. (Supplied by Producer as Appendix A).

2.2. Generating Facility identification number: _____ (Assigned by PG&E).

2.3. Producer's electric service agreement ID number: _____ (Assigned by PG&E).

2.4. Name and address used by PG&E to locate the electric service account used to interconnect the Generating Facility with PG&E's Distribution System:

Name: _____
Address: _____
City/Zip Code: _____

2.5. The Gross Nameplate Rating of the Generating Facility is: _____ kW.

2.6. The Net Nameplate Rating of the Generating Facility is _____ kW.

2.7. The expected annual energy production of the Generating Facility is _____ kWh.

2.8. For the purpose of securing the Competition Transition Charge exemption available under Section 372 of the California Public Utilities Code (PUC), Producer hereby declares that the Generating Facility ☐ does / ☐ does not meet the requirements for Cogeneration as such term is used in Section 216.6 of the California Public Utilities Code.

† Information collected on this form is used in accordance with PG&E's Privacy Policy. The Privacy Policy is available at pge.com/privacy.

2.9. The Generating Facility's expected date of Initial Operation is _____. The expected date of Initial Operation shall be within two years of the date of this Agreement.

3. DOCUMENTS INCLUDED; DEFINED TERMS

3.1. This Agreement includes the following exhibits which are specifically incorporated herein and made a part of this Agreement.

Appendix A- Description of Generating Facility and Single-Line Diagram (Supplied by Producer).
Appendix B- Copies of Rules 2 and 21 and other selected rules and tariffs of PG&E (Supplied by PG&E).
Appendix C- A Copy of PG&E's Agreement for Installation of Allocation of Special Facilities for Parallel Operation of Nonutility-Owned Generation and/or Electrical Standby Service (Form 79-280) (Special Facility Agreement), if applicable, (Formed by the Parties).
Appendix D- (When Applicable) Operating Requirements for Energy Storage Device(s).

3.2. When initially capitalized, whether in the singular or in the plural, the terms used herein shall have the meanings assigned to them either in this Agreement or in PG&E's Rule 21, Section C.

4. TERM AND TERMINATION

4.1. This Agreement shall become effective as of the last date entered in Section 16, below. The Agreement shall continue in full force and effect until the earliest date that one of the following events occurs:

(a) The Parties agree in writing to terminate the Agreement.

(b) Unless otherwise agreed in writing by the Parties, at 12:01 A.M. on the day following the date the electric service account through which Producer's Generating Facility is interconnected to PG&E's Distribution System is closed or terminated.

(c) At 12:01 A.M. on the 61st day after Producer or PG&E provides written Notice pursuant to Section 9 below to the other Party of Producer's or PG&E's intent to terminate this Agreement.

4.2. Producer may elect to terminate this Agreement pursuant to the terms of Section 4.1(c) for any reason. PG&E may elect to terminate this Agreement pursuant to the terms of Section 4.1(c) for one or more of the following reasons:

(a) A change in applicable rules, tariffs, and regulations, as approved or directed by the Commission, or a change in any local, state or federal law, statute or regulation, either of which materially alters or otherwise affects PG&E's ability or obligation to perform PG&E's duties under this Agreement; or,

(b) Producer fails to take all corrective actions specified in PG&E's Notice that Producer's Generating Facility is out of compliance with the terms of this Agreement within the time frame set forth in such Notice; or,

(c) Producer fails to interconnect and operate the Generating Facility per the terms of this Agreement prior to 120 days after the date set forth in Section 2.9, above, as the Generating Facility's expected date of Initial Operation; or,

(d) Producer abandons the Generating Facility. PG&E shall deem the Generating Facility to be abandoned if PG&E determines, in its sole opinion, the Generating Facility is non-operational and Producer does not provide a substantive response to PG&E Notice of its intent to terminate this Agreement as a result of Producer's apparent abandonment of the Generating Facility affirming Producer's intent and ability to continue to operate the Generating Facility.

4.3. Notwithstanding any other provisions of this Agreement, PG&E shall have the right to unilaterally file with the Commission, pursuant to the Commission's rules and regulations, an application to terminate this Agreement.

4.4. Any agreements attached to and incorporated into this Agreement shall terminate concurrently with this Agreement unless the Parties have agreed otherwise in writing.

5. GENERATING FACILITY, OPERATION AND CERTIFICATION REQUIREMENTS

5.1. The electric power produced by Producer's Generating Facility shall be used solely to serve electrical loads connected to the electric service account that PG&E uses to interconnect Producer's Generating Facility (or, where permitted under Section 218 of the PUC, the electric loads of an on-site or neighboring party lawfully connected to Producer's Generating Facility through Producer's circuits). Producer shall attempt in good faith to regulate the electric power output of Producer's Generating Facility so as to prevent the flow of electric energy from the Generating Facility to PG&E's electric system. Unless otherwise agreed upon in writing by the Parties, this Agreement does not provide for, nor otherwise require PG&E to receive, purchase, transmit, distribute, or store the electrical power produced by Producer's Generating Facility.

5.2. If Producer declares that its Generating Facility meets the requirements for Cogeneration as such term is used in Section 216.6 of the PUC (or any successor definition of Cogeneration) (Cogeneration Requirements), Producer warrants that, beginning on the date of Initial Operation and continuing throughout the term of this Agreement, its Generating Facility shall continue to meet such Cogeneration Requirements. If Producer becomes aware that its Generating Facility has ceased to meet the Cogeneration Requirements, Producer shall promptly provide PG&E with Notice of such change pursuant to Section 9.1 below. If at any time during the term of this Agreement PG&E determines in its sole discretion that Producer's Generating Facility may no longer meet the Cogeneration Requirements, PG&E may require Producer to provide evidence that its Generating Facility continues to meet the Cogeneration Requirements within 15 business days of PG&E's request for such evidence. Additionally, PG&E may periodically (typically, once per year) inspect

Producer's Generating Facility and/or require documentation from Producer to monitor the Generating Facility's compliance with Section 216.6 of the PUC. If PG&E determines in its sole judgment that Producer either failed to provide evidence in a timely manner or that it provided insufficient evidence that its Generating Facility continues to meet the Cogeneration Requirements, then the Cogeneration status of the Generating Facility shall be deemed ineffective until such time as Producer again demonstrates to PG&E's reasonable satisfaction that the Generating Facility meets the requirements for a Cogeneration facility (the Status Change).

5.2.1. PG&E shall revise its records and the administration of this Agreement to reflect the Status Change and provide Notice to Producer of the Status Change pursuant to Section 9.1 below. This Notice shall specify the effective date of the Status Change. This date shall be the first day of the calendar year for which PG&E determines in its sole discretion that the Generating Facility first ceased to meet the Cogeneration Requirements. PG&E's Notice shall include an invoice for Competition Transition Charges (CTCs) that were not previously billed during the period between the effective date of the Status Change and the date of the Notice in reliance upon Producer's representations that the Generating Facility complied with the Cogeneration Requirements and therefore was eligible for the exemption from CTCs available under Section 372 of the PUC.

5.2.2. Any amounts to be paid or refunded by Producer, as may be invoiced by PG&E pursuant to the terms of this Section 5.2, shall be paid to PG&E within 30 days of Producer's receipt of such invoice.

5.3. If Producer's Generating Facility includes any energy storage device(s), Distribution Provider may provide requirements that must be met by the Producer prior to initiating Parallel Operation with PG&E's Distribution System and throughout the term of this Agreement, including but not limited to the requirements set forth in Appendix D of this Agreement.

5.4. Smart Inverters - For Producer, applications received on or after September 9, 2017, the Producer certifies that their inverter-based Generating Facilities fully comply with Section Hh of Rule 21, including configuration of protective settings **and default settings,** in accordance with the specifications therein.

Distribution Provider may require a field verification of the Producer's inverter. Producer further agrees to cooperate fully with any such request and make their inverter available to the Distribution Provider for such verification. Producer understands that in the event the inverter is not set in accordance with Section Hh of Rule 21, Producer will need to cease operation of generating facility until verification is confirmed by Distribution Provider.

(Solar inverter models and firmware versions that comply with Rule 21 Section Hh can be found at: http://www.gosolarcalifornia.org/equipment/inverters.php.)

Verification of inverter model's compliance with such requirements shall be provided by the Producer upon request by PG&E in accordance with PG&E's Electric Rule 21.

An "existing inverter" is defined as an inverter that is a component of an existing Generating

Facility that meets one or more of the following conditions:

(a) it is already approved by PG&E for interconnection prior to September 9, 2017

(b) the Producer has submitted the interconnection application prior to September 9, 2017,

(c) the Producer provides evidence of having applied for an electrical permit for the Generating Facility installation that is dated prior to September 9, 2017 and submitted a complete interconnection application[1] no later than March 31, 2018, or

(d) the Producer provides evidence of a final inspection clearance from the governmental authority having jurisdiction over the Generating Facility prior to September 9, 2017.

All "existing inverters" are not required to be Smart Inverters and are only subject to Section H of Rule 21. Producer replacing an "existing inverter" certifies it is being replaced with either:

(i) inverter equipment that complies with Section Hh of Rule 21, (encouraged); or

(ii) a conventional inverter that is of the same size and equivalent ability to that of the inverter being replaced, as allowed in Rule 21 Section /H.3.d.ii..

6. INTERCONNECTION FACILITIES

6.1. Producer and/or PG&E, as appropriate, shall provide Interconnection Facilities that adequately protect PG&E's Distribution System, personnel, and other persons from damage or injury, which may be caused by the operation of Producer's Generating Facility.

6.2. Producer shall be solely responsible for the costs, design, purchase, construction, operation, and maintenance of the Interconnection Facilities that Producer owns.

6.3. If the provisions of PG&E's Rule 21, or any other tariff or rule approved by the Commission, requires PG&E to own and operate a portion of the Interconnection Facilities, Producer and PG&E shall promptly execute an Special Facilities Agreement that establishes and allocates responsibility for the design, installation, operation, maintenance, and ownership of the Interconnection Facilities. This Special Facilities Agreement shall be attached to and made a part of this Agreement as Appendix C.

[1] A complete application consists all of the following without deficiencies:
1. A completed Interconnection Application including all supporting documents and required payments,
2. A completed signed Interconnection Agreement,
3. Evidence of the Producer final inspection clearance from the governmental authority having jurisdiction over the generating system.

7. LIMITATION OF LIABILITY

Each Party's liability to the other Party for any loss, cost, claim, injury, liability, or expense, including reasonable attorney's fees, relating to or arising from any act or omission in its performance of this agreement, shall be limited to the amount of direct damage actually incurred. In no event shall either Party be liable to the other Party for any indirect, special, consequential, or punitive damages of any kind whatsoever.

8. INSURANCE

8.1. In connection with Producer's performance of its duties and obligations under this Agreement, Producer shall maintain, during the term of this Agreement, general liability insurance with a combined single limit of not less than:

(a) Two million dollars ($2,000,000) for each occurrence if the Gross Nameplate Rating of Producer's Generating Facility is greater than one hundred (100) kW;

(b) One million dollars ($1,000,000) for each occurrence if the Gross Nameplate Rating of Producer's Generating Facility is greater than twenty (20) kW and less than or equal to one hundred (100) kW; and

(c) Five hundred thousand dollars ($500,000) for each occurrence if the Gross Nameplate Rating of Producer's Generating Facility is twenty (20) kW or less.

(d) Two hundred thousand dollars ($200,000) for each occurrence if the Gross Nameplate Rating of Producer's Generating Facility is ten (10) kW or less and Producer's Generating Facility is connected to an account receiving residential service from PG&E.

Such general liability insurance shall include coverage for "Premises-Operations, Owners and Contractors Protective, Products/Completed Operations Hazard, Explosion, Collapse, Underground, Contractual Liability, and Broad Form Property Damage including Completed Operations."

8.2. The general liability insurance required in Section 8.1 shall, by endorsement to the policy or policies, (a) include PG&E as an additional insured; (b) contain a severability of interest clause or cross-liability clause; (c) provide that PG&E shall not by reason of its inclusion as an additional insured incur liability to the insurance carrier for payment of premium for such insurance; and (d) provide for thirty (30) calendar days' written notice to PG&E prior to cancellation, termination, alteration, or material change of such insurance.

8.3. If Producer's Generating Facility is connected to an account receiving residential service from PG&E and the requirement of Section 8.2(a) prevents Producer from obtaining the insurance required in Section 8.1, then upon Producer's written Notice to PG&E in accordance with Section 9.1, the requirements of Section 8.2(a) shall be waived.

8.4. Evidence of the insurance required in Section 8.2 shall state that coverage provided is primary and is not in excess to or contributing with any insurance or self-insurance maintained by PG&E.

8.5. Producer agrees to furnish the required certificates and endorsements to PG&E prior to Initial Operation. PG&E shall have the right to inspect or obtain a copy of the original policy or policies of insurance.

8.6. If Producer is self-insured with an established record of self-insurance, Producer may comply with the following in lieu of Sections 8.1 through 8.4:

(a) Producer shall provide to, PG&E, at least thirty (30) calendar days prior to the date of Initial Operation, evidence of an acceptable plan to self-insure to a level of coverage equivalent to that required under Section 8.1.

(b) If Producer ceases to self-insure to the level required hereunder, or if Producer are unable to provide continuing evidence of Producer's ability to self-insure, Producer agrees to immediately obtain the coverage required under Section 8.1.

8.7. All insurance certificates, statements of self-insurance, endorsements, cancellations, terminations, alterations, and material changes of such insurance shall be issued and submitted via email or fax to the following:

Pacific Gas and Electric Company
c/o EXIGIS LLC
support@exigis.com
Fax: 646-755-3327

9. NOTICES

9.1. Any written notice, demand, or request required or authorized in connection with this Agreement (Notice) shall be deemed properly given if delivered in person or sent by first class mail, postage prepaid, to the person specified below:

If to PG&E: Pacific Gas and Electric Company
Attention: Electric Generation Interconnection - Contract Management
245 Market Street
Mail Code N7L
San Francisco, California 94105-1702

If to Producer: Customer-Generator Name: _____

Address: _____

City: _____

Phone: (_____) _____

FAX: (_____) _____

9.2. A Party may change its address for Notices at any time by providing the other Party Notice of the change in accordance with Section 9.1.

9.3. The Parties may also designate operating representatives to conduct the daily communications, which may be necessary or convenient for the administration of this Agreement. Such designations, including names, addresses, and phone numbers may be communicated or revised by one Party's Notice to the other.

10. REVIEW OF RECORDS AND DATA

10.1. PG&E shall have the right to review and obtain copies of Producer's operations and maintenance records, logs, or other information such as, unit availability, maintenance outages, circuit breaker operation requiring manual reset, relay targets and unusual events pertaining to Producer's Generating Facility or its interconnection with PG&E's Distribution System.

10.2. Producer authorizes to release to the California Energy Commission (CEC) information regarding Producer's facility, including customer name, location, size, and operational characteristics of the unit, as requested from time to time pursuant to the CEC's rules and regulations.

11. ASSIGNMENT

Producer shall not voluntarily assign its rights nor delegate its duties under this Agreement without PG&E's written consent. Any assignment or delegation Producer makes without PG&E's written consent shall not be valid. PG&E shall not unreasonably withhold its consent to Producer's assignment of this Agreement.

12. NON-WAIVER

None of the provisions of this Agreement shall be considered waived by a Party unless such waiver is given in writing. The failure of a Party to insist in any one or more instances upon strict performance of any of the provisions of this Agreement or to take advantage of any of its rights hereunder shall not be construed as a waiver of any such provisions or the relinquishment of any such rights for the future, but the same shall continue and remain in full force and effect.

13. GOVERNING LAW, JURISDICTION OF COMMISSION, INCLUSION OF PG&E's TARIFF SCHEDULES AND RULES

13.1. This Agreement shall be interpreted, governed, and construed under the laws of the State of California as if executed and to be performed wholly within the State of California without giving effect to choice of law provisions that might apply to the law of a different jurisdiction.

13.2. This Agreement shall, at all times, be subject to such changes or modifications by the Commission as it may from time to time direct in the exercise of its jurisdiction.

13.3. The interconnection and services provided under this Agreement shall at all times

be subject to the terms and conditions set forth in the Tariff Schedules and Rules applicable to the electric service provided by, PG&E, which Tariff Schedules and Rules are hereby incorporated into this Agreement by this reference.

13.4. Notwithstanding any other provisions of this Agreement, PG&E shall have the right to unilaterally file with the Commission, pursuant to the Commission's rules and regulations, an application for change in rates, charges, classification, service, tariff or rule or any agreement relating thereto.

14. AMENDMENT AND MODIFICATION

This Agreement can only be amended or modified in writing, signed by both Parties.

15. ENTIRE AGREEMENT

This Agreement, including any incorporated Tariff Schedules and rules, contains the entire agreement and understanding between the Parties, their agents, and employees as to the subject matter of this Agreement. Each party also represents that in entering into this Agreement, it has not relied on any promise, inducement, representation, warranty, agreement or other statement not set forth in this Agreement or in the incorporated tariff schedules and rules.

16. SIGNATURES

IN WITNESS WHEREOF, the Parties hereto have caused two originals of this Agreement to be executed by their duly authorized representatives. This Agreement is effective as of the last date set forth below.

APPENDIX A
DESCRIPTION OF GENERATING FACILITY AND SINGLE-LINE DIAGRAM,
(Provided by Producer)

APPENDIX B
RULES “2” AND “21”
(and any other Tariffs pertinent to the situation)
(Provided by PG&E)

(Note: PG&E’s tariffs are included for reference only and shall at all times be subject to such changes or modifications by the Commission as the Commission may, from time to time, direct in the exercise of its jurisdiction.)

APPENDIX C
(If Applicable)
RULE 21 “SPECIAL FACILITIES” AGREEMENT
(Formed between the Parties)

APPENDIX D

(If Applicable)

OPERATING REQUIREMENTS FOR ENERGY STORAGE DEVICE(S)

The following Operating Requirement(s) apply to the charging functions of the Generating Facility:

❑ Producer's storage device(s) will not consume power from Distribution Provider's Distribution System at any time.

❑ Producer's storage device(s) will not cause the Host Load to exceed its normal peak demand. Normal peak demand is defined as the highest amount of power required from the Distribution System by Producer's complete facilities without the influence or use of the energy storage device(s).

❑ To avoid upgrades or other technical mitigation items identified in the interconnection process, Producer has chosen the following Generating Facility operating constraint(s):

For the annual period between _____ [Month/Day] and _____ [Month/Day]
And during the hours of _____
The storage device(s) will consume no more than a total of ___ kW from the Distribution System.
This operating constraint voids the need for the following specific mitigation scope:

No other charging function limitation is required for this Generating Facility except the requirements above. Producer will be responsible for the costs of the corresponding upgrades or other technical mitigations if at any time the Producer elects to forego or violates the operating requirement.

Consistent with current load service Rules, Distribution Provider is not required to reserve capacity for load. Producer is responsible to contact the utility for any modification to its equipment or change in operations that may result in increased load demand per Electric Rule 3.C.

If any operating requirement is specified above, Distribution Provider reserves the right to ask for data at the 15-minute interval level at any time to verify that the operating requirement is being met. Distribution Provider will make such request via a written notice no more than once per calendar quarter. Producer must provide such data within 30 Calendar Days of the written request.

If the Generating Facility fails to adhere to the operating requirements at any time, it will be disconnected immediately in accordance with Rule 21 Section D.9 and not reconnected until an approved mitigation (e.g., supervising controls) is in place as determined by Distribution Provider.

ELECTRIC SAMPLE FORM NO. 79-978 Sheet 1

Interconnection Agreement for Net Energy Metering of Solar or Wind Electric Generating Facilities of 1,000 Kilowatts or Less,
Other Than Facilities of 30 Kilowatts or Less

Please Refer to Attached Sample Form

INTERCONNECTION AGREEMENT FOR NET ENERGY METERING OF SOLAR OR WIND ELECTRIC GENERATING FACILITIES OF 1,000 KW OR LESS, OTHER THAN FACILITIES OF 30 KW OR LESS

This *Interconnection Agreement for Net Energy Metering of Solar or Wind Electric Generating Facilities of 1,000 kW or Less, Other Than Facilities of 30 kW or Less* (Agreement)[1] is entered into by and between _____ (Customer-Generator), and Pacific Gas and Electric Company (PG&E), a California Corporation. Customer-Generator and PG&E are sometimes also referred to in this Agreement jointly as "Parties" or individually as "Party." In consideration of the mutual promises and obligations stated in this Agreement and its attachments, the Parties agree as follows:

1. SCOPE AND PURPOSE

This Agreement provides for Customer-Generator to interconnect and operate a Generating Facility in parallel with PG&E's Distribution System to serve the electrical loads connected to the electric service agreement ID number that PG&E uses to interconnect Customer-Generator's Generating Facility. Customer-Generator's Generating Facility is intended primarily to offset part or all of the Customer-Generator's own electrical requirements. Consistent with, and in order to effectuate, the provisions of Sections 2827, 2827.7 and 2827.8 of the California Public Utilities Code and PG&E's electric rate Schedule NEM (NEM), Parties enter into this Agreement. This Agreement applies to the Customer-Generator's Generating Facilities identified below with the specified characteristics and generating capacity, and does not allow interconnection or operation of facilities different than those described.

2. SUMMARY AND DESCRIPTION OF CUSTOMER-GENERATOR'S GENERATING FACILITY AND DESIGNATION OF OTHERWISE-APPLICABLE RATE SCHEDULE

2.1 A description of the Generating Facility, including a summary of its significant components and a single-line diagram showing the general arrangement of how Customer-Generator's Generating Facility and loads are interconnected with PG&E's Distribution System, is attached to and made a part of this Agreement. (This description is supplied by Customer-Generator as Appendix A).

2.2 Generating Facility identification number: _____ (Assigned by PG&E).

2.3 Customer-Generator's electric service agreement ID number: _____ (Assigned by PG&E).

2.4 Name and address used by PG&E to locate the electric service agreement ID number used to interconnect the Generating Facility with PG&E's Distribution System:

Name: _____

Address: _____

City/Zip Code: _____

[1] Additional forms are available on PG&E's website at http://www.pge.com/gen).

† Information collected on this form is used in accordance with PG&E's Privacy Policy. The Privacy Policy is available at pge.com/privacy.

2.5 Interconnected Equipment:

List of generating equipment interconnected with, or without, an inverter to PG&E. (For those generators interconnecting without an inverter, write in "N/A" in the right three columns. If an inverter is shared by more than one generator, write "shared" on the same line as that generator under the manufacturer column and do not enter the inverter rating. Attach list of additional equipment, if applicable.)

	Type of Generator (Solar / Wind / Hybrid)	Generator Rating (watts)	Manufacturer of Inverter used with Generator (if Applicable)	Inverter Model Number (if Applicable)	Inverter Rating (watts)[2] (if Applicable)
1					
2					

2.6 Customer-Generator's otherwise-applicable rate schedule under the provisions of Schedule NEM will be _____.

2.7 The Generating Facility's expected date of Initial Operation is _____. The expected date of Initial Operation shall be within two years of the date of this Agreement.

2.8 If the date of the permits allowing the Customer-Generator to commence construction of the Generating Facility is prior to January 1, 2003, please provide the date the permits were issued: _____.

2.9 Smart Inverters - For Customer-Generator applications received on or after September 9, 2017, the Customer-Generator certifies that their inverter-based Generating Facilities fully comply with Section Hh of Rule 21, including configuration of protective settings **and default settings**, in accordance with the specifications therein.

Distribution Provider may require a field verification of the Customer-Generator inverter. Customer-Generator further agrees to cooperate fully with any such request and make their inverter available to the Distribution Provider for such verification. Customer-Generator understands that in the event the inverter is not set in accordance with Section Hh of Rule 21, Customer-Generator will need to cease operation of generating facility until verification is confirmed by Distribution Provider.

(Solar inverter models and firmware versions that comply with Rule 21 Section Hh can be found at: https://www.energy.ca.gov/programs-and-topics/topics/renewable-energy/solar-equipment-lists)

[2] If installing an inverter, the inverter rating equals: (the CEC efficiency for each installed inverter) TIMES (the nameplate rating, in kW, of each inverter). The CEC efficiency is obtained on the CEC website at http://www.consumerenergycenter.org/erprebate/eligible_inverters.html as listed on the date the application is reviewed. Enter the total of all inverter ratings for multiple inverter installations in the Table above.

Verification of inverter model's compliance with such requirements shall be provided by the Customer-Generator upon request by PG&E in accordance with PG&E's Electric Rule 21.

An "existing inverter" is defined as an inverter that is a component of an existing Generating Facility that **meets one or more of the following conditions:**

(a) it is already approved by PG&E for interconnection prior to September 9, 2017

(b) the Customer-Generator has submitted the interconnection application prior to September 9, 2017,

(c) the Customer-Generator provides evidence of having applied for an electrical permit for the Generating Facility installation that is dated prior to September 9, 2017 and submitted a complete interconnection application[3] no later than March 31, 2018, or

(d) the Customer-Generator provides evidence of a final inspection clearance from the governmental authority having jurisdiction over the Generating Facility prior to September 9, 2017.

All "existing inverters" are not required to be Smart Inverters and are only subject to Section H of Rule 21. Customer-Generator replacing an "existing inverter" certifies it is being replaced with either:

(i) inverter equipment that complies with Section Hh of Rule 21, (encouraged); or

(ii) a conventional inverter that is of the same size and equivalent ability to that of the inverter being replaced, as allowed in Rule 21 Section H.3.d.ii.

3. DOCUMENTS INCLUDED AND DEFINED TERMS

3.1 This Agreement includes the following exhibits that are specifically incorporated herein and made a part of this Agreement.

Appendix A Description of Generating Facility and Single-Line Diagram (Supplied by Customer-Generator).

Appendix B A Copy of *PG&E's Agreement for Installation or Allocation of Special Facilities* (Forms 79-255, 79-280, 79-702) or Agreements to Perform Any Tariff Related Work (62-4527), if applicable (Formed by the Parties).

[3] A complete application consists all of the following without deficiencies:
1. A completed Interconnection Application including all supporting documents and required payments,
2. A completed signed Interconnection Agreement,
3. Evidence of the Customer-Generator final inspection clearance from the governmental authority having jurisdiction over the generating system.

In addition, PG&E Electric Tariff Rules and Rates, including but not limited to Electric Rules 2, 14, 15, 16, and 21, Schedule NEM, and Customer-Generator's otherwise-applicable rate schedule, available at PG&E's website at www.pge.com or by request, are specifically incorporated herein and made part of this Agreement.

3.2 When initially capitalized, whether in the singular or in the plural, the terms used herein shall have the meanings assigned to them either in this Agreement or in PG&E's Electric Rule 21, Section C.

4. CUSTOMER BILLING AND PAYMENT

Customer-Generator initially selects Pacific Gas and Electric Company's electric rate schedule referenced in Section 2.6 of this Agreement as its otherwise-applicable rate schedule. Customer-Generator understands that they will be billed according to the otherwise-applicable rate schedule and Schedule NEM.

5. TERM AND TERMINATION

5.1 This Agreement shall become effective as of the last date entered in Section 18 below. The Agreement shall continue in full force and effect until the earliest date that one of the following events occurs:

(a) The Parties agree in writing to terminate the Agreement.

(b) Unless otherwise agreed in writing by the Parties, at 12:01 A.M. on the day following the date the electric service agreement ID number through which Customer-Generator's Generating Facility is interconnected to PG&E is closed or terminated.

(c) At 12:01 A.M. on the 61st day after Customer-Generator or PG&E provides written Notice pursuant to Section 11 below to the other Party of Customer-Generator's or PG&E's intent to terminate this Agreement.

5.2 Customer-Generator may elect to terminate this Agreement pursuant to the terms

of Section 5.1(c) for any reason. PG&E may elect to terminate this Agreement pursuant to the terms of Section 5.1(c) for one or more of the following reasons:

(a) A change in applicable rules, tariffs, or regulations, as approved or directed by the Commission, or a change in any local, state or federal law, statute or regulation, either of which materially alters or otherwise affects PG&E's ability or obligation to perform PG&E's duties under this Agreement; or,

(b) Customer-Generator fails to take all corrective actions specified in PG&E's Notice that Customer-Generator's Generating Facility is out of compliance with the terms of this Agreement within the time frame set forth in such Notice; or,

(c) Customer-Generator abandons the Generating Facility. PG&E shall deem the Generating Facility to be abandoned if PG&E determines, in its sole opinion, the Generating Facility is nonoperational and Customer-Generator does not provide a

substantive response to PG&E Notice of its intent to terminate this Agreement as a result of Customer-Generator's apparent abandonment of the Generating Facility affirming Customer-Generator's intent and ability to continue to operate the Generating Facility; or,

(d) Customer-Generator's Generating Facility ceases to meet all applicable safety and performance standards set out in Section 6.

5.3 Notwithstanding any other provisions of this Agreement, PG&E shall have the right to unilaterally file with the Commission, pursuant to the Commission's rules and regulations, an application to terminate this Agreement.

5.4 Any agreements attached to and incorporated into this Agreement shall terminate concurrently with this Agreement unless the Parties have agreed otherwise in writing.

6. GENERATING FACILITY REQUIREMENTS

6.1 Customer-Generator's Generating Facility must meet all applicable safety and performance standards established by the National Electrical Code, the Institute of Electrical and Electronics Engineers, and accredited testing laboratories such as Underwriters Laboratories and, where applicable, rules of the Commission regarding safety and reliability including Rule 21.

6.2 Customer-Generator shall: (a) maintain the Generating Facility and Interconnection Facilities in a safe and prudent manner and in conformance with all applicable laws and regulations including, but not limited to, Section 6.1, and (b) obtain any governmental authorizations and permits required for the construction and operation of the Generating Facility and Interconnection Facilities. Customer-Generator shall reimburse PG&E for any and all losses, damages, claims, penalties, or liability it incurs as a result of Customer-Generator's failure to obtain or maintain any governmental authorizations and permits required for construction and operation of Customer-Generator's Generating Facility.

6.3 Customer-Generator shall not commence parallel operation of the Generating Facility until PG&E has provided express written approval. Such approval shall normally be provided no later than thirty (30) business days following PG&E's receipt of: (1) a completed *Generating Facility Interconnection Application for Non-Export or Certain Net Energy Metered Generating Facilities (between 30 kW and 1,000 kW)* (Form 79-974), including all supporting documents and payments as described in the Application; (2) a completed *Expanded Net Energy Metering (NEM) Supplemental Application* (Form 79-998); (3) a signed and completed *Interconnection Agreement for Net Energy Metering of Solar or Wind Electric Generating Facilities of 1,000 KW or Less, Other Than Facilities of 30 KW or Less* (Form 79-978); and (4) a copy of the Customer-Generator's final inspection clearance from the governmental authority having jurisdiction over the Generating Facility. Such approval shall not be unreasonably withheld. PG&E shall have the right to have representatives present at the Commissioning Test as defined in Rule 21. Customer-Generator shall notify PG&E at least five (5) business days prior to the initial testing.

7. INTERCONNECTION FACILITIES

7.1 Customer-Generator and/or PG&E, as appropriate, shall provide Interconnection Facilities that adequately protect PG&E's Distribution System, personnel, and other persons from damage or injury, which may be caused by the operation of Customer-Generator's Generating Facility.

7.2 Customer-Generator shall be solely responsible for the costs, design, purchase, construction, permitting, operation, and maintenance of the Interconnection Facilities that Customer-Generator owns.

7.3 If the provisions of PG&E's Electric Rule 21, or any other tariff or rule approved by the Commission, require PG&E to own and operate a portion of the Interconnection Facilities, Customer-Generator and PG&E shall promptly execute an Special Facilities Agreement that establishes and allocates responsibility for the design, installation, operation, maintenance, and ownership of the Interconnection Facilities. This Special Facilities Agreement shall be attached to and made a part of this Agreement as Appendix B.

8. LIMITATION OF LIABILITY

Each Party's liability to the other Party for any loss, cost, claim, injury, liability, or expense, including reasonable attorney's fees, relating to or arising from any act or omission in its performance of this agreement, shall be limited to the amount of direct damage actually incurred. In no event shall either Party be liable to the other Party for any indirect, special, consequential, or punitive damages of any kind whatsoever.

9. INSURANCE

Customer-Generator Facility is required to comply with standards and rules set forth in section 6 and provide the following for insurance policies in place.

Customer-Generator shall furnish the required certificates and all endorsements to PG&E prior to Parallel Operation.

The certificate shall provide thirty (30) calendar days' written notice to PG&E prior to cancellation, termination, alteration, or material change of such insurance.

PG&E shall have the right to inspect or obtain a copy of the original policy or policies of insurance.

9.1 If at any time during this agreement the Customer-Generator fails to meet the requirements in section 6 and is not self-insured under Section 9.3, the following insurance shall apply:

Customer-Generator shall procure and maintain a commercial general liability insurance policy at least as broad as the Insurance Services Office (ISO) commercial general liability coverage "occurrence" form; or, if Customer-Generator is an individual, then liability coverage with respect to premises and use at least as broad as the ISO homeowners' or personal liability Insurance occurrence policy form, or substitute,

providing equivalent coverage no less than the following limits, based on generator size:

(a) Two million dollars ($2,000,000) for each occurrence if the Gross Nameplate Rating of the Generating Facility is greater than one hundred (100) kW; or

(b) One million dollars ($1,000,000) for each occurrence if the Gross Nameplate Rating of the Generating Facility is greater than twenty (20) kW and less than or equal to one hundred (100) kW; or

(c) Five hundred thousand dollars ($500,000) for each occurrence if the Gross Nameplate Rating of the Generating Facility is twenty (20) kW or less;

(d) Two hundred thousand dollars ($200,000) for each occurrence if the Gross Nameplate Rating of the Generating Facility is ten (10) kW or less and the Generating Facility is connected to an account receiving residential service from PG&E.

The insurance shall, by endorsement:

(a) Add PG&E as an additional insured;

(b) State that coverage provided is primary and is not in excess to or contributing with any insurance or self-insurance maintained by PG&E.

(c) Contain a severability of interest clause or cross-liability clause.

9.2 If Customer-Generator's Generating Facility is connected to an account receiving residential service from PG&E and the requirement of Section 9.1 prevents Customer-Generator from obtaining the insurance required in this Section, then upon Customer-Generator's written Notice to PG&E in accordance with Section 11.1, the requirements of Section 9.1 may be waived.

9.3 Customer-Generator may self-insure with approval from PG&E. Evidence of an acceptable plan to self-insure, at least thirty (30) calendar days' prior to operations shall be submitted. Customer-Generators such as state agencies that self-insure under this section are exempt from Section 10.1.

If Customer-Generator ceases to self-insure to the level required hereunder, or if Customer-Generator is unable to provide continuing evidence of Customer-Generator's ability to self-insure, Customer-Generator agrees to immediately obtain the coverage required under agreement.

9.4 All required certificates, endorsements or letters of self-insurance shall be issued and submitted via email or fax to the following:

Pacific Gas and Electric Company
c/o EXIGIS LLC
support@exigis.com
Fax: 646-755-3327

10. INDEMNITY FOR FAILURE TO COMPLY WITH INSURANCE PROVISIONS

10.1 If Customer-Generator fails to comply with the insurance provisions of this Agreement, Customer-Generator shall, at its own cost, defend, save harmless and indemnify PG&E, its directors, officers, employees, agents, assignees, and successors in interest from and against any and all loss, liability, damage, claim, cost, charge, demand, or expense of any kind or nature (including attorney's fees and other costs of litigation) resulting from the death or injury to any person or damage to any property, including the personnel and property of the utility, to the extent that the utility would have been protected had Customer-Generator complied with all such insurance provisions. The inclusion of this Section 10.1 is not intended to create any expressed or implied right in Customer-Generator to elect not to provide any such required insurance.

10.2 The provisions of this Section 10 shall not be construed to relieve any insurer of its obligations to pay any insurance claims in accordance with the provisions of any valid insurance policy.

11. NOTICES

11.1 Any written notice, demand, or request required or authorized in connection with this Agreement (Notice) shall be deemed properly given if delivered in person or sent by first class mail, postage prepaid, to the person specified below:

If to PG&E: Pacific Gas and Electric Company
Attention: Generation Interconnection Services- Contract Management
245 Market Street
Mail Code N7L
San Francisco, California 94105-1702

If to Customer-Generator:
Customer-Generator Name:_____

Address: _____

City: _____

Phone: (_____) _____

FAX: (_____) _____

11.2 A Party may change its address for Notices at any time by providing the other Party notice of the change in accordance with Section 11.1.

11.3 The Parties may also designate operating representatives to conduct the daily communications, which may be necessary or convenient for the administration of this Agreement. Such designations, including names, addresses, and phone numbers may be communicated or revised by one Party's Notice to the other.

12. REVIEW OF RECORDS AND DATA

12.1 PG&E shall have the right to review and obtain copies of Customer-Generator's operations and maintenance records, logs, or other information such as Generating Facility availability, maintenance outages, circuit breaker operation requiring manual reset, relay targets and unusual events pertaining to Customer-Generator's Generating Facility or its interconnection to PG&E.

12.2 Customer-Generator authorizes to release to the California Energy Commission (CEC) information regarding Customer-Generator's facility, including customer name and Generating Facility location, size, and operational characteristics, as requested from time to time pursuant to the CEC's rules and regulations.

13. ASSIGNMENT

Customer-Generator shall not voluntarily assign its rights nor delegate its duties under this Agreement without PG&E's written consent. Any assignment or delegation Customer-Generator makes without PG&E's written consent shall not be valid. PG&E shall not unreasonably withhold its consent to Customer-Generator's assignment of this Agreement.

14. NON-WAIVER

None of the provisions of this Agreement shall be considered waived by a Party unless such waiver is given in writing. The failure of a Party to insist in any one or more instances upon strict performance of any of the provisions of this Agreement or to take advantage of any of its rights hereunder shall not be construed as a waiver of any such provisions or the relinquishment of any such rights for the future, but the same shall continue and remain in full force and effect.

15. GOVERNING LAW, JURISDICTION OF COMMISSION, INCLUSION OF PG&E's TARIFF SCHEDULES AND RULES

15.1 This Agreement shall be interpreted, governed, and construed under the laws of the State of California as if executed and to be performed wholly within the State of California without giving effect to choice of law provisions that might apply to the law of a different jurisdiction.

15.2 This Agreement shall, at all times, be subject to such changes or modifications by the Commission as it may from time to time direct in the exercise of its jurisdiction.

15.3 The interconnection and services provided under this Agreement shall at all times be subject to the terms and conditions set forth in the Tariff Schedules and Rules applicable to the electric service provided by PG&E, which Tariff Schedules and Rules are hereby incorporated into this Agreement by this reference.

15.4 Notwithstanding any other provisions of this Agreement, PG&E shall have the right to unilaterally file with the Commission, pursuant to the Commission's rules and regulations, an application for change in rates, charges, classification, service, tariff or rule or any agreement relating thereto.

16. AMENDMENT AND MODIFICATION

This Agreement can only be amended or modified by a writing signed by both Parties.

17. ENTIRE AGREEMENT

This Agreement, including any incorporated Tariff Schedules and Rules, contains the entire Agreement and understanding between the Parties, their agents, and employees as to the subject matter of this Agreement. Each party also represents that in entering into this Agreement, it has not relied on any promise, inducement, representation, warranty, agreement or other statement not set forth in this Agreement or in the incorporated Tariff Schedules and Rules.

18. SIGNATURES

IN WITNESS WHEREOF, the Parties hereto have caused this Agreement to be executed by their duly authorized representatives. This Agreement is effective as of the last date set forth below.

Interconnection Agreement for Net Energy Metering (NEM2) of Solar or Wind Electric Generating Facilities of 1,000 Kilowatts or Less, Other than Facilities of 30 Kilowatts or Less

Please Refer to Attached Sample Form

INTERCONNECTION AGREEMENT FOR NET ENERGY METERING (NEM2) OF SOLAR OR WIND ELECTRIC GENERATING FACILITIES, OTHER THAN FACILITIES OF 30 KW OR LESS

This *Interconnection Agreement for Net Energy Metering (NEM2) of Solar or Wind Electric Generating Facilities of 1,000 kW or Less, Other Than Facilities of 30 kW or Less* (Agreement)[1] is entered into by and between _____ (Customer-Generator), and Pacific Gas and Electric Company (PG&E), a California Corporation. Customer-Generator and PG&E are sometimes also referred to in this Agreement jointly as "Parties" or individually as "Party." In consideration of the mutual promises and obligations stated in this Agreement and its attachments, the Parties agree as follows:

1. SCOPE AND PURPOSE

This Agreement provides for Customer-Generator to interconnect and operate a Generating Facility in parallel with PG&E's Electric System to serve the electrical loads connected to the electric service agreement ID number that PG&E uses to interconnect Customer-Generator's Generating Facility. Customer-Generator's Generating Facility is intended primarily to offset part or all of the Customer-Generator's own electrical requirements. Consistent with, and in order to effectuate, the provisions of Sections 2827, 2827.7 and 2827.8 of the California Public Utilities Code and PG&E's electric rate Schedule NEM2 (NEM2), Parties enter into this Agreement. This Agreement applies to the Customer-Generator's Generating Facilities identified below with the specified characteristics and generating capacity, and does not allow interconnection or operation of facilities different than those described.

2. SUMMARY AND DESCRIPTION OF CUSTOMER-GENERATOR'S GENERATING FACILITY AND DESIGNATION OF OTHERWISE-APPLICABLE RATE SCHEDULE

2.1 A description of the Generating Facility, including a summary of its significant components and a single-line diagram showing the general arrangement of how Customer-Generator's Generating Facility and loads are interconnected with PG&E's Electric System, is attached to and made a part of this Agreement. (This description is supplied by Customer-Generator as Appendix A).

2.2 Generating Facility identification number: _____ (Assigned by PG&E).

2.3 Customer-Generator's electric service agreement ID number: _____ (Assigned by PG&E).

2.4 Name and address used by PG&E to locate the electric service agreement ID number used to interconnect the Generating Facility with PG&E's Electric System:

Name: _____

Address: _____

City/Zip Code: _____

[1] Additional forms are available on PG&E's website at http://www.pge.com/gen).

† Information collected on this form is used in accordance with PG&E's Privacy Policy. The Privacy Policy is available at pge.com/privacy.

2.5 The Gross Nameplate Rating of the Generating Facility is: _____ kW.

2.6 The Net Nameplate Rating of the Generating Facility is _____ kW.

2.7 Customer-Generator's otherwise-applicable rate schedule as of the execution of this Agreement _____.

2.8 The Generating Facility's expected date of Initial Operation is _____. The expected date of Initial Operation shall be within two years of the date of this Agreement.

2.9 Smart Inverters - For Customer-Generator applications received on or after September 9, 2017, the Customer-Generator certifies that their inverter-based Generating Facilities fully comply with Section Hh of Rule 21, including configuration of protective settings **and default settings**, in accordance with the specifications therein.

Distribution Provider may require a field verification of the Customer-Generator's inverter. Customer-Generator further agrees to cooperate fully with any such request and make their inverter available to the Distribution Provider for such verification. Customer-Generator understands that in the event the inverter is not set in accordance with Section Hh of Rule 21, Customer-Generator will need to cease operation of generating facility until verification is confirmed by Distribution Provider.

(Solar Inverter models and firmware versions that comply with Rule 21 Section Hh can be found at https://www.energy.ca.gov/programs-and-topics/topics/renewable-energy/solar-equipment-lists.)

Verification of compliance with such requirements shall be provided by the Customer-Generator upon request by PG&E in accordance with PG&E's Electric Rule 21.

An "existing inverter" is defined as an inverter that is a component of an existing Generating Facility that meets one or more of the following conditions:

(a) it is already approved by PG&E for interconnection prior to September 9, 2017

(b) the Customer-Generator has submitted the interconnection application prior to September 9, 2017,

(c) the Customer-Generator provides evidence of having applied for an electrical permit for the Generating Facility installation that is dated prior to September 9, 2017 and submitted a complete interconnection application[2] no later than March 31, 2018, or

[2] A complete application consists all of the following without deficiencies:
1. A completed Interconnection Application including all supporting documents and required payments,
2. A completed signed Interconnection Agreement,
3. Evidence of the Customer-Generator final inspection clearance from the governmental authority having jurisdiction over the generating system.

(d) the Customer-Generator provides evidence of a final inspection clearance from the governmental authority having jurisdiction over the Generating Facility prior to September 9, 2017.

All "existing inverters" are not required to be Smart Inverters and are only subject to Section H of Rule 21. Customer-Generator replacing an "existing inverter" certifies it is being replaced with either:

(i) inverter equipment that complies with Section Hh of Rule 21, (encouraged); or

(ii) a conventional inverter that is of the same size and equivalent ability to that of the inverter being replaced, as allowed in Rule 21 Section H.3.d.ii.

3. DOCUMENTS INCLUDED AND DEFINED TERMS

3.1 This Agreement includes the following exhibits that are specifically incorporated herein and made a part of this Agreement.

Appendix A Description of Generating Facility and Single-Line Diagram (Supplied by Customer-Generator).

Appendix B A Copy of *PG&E's Agreement for Installation or Allocation of Special Facilities* (Forms 79-255, 79-280, 79-702) or *Agreements to Perform Any Tariff Related Work (62-4527*), if applicable (Formed by the Parties).

Appendix C NEM2 Load Aggregation Customer-Generator Declaration Warranting NEM2 Aggregation Is Located On Same or Adjacent or Contiguous Property to Generator Parcel

In addition, PG&E Electric Tariff Rules and Rates, including but not limited to Electric Rules 2, 14, 15, 16, and 21, Schedule NEM2, and Customer-Generator's otherwise-applicable rate schedule, available at PG&E's website at www.pge.com or by request, are specifically incorporated herein and made part of this Agreement.

3.2 When initially capitalized, whether in the singular or in the plural, the terms used herein shall have the meanings assigned to them either in this Agreement or in PG&E's Electric Rule 21, Section C.

4. CUSTOMER BILLING AND PAYMENT

Customer-Generator initially selects Pacific Gas and Electric Company's electric rate schedule referenced in Section 2.6 of this Agreement as its otherwise-applicable rate schedule. Customer-Generator understands that they will be billed according to the otherwise-applicable rate schedule and Schedule NEM2.

5. TERM AND TERMINATION

5.1 This Agreement shall become effective as of the last date entered in Section 18 below. The Agreement shall continue in full force and effect until the earliest date that one of the following events occurs:

(a) The Parties agree in writing to terminate the Agreement.

(b) Unless otherwise agreed in writing by the Parties, at 12:01 A.M. on the day following the date the electric service agreement ID number through which Customer-Generator's Generating Facility is interconnected to PG&E is closed or terminated.

(c) At 12:01 A.M. on the 61st day after Customer-Generator or PG&E provides written Notice pursuant to Section 11 below to the other Party of Customer-Generator's or PG&E's intent to terminate this Agreement.

5.2 Customer-Generator may elect to terminate this Agreement pursuant to the terms of Section 5.1(c) for any reason. PG&E may elect to terminate this Agreement pursuant to the terms of Section 5.1(c) for one or more of the following reasons:

(a) A change in applicable rules, tariffs, or regulations, as approved or directed by the Commission, or a change in any local, state or federal law, statute or regulation, either of which materially alters or otherwise affects PG&E's ability or obligation to perform PG&E's duties under this Agreement; or,

(b) Customer-Generator fails to take all corrective actions specified in PG&E's Notice that Customer-Generator's Generating Facility is out of compliance with the terms of this Agreement within the time frame set forth in such Notice; or,

(c) Customer-Generator abandons the Generating Facility. PG&E shall deem the Generating Facility to be abandoned if PG&E determines, in its sole opinion, the Generating Facility is nonoperational and Customer-Generator does not provide a substantive response to PG&E Notice of its intent to terminate this Agreement as a result of Customer-Generator's apparent abandonment of the Generating Facility affirming Customer-Generator's intent and ability to continue to operate the Generating Facility; or,

(d) Customer-Generator's Generating Facility ceases to meet all applicable safety and performance standards set out in Section 6.

5.3 Notwithstanding any other provisions of this Agreement, PG&E shall have the right to unilaterally file with the Commission, pursuant to the Commission's rules and regulations, an application to terminate this Agreement.

5.4 Any agreements attached to and incorporated into this Agreement shall terminate concurrently with this Agreement unless the Parties have agreed otherwise in writing.

6. GENERATING FACILITY REQUIREMENTS

6.1 Customer-Generator's Generating Facility must meet all applicable safety and performance standards established by the National Electrical Code, the Institute of Electrical and Electronics Engineers, and accredited testing laboratories such as Underwriters Laboratories and, where applicable, rules of the Commission regarding safety and reliability including Rule 21.

6.2 Customer-Generator shall: (a) maintain the Generating Facility and Interconnection Facilities in a safe and prudent manner and in conformance with all applicable laws and regulations including, but not limited to, Section 6.1, and (b) obtain any governmental authorizations and permits required for the construction and operation of the Generating Facility and Interconnection Facilities. Customer-Generator shall reimburse PG&E for any and all losses, damages, claims, penalties, or liability it incurs as a result of Customer-Generator's failure to obtain or maintain any governmental authorizations and permits required for construction and operation of Customer-Generator's Generating Facility.

6.3 Customer-Generator shall not commence parallel operation of the Generating Facility until PG&E has provided express written approval. Such approval shall normally be provided no later than thirty (30) business days following PG&E's receipt of: (1) a completed *Generating Facility Interconnection Application for Non-Export or Certain Net Energy Metered Generating Facilities* (Form 79-974-02), including all supporting documents and payments as described in the Application; (2) a signed and completed *Interconnection Agreement for Net Energy Metering (NEM2) of Solar or Wind Electric Generating Facilities, Other Than Facilities of 30 KW or Less* (Form 79-978-02); and (3) a copy of the Customer-Generator's final inspection clearance from the governmental authority having jurisdiction over the Generating Facility. Such approval shall not be unreasonably withheld. PG&E shall have the right to have representatives present at the Commissioning Test as defined in Rule 21. Customer-Generator shall notify PG&E at least five (5) business days prior to the initial testing.

6.4 In order to promote the safety and reliability of the customer Generating Facility, the Customer-Generator certifies that as a part of this interconnection request for NEM2, that all major solar system components are on the verified equipment list maintained by the California Energy Commission and certifies that other equipment, as determined by PG&E, has safety certification from a nationally recognized testing laboratory.

6.5 Customer-Generator certifies as a part of this interconnection request for NEM2 that

(i) a warranty of at least 10 years has been provided on all equipment and on its installation, or

(ii) a 10-year service warranty or executed "agreement" has been provided ensuring proper maintenance and continued system performance.

6.6 Customers on this tariff must pay for the interconnection of their Generation Facilities as provided in Electric Rule 21, pursuant to Decision 16-01-044.

7. INTERCONNECTION FACILITIES

7.1 Customer-Generator and/or PG&E, as appropriate, shall provide Interconnection Facilities that adequately protect PG&E's Electric System, personnel, and other persons from damage or injury, which may be caused by the operation of Customer-Generator's Generating Facility.

7.2 Customer-Generator shall be solely responsible for the costs, design, purchase, construction, permitting, operation, and maintenance of the Interconnection Facilities that Customer-Generator owns.

7.3 If the provisions of PG&E's Electric Rule 21, or any other tariff or rule approved by the Commission, require PG&E to own and operate a portion of the Interconnection Facilities, Customer-Generator and PG&E shall promptly execute an Special Facilities Agreement that establishes and allocates responsibility for the design, installation, operation, maintenance, and ownership of the Interconnection Facilities. This Special Facilities Agreement shall be attached to and made a part of this Agreement as Appendix B.

8. LIMITATION OF LIABILITY

Each Party's liability to the other Party for any loss, cost, claim, injury, liability, or expense, including reasonable attorney's fees, relating to or arising from any act or omission in its performance of this agreement, shall be limited to the amount of direct damage actually incurred. In no event shall either Party be liable to the other Party for any indirect, special, consequential, or punitive damages of any kind whatsoever.

9. INSURANCE

Customer-Generator Facility is required to comply with standards and rules set forth in Section 6 and provide the following for insurance policies in place.

Customer-Generator shall furnish the required certificates and all endorsements to PG&E prior to Parallel Operation.

The certificate shall provide thirty (30) calendar days' written notice to PG&E prior to cancellation, termination, alteration, or material change of such insurance.

PG&E shall have the right to inspect or obtain a copy of the original policy or policies of insurance.

9.1 If at any time during this agreement the Customer-Generator fails to meet the requirements in Section 6 and is not self-insured under Section 9.3, the following insurance shall apply:

Customer-Generator shall procure and maintain a commercial general liability insurance policy at least as broad as the Insurance Services Office (ISO) commercial general liability coverage "occurrence" form; or, if Customer-Generator is an individual, then liability coverage with respect to premises and use at least as broad as the ISO homeowners' or personal liability Insurance occurrence policy form, or substitute, providing equivalent coverage no less than the following limits, based on generator size:

(a) Two million dollars ($2,000,000) for each occurrence if the Gross Nameplate Rating of the Generating Facility is greater than one hundred (100) kW; or

(b) One million dollars ($1,000,000) for each occurrence if the Gross Nameplate Rating of the Generating Facility is greater than twenty (20) kW and less than or equal to one hundred (100) kW; or

(c) Five hundred thousand dollars ($500,000) for each occurrence if the Gross Nameplate Rating of the Generating Facility is twenty (20) kW or less;

(d) Two hundred thousand dollars ($200,000) for each occurrence if the Gross Nameplate Rating of the Generating Facility is ten (10) kW or less and the Generating Facility is connected to an account receiving residential service from PG&E.

The insurance shall, by endorsement:

(a) Add PG&E as an additional insured;

(b) State that coverage provided is primary and is not in excess to or contributing with any insurance or self-insurance maintained by PG&E.

(c) Contain a severability of interest clause or cross-liability clause.

9.2 If Customer-Generator's Generating Facility is connected to an account receiving residential service from PG&E and the requirement of Section 9.1 prevents Customer-Generator from obtaining the insurance required in this Section, then upon Customer-Generator's written Notice to PG&E in accordance with Section 11.1, the requirements of Section 9.1 may be waived.

9.3 Customer-Generator may self-insure with approval from PG&E. Evidence of an acceptable plan to self-insure, at least thirty (30) calendar days' prior to operations shall be submitted. Customer-Generators such as state agencies that self-insure under this section are exempt from Section 10.1.

If Customer-Generator ceases to self-insure to the level required hereunder, or if Customer-Generator is unable to provide continuing evidence of Customer-Generator's ability to self-insure, Customer-Generator agrees to immediately obtain the coverage required under agreement.

9.4 All required certificates, endorsements or letters of self-insurance shall be issued and submitted via email or fax to the following:

Pacific Gas and Electric Company
c/o EXIGIS LLC
support@exigis.com
Fax: 646-755-3327

10. INDEMNITY FOR FAILURE TO COMPLY WITH INSURANCE PROVISIONS

10.1 If Customer-Generator fails to comply with the insurance provisions of this Agreement, Customer-Generator shall, at its own cost, defend, save harmless and indemnify PG&E, its directors, officers, employees, agents, assignees, and successors in interest from and against any and all loss, liability, damage, claim, cost, charge, demand, or expense of any kind or nature (including attorney's fees and other costs of litigation) resulting from the death or injury to any person or damage to any property, including the personnel and property of the utility, to the extent that the utility would have been protected had Customer-Generator complied with all such insurance provisions. The inclusion of this Section 10.1 is not intended to create any expressed or implied right in Customer-Generator to elect not to provide any such required insurance.

10.2 The provisions of this Section 10 shall not be construed to relieve any insurer of its obligations to pay any insurance claims in accordance with the provisions of any valid insurance policy.

11. NOTICES

11.1 Any written notice, demand, or request required or authorized in connection with this Agreement (Notice) shall be deemed properly given if delivered in person or sent by first class mail, postage prepaid, to the person specified below:

If to PG&E: Pacific Gas and Electric Company
Attention: Electric Generation Interconnection - Contract Management
245 Market Street
Mail Code N7L
San Francisco, California 94105-1702

If to Customer-Generator:

Customer-Generator Name: _____

Address: _____

City: _____

Phone: (____) _____

FAX: (____) _____

11.2 A Party may change its address for Notices at any time by providing the other Party notice of the change in accordance with Section 11.1.

11.3 The Parties may also designate operating representatives to conduct the daily communications, which may be necessary or convenient for the administration of this Agreement. Such designations, including names, addresses, and phone numbers may be communicated or revised by one Party's Notice to the other.

12. REVIEW OF RECORDS AND DATA

12.1 PG&E shall have the right to review and obtain copies of Customer-Generator's operations and maintenance records, logs, or other information such as Generating Facility availability, maintenance outages, circuit breaker operation requiring manual reset, relay targets and unusual events pertaining to Customer-Generator's Generating Facility or its interconnection to PG&E.

12.2 Customer-Generator authorizes to release to the California Energy Commission (CEC) information regarding Customer-Generator's facility, including customer name and Generating Facility location, size, and operational characteristics, as requested from time to time pursuant to the CEC's rules and regulations.

13. ASSIGNMENT

Customer-Generator shall not voluntarily assign its rights nor delegate its duties under this Agreement without PG&E's written consent. Any assignment or delegation Customer-Generator makes without PG&E's written consent shall not be valid. PG&E shall not unreasonably withhold its consent to Customer-Generator's assignment of this Agreement.

14. NON-WAIVER

None of the provisions of this Agreement shall be considered waived by a Party unless such waiver is given in writing. The failure of a Party to insist in any one or more instances upon strict performance of any of the provisions of this Agreement or to take advantage of any of its rights hereunder shall not be construed as a waiver of any such provisions or the relinquishment of any such rights for the future, but the same shall continue and remain in full force and effect.

15. GOVERNING LAW, JURISDICTION OF COMMISSION, INCLUSION OF PG&E's TARIFF SCHEDULES AND RULES

15.1 This Agreement shall be interpreted, governed, and construed under the laws of the State of California as if executed and to be performed wholly within the State of California without giving effect to choice of law provisions that might apply to the law of a different jurisdiction.

15.2 This Agreement shall, at all times, be subject to such changes or modifications by the Commission as it may from time to time direct in the exercise of its jurisdiction.

15.3 The interconnection and services provided under this Agreement shall at all times be subject to the terms and conditions set forth in the Tariff Schedules and Rules applicable to the electric service provided by PG&E, which Tariff Schedules and Rules are hereby incorporated into this Agreement by this reference.

15.4 Notwithstanding any other provisions of this Agreement, PG&E shall have the right to unilaterally file with the Commission, pursuant to the Commission's rules and regulations, an application for change in rates, charges, classification, service, tariff or rule or any agreement relating thereto.

16. AMENDMENT AND MODIFICATION

This Agreement can only be amended or modified by a writing signed by both Parties.

17. ENTIRE AGREEMENT

This Agreement, including any incorporated Tariff Schedules and Rules, contains the entire Agreement and understanding between the Parties, their agents, and employees as to the subject matter of this Agreement. Each party also represents that in entering into this Agreement, it has not relied on any promise, inducement, representation, warranty, agreement or other statement not set forth in this Agreement or in the incorporated Tariff Schedules and Rules.

18. SIGNATURES

IN WITNESS WHEREOF, the Parties hereto have caused this Agreement to be executed by their duly authorized representatives. This Agreement is effective as of the last date set forth below.

	PACIFIC GAS AND ELECTRIC COMPANY

DESCRIPTION OF GENERATING FACILITY AND SINGLE-LINE DIAGRAM

(Provided by Customer-Generator)

APPENDIX B (If Applicable)

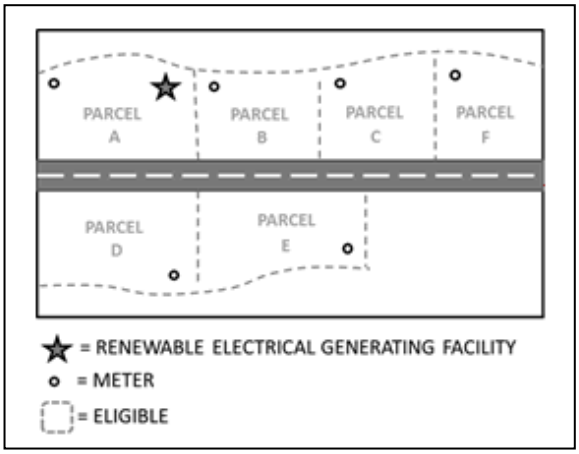
Any Rule 2 or Rule 21 Agreements for the Installation or Allocation of Special Facilities (Forms 79-255, 79-280, 79-702) or Agreements to Perform Any Tariff Related Work (62-4527) (Formed between the Parties)

Appendix C

NEM LOAD AGGREGATION APPENDIX

(If Applicable)

Customer-Generator Declaration Warranting NEM2 Aggregation Is Located On Same or Adjacent or Contiguous Property to Generator Parcel



In accordance with Schedule NEM2, I, Customer-Generator represent and warrant under penalty of perjury that:

1) The total annual output in kWh of the generator is less than or equal to 100% of the annual aggregated electrical load in kWh of the meters within the arrangement, including the load on the generating account itself (before being offset by the generator), and including any estimated future additional load; and

2) Each of the aggregated account meters associated with this NEM2 generator account are located either:

(i) on the property where the renewable electrical generation facility is located, or

(ii) are located within an unbroken chain of contiguous parcels that are all solely owned, leased or rented by the customer-generator. For purposes of Load Aggregation, parcels that are divided by a street, highway, or public thoroughfare are considered contiguous, provided they are within an unbroken chain of otherwise contiguous parcels that are all solely owned leased or rented by the customer-generator.

For example, assume there are five parcels (A, B, C, D, E, and F) that form a cluster of contiguous parcels and D and E are separated from A, B, C and F by a street, highway, or public thoroughfare. For the purposes of participating in Load Aggregation, all five parcels are considered contiguous, provided they are otherwise contiguous and all are solely owned, leased or rented by the customer-generator. Refer to the diagram at left (for illustrative purposes only.)

3) PG&E reserves the right to request a parcel map to confirm the property meets the requirements of 2) above; and

4) Customer-Generator agrees to notify PG&E if there is any change of status that makes any of the participating meters ineligible for meter aggregation to ensure that only eligible meters are participating; PG&E will require an updated Appendix and Declaration form; and

5) Upon request by PG&E, I agree to provide documentation that all aggregated meters meet the requirements of Rate Schedule NEM2 Special Condition 6 including but not limited to parcel maps and ownership records.

Pacific Gas and Electric Company®

GENERATING FACILITY INTERCONNECTION AGREEMENT 3rd PARTY NON-EXPORTING

This *Generating Facility Interconnection Agreement (3rd Party Non-Exporting)* (Agreement) is entered into by and between _____ a _____ (Producer), and Pacific Gas and Electric Company (PG&E), a California corporation. Producer and PG&E are sometimes also referred to in this Agreement jointly as "Parties" or individually as "Party." In consideration of the mutual promises and obligations stated in this Agreement and its attachments, the Parties agree as follows:

1. SCOPE, PURPOSE, AND RELATED AGREEMENT

1.1 This Agreement, in conjunction with the *Customer Generation Agreement (3rd Party Generator on Premises, Non-Exporting)* (Form 79-992) identified in Section 1.2 and attached as Appendix E, provides for Producer to interconnect and operate a Generating Facility in parallel with PG&E's Distribution System to serve the electrical loads at the location identified in Section 2.2. This Agreement does not provide for Producer to deliver electric power to PG&E's Distribution System, nor does this Agreement constitute an agreement by PG&E to provide retail electrical service to Producer. Such arrangements must be made separately between PG&E and Producer.

1.2 The Generating Facility shall be interconnected with PG&E's Distribution System consistent with, and pursuant to, the *Customer Generation Agreement (3rd Party Generator on Premises, Non-Exporting)* between PG&E and _____, (Customer) its successors or assigns dated _____, (*Customer Agreement*).

2. SUMMARY AND DESCRIPTION OF PRODUCER'S GENERATING FACILITY

2.1 A description of the Generating Facility, including a summary of its significant components and a single-line diagram showing the general arrangement of how Producer's Generating Facility and Customer's loads are Interconnected with PG&E's Distribution System, are attached to and made a part of this Agreement.

2.2 Name and address used by PG&E to locate the Customer's Electric Service Account(s) used to interconnect the Generating Facility with PG&E's Distribution System:

_____

_____

_____

† Information collected on this form is used in accordance with PG&E's Privacy Policy. The Privacy Policy is available at pge.com/privacy.

2.3 The Gross Nameplate Rating of the Generating Facility is _____ kW.

2.4 The Net Nameplate Rating of the Generating Facility is _____ kW.

2.5 The annual energy production of the Generating Facility is expected to be _____ kWh.

2.6 The Generating Facility's expected date of Initial Operation is _____. The expected date of Initial Operation shall be within two years of the date of this Agreement.

2.7 For the purpose of securing certain tariff charge exemptions available under the California Public Utilities Code (PU Code), Producer hereby declares that the Generating Facility:

(a) ☐ does / ☐ does not meet the requirements for Cogeneration as such term is used in Section 216.6 of the PU Code.

(b) ☐ does / ☐ does not meet the requirements for Distributed Energy Resource Generation as such term is used in Section 353.1 of the PU Code.

3. DOCUMENTS INCLUDED

This Agreement includes the following exhibits, which are specifically incorporated herein and made a part of this Agreement.

Appendix A - Description of Generating Facility and Single-Line Diagram *(Supplied by Producer).*

Appendix B - A Copy of *PG&E's Agreement for Installation of Allocation of Special Facilities for Parallel Operation of Nonutility-Owned Generation and/or Electrical Standby Service* (Form 79-280, *Special Facility Agreement*) (If applicable, and formed by the parties).

Appendix C - Producer's warranty that the Generating Facility meets the requirements for a Cogeneration facility pursuant to Section 216.6 of the Public Utilities Code *(when applicable).*

Appendix D - Producer's warranty that the Generating Facility meets the requirements for Distributed Energy Resources Generation as defined in Section 353.1 of the Public Utilities Code *(When applicable).*

Appendix E - *Customer Generation Agreement (3rd Party Generator on Premises, Non-Exporting)* (Form 79-992).

4. TERM AND TERMINATION

4.1 This Agreement shall become effective as of the last date entered in Section 16 of this Agreement. The Agreement shall continue in full force and effect until the earliest date that one of the following events occurs:

(a) The Parties agree in writing to terminate the Agreement.

(b) Unless otherwise agreed in writing by the Parties, at 12:01 A.M. on the 31st day following the date the *Customer Agreement* is terminated unless such *Customer Agreement* is assigned to another party or replaced by a subsequent agreement. The Parties shall cooperate in obtaining an assignment or replacement agreement.

(c) At 12:01 A.M. on the 61st day after Producer or PG&E provides written Notice pursuant to Section 9 of this Agreement to the other Party of Producer or PG&E's intent to terminate this Agreement.

4.2 Producer may elect to terminate this Agreement pursuant to the terms of Section 4.1(c) for any reason. PG&E may elect to terminate this Agreement pursuant to the terms of Section 4.1(c) for one or more of the following reasons:

(a) A change in applicable tariffs, as approved or directed by the Commission, or a change in any local, state or federal law, statute or regulation, either of which materially alters or otherwise affects PG&E's ability or obligation to perform PG&E's duties under this Agreement; or,

(b) Unless otherwise agreed in writing by the Parties, Producer fails to take all corrective actions specified in PG&E's Notice that Producer's Generating Facility is out of compliance with the terms of this Agreement within the time frame set forth in such Notice; or,

(c) Producer fails to interconnect and operate the Generating Facility per the terms of this Agreement prior to 120 days after the date set forth in Section 2.6 of this Agreement as the Generating Facility's expected date of Initial Operation; or,

(d) Producer abandons the Generating Facility. PG&E shall deem the Generating Facility to be abandoned if PG&E determines, in its sole opinion, the Generating Facility is non-operational and Producer does not provide a substantive response to PG&E's Notice of its intent to terminate this Agreement as a result of Producer's apparent abandonment of the Generating Facility affirming Producer's intent and ability to continue to operate the Generating Facility.

4.3 Notwithstanding any other provisions of this Agreement, PG&E shall have the right to unilaterally file an application to terminate this Agreement with the Commission pursuant to the Commission's rules and regulations.

4.4 Any agreements attached to and incorporated into this Agreement shall terminate concurrently with this Agreement unless the Parties have agreed otherwise in writing.

5. GENERATING FACILITY OPERATION

5.1 Producer is responsible for operating the Generating Facility in compliance with all of PG&E's tariffs, including but not limited to PG&E's Electric Rule 21, and any other regulations and laws governing the interconnection of the Generating Facility.

5.2 The electric power produced by Producer's Generating Facility shall be used solely to serve electrical loads connected to the electric service account that PG&E uses to interconnect Producer's Generating Facility. Producer shall not use the Generating Facility to serve electrical loads that will cause Producer to be considered an "electrical corporation" as such term is used in Section 218 of the PU Code.

5.3 Producer shall regulate the electric power output of Producer's Generating Facility so as to prevent the flow of electric energy from the Generating Facility to PG&E's electric system. Unless otherwise agreed upon in writing by the Parties, this Agreement does not provide for, nor otherwise require PG&E to receive, purchase, transmit, distribute, or store the electrical power produced by Producer's Generating Facility.

5.4 The Generating Facility shall be operated with all of Producer's Protective Functions in service whenever the Generating Facility is operated in parallel with PG&E's Distribution System. Any deviation from these requirements may occur only when the Parties have agreed to such deviations in writing.

5.5 Producer shall not operate the Generation Facility in parallel with PG&E's Distribution System unless the *Customer Agreement* is in effect. If the *Customer Agreement* identified in Section 1.2 is terminated, Producer agrees to cease operating the Generating Facility in parallel with PG&E's Distribution System.

6. INTERCONNECTION FACILITIES

6.1 Producer and/or PG&E, as appropriate, shall provide Interconnection Facilities that adequately protect PG&E's Distribution System, personnel, and other persons from damage or injury which may be caused by the operation of Producer's Generating Facility.

6.2 Producer shall be solely responsible for the costs, design, purchase, construction, operation, and maintenance of the Interconnection Facilities that Producer owns.

6.3 If the provisions of PG&E's Electric Rule 21, or any other tariff approved by the Commission, require PG&E to own and operate a portion of the Interconnection Facilities, Producer and PG&E shall promptly execute an agreement that establishes and allocates responsibility for the design, installation, operation, maintenance, and ownership of the Interconnection Facilities. This agreement shall be attached to and made a part of this Agreement as Appendix B.

7. LIMITATION OF LIABILITY

7.1 Each Party's liability to the other Party for any loss, cost, claim, injury, liability, or expense, including reasonable attorney's fees, relating to or arising from any act or omission in its performance of this agreement, shall be limited to the amount of direct damage actually incurred. In no event shall either Party be liable to the other Party for any indirect, special, consequential, or punitive damages of any kind whatsoever.

7.2 PG&E shall not be liable to Producer in any manner, whether in tort or contract or under any other theory, for loss or damages of any kind sustained by Producer resulting from termination of *the Customer Agreement* provided such termination is consistent with the terms of the *Customer Agreement.*

8. INSURANCE

8.1 In connection with Producer's performance of its duties and obligations under this Agreement, Producer shall maintain, during the term of this Agreement, general liability insurance with a combined single limit of not less than:

(a) Two million dollars ($2,000,000) for each occurrence if the Gross Nameplate Rating of Producer's Generating Facility is greater than one hundred (100) kW;

(b) One million dollars ($1,000,000) for each occurrence if the Gross Nameplate Rating of Producer's Generating Facility is greater than twenty (20) kW and less than or equal to one hundred (100) kW; and

(c) Five hundred thousand dollars ($500,000) for each occurrence if the Gross Nameplate Rating of Producer's Generating Facility is twenty (20) kW or less.

(d) Two hundred thousand dollars ($200,000) for each occurrence if the Gross Nameplate Rating of Producer's Generating Facility is ten (10) kW or less and Producer's Generating Facility is connected to an account receiving residential service from PG&E.

Such general liability insurance shall include coverage for "Premises-Operations, Owners and Contractors Protective, Products/Completed Operations Hazard, Explosion, Collapse, Underground, Contractual Liability,

and Broad Form Property Damage including Completed Operations."

8.2 The general liability insurance required in Section 8.1 shall, by endorsement to the policy or policies, (a) include PG&E as an additional insured; (b) contain a severability of interest clause or cross-liability clause; (c) provide that PG&E shall not by reason of its inclusion as an additional insured incur liability to the insurance carrier for payment of premium for such insurance; and (d) provide for thirty (30) calendar days' written notice to PG&E prior to cancellation, termination, alteration, or material change of such insurance.

8.3 If Producer's Generating Facility is connected to an account receiving residential service from PG&E and the requirement of Section 8.2(a) prevents Producer from obtaining the insurance required in Section 8.1, then upon Producer's written Notice to PG&E in accordance with Section 9.1, the requirements of Section 8.2(a) shall be waived.

8.4 Evidence of the insurance required in Section 8.2 shall state that coverage provided is primary and is not in excess to or contributing with any insurance or self-insurance maintained by PG&E.

8.5 Producer agrees to furnish the required certificates and endorsements to PG&E prior to Initial Operation. PG&E shall have the right to inspect or obtain a copy of the original policy or policies of insurance.

8.6 If Producer is self-insured with an established record of self-insurance, Producer may comply with the following in lieu of Sections 8.1 through 8.4:

(a) Producer shall provide to PG&E, at least thirty (30) calendar days prior to the date of Initial Operation, evidence of an acceptable plan to self-insure to a level of coverage equivalent to that required under Section 8.1.

(b) If Producer ceases to self-insure to the level required hereunder, or if Producer is unable to provide continuing evidence of Producer's ability to self-insure, Producer agrees to immediately obtain the coverage required under Section 8.1.

8.7 All insurance certificates, statements of self insurance, endorsements, cancellations, terminations, alterations, and material changes of such insurance shall be issued and submitted via email or fax to the following:

Pacific Gas and Electric Company
c/o EXIGIS LLC
support@exigis.com
Fax: 646-755-3327

9. NOTICES

9.1 Any written notice, demand, or request required or authorized in connection with this Agreement (Notice) shall be deemed properly given if delivered in person or sent by first class mail, postage prepaid, to the person specified below:

If to PG&E: [Contact information to be supplied]

If to Producer: [Contact information to be supplied]

9.2 A Party may change its address for Notices at any time by providing the other Party Notice of the change in accordance with Section 9.1.

9.3 The Parties may also designate operating representatives to conduct the daily communications, which may be necessary or convenient for the administration of this Agreement. Such designations, including names, addresses, and phone numbers may be communicated or revised by one Party's Notice to the other.

10. REVIEW OF RECORDS AND DATA

10.1 PG&E shall have the right to review and obtain copies of Producer's operations and maintenance records, logs, or other information such as, unit availability, maintenance outages, circuit breaker operation requiring manual reset, relay targets and unusual events pertaining to Producer's Generating Facility or its Interconnection with PG&E's Distribution System.

Producer authorizes PG&E to release to the California Energy Commission (CEC) and/or the California Public Utilities Commission (Commission) information regarding the Generating Facility, including the Producer's name and location, and the size, location and operational characteristics of the generating facility, as requested from time to time pursuant to the CEC's or Commission's rules and regulations.

11. ASSIGNMENT

Producer shall not voluntarily assign its rights nor delegate its duties under this Agreement without PG&E's written consent. Any assignment or delegation Producer makes without PG&E's written consent shall not be valid. PG&E shall not unreasonably withhold its consent to Producer's assignment of this Agreement.

12. NON-WAIVER

None of the provisions of this Agreement shall be considered waived by a Party unless such waiver is given in writing. The failure of a Party to insist in any one or more instances upon strict performance of any of the provisions of this Agreement or to take advantage of any of its rights hereunder shall not be construed as a waiver of any such provisions or the relinquishment of any such rights for the future, but the same shall continue and remain in full force and effect.

13. GOVERNING LAW, JURISDICTION OF COMMISSION, INCLUSION OF PG&E's TARIFF SCHEDULES, DEFINED TERMS

13.1 This Agreement shall be interpreted, governed, and construed under the laws of the State of California as if executed and to be performed wholly within the State of California without giving effect to choice of law provisions that might apply to the law of a different jurisdiction.

13.2 This Agreement shall, at all times, be subject to such changes or modifications by the Commission as it may from time to time direct in the exercise of its jurisdiction.

13.3 The Interconnection and services provided under this Agreement shall at all times be subject to the terms and conditions set forth in the tariffs applicable to the electric service provided by PG&E. Copies of such tariffs are available at www.PGE.com or by request to PG&E and are incorporated into this Agreement by this reference.

13.4 Notwithstanding any other provisions of this Agreement, PG&E shall have the right to unilaterally file with the Commission, pursuant to the Commission's rules and regulations, an application for change in tariffs, rates, charges, classification, service, or any agreement relating thereto.

13.5 When initially capitalized, whether in the singular or in the plural, the terms used herein shall have the meanings assigned to them either in this Agreement

or in PG&E's Rule 1 or Electric Rule 21, Section C. If any term is defined in both Rule 1 and Electric Rule 21, the definition in Electric Rule 21 shall prevail.

14. AMENDMENTS AND MODIFICATION

This Agreement can only be amended or modified by a written agreement signed by both Parties. PG&E shall determine in its sole discretion whether prior commission approval is required for such amendments or modifications.

15. ENTIRE AGREEMENT

This Agreement and the *Customer Agreement* referenced in Section 1.2, including any incorporated tariffs, contains the entire agreement and understanding between the Parties, their agents, and employees as to the subject matter of this Agreement. Each party also represents that in entering into this Agreement, it has not relied on any promise, inducement, representation, warranty, agreement or other statement not set forth in this Agreement, the *Customer Agreement* or in the incorporated tariffs.

16. SIGNATURES

IN WITNESS WHEREOF, the Parties hereto have caused two originals of this Agreement to be executed by their duly authorized representatives. This Agreement is effective as of the last date set forth below.

APPENDIX A

DESCRIPTION OF GENERATING FACILITY

AND SINGLE-LINE DIAGRAM

(Supplied by Producer)

APPENDIX B

A Copy of PG&E's:

Agreement for Installation or Allocation of Special Facilities for Parallel Operation of Nonutility-Owned Generation and/or Electrical Standby Service

Form 79-280, *Special Facility Agreement*

(if applicable, and formed by the Parties)

APPENDIX C

(When applicable)

PRODUCER'S WARRANTY THAT THE GENERATING FACILITY IS A "COGENERATION FACILITY" PURSUANT TO SECTION 216.6 OF THE CALIFORNIA PUBLIC UTILITIES CODE

For the purpose of securing the Competition Transition Charge exemption available under Section 372 of the California Public Utilities Code (PU Code), Producer hereby declares that the Generating Facility meets the requirements for Cogeneration as such term is used in Section 216.6 of the PU Code (Cogeneration Requirements).

Producer warrants that, beginning on the date of Initial Operation and continuing throughout the term of this Agreement, the Generating Facility shall continue to meet the Cogeneration Requirements. If Producer becomes aware that its Generating Facility has ceased to meet the Cogeneration Requirements, Producer shall promptly provide PG&E with Notice of such change pursuant to Section 9.1 of the Agreement. If at any time during the term of this Agreement PG&E determines in its sole discretion that Producer's Generating Facility may no longer meet the Cogeneration Requirements, PG&E may require Producer to provide evidence that the Generating Facility continues to meet the Cogeneration Requirements within 15 business days of PG&E's request for such evidence. Additionally, PG&E may periodically (typically, once per year) inspect Producer's Generating Facility and/or require documentation from Producer to monitor the Generating Facility's compliance with the Cogeneration Requirements. If PG&E determines in its sole judgment that Producer either failed to provide evidence in a timely manner or that it provided insufficient evidence that its Generating Facility continues to meet the Cogeneration Requirements, then the Cogeneration status of the Generating Facility shall be deemed ineffective until such time as Producer again demonstrates to PG&E's reasonable satisfaction that the Generating Facility meets the requirements for a Cogeneration facility (the Cogeneration Status Change).

PG&E shall revise its records and the administration of this Agreement to reflect the Cogeneration Status Change and provide Notice to Producer of the Cogeneration Status Change pursuant to Section 9.1 of this Agreement. Such Notice shall specify the effective date of the Cogeneration Status Change. This date shall be the first day of the calendar year for which PG&E determines in its sole discretion that the Generating Facility first ceased to meet the Cogeneration Requirements. PG&E shall invoice the Producer's electric Service Account through which the Generating Facility is Interconnected with PG&E's Distribution System for Competition Transition Charges (CTCs) that were not previously billed during the period between the effective date of the Status Change and the date of the Notice in reliance upon Producer's representations that the Generating Facility complied with the Cogeneration Requirements and therefore was eligible for the exemption from CTCs available under Section 372 of the PU Code.

Any amounts to be paid or refunded by Producer, as may be invoiced by PG&E pursuant to the terms of this warranty, shall be paid to PG&E within 30 days of Producer's receipt of such invoice.

APPENDIX D

(When applicable)

PRODUCER'S WARRANTY THAT THE GENERATING FACILITY IS A "DISTRIBUTED ENERGY RESOURCES GENERATION" FACILITY PURSUANT TO SECTION 353.1 OF THE CALIFORNIA PUBLIC UTILITIES CODE

For the purpose of securing the tariff charge exemption available under Section 353.3 of the California Public Utilities Code (PU Code), Producer hereby declares that the Generating Facility meets the requirements for Distributed Energy Resources Generation as such term is used in Section 353.1 of the PU Code (DERG Requirements).

Producer warrants that, beginning on the date of Initial Operation and continuing throughout the term of this Agreement, its Generating Facility shall continue to meet the DERG Requirements. If Producer becomes aware that the Generating Facility has ceased to meet the DERG Requirements, Producer shall promptly provide PG&E with Notice of such change pursuant to Section 9.1 of the Agreement. If at any time during the term of this Agreement PG&E determines in its sole discretion that Producer's Generating Facility may no longer meet the DERG Requirements, PG&E may require Producer to provide evidence that the Generating Facility continues to meet the DERG Requirements within 15 business days of PG&E's request for such evidence. Additionally, PG&E may periodically (typically, once per year) inspect Producer's Generating Facility and/or require documentation from Producer to monitor the Generating Facility's compliance with the DERG Requirements. If PG&E determines in its sole judgment that Producer either failed to provide evidence in a timely manner or that it provided insufficient evidence that its Generating Facility continues to meet the DERG Requirements, then the Distributed Energy Resources Generation status of the Generating Facility shall be deemed ineffective until such time as Producer again demonstrates to PG&E's reasonable satisfaction that the Generating Facility meets the requirements for a Distributed Energy Resources Generation facility (the DERG Status Change).

PG&E shall revise its records and the administration of this Agreement to reflect the DERG Status Change and provide Notice to Producer of the DERG Status Change pursuant to Section 9.1 of this Agreement. Such Notice shall specify the effective date of the DERG Status Change. This date shall be the first day of the calendar year for which PG&E determines in its sole discretion that the Generating Facility first ceased to meet the DERG Requirements. PG&E shall invoice the Producer electric Service Account through which the Generating Facility is Interconnected with PG&E's Distribution System for any tariff charges that were not previously billed during the period between the effective date of the DERG Status Change and the date of the Notice in reliance upon Producer's representations that the Generating Facility complied with the DERG Requirements and therefore was eligible for the exemption from tariff charges available under Section 353.3 of the PU Code.

Any amounts to be paid or refunded by Producer, as may be invoiced by PG&E pursuant to the terms of this warranty, shall be paid to PG&E within 30 days of Producer's receipt of such invoice.

APPENDIX E

CUSTOMER GENERATION AGREEMENT
(3RD PARTY GENERATOR ON PREMISES)
(NON-EXPORTING)

Electric Sample Form No. 79-992 Sheet 1
Customer Generation Agreement
(Third Party Generator on Premises Non-Exporting)

Please Refer to Attached Sample Form

Pacific Gas and Electric Company®

CUSTOMER GENERATION AGREEMENT (3rd PARTY GENERATOR ON PREMISES, NON-EXPORTING)

This *Customer Generation Agreement (3rd Party Generator on Premises, Non-Exporting)* (Agreement) is entered into by and between _____ _____ a _____ (Customer), and Pacific Gas and Electric Company (PG&E), a California Corporation. Customer and PG&E are sometimes also referred to in this Agreement jointly as "Parties" or individually as "Party." In consideration of the mutual promises and obligations stated in this Agreement and its attachments, the Parties agree as follows:

1. SCOPE, PURPOSE, AND RELATED AGREEMENTS

This Agreement, in conjunction with the *Generating Facility Interconnection Agreement (3rd Party Non-Exporting* (Form 79-988), identified in Section 2.2 and attached as Appendix A, allows the Producer (as identified in Section 2.2) to utilize Customer's electrical facilities to interconnect and operate the Generating Facility in parallel with PG&E's Distribution System. The purpose of the Generating Facility is to serve the Customer's electrical loads at the location identified in Section 2.1.

2. SUMMARY AND DESCRIPTION OF THE PARTIES AND LOCATION OF GENERATING FACILITY

2.1 The name and address used by PG&E to locate the Customer or electric service account where the Generating Facility interconnects with PG&E's Distribution System is:

_____

_____

_____

2.2 The Generating Facility shall be Interconnected with PG&E's Distribution System pursuant to the *Generating Facility Interconnection Agreement (3rd Party Non-Exporting)* between PG&E and _____ its successors or assigns (Producer) dated _____ (Producer Agreement).

† Information collected on this form is used in accordance with PG&E's Privacy Policy. The Privacy Policy is available at pge.com/privacy.

2.3 Producer's contact information:

_____

_____

_____

3. CUSTOMER ACKNOWLEDGEMENTS AND OBLIGATIONS

3.1 Customer acknowledges that it has authorized the Generating Facility to be installed and operated by Producer in accordance with PG&E's Electric Rule 21 on or adjacent to Customer's premises. Such Generating Facility shall be used to serve all or a portion of Customer's electrical loads associated with the electric service provided by PG&E at the location identified in Section 2.1, above, and any other purpose permitted under the *Producer Agreement*. Customer shall be solely responsible for the terms of any agreement between it and Producer.

3.2 Customer shall be solely responsible for any charges incurred under PG&E's electric service tariffs for the services provided to Customer by PG&E. Customer acknowledges that it is the sole end-use consumer of such tariffed services. This Agreement does not constitute an agreement by PG&E to provide any tariffed service to Producer.

3.3 Customer acknowledges the Generating Facility shall be operated in compliance with all PG&E tariffs, including but not limited to PG&E's Electric Rule 21, and any other regulations and laws governing the interconnection of the Generating Facility. Customer further acknowledges that it has been made aware of the charges and conditions related to the operation of the Generating Facility including, but not limited to Standby Tariff, Preliminary Statement "BB" Non-Bypassable Charges Tariff, and Electric Rule 2, and that the performance or lack of performance of the Generating Facility may affect the rates and charges billed by PG&E for the electric power delivered to Customer. Copies of such tariffs are available at www.PGE.com or by request to PG&E.

3.4 Any amounts to be paid, or refunded to, PG&E for the services received by Customer as a result of the Producer failing to operate the Generating Facility in accordance with the terms of the representations and warranties made under the *Producer Agreement* shall be paid to PG&E in accordance with PG&E's electric tariffs.

3.5 Customer shall make the Generating Facility reasonably accessible to PG&E's personnel, contractors or agents to perform PG&E's duties under Electric Rule 21.

3.6 Smart Inverters - For Customer applications received on or after September 9, 2017, the Customer certifies that their inverter-based Generating Facilities fully comply with Section Hh of Rule 21, including configuration of protective settings **and default settings**, in accordance with the specifications therein.

Distribution Provider may require a field verification of the Customer's inverter. Customer further agrees to cooperate fully with any such request and make their inverter available to the Distribution Provider for such verification. Customer understands that in the event the inverter is not set in accordance with Section Hh of Rule 21, Customer will need to cease operation of generating facility until verification is confirmed by Distribution Provider.

(Solar inverter models and firmware versions that comply with Rule 21 Section Hh can be found at: http://www.gosolarcalifornia.org/equipment/inverters.php.)

Verification of compliance with such requirements shall be provided by the Customer upon request by PG&E in accordance with PG&E's Electric Rule 21.

An "existing inverter" is defined as an inverter that is a component of an existing Generating Facility that meets one or more of the following conditions:

(a) it is already approved by PG&E for interconnection prior to September 9, 2017,

(b) the Customer has submitted the interconnection application prior to September 9, 2017,

(c) the Customer provides evidence of having applied for an electrical permit for the Generating Facility installation that is dated prior to September 9, 2017 and submitted a complete interconnection application[1] no later than March 31, 2018, or

[1] A complete application consists all of the following without deficiencies:
1. A completed Interconnection Application including all supporting documents and

(d) the Customer provides evidence of a final inspection clearance from the governmental authority having jurisdiction over the Generating Facility prior to September 9, 2017.

All "existing inverters" are not required to be Smart Inverters and are only subject to Section H of Rule 21. Customer replacing an "existing inverter" certifies it is being replaced with either:

(i) inverter equipment that complies with Section Hh of Rule 21, (encouraged); or

(ii) a conventional inverter that is of the same size and equivalent ability to that of the inverter being replaced, as allowed in Rule 21 Section H.3.d.ii.

4. TERMS AND TERMINATION

4.1 This Agreement shall become effective as of the last date entered in Section 13 below. The Agreement shall continue in full force and effect until the earliest date that one of the following events occurs:

(a) The Parties agree in writing to terminate the Agreement.

(b) Unless otherwise agreed in writing by the Parties, at 12:01 A.M. on the day following the date the Customer's electric service account through which the Generating Facility is interconnected to PG&E's Distribution System is closed or terminated.

(c) Unless otherwise agreed in writing by the Parties, at 12:01 A.M. on the 31st day following the date the Producer Agreement is terminated, unless the responsibility for such Producer Agreement is assigned to or replaced by a subsequent Producer. The Parties shall cooperate in obtaining an assignment or replacement agreement.

required payments,
2. A completed signed Interconnection Agreement,
3. Evidence of the Customer final inspection clearance from the governmental authority having jurisdiction over the generating system.

(d) At 12:01 A.M. on the 61st day after Customer or PG&E provides written Notice pursuant to Section 6 below to the other Party of the Customer or PG&E's intent to terminate this Agreement.

4.2 Customer may elect to terminate this Agreement pursuant to the terms of Section 4.1(d) for any reason. PG&E may elect to terminate this Agreement pursuant to the terms of Section 4.1(d) for one or more of the following reasons:

(a) A change in PG&E's applicable tariffs, as approved or directed by the Commission, or a change in any local, state or federal law, statute or regulation, either of which materially alters or otherwise affects PG&E's ability or obligation to perform PG&E's duties under this Agreement; or,

(b) Unless otherwise agreed in writing by the Parties, Customer fails to take all corrective actions specified in PG&E's Notice provided in accordance with Section 6 that Customer is out of compliance with the terms of this Agreement within the time frame set forth in such Notice.

5. LIMITATION OF LIABILITY

5.1 Each Party's liability to the other Party for any loss, cost, claim, injury, liability, or expense, including reasonable attorney's fees, relating to or arising from any act or omission in its performance of this Agreement shall be limited to the amount of direct damage actually incurred. In no event shall either Party be liable to the other Party for any indirect, special, consequential, or punitive damages of any kind whatsoever.

5.2 PG&E shall not be liable to Customer in any manner, whether in tort or contract or under any other theory, for loss or damages of any kind sustained by Customer resulting from termination of the *Producer Agreement* between Producer and PG&E, provided such termination is consistent with the terms of the *Producer Agreement.*

6. NOTICES

6.1 Any written notice, demand, or request required or authorized in connection with this Agreement ("Notice") shall be deemed properly

given if delivered in person or sent by first class mail, postage prepaid, to the person specified below:

If to PG&E: [Contact information to be supplied]

If to Customer: [Contact information to be supplied]

6.2 A Party may change its address for Notices at any time by providing the other Party Notice of the change in accordance with Section 6.1.

6.3 The Parties may also designate operating representatives to conduct the daily communications, which may be necessary or convenient for the administration of this Agreement. Such designations, including names, addresses, and phone numbers may be communicated or revised by one Party's Notice to the other.

7. RELEASE OF DATA

Customer authorizes PG&E to release to the California Energy Commission (CEC) and/or the California Public Utilities Commission (Commission) information regarding the Generating Facility, including Customer's name and location, and the size, location and operational characteristics of the Generating Facility, as may be requested from time to time pursuant to the CEC's or Commission's rules and regulations.

Customer shall not voluntarily assign its rights nor delegate its duties under this Agreement without PG&E's written consent. Any assignment or delegation Customer makes without PG&E's written consent shall not be valid. PG&E shall not unreasonably withhold its consent to Customer's assignment of this Agreement.

9. NON-WAIVER

None of the provisions of this Agreement shall be considered waived by a Party unless such waiver is given in writing. The failure of a Party to insist in any one or more instances upon strict performance of any of the provisions of this Agreement or to take advantage of any of its rights hereunder shall not be construed as a waiver of any such provisions or the relinquishment of any such rights for the future, but the same shall continue and remain in full force and effect.

10. GOVERNING LAW, JURISDICTION OF COMMISSION, INCLUSION OF PG&E's TARIFFS, DEFINED TERMS

10.1 This Agreement shall be interpreted, governed, and construed under the laws of the State of California as if executed and to be performed wholly within the State of California without giving effect to choice of law provisions that might apply to the law of a different jurisdiction.

10.2 This Agreement shall, at all times, be subject to such changes or modifications by the Commission as it may from time to time direct in the exercise of its jurisdiction.

10.3 The interconnection and services provided under this Agreement shall at all times be subject to the terms and conditions set forth in the tariffs applicable to the electric service provided by PG&E. Copies of such tariffs are available at www.PGE.com or by request to PG&E and are incorporated into this Agreement by this reference.

10.4 Notwithstanding any other provisions of this Agreement, PG&E shall have the right to unilaterally file with the Commission, pursuant to the Commission's rules and regulations, an application for change in tariffs, rates, charges, classification, service, or any agreement relating thereto.

10.5 When initially capitalized, whether in the singular or in the plural, the terms used herein shall have the meanings assigned to them either in this Agreement or in PG&E's Rule 1 or Electric Rule 21 Section C. If any term is defined in both Rule 1 and Electric Rule 21, the definition in Electric Rule 21 shall prevail.

11. AMENDMENTS AND MODIFICATION

This Agreement can only be amended or modified by a written agreement signed by both Parties. PG&E shall determine in its sole discretion whether prior commission approval is required for such amendments or modifications.

12. ENTIRE AGREEMENT

This Agreement, and the *Producer Agreement*, including any incorporated tariffs, contain the entire agreement and understanding between the Parties, their agents, and employees as to the subject matter of this Agreement. Each party also represents that in entering into this Agreement, it has not relied on any promise, inducement, representation, warranty, agreement or other statement not set forth in this Agreement, the *Producer Agreement*, or in the incorporated tariffs.

13. SIGNATURES

IN WITNESS WHEREOF, the Parties hereto have caused two originals of this Agreement to be executed by their duly authorized representatives. This Agreement is effective as of the last date set forth below.

AGREEMENT FOR CUSTOMERS TAKING SERVICE ON SCHEDULE E-31

This Agreement for Customers Taking Service on Schedule E-31 (hereinafter "Agreement") is made between _____ ("Customer" or "the Customer"), a(n) _____Corporation and PACIFIC GAS AND ELECTRIC COMPANY ("PG&E"), a California corporation. PG&E and the Customer will be referred to collectively herein as the "Parties" or individually as "Party." Customer is either: (a) an existing PG&E customer who, because of Schedule E-31, is declining an offer of retail electric service from a competing irrigation district ("Competitor") through the use of Competitor's transmission and/or distribution facilities and thus is choosing not to bypass PG&E's distribution system for retail delivery of electricity to the Customer's premises; or (b) a potential PG&E customer who is currently taking, or has the option to take, retail distribution service from Competitor but, because of Schedule E-31, has decided to take retail distribution service from PG&E. Customer's premises are located at _____
("Premises").

This Agreement provides for a discount to be applied to Customer's otherwise-applicable PG&E rate schedule, to establish an average electric rate (net of commodity costs) competitive with the rate the Customer currently pays or would pay for obtaining electricity through [ne Competitor's distribution facilities ("Discount Percentage"). This discount is determined using the price calculations described in Section 1 below and is intended to respond to the potential for bypass of PG&E's distribution system by making PG&E's rates competitive with the rates offered by Competitor.

The Parties agree to the following terms and conditions:

AGREEMENT

1. **DISCOUNTED RATE**: The Customer's Discounted Rate under this Agreement will be calculated as follows:

    a. **PG&E Average Non-Commodity Rate**. The PG&E Average Non-Commodity Rate is me projected annual PG&E revenue from the Customer (excluding commodity cost revenue and taxes and surcharges) divided by the Customer's projected annual usage in kilowatt-hours. The projected annual PG&E revenue is calculated by applying the non-commodity rates in the Customer's otherwise-applicable schedule to its historical billing determinants over the preceding twelve months. Customer's historical billing determinants will be adjusted for projected load change.

    b. **Competitor's Average Non-Commodity Rate**. The Competitor's Average Non-Commodity Rate is calculated using the identical billing determinants in Section 1.a., above. The Competitor's tariff rates (or other documented non-tariff rate offer) are applied to billing determinants adjusted as appropriate to account for differences in Competitor's billing determinant definitions (e.g. seasons, time-of-use periods) to calculate total bundled annual revenue (excluding any applicable taxes and surcharges). An estimate of Customer's annual commodity cost is then subtracted from this amount, and the result is then divided by the Customer's projected total annual usage to obtain the Competitor's Average Non-Commodity Rate. PG&E will estimate the Customer's annual commodity cost based upon the generation rate component in PG&E's owe respective tariff as a proxy for what the Competitor would pay for its generation. After April 1. 2003, the generation rate in PG&E's rate schedule will be reduced by the energy surcharges provided in Schedule E-EPS to determine the generation portion of the rates.

The Competitor's Average Non-Commodity Rate will reflect all applicable out-of-pocket competitive transition and other non-bypassable charges that Customer would be obligated to and would itself pay PG&E upon departure, or in the case of a Customer currently taking service from the Competitor, is already paying to PG&E and/or would pay the competitor upon departure.

In situations where PG&E deems that the Competitor's tariff rates do not effectively represent the true electric costs that the Customer will encounter at its site due to receipt by the Customer of a written non-tariff rate offer from the Competitor, the non-tariff rate offer may be used to make this calculation.

c. **Competitive Discount**. The Competitive Discount is calculated as the difference between the PG&E Average Non-Commodity Rate and the Competitor's Average Non-Commodity Rate. PG&E has the discretion to offer a larger discount (resulting in a lower price) if, in PG&E's business judgment, it is necessary to do so to retain or attract the Customer. However, PG&E may not discount the energy surcharges adopted by the Commission in D.01-01-018 and D.01-03-082 (as implemented in D.01-05-064).

d. **PG&E Average Non-Commodity Rate (Net of Non-Bypassable Charges)**. PG&E's Average Non-Commodity Rate (Net of Non-Bypassable Charges) is calculated by applying the functionally unbundled non-commodity rate components (except for the non-bypassable charges) in the Customer's otherwise-applicable rate schedule to the billing determinants in Section 1.a above, to calculate annual non-commodity revenue (net of non-bypassable charge revenue), then dividing by the Customer's annual usage.

e. **Allowable Discount**. The Allowable Discount is calculated by reducing the Competitive Discount, if necessary, to ensure that the resulting discounted rate (i.e., the PG&E Average Non-Commodity Rate minus the Allowable Discount) can be no lower than the Marginal Transmission and Distribution Cost. If the Customer is located in the area described in P.U. Code Section 9610(b) (i.e., the 4-city area which PG&E proposed to sell to Modesto Irrigation District in 1997), then the resulting discounted rate can be no lower than 120 percent of the Marginal Transmission and Distribution Cost. Marginal Costs are defined in Section 7 of this Agreement.

f. **Rate Discount Percentage**. The Rate Discount Percentage is the Allowable Discount expressed as a percentage of PG&E's Average Non-Commodity Rate (Net of Non-Bypassable Charges)

g. **Discounted Rate**. The Discounted Rate is calculated by applying the Rate Discount Percentage to all non-commodity rate components (excluding non-bypassable charges). These discounted rate components, along with the other non-discounted billing components found in the Customer's otherwise-applicable rate schedule, shall be combined to establish the Customer's Schedule E-31 Rate.

The Discounted Rate will be subject to annual review and possible future modifications to ensure that the constraint described in Section 1.d above, continues to be met during the term of the Agreement.

Eligibility for Schedule E-31 does not depend in any way upon whether or not the customer takes bundled service from PG&E or purchases its energy from another supplier, and customers taking service under Schedule E-31 may switch their energy supplier as allowed under PG&E's Rule 22 and applicable tariffs Since the discount calculation described in this section does not involve commodity/costs the amount of the Schedule E-31 discount

is the same regardless of whether the Customer takes bundled service from PG&E or purchases its energy from another supplier.

The Rate Discount Percentage is shown in Exhibit A to this Agreement. Customer's otherwise-applicable rate schedule is _____ (include voltage level _____.).

2. INFORMATIONAL REQUIREMENTS

To qualify for service under this Agreement, Customer must first provide PG&E with the following information and demonstrate, to PG&E's satisfaction, the credibility of the same as it applies to the Premises:

- Written rate offer from Competitor or Competitor's tariff (in the case of a Customer already taking service from Competitor);
- Any other Customer cost or operational information that PG&E deems pertinent to the analysis.

Customer will sign under penalty of perjury, have notarized, and deliver ta PG&E an affidavit attesting to the fact that the Customer has received a bona fide offer from an irrigation district at rates less than PG&E's tariffed rates (see Exhibit B). PG&E shall evaluate the information provided by Customer and any other available information and determine in its sole discretion whether Customer qualifies far this Agreement.

3. REQUIREMENT OF DELIVERY OF ELECTRICITY THROUGH PG&E'S SYSTEM

Customer shall use PG&E-delivered electricity for their total electrical load requirement throughout the term of this Agreement. Customer shall not use any electricity that is not delivered By PG&E unless the Customer is:

- utilizing emergency generation in the event of an outage;
- testing emergency generation facilities (not to exceed 10 hours per month); or
- given prior written permission by PG&E or similar operational events

If Customer utilizes any electricity not delivered by PG&E other than as provided above, PG&E may cancel this Agreement as specified in Section 9 ("Cancellation and Termination").

The Customer may choose to purchase energy from either PG&E in a bundled transaction or from another supplier, with the power delivered over PG&E lines via direct access arrangement.

GENERAL TERMS AND CONDITIONS

4. COMMENCEMENT DATE

The rate discount shall take effect no earlier than the date on which, in PG&E's judgment, the customer would have begun taking service from the Competitor ("Commencement Date"), or, in the case of a new Customer, the date the Customer begins taking PG&E distribution service. The Commencement Date for this Agreement is The Customer will be billed at the Discounted Rate on the Customer's first regular scheduled meter read Dale after the "Commencement Date."

This Agreement must be fully executed prior to the Customer receiving the Discounted Rate.

5. TERM

This Agreement shall expire or _____, 20____.

6. COMMISSION JURISDICTION

This Agreement shall be subject to all of PG&E's tariffs on file with, and authorized by, the California Public Utilities Commission (Commission) and shall at all times be subject to such changes or modifications as the Commission may direct from time to time in the exercise of its jurisdiction. Such action by the CPUC may be grounds for cancellation of this Agreement by either Party.

7. FLOOR PRICE

Over the term of this Agreement, the sum of the non-commodity charges collected by PG&E from the Customer, exclusive of any additional applicable taxes or surcharges and expressed in units of dollars per kilowatt-hour, shall net fall below the Floor Price defined as PG&E's total, distribution planning area-specific, marginal transmission and distribution cost, expressed in units of dollars per kilowatt-hour (or, if the Customer is located in the area described in P.U. Code Section 9610(b), 120 percent thereof. The marginal costs will be determined using the appropriate CPUC-approved methodologies for marginal costing purposes in effect at the time.

8. ANNUAL REVIEW

Once each calendar year, odor to March 31 PG&E shall compute me total Schedule E-31 revenue it has collected from the Customer during the preceding calendar year to ensure that PG&E has collected, at a minimum the annual revenue (or adjusted portion thereof, if toe customer was not taking service on Schedule E-31 for the entire calendar year) associated with the Floor Price, The Parties agree that if the revenues collected during the preceding calendar year fall below the amount associated with the Floor Price Customer shall pay PG&E a lump sum equal to that shortfall amount. In no case however, shall the revenues paid exceed what the customer would pay on its otherwise-applicable schedule PG&E shall notify customer of any lump sum payment obligation as soon as possible according to Section 11 below, after it has completed its annual review. This payment; will be due and payable in full, without interest thirty (30) days after PG&E has notified the Customer in writing of its payment obligation.

If a shortfall occurs, and after all shortfall payments described above have been made by Customer, the Customer may request that PG&E simply bill the Customer at a rate equal to the Floor Price. PG&E will continue to do so until such time as the Customer's Discounted Rate exceeds the Floor Price at which time the Customer will once again be billed at the Discounted Rate established in this Agreement. This provision is intended to eliminate the potential for any future lump sum shortfall payments by the Customer.

9. CANCELLATION AND TERMINATION

The Customer may terminate this Agreement at any time prior to the end of its term by giving PG&E a minimum of thirty (30) days written notice of such termination Upon such termination Customer shall be required to pay PG&E a liquidated damages payment as specified in Section 10. Notwithstanding the foregoing, Customer shall not be liable for liquidated damages if it terminates this Agreement due to a permanent plant or business closure at the Premises

PG&E may cancel this Agreement upon thirty (30) days written notice to Customer if Customer uses electricity not delivered by PG&E to supply toe electrical load at the Premises for a total of 1,080 hours during the term of this Agreement. In the event of the termination of this Agreement

pursuant to this paragraph, Customer shall be liable to PG&E for liquidated damages in an amount calculated under Section 10.

Either Party may cancel this Agreement upon thirty (30) days written notice in the event any regulatory body or court of competent jurisdiction finds that a provision of this Agreement, or a portion thereof, is unenforceable or invalid and the canceling Party determines, in good faith, that the remaining provisions of this Agreement have been rendered unenforceable or disadvantageous; provided the written notice is made within 60 days of the date of the regulatory or court decision.

10. LIQUIDATED DAMAGES

PG&E's electric business is based upon furnishing services to its customers under its standard tariffs authorized by the CPUC. This Agreement provides a special rate and service level to Customer that is outside of the bounds of these standard tariffs. It will be extremely difficult for the Parties to identify the amounts of increased or additional costs attributable to Customer's termination of this Agreement. The liquidated damages payment is required to ensure that neither PG&E nor its ratepayers are financially or otherwise damaged if the Customer chooses to prematurely terminate this Agreement. Parties agree the liquidated damages specified herein are a reasonable approximation of damages which PG&E and its ratepayers may incur as a result of such termination, and that the damage amount does not represent a penalty.

The Customer shall not be liable for liquidated damages to the extent termination, automatic or otherwise, is due to permanent plant or business closure at the Premise.

Customer's liquidated damages payment, if applicable, will be due to PG&E within ninety (90) days of the date this Agreement is terminated. As of the date of termination, the liquidated damage payment amount shall be calculated as follows:

For termination within 30 months of the Commencement Date (i.e., one-half of the rate discount period):

The liquidated damages payment shall equal the net present value amount of the discount provided by PG&E to the Customer under this Agreement until and on the date of its termination.

For termination later than 30 months after the Commencement Date:

The liquidated damages payment shall equal the net present value amount of the discount provided by PG&E to the Customer under this Agreement, until and on the date of its termination, less that amount multiplied by the ratio of: (a) the number of months between the Commencement Date and the termination date minus 30 months: to (b) 30 months. This formula is mathematically expressed as follows:

Damages = Discount - (Discount x Ratio),

where Ratio = (Commencement Date - Termination Date - 30) / 30

11. NOTICE

Any notice either PG&E or Customer may wish to give to the other must be in writing. Such notice must be either hand delivered, or sent by U.S. certified or registered mail postage prepaid, to the person designated to receive notice for the other Party, or to such other address as either may designate by written notice. Notices delivered by hand shall be deemed effective when delivered. Notices delivered by mail shall be deemed effective when received, as acknowledged by the receipt of the certified or registered mailing,

To: (Customer) _____
_____
_____
_____

PG&E: Pacific Gas and Electric Company
Tariffs and Compliance
Mail Code H28H
P.O. Box 777000
San Francisco, CA 94177

12. SERVICE RELIABILITY

PG&E's standard for reliability of service for Customer shall be as dictated in PG&E's Electric Rule 14 or its successor, a copy of which is attached to this Agreement and incorporated by reference herein.

13. ASSIGNMENT

Customer may not assign this Agreement to a third party without the prior written permission of an authorized representative of PG&E. Any assignment is subject to any applicable CPUC authorization or regulation except as waived by the CPUC.

14. SEVERABILIT

In the event that any of the provisions, or portions thereof, of this Agreement are held to be unenforceable or invalid by any court of competent jurisdiction, the validity and enforcement of the remaining provisions or portions thereof shall not be affected thereby; provided, however, that should either Party determine, in good faith, that such unenforceability or invalidity renders the remaining provisions of this Agreement economically infeasible or disadvantageous, such Party may terminate this Agreement upon thirty (30) days prior written notice to the other, provided such written notice is made within 60 days of the date of the court decision.

15. FORCE MAJEURE

Neither Party hereto shall be liable for any failure of performance, other than the continuing obligation to make payments due hereunder for periods prior to the event of force majeure, owing to causes beyond its reasonable control and the occurrence of which could not have been prevented by the exercise of due diligence. Refusal by either Party to accede to demands of laborers or labor unions that it considers unreasonable shall not deny it the benefits of this provision. If either Party hereto is unable, for any reason, to deliver or receive full or partial quantities of electricity contemplated by this Agreement due to force majeure, the Party so unable to perform shall promptly advise the other Party that such condition exists, and the Parties shall suspend operations under this Agreement to the extent dictated by the force majeure event, until the event of force majeure is remedied and both Parties can once again deliver and receive electricity, respectively. Any force majeure event shall be remedied as far as possible with all reasonable

dispatch. The term "force majeure" as employed herein shall include, but is not be limited to: acts of God; strikes or other industrial disturbances; acts of a public enemy; the direct or indirect effect of governmental orders actions, or interference civil disturbances; explosions; breakage of or accidents to machinery or power lines; power outages; the necessity of making repairs to or alterations of machinery or power lines; landslides; lighting; earthquakes; fires: storms; floods; and washouts. Force majeure shall not include financial considerations.

16. NO INCIDENTAL OR CONSEQUENTIAL DAMAGES

PG&E shall not be liable for any incidental special or consequential damages, including but not limited to lost profits and loss of power related in any way with the performance of either Party under this Agreement.

17. WAIVER

A waiver by either Party or any one or more defaults by the other hereunder shall not operate as a waiver of any future default or defaults, whether of a like or of a different character.

18. SURVIVAL

The provisions of this Agreement which by their nature should survive expiration, cancellation or other termination of this Agreement, including but not limited to provisions regarding financial obligations, shall survive such expiration, cancellation or other termination.

IN WITNESS THEREOF, the Parties have executed this Agreement in multiple originals of equal dignity by their respective duly authorized representatives.

INTERCONNECTION AGREEMENT FOR NET ENERGY METERING OF BIOGAS DIGESTER GENERATING FACILITIES

This "Interconnection Agreement for Net Energy Metering of Qualifying Biogas Digester Generating Facilities" ("Agreement") is entered into by and between _____("Biogas Customer-Generator"), and Pacific Gas and Electric Company ("PG&E"), a California Corporation. Biogas Customer-Generator and PG&E are sometimes also referred to in this Agreement jointly as "Parties" or individually as "Party." In consideration of the mutual promises and obligations stated in this Agreement and its attachments, the Parties agree as follows:

1. SCOPE AND PURPOSE

This Agreement provides for Biogas Customer-Generator to interconnect and operate an Eligible Biogas Digester Electrical Generating Facility in parallel with PG&E's Distribution System to serve the electrical loads connected to the electric service account that PG&E uses to interconnect Biogas Customer-Generator's Generating Facility. Biogas Customer-Generator's Generating Facility is intended primarily to offset part or all of the Biogas Customer-Generator's own electrical requirements. Consistent with, and in order to effectuate, the provisions of Section 2827.9 of the California Public Utilities Code and Pacific Gas and Electric Company's electric rate Schedule NEMBIO ("NEMBIO"), Parties enter into this Agreement. This Agreement applies to the Biogas Customer-Generator's Generating Facilities identified below with the specified characteristics and generating capacity, and does not allow interconnection or operation of facilities different than those described.

2. SUMMARY AND DESCRIPTION OF BIOGAS CUSTOMER-GENERATOR'S GENERATING FACILITY AND DESIGNATION OF OTHERWISE-APPLICABLE-RATE SCHEDULE.

2.1 A description of the Generating Facility, including a summary of its significant components and a single-line diagram showing the general arrangement of how Biogas Customer-Generator's Eligible Biogas Digester Electrical Generating Facility and loads are interconnected with PG&E's Distribution System, are attached to, and made a part of this Agreement. (This description is supplied by Biogas Customer-Generator as Appendix A).

2.2 Generating Facility identification number: _____ (Assigned by PG&E)

2.3 Biogas Customer-Generator's electric service account number: _____ (Assigned by PG&E)

2.4 Name and address used by PG&E to locate the electric service account used to interconnect the Eligible Biogas Digester Electrical Generating Facility with PG&E's Distribution System:

Name: _____

Address: _____

City/Zip Code: _____

† Information collected on this form is used in accordance with PG&E's Privacy Policy. The Privacy Policy is available at pge.com/privacy.

2.5 The Gross Nameplate Rating of the Generating Facility is: _____ kW.

2.6 The Net Nameplate Rating of the Generating Facility is _____ kW.

2.7 The expected annual energy production of the Generating Facility is _____ kWh.

2.8 The Generating Facility's expected date of Initial Operation is _____. The expected date of Initial Operation shall be within two years of the date of this Agreement.

2.9 Biogas Customer-Generator's otherwise-applicable-rate schedule as of the execution of this Agreement is _____.

3. DOCUMENTS INCLUDED; DEFINED TERMS

3.1 This Agreement includes the following exhibits which are specifically incorporated herein and made a part of this Agreement.

Appendix A Description of Generating Facility and Single-Line Diagram (Supplied by Biogas Customer-Generator)

Appendix B A Copy of PG&E's Agreement for Installation of Allocation of Special Facilities for Parallel Operation of Nonutility-Owned Generation and/or Electrical Standby Service (Form 79-280) ("Special Facility Agreement"), if applicable, (Formed by the Parties).

Appendix C List of qualifying accounts eligible for aggregation under Special Condition 2 of Schedule NEMBIO (if applicable).

In addition PG&E Electric Tariff Rules and Rates, including but not limited to Electric Rules 2, 14, 15, 16, and 21, Schedule NEMBIO, and Biogas Customer-Generator's otherwise applicable rate schedule, available at PG&E's web-site at www.pge.com, or by request, are specifically incorporated herein and made part of this Agreement.

3.2 When initially capitalized, whether in the singular or in the plural, the terms used herein shall have the meanings assigned to them either in this Agreement, or in PG&E's Rule 21, Section H, or in Schedule NEMBIO.

4. CUSTOMER BILLING AND PAYMENT OPTIONS

Biogas Customer-Generator initially selects Pacific Gas and Electric Company's electric rate schedule referenced in Section 2.9 of this Agreement as its otherwise-applicable rate schedule. Biogas Customer-Generator understands that they will be billed according to Schedule NEMBIO.

As provided under Special Condition 2 of Schedule NEMBIO, dairy operations may aggregate the electric load of other qualifying accounts. Exhibit C of this Agreement lists all accounts that qualify for this provision. Exhibit C may be modified from time to time by mutual consent of the Parties. Biogas Customer-Generator must provide PG&E with at least 60 days Notice pursuant to Section 11of this Agreement, of proposed changes to Exhibit C.

5. TERM AND TERMINATION

5.1 This Agreement shall become effective as of the last date entered in Section 18, below, which shall be no later than 12/31/06. The Agreement shall continue in full force and effect until the earliest date that one of the following events occurs:

(a) The Parties agree in writing to terminate the Agreement.

(b) Unless otherwise agreed in writing by the Parties, at 12:01 A.M. on the day following the date the electric service account through which Biogas Customer-Generator's Generating Facility is interconnected to PG&E's Distribution System is closed or terminated.

(c) At 12:01 A.M. on the 61st day after Biogas Customer-Generator or PG&E provides written Notice pursuant to Section 11 below to the other Party of Biogas Customer-Generator's or PG&E's intent to terminate this Agreement.

5.2 Biogas Customer-Generator may elect to terminate this Agreement pursuant to the terms of Section 5.1(c) for any reason. PG&E may elect to terminate this Agreement pursuant to the terms of Section 5.1(c) for one or more of the following reasons:

(a) A change in applicable rules, tariffs, and regulations, as approved or directed by the Commission, or a change in any local, state or federal law, statute or regulation, either of which materially alters or otherwise affects PG&E's ability or obligation to perform PG&E's duties under this Agreement; or,

(b) Biogas Customer-Generator fails to take all corrective actions specified in PG&E's Notice that Biogas Customer-Generator's Generating Facility is out of compliance with the terms of this Agreement within the time frame set forth in such Notice; or,

(c) Biogas Customer-Generator fails to interconnect and operate the Generating Facility per the terms of this Agreement prior to January 1, 2007; or,

(d) Biogas Customer-Generator abandons the Generating Facility. PG&E shall deem the Generating Facility to be abandoned if PG&E determines, in its sole opinion, the Generating Facility is non-operational and Biogas Customer-Generator does not provide a substantive response to PG&E Notice of its intent to terminate this Agreement as a result of Biogas Customer-Generator's apparent abandonment of the Generating Facility affirming Biogas Customer-Generator's intent and ability to continue to operate the Generating Facility; or,

(e) Biogas Customer-Generators facility ceases to meet all applicable safety and performance standards set out in Section 6.

5.3 Notwithstanding any other provisions of this Agreement, PG&E shall have the right to unilaterally file with the Commission, pursuant to the Commission's rules and regulations, an application to terminate this Agreement.

5.4 Any agreements attached to and incorporated into this Agreement shall terminate concurrently with this Agreement unless the Parties have agreed otherwise in writing.

6. GENERATING FACILITY REQUIREMENTS:

6.1 Biogas Customer-Generator's generator must meet all applicable safety and performance standards established by the National Electrical Code, the Institute of Electrical and Electronics Engineers, and accredited testing laboratories such as Underwriters Laboratories and, where applicable rules of the Public Utilities Commission regarding safety and reliability.

6.2 Biogas Customer-Generator shall: (a) maintain the Facility and Interconnection Facilities in a safe and prudent manner and in conformance with all applicable laws and regulations including, but not limited to, Section 6.1, and (b) obtain any governmental authorizations and permits required for the construction and operation of the Facility and interconnection facilities. Biogas Customer-Generator shall reimburse Pacific Gas and Electric Company for any and all losses, damages, claims, penalties, or liability it incurs as a result of Biogas Customer-Generator's failure to obtain or maintain any governmental authorizations and permits required for construction and operation of Biogas Customer-Generator's Facility.

6.3 Biogas Customer-Generator shall not commence parallel operation of the Facility until Pacific Gas and Electric Company has provided written approval to the Biogas Customer-Generator to do so. No such approval shall be provided until at least ten (10) working days following the utility's receipt of the inspection clearance of the governmental authority having jurisdiction. Such approval shall not be unreasonably withheld. Pacific Gas and Electric Company shall have the right to have representatives present at the initial testing of Biogas Customer-Generator's protective apparatus. Biogas Customer-Generator shall notify the utility five (5) working days prior to the initial testing.

6.4 The Biogas Customer-Generator warrants that they are the recipient of local, state, or federal funds; or they self-finance pilot projects designed to encourage the development of eligible biogas digester electrical generating facilities.

7. INTERCONNECTION FACILITIES

7.1 Biogas Customer-Generator and/or PG&E, as appropriate, shall provide Interconnection Facilities that adequately protect PG&E's Distribution System, personnel, and other persons from damage or injury, which may be caused by the operation of Biogas Customer-Generator's Generating Facility.

7.2 Biogas Customer-Generator shall be solely responsible for the costs, design, purchase, construction, operation, and maintenance of the Interconnection Facilities that Biogas Customer-Generator owns.

7.3 If the provisions of PG&E's Electric Rule 21, or any other tariff or rule approved by the Commission, requires PG&E to own and operate a portion of the Interconnection Facilities, Biogas Customer-Generator and PG&E shall promptly execute an Special Facilities Agreement that establishes and allocates responsibility for the design,

installation, operation, maintenance, and ownership of the Interconnection Facilities. This Special Facilities Agreement shall be attached to and made a part of this Agreement as Appendix B.

8. LIMITATION OF LIABILITY

Each Party's liability to the other Party for any loss, cost, claim, injury, liability, or expense, including reasonable attorney's fees, relating to or arising from any act or omission in its performance of this agreement, shall be limited to the amount of direct damage actually incurred. In no event shall either Party be liable to the other Party for any indirect, special, consequential, or punitive damages of any kind whatsoever.

9. INSURANCE

9.1 In connection with Customer-Generator's performance of its duties and obligations under this Agreement, Customer-Generator shall maintain, during the term of this Agreement, general liability insurance with a combined single limit of not less than:

(a) Two million dollars ($2,000,000) for each occurrence if the Gross Nameplate Rating of Producer's Generating Facility is greater than one hundred (100) kW;

(b) One million dollars ($1,000,000) for each occurrence if the Gross Nameplate Rating of Producer's Generating Facility is greater than twenty (20) kW and less than or equal to one-hundred (100) kW; and

(c) Five hundred thousand dollars ($500,000) for each occurrence if the Gross Nameplate Rating of Producer's Generating Facility is twenty (20) kW or less.

(d) Two hundred thousand dollars ($200,000) for each occurrence if the Gross Nameplate Rating of Producer's Generating Facility is ten (10) kW or less and Producer's Generating Facility is connected to an account receiving residential service from PG&E.

Such insurance shall include coverage for "Premises-Operations, Owners and Contractors Protective, Products/Completed Operations Hazard, Explosion, Collapse, Underground, Contractual Liability, and Broad Form Property Damage including Completed Operations."

9.2 The general liability insurance required in this Section shall, by endorsement to the policy or policies, (a) include PG&E as an additional insured; (b) contain a severability of interest clause or cross-liability clause; (c) provide that PG&E shall not by reason of its inclusion as an additional insured incur liability to the insurance carrier for payment of premium for such insurance; and (d) provide for thirty (30) calendar days' written notice to PG&E prior to cancellation, termination, alteration, or material change of such insurance.

9.3 If Biogas Customer-Generator's Generating Facility is connected to an account receiving residential service from PG&E and the requirement of Section 9.2(a) prevents Biogas Customer-Generator from obtaining the insurance required in this

Section, then upon Biogas Customer-Generator's written Notice to PG&E in accordance with Section 11.1, the requirements of Section 9.2(a) shall be waived.

9.4 Evidence of the insurance required in Section 9.2 shall state that coverage provided is primary and is not in excess to or contributing with any insurance or self-insurance maintained by PG&E.

9.5 Biogas Customer-Generator agrees to furnish the required certificates and endorsements to PG&E prior to Initial Operation. PG&E shall have the right to inspect or obtain a copy of the original policy or policies of insurance.

9.6 If Biogas Customer-Generator is self-insured with an established record of self-insurance, Biogas Customer-Generator may comply with the following in lieu of Section 9.2:

(a) Biogas Customer-Generator shall provide to, PG&E, at least thirty (30) calendar days prior to the date of Initial Operation, evidence of an acceptable plan to self-insure to a level of coverage equivalent to that required under Section 9.1.

(b) If Biogas Customer-Generator ceases to self-insure to the level required hereunder, or if Biogas Customer-Generator is unable to provide continuing evidence of Biogas Customer-Generator's ability to self-insure, Biogas Customer-Generator agrees to immediately obtain the coverage required under Section 9.1.

9.7 All insurance certificates, statements of self insurance, endorsements, cancellations, terminations, alterations, and material changes of such insurance shall be issued and submitted to the following:

Pacific Gas and Electric Company
Attn: Manager, Generation Interconnection Services.
PO Box 770000
Mail Code B13J
San Francisco, California 94177

10. INDEMNITY FOR FAILURE TO COMPLY WITH INSURANCE PROVISIONS

10.1 If Biogas Customer-Generator fails to comply with the insurance provisions of this Agreement, Biogas Customer-Generator shall, at its own cost, defend, save harmless and indemnify Pacific Gas and Electric Company, its directors, officers, employees, agents, assignees, and successors in interest from and against any and all loss, liability, damage, claim, cost, charge, demand, or expense of any kind or nature (including attorney's fees and other costs of litigation) resulting from the death or injury to any person or damage to any property, including the personnel and property of the utility, to the extent that the utility would have been protected had Biogas Customer-Generator complied with all such insurance provisions. The inclusion of this Section 10.1 is not intended to create any expressed or implied right in Biogas Customer-Generator to elect not to provide any such required insurance.

10.2 The provisions of this Section 10 shall not be construed to relieve any insurer of its obligations to pay any insurance claims in accordance with the provisions of any valid insurance policy.

11. NOTICES

11.1 Any written notice, demand, or request required or authorized in connection with this Agreement ("Notice") shall be deemed properly given if delivered in person or sent by first class mail, postage prepaid, to the person specified below:

If to PG&E: Pacific Gas and Electric Company
Attention: Business Customer Services
P.O. Box 770000
Mail Code B8C
San Francisco, California 94177
Phone: (800) 468-4743
FAX: (415) 972-5309

If to Biogas Customer-Generator:

Biogas Customer-Generator Name: _____

Address: _____

City: _____

Phone: (____) _____

FAX: (____) _____

11.2 A Party may change its address for Notices at any time by providing the other Party notice of the change in accordance with Section 11.1.

11.3 The Parties may also designate operating representatives to conduct the daily communications, which may be necessary or convenient for the administration of this Agreement. Such designations, including names, addresses, and phone numbers may be communicated or revised by one Party's Notice to the other.

12. REVIEW OF RECORDS AND DATA

12.1 PG&E shall have the right to review and obtain copies of Biogas Customer-Generator's operations and maintenance records, logs, or other information such as, Generation Unit availability, maintenance outages, circuit breaker operation requiring manual reset, relay targets and unusual events pertaining to Biogas Customer-Generator's Generating Facility or its interconnection with PG&E's Distribution System.

12.2 Biogas Customer-Generator authorizes to release to the California Energy Commission (CEC) information regarding Biogas Customer-Generator's facility, including customer name, location, size, and operational characteristics of the unit, as requested from time to time pursuant to the CEC's rules and regulations.

13. ASSIGNMENT

Biogas Customer-Generator shall not voluntarily assign its rights nor delegate its duties under this Agreement without PG&E's written consent. Any assignment or delegation Biogas Customer-Generator makes without PG&E's written consent shall not be valid. PG&E shall not unreasonably withhold its consent to Biogas Customer-Generator's assignment of this Agreement.

14. NON-WAIVER

None of the provisions of this Agreement shall be considered waived by a Party unless such waiver is given in writing. The failure of a Party to insist in any one or more instances upon strict performance of any of the provisions of this Agreement or to take advantage of any of its rights hereunder shall not be construed as a waiver of any such provisions or the relinquishment of any such rights for the future, but the same shall continue and remain in full force and effect.

15. GOVERNING LAW, JURISDICTION OF COMMISSION, INCLUSION OF PG&E's TARIFF SCHEDULES AND RULES

15.1 This Agreement shall be interpreted, governed, and construed under the laws of the State of California as if executed and to be performed wholly within the State of California without giving effect to choice of law provisions that might apply to the law of a different jurisdiction.

15.2 This Agreement shall, at all times, be subject to such changes or modifications by the Commission as it may from time to time direct in the exercise of its jurisdiction.

15.3 The interconnection and services provided under this Agreement shall at all times be subject to the terms and conditions set forth in the Tariff Schedules and Rules applicable to the electric service provided by, PG&E, which Tariff Schedules and Rules are hereby incorporated into this Agreement by this reference.

15.4 Notwithstanding any other provisions of this Agreement, PG&E shall have the right to unilaterally file with the Commission, pursuant to the Commission's rules and regulations, an application for change in rates, charges, classification, service, tariff or rule or any agreement relating thereto.

16. AMENDMENT AND MODIFICATION

This Agreement can only be amended or modified by a writing signed by both Parties.

17. ENTIRE AGREEMENT

This Agreement, including any incorporated Tariff Schedules and rules, contains the entire agreement and understanding between the Parties, their agents, and employees as to the subject matter of this Agreement. Each party also represents that in entering into this Agreement, it has not relied on any promise, inducement, representation, warranty, agreement or other statement not set forth in this Agreement or in the incorporated tariff schedules and rules.

18. SIGNATURES

IN WITNESS WHEREOF, the Parties hereto have caused two originals of this Agreement to be executed by their duly authorized representatives. This Agreement is effective as of the last date set forth below.

This agreement is effective when accepted and executed by PG&E.

AGREEMENT FOR LIMITED OPTIONAL REMOTE METERING SERVICE

This AGREEMENT FOR LIMITED OPTIONAL REMOTE METERING SERVICE (Agreement) is made by **PACIFIC GAS AND ELECTRIC COMPANY**, a California corporation, (PG&E) and _____ (Customer) (individually "Party" and jointly "Parties").

The installation of PG&E's meters under this Agreement is pursuant to PG&E's electric tariff rules and rate schedules, of which this Agreement is a part. Customer agrees to abide by the requirements of PG&E's rules and rate schedules including the following terms and conditions.

1. At the request of Customer, PG&E hereby agrees, as an accommodation, to install at Customer's expense within a reasonable period of time, a PG&E-owned interval meter. PG&E will remove any existing meter.
2. If required, Customer is responsible for the installation of a wired telephone line that terminates within three (3) feet of the Customer's meter panel and terminates within eighteen (18) inches to seventy-two (72) inches above grade. Customer is also responsible for any maintenance and repair of the telephone line. The telephone line installation must be completed and the telephone line must be operational before PG&E will perform any meter installation work. For a situation in which it is not feasible for the telephone company to install a wired telephone line, PG&E may, at Customer's request and expense, arrange for a cellular telemetry system to be installed and activated.
    a. Customer is responsible for the on-going phone service charges.
    b. Operation and maintenance of telecommunications lines shall be Customer's sole responsibility.
3. PG&E will perform all metering and meter programming work. This includes all maintenance, repair, or any meter related work.
4. PG&E will bill Customer in advance of the meter installation work, its estimated cost for all costs associated with the meter installation, including labor, materials, shipping and administration costs. Customer agrees to pay an ownership cost, as specified in PG&E's Electric Rule 2, and any applicable Income Tax Component of Contribution (ITCC) at the rate set forth in PG&E's electric Preliminary Statement Part J. The Customer charges will be shown on Exhibit A – Cost Summary, to this Agreement. Revocation or termination of the Agreement in whole or in part shall not relieve Customer of any obligation: (a) to pay charges incurred prior to such revocation, nor (b) to indemnify PG&E as provided in Section 12 herein.
5. PG&E will begin the meter installation work when both parties have signed the Agreement and PG&E has received payment from the Customer.

6. PG&E will perform all meter reading services that are necessary to prepare the customer's monthly energy bill. PG&E will use its normal business practices to perform the meter reading services.
7. PG&E shall make a reasonable attempt to provide the services described in this Agreement in a timely and expeditious manner. However, PG&E shall not be responsible for any delay in completion of its work resulting from any cause or condition beyond the control of PG&E. PG&E shall have the right to allocate material or labor resources to the construction or maintenance projects that it deems, in its sole discretion, most important to serve the needs of all of its customers. Any delay in service work for the Customer hereunder resulting from such allocation or reallocation of PG&E's resources shall be deemed to be beyond PG&E's control.
8. PG&E shall at all times during this Agreement continue to own, operate, maintain, read and replace the PG&E meter, and carry out all other activities lawfully permitted or required under PG&E's tariffs, rules, CPUC regulations and requirements, and PG&E's business practices. Such activities shall include, but not be limited to, investigations of tampering or suspected energy theft and actions taken during emergencies or in the normal course of business. Customer acknowledges that such activities by PG&E may affect the ability of PG&E to obtain interval meter data. Customer agrees that PG&E shall not be liable for any harm, detriment, or damage of any kind to Customer, or any other third party resulting from PG&E being unable to access the interval meter data.
9. Regardless of the manner in which the PG&E meter shall be attached to property owned by, or under lease to Customer, the PG&E meter shall remain the property of PG&E and title shall remain in PG&E. Customer's use of the PG&E meter shall not ripen into any title, or right in and to the PG&E meter, and Customer shall not make any claim of right or title, nor resist or assail PG&E's title, to the PG&E meter based on this Agreement or Customer's use hereunder. Customer shall not permit any judgment or lien against it to encumber the PG&E meter and shall give PG&E immediate notice of any attempt to place a lien on PG&E meter by any third person or party.
10. This Agreement in no way precludes PG&E from exercising its rights to enter and leave customer's premises for any purpose connected with the furnishing of electric service (including, but not limited to, meter reading, inspection, testing, routine repairs, replacement, maintenance, and emergency work).
11. Customer shall not assign this Agreement to, nor permit the use of the PG&E meter by, any third party without obtaining the prior express written consent of PG&E.
12. Each Party's liability to the other Party for any loss, cost, claim, injury, liability, or expense, including reasonable attorneys' fees, relating to or arising from any act or omission in its performance of this Agreement, shall be limited to the amount of direct damage actually incurred, except as provided for in this Section. In no event shall either Party be liable to the other Party for any indirect, special, consequential, or punitive damages of any kind whatsoever, whether in contract, tort or strict liability, except in the event of an action covered by the Indemnification provisions of Section 13 of this Agreement, in which event this Section 12 shall not be applicable.

13. Customer shall indemnify, defend and hold harmless PG&E, its officers, directors, agents, and employees, from and against all claims, demands, losses, damages, costs, expenses, and legal liability connected with or resulting from injury to or death of persons, including but not limited to employees of PG&E, Customer, or either Party's contractors or subcontractors; injury to property of PG&E, Customer, or any third party, or to natural resources, or violation of any local, state or federal law or regulation, including but not limited to environmental laws or regulations, or strict liability imposed by any law or regulation; arising out of, related to, or in any way connected with Customer's performance of this Agreement, however caused, regardless of any strict liability or negligence of PG&E, whether active or passive, excepting only such claims, demands, losses, damages, costs, expenses, liability or violation of law or regulation as may be caused by the active negligence or willful misconduct of PG&E, its officers, agents, or employees. Customer acknowledges that any claims, demands, losses, damages, costs, expenses, and legal liability that arise out of, result from, or are in any way connected with the release or spill of any legally designated hazardous material or waste as a result of the work performed under this Agreement are expressly within the scope of this indemnity, and that the costs, expenses, and legal liability for environmental investigations, monitoring, containment, abatement, removal, repair, cleanup, restoration, remedial work, penalties, and fines arising from the violation of any local, state, or federal law or regulation, attorney's fees, disbursements, and other response costs are expressly within the scope of this indemnity. Customer shall, on PG&E's request, defend any action, claim or suit asserting a claim covered by this indemnity. Customer shall pay all costs that may be incurred by PG&E in enforcing this indemnity, including reasonable attorney's fees.
14. The waiver by either party of any default in performance, or the failure to insist on strict performance, by the other of any covenant or duty herein shall not be construed as a waiver of any preceding or subsequent defaults of the same or other covenant or duty.
15. Each provision in this Agreement shall be considered separate and severable from every other provision herein; if any provision shall be held to be invalid by a court or regulatory or administrative body having jurisdiction, it shall be adjusted rather than voided, if possible, in order to achieve the intent of the parties. In any event, the remaining provisions shall remain in effect and shall in no way be impaired thereby.
16. This Agreement shall be interpreted, governed by and construed in accordance with the laws of the State of California, and shall exclude any choice of law rules that direct the application of the laws of another jurisdiction, irrespective of the place of execution or of the order in which the signatures of the parties are affixed or of the place or places of performance. This Agreement shall at all times be subject to such changes and modifications by the California Public Utilities Commission as said Commission may direct, from time to time, in the exercise of its jurisdiction. Where the terms of this Agreement conflict with PG&E's filed tariffs or rules, PG&E's filed tariffs and rules govern. Except for matters and disputes with respect to which the Commission is the sole proper venue for dispute resolution pursuant to applicable law or this Agreement, the federal and state courts located in San Francisco County, California shall constitute the sole proper venue for resolution of any matter or dispute

hereunder, and the Parties submit to the exclusive jurisdiction of such courts with respect to such matters and disputes.

17. If any monetary payment under this Agreement is not received by PG&E when due, such payment shall bear interest from the due date until received by PG&E at the lesser of (a) the rate set forth in PG&E's Electric Rule 7 section (c), or (b) the maximum rate permitted by law. Any change in said interest rate shall become effective on the same date on which a change in PG&E's Electric Rule 7 section (c) becomes effective.
18. This Agreement contains the entire agreement of the parties and cannot be modified or amended in any respect except by a writing executed by PG&E and Customer.
19. Any notice to be given in connection with this Agreement shall be in writing and may be served by personal delivery or be sent by certified mail, or by reputable courier service that provides written evidence of delivery, addressed as specified below, or to such other address as requested by either party in writing, in the manner specified herein. Delivery by facsimile shall not be considered sufficient notice under this Agreement. Notice shall be effective upon actual receipt or upon refusal to accept delivery.
20. This Agreement may be terminated provided that each party agrees to use reasonable efforts to give the non-terminating party at least 30 days' prior notice of any such termination.

IN WITNESS WHEREOF the parties have executed this Agreement this _____day of _____, 20_____.

This agreement is effective when accepted and executed by PG&E.

Attachment 2

Redline Tariffs

For convenience of the reader, PG&E has included redline revisions in Attachment 2.

Where sample forms have been revised, the entire sample form is included in Attachment 1 (clean version), but the redline version in Attachment 2:

1) Includes the pages where the Privacy Policy modification has occurred, and excludes pages of the form where only the advice letter number and date has been updated; and,

2) In instances, where a sample form is presented under both electric and gas tariffs, only the redlines of the electric sample form is being provided in Attachment 2. The revisions are identical to both the gas and electric sample forms.

These actions were taken to show the modifications being made to the sample forms in Attachment 2 and to reduce the number of pages of this advice letter.

Electric Sample Form No. 02-2590 Sheet 1
Interim Service Agreement

Please Refer to Attached
Sample Form

CONTINUOUS SERVICE AGREEMENT

As a convenience to our customers who lease or rent individually metered units to tenants, PG&E offers the "Continuous Service" option. Under the agreement, PG&E agrees to maintain gas and/or electric service to customer's vacant units by placing the service agreements in the applicant's name when tenants discontinue service.

Please fill out the information below and return this agreement to PG&E as described in Section 11 of the Terms of Agreement.

Step 1: This Agreement between _____ (Applicant) and Pacific Gas and Electric Company (PG&E) is to establish and govern the provision of all gas and electric service by PG&E during the time period commencing when a tenant in an individually-metered unit at Applicant's Service Address requests termination of liability for payment of PG&E service, and ending when PG&E establishes service in the name of a new tenant in the same unit. The service provided by PG&E during this time period shall hereinafter be referred to as "interim service" at the Applicant's Service Address below:

Step 2: Check Commodity**:** **Gas & Electric** ☐ **Electric only** ☐ **Gas Only** ☐

Step 3: Would you like a single account for all bills? **Yes** ☐ **No** ☐

Step 4: Please list the service address(es) you want included in this agreement. Include House number (exact numbers), street, apartment number (if applicable), city and zip code.

Service Address: _____

_____

Attach Additional Service Addresses on Page 3 (if needed).

Step 5: Where do you want the bills mailed?

Billing Address: _____

City, State and Zip Code: _____

Terms of Agreement

1) Applicant affirms that Applicant is the owner or manager of the property herein referred to as "Applicant's Service Address," where Applicant's Service Address is a property containing separately metered units for lease or rent to third party tenants.

2) Whenever a tenant at Applicant's Service Address requests termination of liability for payment for the gas and/or electric service, PG&E will read the meter(s), render a closing bill to the tenant and transfer the account for Continuous Service to Applicant.

† Information collected on this form is used in accordance with PG&E's Privacy Policy. . The Privacy Policy is available at pge.com/privacy.

11) Correspondence regarding this Agreement should be sent either by facsimile at (209) 476-7694 or mailed to PG&E at the following address:

Pacific Gas & Electric Company
Landlord Department
P.O. Box 8329
Stockton, CA 95208

12) This Agreement shall at all times be subject to such changes or modifications by the Public Utilities Commission of the State of California as said Commission may, from time to time, direct in the exercise of its jurisdiction.

DISTRIBUTION SERVICE AND EXTENSION AGREEMENT DECLARATIONS[1]

Submitted to Applicant by:

PG&E REP NAME

Date of issuance:_____

1. _____**(Applicant),** has requested **PACIFIC GAS AND ELECTRIC COMPANY**, a California corporation (PG&E), to deliver **Gas / Electric** energy to the property situated at **Enter Address Here** and shown on the attached drawings.

2. **Applicable Documents.** The cost summary for the facilities to be installed is attached hereto as Exhibit A. These facilities shall be installed in accordance with the applicable rules on file with the California Public Utilities Commission (which may include Gas and Electric Rules 2, 13, 15, 16, and 20), as well as the requirements set forth in the Provisions (Form 62-0982) and the General Terms and Conditions for Gas and Electric Service by Applicant (Form 79-716) These documents are located online in PG&E's Tariff Book, which is available at http://www.pge.com/cco . Should you require hard copies please contact your PG&E Representative.

3. **Construction Options.** The responsibility for providing line extension work is divided between PG&E and the Applicant. However, Applicant may chose to have a qualified contractor perform some of the work that is PG&E's responsibility, and may choose to have PG&E perform some or all of the work that is the Applicant's responsibility. PG&E will reimburse or collect money based on its estimate of the costs, subject to the applicable rules. Based on Applicant's request, the contract costs are based on the following construction options:

PG&E Responsibility [1]		To Be Performed By	
		PG&E	Applicant
Gas	Main Trench	☐	☐
	Main Pipe Installation	☐	☐
	Service Pipe Installation	☐	☐
Electric	Distribution Wire and Equipment Installation	☐	☐
	Service Wire Installation	☐	☐

Applicant Responsibility [2]		To Be Performed By	
		PG&E	Applicant
Gas	Service Trench	☐	☐
Electric	Distribution Trench	☐	☐
	Service Trench	☐	☐
	Distribution Substructure Installation	☐	☐
	Service Substructure Installation	☐	☐

1. PG&E's responsibilities per Rule 15.b.1.b and Rule 16.D.2
2. Applicant's responsibilities per Rule 15.b.1.a and Rule 16.D.1

REQUEST FOR SERVICE
(FOR USE ONLY WITH INTERIM SERVICE AGREEMENT)

The undersigned requests that gas and/or electric service be started at this service address:

_____
House No. *Street* *Apt. No.* *City*

Effective on (must allow three working days): _____
Month *Day* *Year*

Please note: Request will be worked within three working days of receipt by PG&E. Appointment date should be requested a minimum of three working days in advance and should not be scheduled for a Saturday, Sunday or holiday. Four-hour appointment time frames will be accommodated only if resources are available. If resources are unavailable on the date or time requested, appointments will be scheduled as an all day (8 a.m. to 8 p.m.) appointment.

In the event that the gas and/or electric commodity are physically off, access to the main breaker and/or gas appliances must be provided on the date of the appointment. Is there any reason PG&E would not be able to access our equipment or your gas appliances to complete this request (e.g., locked gate or dog)? ☐ Yes ☐ No

If Yes, please explain: _____

_____

The following information is required to establish the above utility service: *(Please Print)*
Your Name:_____
First *Middle* *Last*

Mailing Address (if different from service address):

_____

_____

_____

Telephone Numbers (include area code and extension):

_____
Home *Business*

Email Address:

_____

Previous Address:

_____
House No. *Street* *Apt. No.* *City*

How Long?_____ Was PG&E service in your name? ☐ Yes ☐ No

If yes, has it been turned off? ☐ Yes ☐ No Approximate Date: _____
(Any outstanding balance will be included in your initial bill at the new service address.) *Month* *Day* *Year*

If no, do you want it turned off? ☐ Yes ☐ No _____
Month *Day* *Year*

Social Security Number:_____

(In order to start service it may be necessary to perform a credit check to determine whether or not security is required. If security is required, it will be included on your bill. If the Social Security Number is not provided, security will be required and also included on your bill.)

If applicable, name of spouse or domestic partner: _____

Please note: Copies of applicable rates and rules are available online at http://www.pge.com/tariffs/. You will receive rate information in the mail. Please call our toll-free customer service number (800) 743-5000 if you would like to change your rate or customer information.

This agreement at all times shall be subject to such modifications as the California Public Utilities Commission may direct from time to time in the exercise of its jurisdiction.

Surety Bond/Bill Guaranty

Please Refer to Attached Sample Form

Pacific Gas and Electric Company

BOND # _____

SURETY BOND / BILL GUARANTY

In consideration of Pacific Gas and Electric Company furnishing gas and/or electric service to **(a)** _____ ***(applicant)*** without demanding that the Applicant provide a cash deposit as security for the payment for the Utility Service, I guarantee the prompt payment of all bills due or to become due for the Utility Service provided to Applicant.

If the Applicant does not pay the entire amount due for the Utility Service after Pacific Gas and Electric Company has demanded payment from the Applicant, I will pay all amounts due for Utility Service to Pacific Gas and Electric Company, up to but not exceeding total of **(b)** _____ ***($).***

I authorize Pacific Gas and Electric to transfer any past due closing bill (limited to the amount of this guaranty) for the Utility Service provided to Applicant to my current account or any subsequent account I may have with Pacific Gas and Electric Company. I agree that Pacific Gas and Electric Company may disconnect service to any or all accounts to which the closing bill is transferred if the bill is not paid. **(This clause does not apply to bonding and/or insurance company using a surety bond).**

I waive notice of acceptance of this guaranty, presentation of bills and other collection notices, and consent without further notice to any extension of time granted to the Applicant for payment of any amount due.

I agree that I cannot require Pacific Gas and Electric Company to pursue any remedy Pacific Gas and Electric Company might have against Applicant as a prerequisite to pursuing any remedy Pacific Gas and Electric Company may have against me under this guaranty.

I agree to pay Pacific Gas and Electric Company all cost and expenses it shall incur associated with collection proceedings, including reasonable attorneys' fees, in the event that Pacific Gas and Electric Company must institute any such proceedings to collect any amount due under this guaranty.

I agree this guaranty will remain in effect until either (1) the applicant's accounts under which the Utility Service is provided are closed, (2) Applicant establishes Credit pursuant to Rule No. 6, or (3) twenty days after Pacific Gas and Electric Company receives a written notice from me of termination of this guaranty sent "return receipt requested" to ***P.O. Box 8329, Stockton, CA 95208.*** I guarantee the payment of all amounts due for the Utility Service as of the time of the termination of this guaranty.

This guaranty shall at all times be subject to such changes or modification by the Public Utilities Commission as it may, from time to time, direct in the exercise of its jurisdiction.

Electric Sample Form No. 62-4501 Sheet 1
Absolving Service Agreement

Please Refer to Attached Sample Form

Pacific Gas and Electric Company

DISTRIBUTION:

- ☐ Applicant (Original)
- ☐ Division (Original)
- ☐ Customer Care (Copy)

REFERENCE: _____

Absolving Service Agreement

1. _____ (Applicant) having requested Pacific Gas and Electric Company (PG&E), to supply all of the _____service, hereinafter called "service," required for the operation of Applicant's equipment and apparatus, located at _____County, State of California, PG&E shall, subject to the conditions hereof, install its distribution facilities without undue delay and supply such service in accordance with its applicable rates and rules established from time to time and on file with the Public Utilities Commission of the State of California, and as provided in a written agreement for service, if any, attached hereto and made a part hereof.

2. In order for PG&E to supply and/or for Applicant to receive such service, it will be necessary for (check appropriate item or items)

   ☐ PG&E to utilize certain of its existing facilities considered by PG&E to be of questionable permanency.

   ☐ PG&E to install and utilize certain of its facilities on property across which suitable permanent rights of way are not available on a basis acceptable to PG&E.

   ☐ Applicant to use service facilities owned by the hereinafter named licensor.

   ☐ Applicant to install and use service facilities on, over, or under property owned by the hereinafter named licensor.

   Said facilities and/or property are shown and delineated on the map attached hereto and made a part hereof.

3. Applicant has represented and does hereby represent to PG&E that he has obtained permission to use the said certain service facilities and/or to install and use facilities on, over, and under property owned by the following named Licensor:

   NAME _____

   ADDRESS _____

4. Applicant shall hold harmless PG&E, its officers, agents, and employees from and indemnify them against any liability, claim, or loss for damage to any property or injury to or death of any person or persons in any way arising from or connected with the service facilities owned by Licensor or Applicant, as the case may be, used by Applicant to receive service hereunder and PG&E shall have no obligation with respect to the operation or maintenance thereof.

5. Should PG&E desire to remove or abandon its facilities of questionable permanency or in the event of the revocation of PG&E's or Applicant's right or permission to locate facilities on property owned by others or on lands across which suitable permanent rights of way are not available, or should Applicant's permission to use Licensor's facilities be terminated, or should Licensor's or Applicant's facilities at any time become unsafe or unsuitable in PG&E's opinion for transmitting service, PG&E shall have the right to remove or abandon any of its facilities and discontinue service to Applicant and in any such event, PG&E, shall be absolved of and from any and all liability to Applicant for and Applicant shall indemnify PG&E, its officers, agents and employees against any and all damage, whether to person or property, which Applicant or any third party may suffer by reason of or in any way connected with such discontinuance of service. PG&E will relocate its facilities upon request provided suitable rights of way are available therefore and Applicant first pays to PG&E the cost of such relocation as estimated by PG&E.

Electric Sample Form No. 62-4527 Sheet 1
Agreement to Perform Tariff Schedule Related Work

Please Refer to Attached
Sample Form

Pacific Gas and Electric Company®

DISTRIBUTION:

- ☐ Applicant (Original)
- ☐ Division (Original)
- ☐ Customer Care (Copy)

REFERENCE: _____

AGREEMENT TO PERFORM TARIFF SCHEDULE RELATED WORK[1]

_____ (Applicant) has requested **PACIFIC GAS AND ELECTRIC COMPANY,** a California corporation (PG&E), to perform the tariff schedule related work as located and described in paragraph 3 herein.

PG&E agrees to perform the requested work and furnish all necessary labor, equipment, materials and related facilities required therefore, subject to the following conditions:

1. Whenever part or all of the requested work is to be furnished or performed upon property other than that of Applicant, Applicant shall first procure from such owners all necessary rights-of-way and/or permits in a form satisfactory to PG&E and without cost to it.

2. Customer shall indemnify and hold harmless PG&E, its officers, agents, and employees, against all loss, damage, expense, and liability, resulting from injury to or death of person, including, but not limited to employees of PG&E, Customer, or any third party, or damage to property, including, but not limited to, property of PG&E, Customer, or any third party, arising out of or in any way connected with the Services to be provided under this Agreement, but only in proportion to and to the extent such liability, loss, expense, attorneys' fees, or claims for injury or damages are caused by or result from the negligent or intentional acts or omissions of the Customer, its officers, employees or agents. Customer shall pay any costs that may be incurred by PG&E in enforcing this indemnity, including reasonable attorneys' fees. [Pursuant to Resolution G-3561 of the California Public Utilities Commission the foregoing provision may be modified in agreements with governmental agencies to limit the scope of the indemnity to claims caused by the negligent or intentional acts or omissions of the governmental agency. Such modifications to this Agreement shall be submitted to the Commission for approval through a Tier 1 Advice Letter.]

3. The location and requested work are described as follows: (Describe in detail the materials and facilities to be furnished and/or work to be performed by PG&E. If more space is required, use other side and attach any necessary drawings as Exhibits A, B, C, etc.):

LOCATION: _____

DESCRIPTION OF WORK: _____

_____

_____

4. Applicant shall pay to PG&E, promptly upon demand by PG&E, as the complete contract price hereunder, the sum of _____dollars ($ _____)

5. This agreement at all times shall be subject to such modifications as the California Public Utilities Commission may direct from time to time in the exercise of its jurisdiction.

Upon completion of requested work, ownership shall vest in: ☐ PG&E ☐Applicant

Executed this _____ day of _____ 20 ____.

Electric Sample Form No. 79-1002 Sheet 1
Customer Generation Departing Nonbypassable Charge

Please Refer to Attached
Sample Form

(Continued)

PACIFIC GAS AND ELECTRIC COMPANY
CUSTOMER GENERATION DEPARTING LOAD NONBYPASSABLE CHARGE STATEMENT FOR

Customer name: _____

Service address: _____

_____

PG&E Electric Service ID number(s): _____

The customer identified above (Customer) has load that qualifies as Customer Generation Departing Load as defined in Pacific Gas and Electric Company's (PG&E's) Schedule E-DCG. This Customer Generation Departing Load Nonbypassble Charge Statement contains: (1) Customer's reference period billing determinants (the "Reference Period Load Profile"); (2) Customer's applicable rate schedule and service voltage; (3) whether PG&E has confirmed or rejected (and reasons for doing so) any claim made by the Customer for an exemption from any nonbypassable charges; and (4) a summary of applicable nonbypassable charge payment obligations.

Date notice of departure received by PG&E, or in the case of no notice from Customer, date of departure: _____.

(1) Customer's reference period billing determinants:

Customer's reference period billing determinants are based upon one of the following two options as selected by Customer in its notice: (1) Customer's demand and energy usage over the 12 month period prior to Customer's submission of notice; or (2) Customer's average 12 month demand and energy usage, with such average to be as measured over the prior 36 months of usage. In the event that the previous 12-month usage differs from the 36-month average by an amount greater than 25 percent, the 36-month average is automatically used unless there is substantial evidence to demonstrate that the more recent usage is the result of a persisting change in Customer's electric usage, and that the 12-month average will be more indicative of Customer's future electric requirements. If Customer does not choose an option in its notice, PG&E will use the customer's demand and energy usage over the 12-month period prior to Customer's submission of notice, or in the case of no notice, prior to the date of departure. A third option available to Customer is to be charged based upon future metered usage.

☐ A. Historical usage over previous 12-month period (Note: This option is the default if Customer did not choose an option in its Notice of Departing Load letter).

☐ B. Historical usage over previous 36-month period.

☐ C. Metered usage.

(2) Applicable PG&E rate schedule and service voltage level: _____.

† Information collected on this form is used in accordance with PG&E's Privacy Policy. The Privacy Policy is available at pge.com/privacy.

Electric Sample Form No. 79-1003 Sheet 1
Statement of Applicant's Contract Anticipated Costs

Please Refer to Attached Sample Form

Pacific Gas and Electric Company®

STATEMENT OF APPLICANT'S CONTRACT ANTICIPATED COSTS*

Project Name: _____

Project Location: _____

Notification Number: _____

PM Number(s): (Gas) _____ **(Electric)** _____

APPLICANT COSTS

The following statement must only include the contracted anticipated installed costs of facilities installed by the Applicant that are refundable and that are PG&E's responsibility under its tariffs.

The costs provided by the Applicant must be taken from the Applicant's contract with its contractor. If the Applicant will be performing the work itself, the Applicant must also complete and sign this form.

The Applicant's statement of costs will be compared with PG&E's estimated installed costs of the same facilities, the lower of which will be used to determine the amount subject to allowances and refunds in accordance with the provisions of PG&E's Gas and Electric Rules 15 and 16.

If the Applicant chooses not to provide its costs, it must complete the last section of this form. Until the Applicant either provides the refundable cost from its contract with its contractor (or its own cost, if applicable), or returns this form indicating that it will not do so, PG&E will not proceed with any work on the Applicant's project.

GAS	**ELECTRIC**
Residential Service Facilities:	**Residential Service Facilities**
Applicant: $_____	**Applicant:** $ _____
PG&E: $_____	**PG&E** $ _____
Number of gas services: _____ **stubs:** _____	**Number of electric services:** _____

- Applicant's statement of costs include: overhead or underground service conductors, poles, service transformers, connection fittings, service pipe, valves, service connections, and other PG&E-owned service equipment, as detailed in Gas and Electric Rule 16.
- Applicant's statement of costs DOES NOT include: inspection fees, nonresidential service costs, regulators, or PG&E-owned metering equipment.

* This form at all times shall be subject to such modifications as the California Public Utilities Commission may direct from time to time in the exercise of its jurisdiction.

Transferred Municipal Departing Load Nonbypassable Charge Statement

Please Refer to Attached Sample Form

TRANSFERRED MUNICIPAL DEPARTING LOAD NONBYPASSABLE CHARGE STATEMENT

Customer Name: _____

Service Address: _____

_____

PG&E Electric Service ID number(s): _____

The customer identified above (Customer) has load that qualifies as Transferred Municipal Departing Load as defined in Pacific Gas and Electric Company's (PG&E's) Schedule E-TMDL. This Transferred Municipal Departing Load Nonbypassable Charge Statement contains: (1) Customer's reference period billing determinants (the "Reference Period Load Profile" or metered consumption data); (2) Customer's applicable rate schedule and service voltage; (3) a summary of applicable nonbypassable charge payment obligations.

Date notice received by PG&E, or in the case of no notice from Customer, date of departure: _____.

(1) Consumer's Billing Determinants:

The customer's Reference Period Load Profile will be based upon the lower of the following two options: (1) the customer's demand and energy usage over the 12 month period prior to the customer's submission of notice that it will depart or reduce its load; or (2) the customer's average 12 month demand and energy usage, with such average to be as measured over the prior 36 months of usage.

Customer's Reference Period Load Profile

☐ A. Customer's demand and energy usage over the 12 month period prior to the customer's submission of notice that it will depart or reduce its load

☐ B. Customer's average 12 month demand and energy usage, with such average to be measured over the prior 36 months of usage prior to the customer's submission of notice that it will depart or reduce its load

Substitution of Metered data

☐ C. Customer has chosen to provide metered consumption data on a prospective basis

INTERCONNECTION AGREEMENT FOR NET ENERGY METERING OF FUEL CELL GENERATING FACILITIES

This *"Interconnection Agreement for Net Energy Metering of Fuel Cell Generating Facilities"* ("Agreement") is entered into by and between _____ ("Fuel Cell Customer-Generator"), and Pacific Gas and Electric Company ("PG&E"), a California Corporation. Fuel Cell Customer-Generator and PG&E are sometimes also referred to in this Agreement jointly as "Parties" or individually as "Party." In consideration of the mutual promises and obligations stated in this Agreement and its attachments, the Parties agree as follows:

1. SCOPE AND PURPOSE

This Agreement provides for Fuel Cell Customer-Generator to interconnect and operate an Eligible Fuel Cell Electrical Generating Facility in parallel with PG&E's Distribution System to serve the electrical loads connected to the electric service account that PG&E uses to interconnect Fuel Cell Customer-Generator's Generating Facility. Fuel Cell Customer-Generator's Generating Facility is intended primarily to offset part or all of the Fuel Cell Customer-Generator's own electrical requirements. Consistent with, and in order to effectuate, the provisions of Section 2827.10 of the California Public Utilities Code and PG&E's electric rate Schedule NEMFC ("NEMFC"), Parties enter into this Agreement. This Agreement applies to the Fuel Cell Customer-Generator's Generating Facilities identified below with the specified characteristics and generating capacity, and does not allow interconnection or operation of facilities different than those described.

2. SUMMARY AND DESCRIPTION OF FUEL CELL CUSTOMER-GENERATOR'S GENERATING FACILITY AND DESIGNATION OF OTHERWISE-APPLICABLE-RATE SCHEDULE.

2.1 A description of the Generating Facility, including a summary of its significant components and a single-line diagram showing the general arrangement of how Fuel Cell Customer-Generator's Eligible Fuel Cell Electrical Generating Facility and loads are interconnected with PG&E's Distribution System, are attached to, and made a part of this Agreement. (This description is supplied by Fuel Cell Customer-Generator as Appendix A).

2.2 Generating Facility identification number: _____ (Assigned by PG&E).

2.3 Fuel Cell Customer-Generator's electric service agreement ID number: _____ (Assigned by PG&E).

2.4 Name and address used by PG&E to locate the electric service account used to interconnect the Eligible Fuel Cell Electrical Generating Facility with PG&E's Distribution System:

Name: _____

Address: _____

City/Zip Code: _____

2.5 The Gross Nameplate Rating of the Generating Facility is: _____ kW.

2.6 The Net Nameplate Rating of the Generating Facility is _____ kW.

Electric Sample Form No. 79-1011 Sheet 1
Notice to Return to PG&E Bundled Service

Please Refer to Attached Sample Form

NOTICE TO RETURN TO PG&E BUNDLED SERVICE

(Customer: Please Retain a Copy for Your Records)

This form serves as my formal notice to return my electricity account(s) currently on Direct Access (DA) Service[1] or Community Choice Aggregation (CCA) Service[2] to Pacific Gas and Electric Company's (PG&E's) Bundled Portfolio Service.

With PG&E's Bundled Portfolio Service, PG&E provides your electric supply and provides other utility services such as the transmission and distribution of electricity, meter reading, billing, and maintenance and outage response services. With DA or CCA Service, your electricity is provided by a third-party energy supplier (other than PG&E), while PG&E continues to provide the other utility services mentioned above.

I. Please choose one of the following two options:

☐ **Bundled Portfolio Service – Six-Month Advance Notice Return** – Return the accounts listed in Section III to Bundled Portfolio Service under the "Six-Month Advance Notice Return" option. Under this option, the accounts remain on DA or CCA Service for the next six months. Each account will be switched to PG&E Bundled Portfolio Service and will be billed on the standard Bundled Portfolio Service rate applicable to the account(s) as of the account(s)' first meter read date after the six-month advance notice period. The accounts will then need to stay on Bundled Portfolio Service for a minimum of eighteen (18) months for returning DA customers as set forth in Electric Rule 22.1.B.1. (DA Service), or one (1) year for returning CCA Service customers as set forth in Electric Rule 23.L.3 (CCA Service).

☐ **Bundled Portfolio Service – Immediate Return** – Return the accounts listed in Section III to PG&E service immediately. Under this option, the account will be placed on PG&E's "Transitional Bundled Commodity Cost" Rate Schedule as of the account(s)' next meter read date. The accounts will stay on this rate for six months, as set forth in Electric Rule 22.1.B.1. or Electric Rule 23.L.3. PG&E will transfer the listed accounts to Bundled Portfolio Service beginning on the account(s)' next meter read date after the six-month period. The accounts will then need to stay on Bundled Portfolio Service for a minimum of eighteen (18) months for returning DA customers as set forth in Electric Rule 22.1.B.1. (DA Service), or six-(6) additional months, for a total minimum stay of one (1) year, for returning CCA Service customers as set forth in Electric Rule 23.L.3 (CCA Service). Customers on Bundled Portfolio Service pay the Bundled Portfolio Service rate applicable to their accounts.

II. Important Provisions

- Once your Notice has been received by PG&E, you have the right to rescind (cancel) your requested action within three business days by contacting PG&E using any of the options referenced in Section V below.
- Once the three-business day rescission period has passed, your requested action cannot be changed.

[1] PG&E's Electric Rule 22.1 (Direct Access Service Switching Exemption Rules) includes the terms and conditions applicable to transferring to BPS from DA Service.
[2] PG&E's Electric Rule 23 (Community Choice Aggregation Service) includes the terms and conditions applicable to transferring to BPS from CCA Service. This notice form is only applicable when a Community Choice Aggregator has elected to use PG&E's opt-out process. Please check with your Community Choice Aggregator for more information.

ELECTRIC SAMPLE FORM NO. 79-1013 Sheet 1
NEW MUNICIPAL DEPARTING LOAD
NONBYPASSABLE CHARGE STATEMENT

Please Refer to Attached
Sample Form

NEW MUNICIPAL DEPARTING LOAD NONBYPASSABLE CHARGE STATEMENT

Consumer Name: _____

Service Address: _____

_____

PG&E Account ID number: _____

PG&E Departing Load Service Agreement number: _____

The consumer identified above (Consumer) has load that qualifies as New Municipal Departing Load as defined in Pacific Gas and Electric Company's (PG&E's) Rate Schedule E-NMDL. This New Municipal Departing Load Charge Statement confirms: (1) Consumer's billing determinants; (2) Consumer's otherwise applicable electric rate schedule; (3) nonbypassable charges which the Consumer is exempt from paying; and (4) nonbypassable charges which the Consumer is obligated to pay.

Date notice received by PG&E, or in the case of no notice from Consumer, date Consumer began taking gas service from PG&E but not electric service: _____.

(1) Consumer's Billing Determinants:

Consumer has indicated to PG&E that its billing determinants **going forward** shall be based on the option shown below. If the Consumer did not indicate a preference, option A was selected on the Consumer's behalf.

A. PG&E's estimate of consumer's New Municipal Departing Load based on data for similar PG&E customers.

B. Last 12 months usage history as recorded by the POU serving the Consumer

C. Future metered usage, subject to the metering provisions described in Section 4.a. of PG&E's Schedule E-NMDL.

Consumer has also indicated to PG&E that its **retroactive** billing determinants shall be based on the option shown below. If the Consumer did not indicate a preference, option A was selected on the Consumer's behalf.

A. PG&E's estimate of Consumer's New Municipal Departing Load based on data for similar PG&E customers.

B. Usage history from the date electric service began with the POU serving the Consumer.

Pacific Gas and Electric Company®

DIRECT ACCESS CUSTOMER RELOCATION DECLARATION*

A. Electric Service Provider (ESP) Declaration

I, _____, state as follows:

1. I am an authorized representative of _____ (Name of ESP) ("ESP") authorized to make this declaration. I have personal knowledge of the matters set forth herein and if called upon as a witness could and would testify competently thereto.

2. Pursuant to a valid agreement (Agreement) by and between _____ (Name of ESP) and _____ (Name of Customer) ("Customer"), ESP provides electric power service to Customer at the Current Location, as specified below.

3. As stated herein, Customer requests to transfer its direct access (DA) service provided by PG&E and electric power service provided by ESP at the Current Location, to the New Location, as specified in this document. This relocation is requested in the normal course of business.

4. Under the provisions of the Agreement, the Customer has the right to receive electric power service from ESP for electric service loads located at the New Location.

5. All conditions of the Agreement necessary for a transfer of electric service from Current Location to New Location have been satisfied, including any necessary approvals by ESP.

I declare under penalty of perjury under the laws of the State of California that the foregoing is true and correct. Executed this _____ day of _____, _____ at

Electric Sample Form No. 79-1024 Sheet 1
Dual Supply Customer Authorizing Agreement

Please Refer to Attached
Sample Form

Pacific Gas and Electric Company

DISTRIBUTION
- ☐ Customer
- ☐ Division(s)
- ☐ Electric Transmission Rate
- ☐ Electric Supply

REFERENCE:
(See Exhibit B)

DUAL SUPPLY CUSTOMER AUTHORIZING AGREEMENT

This Dual Supply Customer Authorizing Agreement ("Customer Agreement") is entered into by and between Pacific Gas and Electric Company, a corporation organized and existing under the laws of the state of California ("PG&E"), and _____

_____ ("the Customer"). PG&E and the Customer are each sometimes referred to collectively as "the Parties." Capitalized terms used but not otherwise defined in this Customer Agreement shall have the meanings defined in the Enabling Agreement (defined below), a copy of which is attached to this Customer Agreement as Exhibit A.

RECITALS

WHEREAS, PG&E and the United States of America, acting by and through the Administrator, Western Area Power Administration, Department of Energy ("Western") have entered into the Dual-Supply Customer Enabling Agreement for New Base Resource Allottees ("Enabling Agreement") to provide for the delivery of Western Base Resource and the supply of PG&E bundled retail service to Dual-Supply Customers such as the Customer; and

WHEREAS, by entering into this Customer Agreement, the Customer verifies that it has executed one or more contracts with Western for the purchase of Base Resource to meet some of the Customer's electric power requirements; and

WHEREAS, the Customer qualifies for the services provided by this Customer Agreement under the Enabling Agreement and desires to receive power from both Western and PG&E.

AGREEMENT

NOW, THEREFORE, the Parties agree as follows:

1. Term.

1.1. This Customer Agreement will become effective on the later of: (a) the effective date of the Service Agreement between PG&E and Western under the PG&E Wholesale Distribution Tariff, dated October 21, 2004 ("Western WDT SA), or (b) the date the Customer and PG&E execute this Customer Agreement.

1.2. This Customer Agreement will terminate on the earliest of: (a) the date agreed upon by the Parties in writing; (b) 30 days from receipt of written notice from the Customer requesting termination, which notice must include the designation of the full requirements supplier the Customer will use upon termination of this Customer Agreement; (c) 30 days from receipt of written notice from the Customer that it is eligible for retail Direct Access or similar retail service and acknowledgement that such Customer is switching to such service; or (d) the termination of the Enabling Agreement without a successor agreement.

Electric Sample Form No. 79-1029 Sheet 1
COMMUNITY CHOICE AGGREGATOR (CCA)
SERVICE AGREEMENT

Please Refer to Attached
Sample Form

Pacific Gas and Electric Company

COMMUNITY CHOICE AGGREGATOR (CCA) SERVICE AGREEMENT

This Community Choice Aggregator (CCA) Service Agreement ("Agreement") is made and entered into as of this ____ day of _____, _____, by and between "_____ _____" ("CCA"), a _____ _____ organized and existing under the laws of the state of _____, and Pacific Gas and Electric Company "PG&E", a corporation organized and existing under the laws of the state of California. From time to time, CCA and PG&E shall be individually referred to herein as a "Party" and collectively as the "Parties."

Section 1: General Description of Agreement

1.1 This Agreement is a legally binding contract. The Parties named in this Agreement are bound by the terms set forth herein and otherwise incorporated herein by reference. This Agreement shall govern the business relationship between the Parties hereto by which CCA shall offer electrical energy services. Each Party, by agreeing to undertake specific activities and responsibilities for or on behalf of customers, acknowledges that each Party shall relieve and discharge the other Party of the responsibility for said activities and responsibilities with respect to those customers. Except where explicitly defined herein (including Attachment A hereto) the definitions controlling this Agreement are contained in PG&E's applicable rules or in the relevant community choice aggregation tariff.

1.2 The form of this Agreement has been developed as part of the CPUC regulatory process to implement Assembly Bill 117, was intended to conform to CPUC directions, was filed and approved by the CPUC for use between PG&E and CCAs and may not be waived, altered, amended or modified, except as provided herein or in the applicable community choice aggregation tariff, or as may otherwise be authorized by the CPUC.

1.3 This Agreement incorporates by reference the applicable community choice aggregation tariff as authorized and modified from time to time by the CPUC.

Section 2: Representations

2.1 Each Party represents that it is and shall remain in compliance with all applicable laws and tariffs, including applicable CPUC requirements.

Declaration by Mayor or Chief County Administrator Regarding Investigation Pursuit or Implementation of Community Choice Aggrega

Please Refer to Attached Sample Form

DECLARATION BY MAYOR OR CHIEF COUNTY ADMINISTRATOR REGARDING INVESTIGATION, PURSUIT OR IMPLEMENTATION OF COMMUNITY CHOICE AGGREGATION*

I,_____*[name], state as follows:*

1. I am the mayor, chief county administrator, or chief executive officer of _____

   _____ [name of city, county, or public agency,].

2. I am authorized to make this declaration on behalf of _____

   _____ [check appropriate box]

   [ ] a city, or

   [ ] a county, or

   [ ] an eligible public agency

   which is investigating, pursuing or implementing community choice aggregation as a community choice aggregator as defined by Section 331.1 of the California Public Utilities Code ("CCA" or "Potential CCA").

3. I understand that all of the confidential information provided by PG&E to the city, county, or public agency indicated above is subject to the terms and conditions of the Nondisclosure Agreement between these two entities and is provided for the sole purpose of enabling the city, county or public agency to investigate, pursue or implement community choice aggregation.

I declare under penalty of perjury under the laws of the State of California that the foregoing is true and correct. Executed this_____day of_____, 20_____, at _____,_____[city, state].

_____

[Signature]

* This form at all times shall be subject to such modifications as the California Public Utilities Commission may direct from time to time in the exercise of its jurisdiction.

ELECTRIC SAMPLE FORM NO. 79-1031 Sheet 1
COMMUNITY CHOICE AGGREGATOR NON-DISCLOSURE AGREEMENT

Please Refer to Attached
Sample Form

COMMUNITY CHOICE AGGREGATOR NON-DISCLOSURE AGREEMENT

This Non-Disclosure Agreement ("Agreement") is entered into by and between Pacific Gas and Electric Company ("Utility") and _____ _____[name]_____ _____, a _____ [describe political entity] _____("CCA") as of _____ ("Effective Date"). This Agreement is executed pursuant to California Public Utilities Commission ("CPUC") Order Instituted Rulemaking ("OIR") 03-10-003, California Public Utilities Code ("PU Code") Section 366.2 et seq., and applicable Utility tariffs (as modified hereafter from time to time). As used herein Utility and CCA may each be referred to individually as a "Party" and collectively as "Parties."

The CPUC has determined that CCA may obtain specified confidential customer information from Utility pursuant to Tariff Schedules E-CCAINFO-Information (as modified hereafter from time to time) ("E-CCAINFO") as a community choice aggregator, as defined by PU Code Section 331.1, solely in order to investigate, pursue or implement community choice aggregation pursuant to PU Code Section 366.2, et seq. or confidential customer electric and gas consumption data to implement energy efficiency programs pursuant to PU Code section 381.1. The provisions of this Agreement and E-CCAINFO govern the disclosure of Utility's confidential customer information to CCA ("Disclosure Provisions") under Schedules E-CCAINFO and E-CCA.

The Parties hereby mutually agree that:

1. Subject to the terms and conditions of this Agreement, current proprietary and confidential information of Utility regarding customers of Utility ("Utility Customers") may be disclosed to CCA from time to time in connection herewith as provided by the Disclosure Provisions and solely for the purpose of investigating, pursuing or implementing community choice aggregation pursuant to PU Code Section 366.2, et seq. as a community choice aggregator or to implement energy efficiency programs pursuant to PU Code section 381.1. Such disclosure is subject to the following legal continuing representations and warranties by CCA:

   (a) CCA represents and warrants that, pursuant to PU Code Section 331.1,

   (1) it is either (i) a city, county, or other entity as defined in PU Code Section 331.1 whose governing board has elected to combine the loads of its residents, businesses, and municipal facilities in a community wide electricity buyers program or (ii) a city, county, or other entity as defined in PU Code Section 331.1 that intends to actively investigate or pursue delivery of electric service to customers located within the geographic territory of the CCA, and

   (2) that to investigate, pursue or implement community choice aggregation under PU Code Section 366.2 et seq., or to implement energy efficiency programs pursuant to PU Code section 381.1;

Please Refer to Attached Sample Form

RATE SCHEDULE SELECTION
CUSTOMER AGREEMENT

I wish to be billed under the optional rate schedule(s) as listed. I agree to the terms and conditions as described in the rate schedule tariff and as follows:

- I hereby grant to PG&E, its employees, agents or contractors, reasonable access at reasonable times to install, remove, repair and inspect the metering equipment.
- I understand that I can only change my rate schedule in accordance with Electric Rule 12.
- The chosen rate schedule will commence on the next regular meter reading date or meter installation or reprogramming date following PG&E's receipt of Rate Schedule Selection Customer Agreement.

STEP 1: SELECT YOUR DESIRED RATE SCHEDULE

Please provide information for each Service Agreement and meter for which you are seeking a rate change (see sample on page 2 for assistance). Descriptions of rate options and tariffs can be found at www.pge.com/rateoptions and www.pge.com/tariffs. Information about rate options and copies of rate schedule tariffs are also available upon request by calling 1-800-743-5000.

NON-DISCLOSURE AND USE OF INFORMATION AGREEMENT
(CONCERNING WORK ADJACENT TO PG&E FACILITIES)

THIS AGREEMENT is by _____, _____
("Company") ("Undersigned")
an authorized employee of Company, (together, Company and Undersigned are sometimes referred to as the "Receiving Party"), and PACIFIC GAS AND ELECTRIC COMPANY ("PG&E").

Undersigned and Company agree as follows:

1. The Receiving Party acknowledges that in connection with construction work to be performed adjacent to, in the vicinity of, or that will be connected to PG&E's natural gas or electric facilities, or performing design or construction services on behalf of a new business applicant, the Receiving Party will be given access or provided with PG&E-technical information and materials, including but not limited to generated maps, job-specific construction drawings and specifications, Gas Applicant Design Manual, Electric Design Manual, Electric Underground Construction Manual, Electric Overhead Construction Manual , and other data which are owned by PG&E, its parent company, subsidiaries or affiliates, and/or owned by third parties and in the possession of or licensed to PG&E, and which constitute valuable confidential or proprietary information, know-how and trade secrets belonging to PG&E, its parent company, subsidiaries, affiliates and/or third parties (hereinafter referred to as "Proprietary Information").

2. In consideration of being made privy to the Proprietary Information, the Receiving Party hereby agrees to hold all such Proprietary Information in strict confidence and not to disclose it, or otherwise make it available, to any person or third party, including any affiliate of PG&E that produces energy or energy-related products or services, without the prior written consent of PG&E. The Receiving Party agrees that all Proprietary Information:

   (a) Shall be used only for the purpose of performing the design and/or construction of PG&E electric service and distribution facilities; and

   (b) Shall not be reproduced, copied, in whole or in part, except as specifically authorized by PG&E and in conformance with PG&E's instructions when necessary for the purposes set forth in (a) above; and

   (c) Shall, together with any copies, reproductions or other records thereof, in any form, and all information and materials developed by the Receiving Party therefrom, be returned to PG&E upon request when no longer needed for the performance of Receiving Party's work described in paragraph 1 above.

3. The Receiving Party hereby agrees that any third parties owning any confidential or proprietary information included in the Proprietary Information are express third party beneficiaries of this Agreement.

4. Receiving Party acknowledges that PG&E's construction and design manuals are updated periodically. Before proceeding with any final design or beginning construction, Receiving

Gas Sample Form No. 79-1047 Sheet 1
Authorization to Change Residential Rate NGV Home Refueling

Please Refer to Attached
Sample Form

AUTHORIZATION TO CHANGE RESIDENTIAL RATE NGV HOME REFUELING

Dear Customer:

Thanks for your interest in installing a Natural Gas Vehicle (NGV) Home Refueling Appliance (HRA) at your residence. Clean-burning NGVs are great for the environment and they help reduce our dependence on oil. We applaud your efforts in supporting a cleaner, healthier environment.

As a Pacific Gas and Electric Company residential customer, a special optional residential NGV rate is available to you. PG&E's gas Rate Schedule G1-NGV (Residential Natural Gas Service For Compression On Customers' Premises) is available to customers who own or lease a NGV for home use and have installed a HRA at their home. All you have to do is check one of the following options, complete the rest of the form, and fax or mail it to the contact below.

- ☐ Enroll me in the new optional residential NGV rate (G1-NGV[1])*. I understand that I will pay a fixed customer charge in addition to a lower per-therm charge for the gas I use. **All** the gas use at my residence will be charged at this rate.
- ☐ Do not change my rate. I would like to continue with my current residential rate* for all my gas use, including my NGV home refueling.

NAME:

MAILING ADDRESS:

DAYTIME PHONE NUMBER: ( ) __ __ __ - __ __ __ __

PG&E 10-DIGIT SERVICE ID #: __ __ __ __ __ __ __ __ __ __

(As it appears on your gas bill)

ADDRESS OF HRA INSTALLATION: _____

_____

By signing this affidavit, I hereby affirm all of the following:

- I currently own or lease a NGV for my home use and have installed a natural gas HRA at the above address.
- The HRA has been installed by a qualified contractor/installer and I have received all required city and/or county inspections. I have attached all required inspection forms.
- I understand that PG&E may require documents to support this affidavit at any time. Failure to provide documents may result in appropriate action, including suspension of gas service to my residence.
- I understand that, if I cease to meet the qualifications for service under PG&E's residential NGV rates, the gas service will be provided at the rates shown on my otherwise applicable residential gas rate schedule (i.e., G-1 – Residential Service or GL-1 – Residential CARE program Service) until I can demonstrate that my premise again meets the qualifications for service under PG&E's residential NGV gas rate schedules.
- I understand that this form at all times shall be subject to such modifications as the California Public Utilities Commission may direct from time to time in the exercise of its jurisdiction.

Additionally, I will notify PG&E within thirty (30) days if I no longer possess the NGV or HRA mentioned above.

Signature: _____ Date: _____

Mail this completed form to:

Pacific Gas and Electric Company
Stockton Records

AGREEMENT FOR UNMETERED LOW WATTAGE EQUIPMENT CONNECTED TO CUSTOMER-OWNED STREET LIGHT FACILITIES

This Agreement for Unmetered Low Wattage Equipment Connected to Customer-Owned Street Light Facilities ("Agreement") between (the "Customer") and Pacific Gas and Electric Company (the "Company") is to establish and govern the provisions of unmetered electric service provided by the Company for such low wattage equipment described in the Attachment A to this Agreement.

A. WHEREAS, such low wattage equipment will be owned operated and/or maintained either by Customer or by a third party acting on Customer's behalf or by third party having a business relationship with the Customer; and

B. WHEREAS, Customer intends to attach and energize such equipment to Customer-Owned street light facilities at various locations in its jurisdiction and within the Company's service territory, with the exception of Series street light circuits served above 480 volts; and

C. WHEREAS, in the Company's opinion, it would be impractical to install electric meters at the requested locations and for such equipment installed subject to this Agreement; and

D. WHEREAS, the consumption of electricity at such locations and for such equipment can be reasonably determined from Manufacturer's specifications and operating characteristics of the Customer where the load is 24 hour constant and of one hundred fifty (150) watts or less rated or average consumption on any one street light circuit; and

E. WHEREAS, pursuant to the Company's Electric Preliminary Statement Part A.6.a, Customer and the Company agree that, in lieu of installing meters at each location, the Company shall provide unmetered electric service for Customer's equipment in accordance with the following terms and conditions.

NOW, THEREFORE, in consideration of the terms, and covenants contained herein, Customer and Company hereby agree as follows:

1. Customer's use of the street light facilities and the equipment that is the subject of this Agreement are identified in the data sheets set forth in Attachment A (the "Equipment"). The Equipment will be installed by Customer on Customer-owned street light facilities with an energy connection on the Customer-owned street light or circuit wire. Each location will be grouped in a specific account, separate from the street light account, identified by either the city or unincorporated county where the Equipment is located for proper billing and accounting. The energy account will be billed on the Company's regular monthly billing cycle for unmetered loads. Billing of fixed usage shall be at the amount indicated in Paragraph 2.

2. Each piece of Equipment will be billed on Schedule A-1 or B-1- Small General Service with an appropriate single customer charge for the grouped account.

   a. Customer shall provide the Company with the Manufacturer's documentation on Equipment rating, documented average consumption and other information necessary to for Company to determine applicability to this Agreement prior to

AGREEMENT TO INSTALL APPLICANT REQUESTED COMMON SPECIAL FACILITIES - GAS AND ELECTRIC RULE 2

At the request of (Applicant), **Pacific Gas and Electric Company (PG&E),** hereby agrees, as an accommodation, to install at the Applicant's expense and within a reasonable time, Facilities (described in paragraph 1 herein) that are in addition to or in substitution for PG&E's standard facilities.

PG&E agrees to perform the requested work and furnish all necessary labor, equipment, materials and related facilities required therefore, subject to the following conditions:

1. The location and requested work are described as follows: (Describe in detail the materials and facilities to be furnished and/or work to be performed by PG&E. If more space is required, use other side and attach any necessary drawings as Exhibits):

   LOCATION:

   _____

   DESCRIPTION OF FACILITIES:

   _____

2. Applicant shall pay to PG&E, promptly upon demand by PG&E prior to construction, the additional cost over and above the standard equipment installation. In addition, Applicant shall pay for the ongoing maintenance and operation of that equipment through an Equivalent One Time Cost of Ownership payment which is the present worth of the monthly Cost of Ownership as specified in Electric and Gas Rule 2. The total costs are summarized as follows:

1. Special Facilities Additional Cost	_____
2. Equivalent One Time Cost of Ownership	_____
3. Facilities Rearrangement Cost	_____
4. Income Tax Component of Contribution (ITCC) for Costs 1, 3, 5 and 7[1]	_____
5.CPUC D.04-05-055 Line Extension Costs (PMC)	_____
6. Items not subject to ITCC	_____
7. Credit for Applicant provided work	_____
TOTAL DUE	_____

[1] The IRS taxes all contributions made by an applicant requesting utility service that benefits the applicant. Thus, PG&E collects from the applicant both the contribution and the income tax on that contribution at the rate shown in the Preliminary Statements of the Tariffs.

Electric Sample Form No. 79-1050 Sheet 1
Contract for Customer Provision of Physically Assured Load Reduction

Please Refer to Attached
Sample Form

CONTRACT FOR CUSTOMER PROVISION OF PHYSICALLY ASSURED LOAD REDUCTION

Pacific Gas and Electric Company hereinafter referred to as "PG&E" and _____, hereinafter referred to as “Customer” (collectively referred to as “Parties” or separately as the "Party").

1. RECITALS

WHEREAS, PG&E and Customer desire to enter into a contract for the provision of electric distribution service wherein the Customer will provide for physically assured load reduction (“Load Reduction”) based on either the availability of the installed capacity (the “Capacity”) of a distributed generation facility (“DG”) at the Customer’s site(s) or by Load Reduction if the full Capacity is unavailable.

NOW, THEREFORE, THE PARTIES AGREE AS FOLLOWS:

2. APPLICABILITY

The rates set forth in this Contract shall apply only to PG&E's electric distribution rates and reservation charges for service to Customer located at _____, City/County of_____. This Contract shall be applicable to those customers that can provide physical assurance for Load Reduction at any time the Customer’s DG is not operating at full Capacity. An equal amount of Customer load to the DG capacity would be interrupted to prevent adverse consequences to the distribution system and to other customers.

3. TERM AND TERMINATION

3.1 Term

The initial term of this Agreement shall be for a period of one (1) year from the date the standby service under this Agreement is first made available to Customer as such date is established in PG&E's records and shall continue thereafter from year to year. This Contract shall become effective on _____; provided, however, the rates set forth in Section 4 hereof shall not be effective until Customer can provide for physically assured load reduction as defined in Section 5.1 hereof.

3.2 Termination

Either party may terminate this Contract at the end of each one (1) year term by providing notice in accordance with Section 11.2. Such notice shall provide PG&E enough time to design and install any necessary distribution system upgrades to accommodate the additional load, and shall be determined on a case-by-case basis depending on current local lead-times. In addition, in accordance with section 6.1 below, either party may terminate this Contract during any year by giving written notice of termination in the event that the other party commits any material default under this Contract which, if capable of being remedied, is not remedied in accordance with the process set out in section 6.1.

† Information collected on this form is used in accordance with PG&E’s Privacy Policy. The Privacy Policy is available at pge.com/privacy.

Generating Facility Interconnection Agreement (Multiple Tariff)

Please Refer to Attached
Sample Form

GENERATING FACILITY INTERCONNECTION AGREEMENT (MULTIPLE TARIFF)

This *Generating Facility Interconnection Agreement (Multiple Tariff)* (Agreement) is entered into by and between _____ (Producer), and Pacific Gas and Electric Company (PG&E) a California Corporation. Producer and PG&E are sometimes also referred to in this Agreement jointly as "Parties" or individually as "Party." In consideration of the mutual promises and obligations stated in this Agreement and its attachments, the Parties agree as follows:

1. SCOPE AND PURPOSE

This Agreement provides for Producer to interconnect and operate a Generating Facility in parallel with PG&E's Distribution System to serve the electrical loads at the location identified in Section 2.4 (or for the qualifying energy where permitted under Section 218 of the California Public Utilities Code (PUC). The Generating Facility may be any combination of generators, but must include at least one "Eligible customer-generator." Eligible customer-generators consist of any Renewable Electrical Generation Facility(ies) (as defined in PG&E's Schedule NEM) or Eligible Fuel Cell Electrical Generating Facility(ies) (as defined in PG&E's Schedule NEMFC).

1.1. This Agreement provides for Producer to operate the Eligible Generator(s) pursuant to the provisions of Section 2827 et seq. of the PU Code and the applicable PG&E tariffs for net energy metering. This Agreement also provides for Producer to operate its Non-Eligible Generator(s). This Agreement does not provide for retail electrical service by PG&E to Producer. Such arrangements must be made separately between PG&E and Producer.

1.2. This Agreement does not address Producer's account billing and payment for energy consumption. For the Generating Facility as specified in Section 2 of this Agreement, please refer to the applicable PG&E net-energy-metered (NEM) tariff schedules for billing and payment protocol.

1.3. NEM Transition - Customers receiving service on the current NEM tariff prior to the date that PG&E reaches its NEM Cap or July 1, 2017, whichever is earlier are subject to the NEM Transition Provisions outlined in Rate Schedule NEM. Please see Rate Schedule NEM at: https://www.pge.com/tariffs/assets/pdf/tariffbook/ELEC_SCHEDS_NEM.pdf for more details.

2. SUMMARY AND DESCRIPTION OF PRODUCER'S GENERATING FACILITY

2.1 A description of the Generating Facility, including a summary of its significant components and a single-line diagram showing the general arrangement of how Producer's Generating Facility and loads are interconnected with PG&E's Distribution System, are attached to and made a part of this Agreement. (Supplied by Producer as Appendix A).

Electric Sample Form No. 79-1069-02 Sheet 1
Generating Facility Interconnection Agreement (Multiple Tariff NEM2MT)

Please Refer to Attached Sample Form

GENERATING FACILITY INTERCONNECTION AGREEMENT (MULTIPLE TARIFF NEM2MT)

This *Generating Facility Interconnection Agreement (Multiple Tariff NEM2MT)* (Agreement) is entered into by and between _____ (Producer), and Pacific Gas and Electric Company (PG&E) a California Corporation. Producer and PG&E are sometimes also referred to in this Agreement jointly as "Parties" or individually as "Party." In consideration of the mutual promises and obligations stated in this Agreement and its attachments, the Parties agree as follows:

1. SCOPE AND PURPOSE

This Agreement provides for Producer to interconnect and operate a Generating Facility in parallel with PG&E's Electric System to serve the electrical loads at the location identified in Section 2.4 (or for the qualifying energy where permitted under Section 218 of the California Public Utilities Code (PUC). The Generating Facility must be a combination of generators, but must include at least one NEM2 "Eligible customer-generator." (as defined in PG&E's Schedule NEM2). "Eligible customer-generator" may also include other eligible customer-generators such as NEM2 Renewable Electrical Generation Facility(ies), Renewable Electrical Generation Facility(ies) (as defined in PG&E's Schedule NEM) or Eligible Fuel Cell Electrical Generating Facility(ies) (as defined in PG&E's Schedule NEMFC), as allowed under Special Condition 4 of Schedule NEM2.

1.1. This Agreement provides for Producer to operate the Eligible Generator(s) pursuant to the provisions of Section 2827.1 et seq. of the PU Code and the applicable PG&E tariffs for net energy metering. This Agreement also provides for Producer to operate its Non-Eligible Generator(s). This Agreement does not provide for retail electrical service by PG&E to Producer. Such arrangements must be made separately between PG&E and Producer.

1.2. This Agreement does not address Producer's account billing and payment for energy consumption. For the Generating Facility as specified in Section 2 of this Agreement, please refer to the applicable PG&E net-energy-metered (NEM and/or NEM2) tariff schedules for billing and payment protocol.

2. SUMMARY AND DESCRIPTION OF PRODUCER'S GENERATING FACILITY

2.1 A description of the Generating Facility, including a summary of its significant components and a single-line diagram showing the general arrangement of how Producer's Generating Facility and loads are interconnected with PG&E's Electric System, are attached to and made a part of this Agreement. (Supplied by Producer as Appendix A).

Electric Sample Form No. 79-1070 Sheet 1

Export Addendum to Generating Facility Interconnection Agreement
for Non-Export Generating Facilities (Form 79-973) Sized 2 Megawatts or Less

Please Refer to Attached
Sample Form

EXPORT ADDENDUM TO GENERATING FACILITY INTERCONNECTION AGREEMENT FOR NON-EXPORT GENERATING FACILITIES (FORM 79-973) SIZED 2 MEGAWATTS OR LESS

Pacific Gas and Electric Company (PG&E), a California Corporation, and _____ _____ _____ (Customer) hereby enter into this Addendum to the Generation Facility Interconnection Agreement for Non-Export Generating Facilities (GFIA) (Form 79-973) between PG&E and Customer. Customer and PG&E are sometimes referred to in this Addendum jointly as "Parties" or individually as "Party." The Parties agree as follows:

1. PURPOSE AND SCOPE

1.1. This Addendum represents mutual agreement between PG&E and Customer to provide for Export as described in Section 1.3 below, notwithstanding Section 5.1 of the GFIA.

1.2. This Addendum shall apply to Customer's Generating Facility that is 2 megawatts (MW) or less provided that the Generating Facility otherwise satisfies all other applicable requirements of PG&E's Electric Rule 21.

1.3. For purposes of this Addendum, Export is defined as the uncompensated and unscheduled flow of electrical energy from Customer's Generating Facility onto PG&E's Distribution System. The Export shall fully comply with Section 3 of this Addendum. Customer agrees that such Export is solely for Customer's operating convenience and understands that there will be no compensation made by PG&E, or third parties, for such Export. Customer understands that it is obligated to manage Export in compliance with current and future guidelines established by regulatory agencies having jurisdiction over such Export.

1.4. All other capitalized terms used and not defined herein, whether in singular or plural, shall have the meanings assigned to them in PG&E's Electric Rule 21.

2. TERM AND TERMINATION

2.1. This Addendum shall become effective as of the later of the effective date of the GFIA or the last date entered in Section 5 of this Addendum.

2.2. This Addendum shall continue in full force and effect until termination of the GFIA, or unless terminated in accordance with Section 4.2 of this Addendum.

Electric Sample Form No. 79-1075 Sheet 1

Notice to Add or Delete Customers Participating in the Capacity Bidding Program

Please Refer to Attached Sample Form

NOTICE TO ADD OR DELETE CUSTOMERS PARTICIPATING IN THE CAPACITY BIDDING PROGRAM

Instructions: Aggregators and Customers use this notice to officially notify Pacific Gas and Electric Company (PG&E) of their intent to add or delete PG&E customers from the Aggregator's CBP portfolio and are required to attest to whether they have a Prohibited Resource, and if they do, whether they intend to use the resource to reduce load during a demand response (DR) event.

PG&E may verify the information on this notice with the Customer.

Aggregator Company Name:	

This notice adds or deletes a customer's Service Agreements from the Aggregator's CBP portfolio. PG&E will review and approve each Service Agreement to be added to determine if it meets the minimum requirements as specified in Schedule E-CBP. PG&E must approve each Service Agreement before the Service Agreement can be included in an Aggregator's portfolio. Additions to the portfolio will be effective upon PG&E's approval date. Deletions from the portfolio will be effective at the end of the current calendar month in which this notice is received provided PG&E receives this notice at least 15 calendar days prior to the end of the current month.

By signing this notice, Aggregator and Customer understand that the Aggregator has the authority to act on behalf of the Customer in connection with the CBP for the Customer's Service Agreements shown below. Such authority is subject to the applicable terms and conditions of Schedule E-CBP and the Agreement For Aggregators Participating In The Capacity Bidding Program (Form 79-1076).

Customer designates the above-named Aggregator to act on its behalf as its Aggregator pursuant to Schedule E-CBP for all purposes, including, but not limited to, the receipt of payments, the payment of penalties, if any, and the receipt of all notices sent by PG&E under the E-CBP program.

Customer understands that PG&E will provide its electric usage and electric meter data for the Service Agreements to Aggregator so Aggregator can determine the payment payable to and penalties chargeable to Customer under Schedule E-CBP. Customer also agrees to allow personnel from the California Energy Commission (CEC), PG&E, and their contracting agents, reasonable access to conduct a site visit for measurement and evaluation, access to the Customer's interval meter data, and agree to complete any surveys needed to enhance this program.

Customer acknowledges that Aggregator is not PG&E's agent for any purpose. PG&E shall not be liable to the Customer for any damages resulting from any acts, omissions, or representations made by Aggregator in connection with Aggregator's solicitation of Customer or with the Aggregator's performance any of its functions in the CBP. PG&E shall not be liable to Customer for any damages caused to the Customer by any failure by Aggregator to comply with PG&E's tariffs or for any damages caused by Aggregator's failure to perform any commitment to the Customer.

This agreement at all times shall be subject to such modifications as the California Public Utilities Commission may direct from time to time in the exercise of its jurisdiction

Electric Sample Form No. 79-1076 Sheet 1
Agreement for Aggregators Participating in the Capacity Bidding Program

Please Refer to Attached Sample Form

AGREEMENT FOR AGGREGATORS PARTICIPATING IN THE CAPACITY BIDDING PROGRAM

This Agreement (Agreement) for Aggregators participating in the Capacity Biding Program (CBP) is entered into by and between Pacific Gas and Electric Company (PG&E), a California corporation, and_____ (Aggregator),

a _____. PG&E and Aggregator may sometimes be referred to herein as a "Party" and collectively as the "Parties".

WHEREAS, the California Public Utilities Commission (CPUC) has authorized the CBP, a capacity bidding program as set forth in PG&E's Schedule E-CBP, (Schedule E-CBP), which is attached hereto as **Attachment A** and incorporated herein by this reference, whereby PG&E pays eligible Aggregators for participating in the CBP; and

WHEREAS, the CPUC has authorized the participation of Aggregators in the CBP, and Aggregator desires to participate in the CBP subject to the applicable PG&E tariff rules and rate schedules.

NOW, THEREFORE, in consideration of the mutual undertakings set forth below, the Parties agree as follows:

I. AGGREGATOR'S OBLIGATIONS

A. Status; Subject to Applicable PG&E Tariffs. Aggregator's status in the CBP shall be as an "Aggregator" under Schedule E-CBP. Aggregator shall be subject to all applicable tariff rules and regulations (which rules and regulations are hereby incorporated herein as an integral part of this Agreement), including, but not limited to, the rates, terms and conditions set forth in Schedule E-CBP, as such rules and regulations may be amended from time to time.

B. Representation of Customers. Aggregator shall represent those customers in PG&E's electric service territory eligible to participate in the CBP, who have elected to participate through Aggregator with respect to such customer's service agreement(s), by having appropriate contractual or other arrangements with each such eligible customer whereby such customer authorizes Aggregator, as its representative, to receive payments and to pay penalty charges on behalf of such customer in connection with the customer's participation, through Aggregator, in the CBP. Aggregator shall be solely responsible for having the appropriate contractual or other arrangements with each customer whom Aggregator represents in the CBP. PG&E shall not be responsible for monitoring, auditing, reviewing or enforcing such arrangements. Aggregator acknowledges and agrees that, in its representation of PG&E customers for the CBP, Aggregator is subject to the terms and conditions of Schedule E-CBP and this Agreement.

C. Aggregator Service Establishment. Aggregator must submit an executed Agreement for Aggregators Participating in the CBP. The Agreement becomes effective upon execution by PG&E.

D. Required Notice to Add or Delete Customers. Once Aggregator has entered into the appropriate contractual or other arrangements with each customer whom Aggregator represents in the CBP, Aggregator can deliver to PG&E a "Notice to Add or Delete Customers Participating in the Capacity Bidding Program" in the form attached hereto as **Attachment B**, adding such customer's service

AGREEMENT FOR UNMETERED ELECTRIC SERVICE TO DEVICES CONNECTED TO PACIFIC GAS AND ELECTRIC COMPANY'S STREET LIGHT FACILITIES

This Agreement for Unmetered Electric Service to Devices Connected to Pacific Gas and Electric Company's Street Light Facilities (Agreement) between _____ (Customer) and Pacific Gas and Electric Company (the Company) is to establish and govern the provisions of unmetered electric service provided by the Company at the locations reported for security devices and wireless communication equipment described in the attachments to this Agreement.

A. WHEREAS, such equipment will be owned, operated and/or maintained by Customer;

B. WHEREAS, Customer intends to energize such equipment by connecting to Company-owned street light facilities consisting of a street light with an exposed (external) photocell control mounted on a distribution pole or on a dedicated street light pole by means of a bracket or support arm, where PG&E has ownership interest in and maintenance responsibility for the pole, luminaire, support arm, control facility and internal wiring at various locations within the Company's service territory, where the lighting facilities are not a particular aesthetic selection by the street light customer of record and with the exception of series street light circuits served above 480 volts; and

C. WHEREAS, in the Company's opinion, it would be impractical to install electric meters at the requested locations and for such equipment installed subject to this Agreement; and

D. WHEREAS, the consumption of electricity at such locations and for such equipment can be reasonably determined from Manufacturer's specifications and operating characteristics of the Customer where the load is 24 hour constant and of one hundred fifty (150) watts or less rated or average consumption on any one street light circuit; and

E. WHEREAS, pursuant to the Company's Electric Preliminary Statement Part A.6.a, Customer and the Company agree that, in lieu of installing meters at each location, the Company shall provide unmetered electric service for Customer's equipment in accordance with the following terms and conditions.

NOW, THEREFORE, in consideration of the terms, and covenants contained herein, Customer and Company hereby agree as follows:

† Information collected on this form is used in accordance with PG&E's Privacy Policy. The Privacy Policy is available at pge.com/privacy.

ELECTRIC SAMPLE FORM NO. 79-1079 Sheet 1
AGREEMENT FOR AGGREGATORS PARTICIPATING IN THE BASE INTERRUPTIBLE PROGRAM

Please Refer to Attached Sample Form

AGREEMENT FOR AGGREGATORS PARTICIPATING IN THE BASE INTERRUPTIBLE PROGRAM

This Agreement (Agreement) for Aggregators participating in the Base Interruptible Program (BIP) is entered into by and between Pacific Gas and Electric Company (PG&E), a California corporation, and _____ (Aggregator), a _____. PG&E and Aggregator may sometimes be referred to herein as a "Party" and collectively as the "Parties".

WHEREAS, the California Public Utilities Commission (CPUC) has authorized PG&E's Schedule E-BIP, (Schedule E-BIP), which is attached hereto as **Attachment A** and incorporated herein by this reference, whereby PG&E pays eligible Aggregators for participating in the BIP; and

WHEREAS, the CPUC has authorized the participation of Aggregators in BIP, and Aggregator desires to participate in the BIP subject to the applicable PG&E tariff rules and rate schedules.

NOW, THEREFORE, in consideration of the mutual undertakings set forth below, the Parties agree as follows:

I. AGGREGATOR'S OBLIGATIONS

A. Status; Subject to Applicable PG&E Tariffs. Aggregator's status in the BIP shall be as an "Aggregator" under Schedule E-BIP. Aggregator shall be subject to all applicable tariff rules and regulations (which rules and regulations are hereby incorporated herein as an integral part of this Agreement), including, but not limited to, the rates, terms and conditions set forth in Schedule E-BIP, as such rules and regulations may be amended from time to time.

B. Representation of Customers. Aggregator shall represent those customers in PG&E's electric service territory eligible to participate in the BIP, who have elected to participate through Aggregator with respect to such customer's service agreement(s), by having appropriate contractual or other arrangements with each such eligible customer whereby such customer authorizes Aggregator, as its representative, to receive payments and to pay penalty charges on behalf of such customer in connection with the customer's participation, through Aggregator, in the BIP. Aggregator shall be solely responsible for having the appropriate contractual or other arrangements with each customer whom Aggregator represents in the BIP. PG&E shall not be responsible for monitoring, auditing, reviewing or enforcing such arrangements. Aggregator acknowledges and agrees that, in its representation of PG&E customers for the BIP, Aggregator is subject to the terms and conditions of Schedule E-BIP and this Agreement.

C. Aggregator Service Establishment. Aggregator must submit an executed Agreement for Aggregators Participating in the BIP. The Agreement becomes effective upon execution by PG&E.

D. Required Notice to Add or Delete Customers. Once Aggregator has entered into the appropriate contractual or other arrangements with each customer whom Aggregator represents in the BIP, Aggregator shall deliver to PG&E a "Notice to Add or Delete Customers Participating in the Base Interruptible Program" in the form attached hereto as **Attachment B**, adding such customer's service agreement(s) to Aggregator's portfolio. The Notice shall be executed by the Aggregator and each affected customer. Aggregator shall notify PG&E that it has dropped a customer service agreement from its portfolio by delivering to PG&E a "Notice to Add or Delete Customers Participating in the Base Interruptible Program" signed by customer and Aggregator. Aggregator shall deliver such Notices to PG&E as specified in the Notice.

ELECTRIC SAMPLE FORM NO. 79-1080 Sheet 1

NOTICE TO ADD OR DELETE CUSTOMERS PARTICIPATING IN THE BASE INTERRUPTIBLE PROGRAM

Please Refer to Attached Sample Form

NOTICE TO ADD OR DELETE CUSTOMERS PARTICIPATING IN THE BASE INTERRUPTIBLE PROGRAM

Instructions: Aggregators and Customers use this notice to officially notify Pacific Gas and Electric Company (PG&E) of their intent to add or delete PG&E customers from the Aggregator's BIP portfolio and are required to attest to whether they have a Prohibited Resource, and if they do, whether they intend to use the resource to reduce load during a demand response (DR) event .

PG&E may verify the information on this notice with the Customer.

Aggregator Company Name:	

This notice adds or deletes a customer's Service Agreement(s) (SA) from the Aggregator's BIP portfolio. PG&E will review and approve each SA to be added to determine if it meets the minimum requirements as specified in Schedule E-BIP. PG&E must approve each SA before it can be included in an Aggregator's portfolio. Additions to the portfolio will be effective upon PG&E's approval date.

By signing this notice, Aggregator and Customer understand that the Aggregator has the authority to act on behalf of the Customer in connection with the BIP for the Customer's Service Agreements shown on the next page. Such authority is subject to the applicable terms and conditions of Schedule E-BIP and the Agreement For Aggregators Participating In Base Interruptible Program (Form 79-1079).

Customer designates the above-named Aggregator to act on its behalf as its Aggregator pursuant to Schedule E-BIP for all purposes, including, but not limited to, the receipt of payments, the payment of penalties, if any, and the receipt of all notices sent by PG&E under the program.

Customer understands that PG&E will provide its electric usage and electric meter data for the Service Agreements to Aggregator so Aggregator can determine the payment payable to and penalties chargeable to Customer under Schedule E-BIP. Customer also agrees to allow personnel from the California Energy Commission (CEC), PG&E, and their contracting agents, reasonable access to conduct a site visit for measurement and evaluation, access to the Customer's interval meter data, and agree to complete any surveys needed to enhance this program.

Customer acknowledges that Aggregator is not PG&E's agent for any purpose. PG&E shall not be liable to the Customer for any damages resulting from any acts, omissions, or representations made by Aggregator in connection with Aggregator's solicitation of Customer or with the Aggregator's performance any of its functions in the BIP. PG&E shall not be liable to Customer for any damages caused to the Customer by any failure by Aggregator to comply with PG&E's tariffs or for any damages caused by Aggregator's failure to perform any commitment to the Customer.

This agreement at all times shall be subject to such modifications as the California Public Utilities Commission may direct from time to time in the exercise of its jurisdiction.

SA#:_____
PM#:_____
Notification#:_____
Other Agmts:_____

This supplemental agreement is made between _____ (Applicant), and PACIFIC GAS AND ELECTRIC COMPANY (PG&E), a California Corporation, and shall be made part of the_____ (Agreement), dated _____ between these two parties.

RECITALS:

Applicant recognizes that PG&E is required by its California Public Utilities Commission (Commission) authorized tariffs to design its gas facilities to provide adequate capacity to meet the maximum demands of Applicant's loads during normal, non-emergency, conditions. It is also understood that to achieve this degree of service reliability at Applicant's business facility, located at _____

_____, reinforcement work must be done to PG&E's existing system. Therefore, PG&E and Applicant agree as follows:

AGREEMENT:

1. At Applicant's request, PG&E will <u>not</u> reinforce its existing system to meet PG&E's design criteria. To avoid or reduce the costs of reinforcing PG&E's existing system, Applicant acknowledges that service may be subject to curtailments and agrees to a reduced level of service reliability during the period _____ to _____. This decreased service reliability may result in the curtailment, interruption, or reduction of gas service to the Applicant during periods in which Applicant's demand exceeds system capacity.

2. PG&E's ability to serve Applicant's load will be determined by load limiting devices (Device(s)) including but not limited to back pressure regulator(s) which, will limit the gas supplied to Applicant to the capacity available on PG&E's system. The Device(s) will be installed at Applicant's expense as a special facility (Form 79-1049). PG&E system conditions that will cause the Device(s) to operate are set forth as follows:

   _____
   _____
   _____
   _____
   _____ Applicant is also subject to additional curtailments as provided by PG&E's gas Rule 14 and the Agreement.

3. Applicant understands that all of the conditions and provisions specified in other agreements with PG&E remain in effect and that interruption or curtailment, due to the presence of the Device(s) do not excuse any of the charges associated with applicable rate schedules.

4. Applicant agrees that PG&E is not liable for any physical damage or property damage caused by the presence or operation of the Device(s).

Gas Sample Form No. 79-1090 Sheet 1
G-ESISP Service Agreement

Please Refer to Attached
Sample Form

G-ESISP SERVICE AGREEMENT

This G-ESISP Service Agreement is made by and between Pacific Gas and Electric Company (PG&E), a California Corporation, and _____ (Independent Storage Provider (ISP)), a(n) _____ and _____ (Customer), a(n) _____, (together referenced as "Parties").

Service Street: _____

Service City, State and Zip: _____

PG&E Service Point #: _____

NGSA Trans ID or CPBA Contract #: _____

1. PG&E will provide Exchange Service to the Customer per the provisions of Schedule G-ESISP.
2. The ISP agrees to interconnect with PG&E's metering facility in order to serve Customer.
3. Customer has built a pipeline from its facility that is interconnected with PG&E's metering facility.
4. Customer and the ISP agree to an Exchange Fee, as specified in Exhibit A to this Agreement, that applies to each therm of gas delivered to Customer or accepted from Customer through the PG&E metering facility that connects with Customer and the ISP facilities. Changes to the Exchange Fee must be agreed to by the ISP and Customer signing a new Exhibit A, and providing a copy to PG&E so it can effectuate the billing change.
5. Customer agrees to pay the Exchange Fee charges to PG&E per the billing, payment and collection provisions of PG&E's tariffs. PG&E agrees to pay the ISP the same Exchange Fee charges excluding PG&E's Revenue Fees and Uncollectible (RF&U) accounts expense.
6. For a Noncore End-Use Customer, Customer has signed a Natural Gas Service Agreement (NGSA) (Form 79-756) that includes service under Schedules G-NT or G-EG, as appropriate. For a California gas producer, Customer has signed a California Production Balancing Agreement (CPBA) (Gas Form 79-944), and signed any other agreement required for interconnecting with PG&E.
7. The ISP will use its storage services to provide the necessary balancing service for Customer. The ISP and Customer have signed an agreement for this service, including the charges.
8. The Customer or the ISP has provided or will provide PG&E a copy of its gas quality agreement, or of that section of the storage services agreement related to gas quality, with Customer within ten (10) days of signing.
9. Customer agrees that PG&E can share contemporaneously the Customer's metering and gas quality data with the ISP. The metering data will be provided to the ISP at the PG&E metering facility location.
10. The Effective Date of this agreement is the date that it has been signed by all Parties.

Gas Sample Form No. 79-1091 Sheet 1
G-ESISP Service Relocation Agreement

Please Refer to Attached
Sample Form

G-ESISP SERVICE RELOCATION AGREEMENT

This G-ESISP Service Relocation Agreement is made by and between Pacific Gas and Electric Company (PG&E) a California Corporation, and _____ (Customer), a(n) _____, is to address the situation if Exchange Service is terminated under a G-ESISP Service Agreement at the location(s) specified below.

Service Street: _____

Service City, State and Zip Code: _____

PG&E Service Point #: _____

NGSA Trans. ID or CPBA Contract #: _____

1. Should the use of the ISP facilities for Exchange Service be terminated for Customer or PG&E for any reason, or should the ISP or Customer facilities become, in PG&E's opinion, unsafe or unsuitable for service pursuant to good utility practice, PG&E will continue to provide service to Customer from a different location, if Customer wants to continue to receive service. In such circumstances:

   a. PG&E will relocate the point of service upon request, provided suitable rights of way are available, and Customer first pays to PG&E the cost of such relocation, as estimated by PG&E, per PG&E's applicable tariffs; and

   b. PG&E is hereby absolved of and from any and all liability to Customer for, and Customer shall indemnify PG&E, its officers, agents and employees against, any and all damage, whether to person or property or due to financial injury, including but not limited to financial injury from interruption to Customer's business operations, which Customer or any third party may suffer by reason of, or in any way connected with such discontinuance of service; and

   c. Customer shall hold harmless PG&E, its officers, agents, and employees, from and indemnify them against any liability, claim, or loss from damage to any property or injury to or death of any person or persons in any way arising from or connected with the service facilities owned by ISP or Customer, as the case may be, and used by Customer to receive service hereunder, and PG&E has no obligation with respect to the operation or maintenance thereof.

2. This agreement will not terminate if the G-ESISP Service Agreement is terminated.

3. This agreement at all times shall be subject to such modifications as the California Public Utilities Commission may direct from time to time in the exercise of its jurisdiction.

I, _____ (NAME) _____ (TITLE (IF APPLICABLE)

of _____ (NAME OF CUSTOMER OF RECORD) **(Customer) have the following mailing address**

_____ (MAILING ADDRESS) _____ (CITY) _____ (STATE) _____ (ZIP) **, and do hereby appoint**

_____ (NAME OF THIRD PARTY)

of

_____ (MAILING ADDRESS)

_____ (CITY) _____ (STATE) _____ (ZIP)

To act as my agent and consultant (Agent) for the listed account(s) and in the categories indicated below:

ACCOUNTS INCLUDED IN THIS AUTHORIZATION:

1. _____ (SERVICE ADDRESS) _____ (CITY) _____ (SERVICE ACCOUNT NUMBER)
2. _____ (SERVICE ADDRESS) _____ (CITY) _____ (SERVICE ACCOUNT NUMBER)
3. _____ (SERVICE ADDRESS) _____ (CITY) _____ (SERVICE ACCOUNT NUMBER)

(For more than three accounts, please list additional accounts on a separate sheet and attach it to this form)

INFORMATION, ACTS AND FUNCTIONS AUTHORIZED – This authorization provides authority to the Agent. The Agent must thereafter provide specific written instructions/requests (e-mail is acceptable) about the particular account(s) before any information is released or action is taken. In certain instances, the requested act or function may result in cost to you, the customer. Requests for information may be limited to the most recent 12 month period.

I (Customer) authorize my Agent to act on my behalf to perform the following specific acts and functions (initial all applicable boxes):

☐ 1. Request and receive billing records, billing history and all meter usage data used for bill calculation for all of my account(s), as specified herein, regarding utility services furnished by the Utility[1].

☐ 2. Request and receive copies of correspondence in connection with my account(s) concerning (initial all that apply):

- ☐ a. Verification of rate, date of rate change, and related information;
- ☐ b. Contracts and Service Agreements;
- ☐ c. Previous or proposed issuance of adjustments/credits; or
- ☐ d. Other previously issued or unresolved/disputed billing adjustments.

☐ 3. Request investigation of my utility bill(s).

☐ 4. Request special metering, and the right to access interval usage and other metering data on my account(s).

☐ 5. Request rate analysis.

☐ 6. Request rate changes.

☐ 7. Request and receive verification of balances on my account(s) and discontinuance notices.

1 The Utility will provide standard customer information without charge up to two times in a 12-month period per service account. After two requests in a year, I understand I may be responsible for charges that may be incurred to process this request.

PROPERTY MANAGEMENT AUTHORIZATION AGREEMENT

The Property Management Authorization agreement permits account holders who are property owners to specifically delegate certain rights to third parties who are agents for the property owner for the purposes of managing the property owner's PG&E account(s). The customer of record who is a property owner may permit his or her agent, such as a property manager, to receive information or transact business with PG&E on his or her behalf. The customer must specify what information the third party is entitled to receive, what if any act(s) the third party may transact on his/her behalf, and whether the authorization is being provided on a limited basis or on an indefinite basis. The customer of record may revoke or modify the designation of his or her agent for this purpose at any time by submitting a written request to PG&E.

Please complete and sign the attached form "Property Management Authorization Agreement" and mail to:

Pacific Gas & Electric Company
Property Manager Authorization Department
P.O. Box 24047
Fresno, CA 93706-2010

Fax to:

☐ _____

REFERENCE:

_____
_____
_____
_____
_____

ELECTRIC RULE 21 - AGREEMENT TO INSTALL APPLICANT REQUESTED NGOM SPECIAL FACILITIES FOR SOLAR PERFORMANCE METERING

At the request of _____("Applicant"), Applicant and **Pacific Gas and Electric Company (PG&E)** hereby enter into this agreement ("Agreement") for the installation of solar generation performance metering equipment, also known as net generation output metering ("NGOM"), to support Applicant's participation in the California Solar Initiative ("CSI") Program. NGOM is required by the California Public Utilities Commission ("CPUC") for participation in the CSI Performance Based Incentive ("PBI") payment structure, and may also be installed to provide Applicant information on Applicant's solar generating system's performance. This Agreement will commence the later of: (1) the date of Agreement's execution; or (2) the date of the first CSI payment.

PG&E agrees to perform the requested work and furnish all necessary labor, equipment, materials, services, and related facilities required therefore, subject to the following conditions:

1. The location and requested work are described as follows: (A detailed description of the materials and facilities to be furnished and/or work to be performed by PG&E is provided below. This includes any data communication and processing services provided by PG&E and/or its selected communication vendors.)

   SERVICE ADDRESS:

   _____

   DESCRIPTION OF FACILITIES (Special Facilities):

   _____

2. Prior to Special Facilities installation, Applicant shall pay to PG&E, promptly upon demand the cost of the equipment installation. In addition, Applicant shall pay for the ongoing maintenance and operation of that equipment in perpetuity (Cost-of-Ownership, COO), and for on-going performance data communication and processing services required for PBI payment calculation and processing through an Equivalent One Time payment based upon the appropriate present-worth-factor ("PWF"). Applicant waives its right to elect the "actual" cost option under Rule 21, and PG&E will use the "estimated" cost option in determining costs. As rearrangement (PG&E service re-configuration following NGOM removal) and meter removal costs are paid by Applicant prior to construction, there will be no true-up upon termination of Agreement, and for the purpose of calculating Applicant's charges under Agreement, a salvage value of zero will be assigned to the meter and other PG&E equipment removed upon termination.

   Performance Data Provider ("PDP") services, if required, will coincide with the 5-year PBI payment schedule. However, Applicants who change their PDP during the 5-year incentive payment term may alternatively select 1, 2, 3, or 4 years of PDP service from PG&E, depending on the length of term remaining on their PBI incentive payment schedule. PDP service provided pursuant to Agreement includes remote communication and collection of

Bill Calculation Service Agreement

Please Refer to Attached Sample Form

BILL CALCULATION SERVICE AGREEMENT

Pacific Gas and Electric Company (PG&E) and _____(Customer), Service Account Number(s) _____ served under Schedule _____("Applicable Tariff") hereby enter into this Bill Calculation Service Agreement (Agreement) for the provision of fee-based bill calculation services. The purpose of this Agreement is for PG&E to provide bill calculation services for sub-metered tenants of Customer in accordance with the rates applicable to PG&E's residential customers. Customer and PG&E shall be individually referred to herein as a "Party" and collectively as the "Parties."

Section 1: Service Description

1.1 To utilize PG&E bill calculation services, Customer must complete an application and agree to provide required tenant information identified below as: 1.1 a – d.

PG&E shall provide Customer password protected internet access allowing the Customer to transmit Customer's sub-metered tenant data to PG&E. Customer shall provide the following data for each sub-metered tenant for Customer's Service Account(s):

a) sub-metered tenant's identification number or address

b) sub-metered tenant's rate schedule

c) sub-metered tenant's billing period (e.g. beginning and ending dates)

d) sub-metered tenant's gas and/or electric meter reads.

1.2 PG&E shall calculate the sub-metered tenants' bills under the specified rate schedules in effect during the billing periods specified by Customer.

1.3 Should Customer determine that a sub-metered tenant's energy charges need to be recalculated because of incorrect information submitted by Customer to PG&E, Customer shall resubmit the data listed in Section 1.1. Each bill calculation request will result in a corresponding transaction charge to be paid by Customer according to the charges specified in the Applicable Tariff. The Customer will not be charged for additional calculations required due to errors made by PG&E.

† Information collected on this form is used in accordance with PG&E's Privacy Policy. The Privacy Policy is available at pge.com/privacy.

AGREEMENT FOR UNMETERED ELECTRIC SERVICE TO SEASONAL LIGHTING LOADS CONNECTED TO FESTOON OUTLETS ON PACIFIC GAS AND ELECTRIC COMPANY'S STREET LIGHT FACILITIES

This Agreement for Unmetered Electric Service to Seasonal Lighting Loads Connected to Festoon Outlets on Pacific Gas and Electric Company's Street Light Facilities (Agreement) between _____ (Customer) and Pacific Gas and Electric Company (the Company) is to establish and govern the provisions of unmetered electric service provided by the Company at the locations reported for seasonal decorative equipment connected to street light facilities through festoon outlets.

A. WHEREAS, such seasonal decorative equipment will be owned, operated and/or maintained by Customer; and

B. WHEREAS, the Company historically owns, operates and maintains street light circuits with existing festoon receptacles designed to allow seasonal decorative lighting to be attached and energized; and

C. WHEREAS, Customer intends to energize such equipment by connecting to Company-owned street light facilities through festoon outlet receptacles located a minimum of nine (9) feet above grade at the base of the pole or post; and

D. WHEREAS, in the Company's opinion, it would be impractical to install electric meters at the requested locations and for such equipment installed subject to this Agreement; and

E. WHEREAS, the consumption of electricity at such locations and for such equipment can be reasonably determined from Manufacturer's specifications and operating characteristics of the Customer where the load is controlled by a timer (where timer is not accessible by pedestrians) or is 24 hour constant and of one hundred fifty (150) watts or less rated load on any one street light; and

F. WHEREAS, pursuant to the Company's Electric Preliminary Statement Part A.6.a, Customer and the Company agree that, in lieu of installing meters at each location, the Company shall provide unmetered electric service for Customer's equipment in accordance with the following terms and conditions.

NOW, THEREFORE, in consideration of the terms, and covenants contained herein, Customer and Company hereby agree as follows:

1. Customer's equipment that is the subject of this Agreement is identified in the data sheets set forth in Attachment A (Equipment). The Equipment will be installed by Customer on the facilities described in Recital Paragraph C above with an energy connection on the Company-owned street light circuit. Each location will be grouped in a specific account, separate from the street light account, identified by either the city or unincorporated county where the Equipment is located for proper billing and accounting. The energy account will be billed on the Company's regular monthly billing cycle for unmetered loads. Billing of fixed usage shall be at the amount indicated in Paragraphs

Virtual Net Energy Metering Application and Interconnection Agreement for the
Building Owner of Multifamily Affordable Housing with a Solar Generating Facility of 1 Megawatt or Less

Please Refer to Attached
Sample Form

Pacific Gas and Electric Company®

NEMVMASH

Virtual Net Energy Metering Application and Interconnection Agreement for the Building Owner of Multifamily Affordable Housing with a Solar Generating Facility of 1 Megawatt or Less

Please note that this agreement does not constitute an application for **rebate** and/or **incentive programs**. For more information on these programs and their specific applications, please contact PG&E by phone, or by email using the subject "solar energy" at smarter-energy@pge.com, 1-800-933-9555 (residential) or BusinessCustomerHelp@pge.com, 1-800-468-4743 (commercial/industrial).

For more information on the , Multifamily Affordable Solar Housing (MASH) or the New Solar Homes Partnership (NSHP) for affordable housing, please go to www.pge.com/csi where you will find information about the program, including the program handbook, reservation request forms with the program contract as well as a list of requirements, FAQ's and resources. For additional questions about the California Solar Initiative (CSI), MASH or the NSHP, contact PG&E at solar@pge.com.

This *VIRTUAL NET ENERGY METERING APPLICATION AND INTERCONNECTION AGREEMENT FOR THE BUILDING OWNER OF MULTIFAMILY AFFORDABLE HOUSING WITH A SOLAR GENERATING FACILITY OF 1 MEGAWATT OR LESS* (Agreement) applies to electric rate schedule *NEMVMASH*[1]*, Virtual Net Energy Metering Service for Multifamily Affordable Solar Housing* for the Owner or designated agent of the Owner (Owner) who interconnects a solar electric Generating Facility with an capacity of 1 megawatt (1,000 kW) or less that is located on Owner's existing buildings that received incentives under PG&E's California Solar Initiative (CSI) Multifamily Affordable Solar Housing (MASH) Program or on the Owner's new, "Affordable Housing" as defined in Public Resource Code section 25401.6** that received incentives under the New Solar Homes Partnership (NSHP) Program in PG&E's service territory, and that operates in parallel with Pacific Gas and Electric Company's (PG&E) Distribution System.

The purpose of this Agreement is to allow Owner to interconnect a solar electric generating facility with PG&E's Distribution System, subject to the provisions of this Agreement and PG&E's rate schedule NEMVMASH. Owner has elected to interconnect and operate its solar electric Generating Facility in parallel with PG&E's Distribution System, primarily to offset part or all of the Owner's Multifamily Affordable Solar Housing's own electrical requirements at the affiliated service points as listed in Appendix A. Owner shall comply at all times with this Agreement as well as with all applicable laws, tariffs and applicable requirements of the Public Utilities Commission of the State of California.

B. Guidelines and Steps for Interconnection

This Application and Agreement must be completed and sent to PG&E along with a completed Supplemental Data Collection Form for Net Energy Metered Generating Facilities to initiate PG&E's interconnection review of the proposed Generating Facility.

[1] Formerly referred to as Rate Schedule NEMVNMA – See Advice Letter 3890-E regarding name change.

ELECTRIC SAMPLE FORM 79-1111 Sheet 1
OPTIMAL BILLING PERIOD SERVICE ELECTION FORM

Please Refer to Attached Sample Form

OPTIMAL BILLING PERIOD SERVICE ELECTION FORM

The undersigned Customer hereby acknowledges and agrees to all terms and conditions specified.

1. Eligibility

Customers taking service on PG&E's Schedule AG, "Time-of-Use Agricultural Power", Rate AG-C, Schedule E-19 or B-19, "Medium General Demand Metered Time-of-Use Service," or Schedule E-20 or B-20, "Service to Customers with Maximum Demands of 1,000 Kilowatts or More," may elect the Optimal Billing Period (OBP) service, subject to program availability, and the qualifying eligibility terms and conditions specified below and in the applicable tariffs.

2. By electing the Optimal Billing Period (OBP) service, customer declares it has reviewed and meets all eligibility requirements as described in the customer's applicable electric rate schedules: PG&E's electric rate Schedule AG, Special Condition 16 – *Optimal Billing Period Service*, PG&E's electric rate Schedule E-19 or B-19, Special Condition 20 – *Optimal Billing Period Service*, or in PG&E's electric rate Schedule E-20 or B-20, Special Condition 18 – *Optimal Billing Period Service.*

3. Terms and Conditions

The initial term of this Agreement shall be for a period of one (1) year from the date executed by PG&E. This Agreement shall continue thereafter for successive terms of one (1) year, provided, however, that either party shall have the right to terminate this Agreement at the expiration of the initial one (1) year term or anytime thereafter upon thirty (30) days written notice to the other party. However, if a customer terminates this agreement between anniversary dates, there shall be no entitlement to a refund for any portion of the most recent OBP fee payment to PG&E. Once terminated, the Customer will not be eligible for OBP service for twelve (12) months from the termination date. Should this OBP program terminate, PG&E reserves the right to terminate all Agreements upon the expiration date of the OBP service.

4. Designation of Subject Months

The Customer designates the six consecutive months of _____, _____, _____, _____, _____, and _____ as the high seasonal optimal billing period.

5. Annual Qualification

Customers must continue to meet the eligibility requirements stated in Section 1, above, to qualify for OBP service in subsequent one-year term(s).

6. Customer Notification to PG&E

The customer must notify PG&E via email and shall state in its subject line "OBP Notification" of its elected production start and/or end dates of the OBP service. The designation may not be implemented if it is not received or if it does not contain the specified information. A participating customer must email PG&E at least seventy-two (72) hours in advance of elected date(s). The customer should send emails to the following address: OptimalBillingNotifi@pge.com.

Project Mgr.:_____

AGREEMENT TO PERFORM TARIFF SCHEDULE RELATED WORK - RULE 20A ELECTRIC PANEL SERVICE CONVERSION

City/County of _____, (Applicant) has requested PACIFIC GAS AND ELECTRIC COMPANY, a California corporation (PG&E) to perform the tariff scheduled related work as located and described herein.

Electric Panel Service Conversion Program:

In order to expedite the completion of Rule 20A Projects, PG&E has offered to manage the electric service conversions, and pay for this work from the Applicant's allocation funds. The underground electric feed that replaces the existing overhead service will be installed in the most economical manner possible, as determined by PG&E. To ensure the success of this program, the Applicant agrees to support the Electric Panel Service Conversion Program as follows:

Responsibilities of the Applicant:

1. Provide accurate list of owner, parcel #, address, phone number.
2. Mail informational letters to all residents describing the program and their responsibilities.
    a. PG&E will provide templates for these letters.
3. Obtain Right of Entry agreements from property owners prior to scheduling construction.
    a. PG&E will provide the document for each property owner to complete and sign.
4. Provide a liaison for residents and property owners to contact with questions.
5. Waive permit fees.
6. Waive Inspection fees.
7. Facilitate a preliminary job walk with the liaison, building inspector and others.
    a. Review PG&E's intended placement of new equipment required for conversions.
    b. Clarify the inspection and permit requirements and timing, if necessary.
8. Provide information enabling the field crews to determine the location of property lines.
9. Disclose all special circumstances
    a. For example: historic buildings, hazardous materials, environmental issues, burial grounds and other items that may affect the overhead-to-underground conversion.
10. Communicate with the property owners if additional work beyond the conversion will be required.
    a. PG&E will pay for the work required to replace the existing overhead electric feed with a new underground feed only. The cost of any additional work required to bring the property up to current codes will be borne by others (property owner or Applicant).
    b. The Applicant will communicate to the property owner all items that must be brought up to code in a timely manner, and all code issues will be managed by the Applicant.

NEM 2010 Early True-up Request Form

Dear Net Energy Metered Customer:

If you would like to move up the 2010 start date of your 12 month true-up period, you may elect to do so by providing the information requested below, signing, and submitting it to PG&E at:

NEM Compensation Program
PO Box 770000
MC B12C
San Francisco, CA 94177

☐ Yes, I would like to move up my 12 month NEM true-up start date. I understand that PG&E will true-up my account once this request has been received and any credits I have associated with the previous true-up period will be zeroed out. I understand that if my 2010 true-up has already occurred by the time PG&E receives this form from you, it will not be possible to have a new true-up date.

Customer Assignment Notification

Please Refer to Attached Sample Form

Pacific Gas and Electric Company

CUSTOMER ASSIGNMENT NOTIFICATION

1. Electric Service Provider (ESP) Declaration

_____ (*Name of ESP*) ("ESP") hereby warrants that:

(1) Under provisions of the agreement for Direct Access service (Agreement), the current customer as identified below (Current Customer) has the right to receive Direct Access (DA) service from an ESP for electric service loads located at the service address identified below (Current Location) under the service accounts identified below (Current Accounts)

(2) Under the provisions of the Agreement, Current Customer has the right to assign its right to receive DA service at the current location for load represented by the Current Accounts to New Customer (identified below).

(3) All conditions of the Agreement necessary for a valid assignment from the Current Customer to New Customer have been satisfied, including any necessary approvals by ESP.

Signature: _____

Authorized Representative of ESP

Date Of Signature: _____

2. New Customer Declaration

_____ (*New Customer as identified below)*) hereby warrants that:

(1) It consents to the assignment of rights by the Current Customer as described above under the ESP Declaration.

(2) It understands that the assigned right to receive direct access service is limited to electric power loads at the Current Location.

(3) It understands that this notice must be submitted within sixty (60) days after Current Customer closes its service account.

(4) It understands that its service account may not have been in the New Customer's name for more than ninety (90) days.

(5) It understands that a Direct Access Service Request (DASR) must be submitted within sixty (60) days of acceptance of this notice by PG&E for this assignment to be valid.

(6) It is familiar with the loads and load history represented by the Current Accounts and understands that, pursuant to California Public Utilities Commission Decision 02-03-055, its right to receive direct access is limited to loads the same as, or substantially the same as, the loads represented by the Current Accounts.

† Information collected on this form is used in accordance with PG&E's Privacy Policy. The Privacy Policy is available at pge.com/privacy.

Electric Sample Form No. 79-1117 Sheet 1
Six Month Notice to Transfer to Direct Access Service

Please Refer to Attached Sample Form

Six Month Notice to Transfer to Direct Access Service

This signed and completed form notifies Pacific Gas and Electric Company (PG&E) of your intent to transfer your service account(s) to Direct Access (DA) service.

Terms and conditions

Within thirty (30) business days of receipt, PG&E will notify you of the status of your Six Month Notice to Transfer to Direct Access Service (Notice). If your Notice has been accepted, the confirmation from PG&E will specify the date by which your Electric Service Provider must submit a Direct Access Service Request to PG&E in order to transfer your service account(s) to DA service. This is important information that you will need to provide to your Electric Service Provider to complete your request. This date is significant because if PG&E does not receive a Direct Access Service Request by this date, your service account(s) will be switched to Transitional Bundled Service for a period of up to sixty (60) days. If a Direct Access Service Request is not received by the end of this sixty (60) day period, then your six month notice to return to DA service will be cancelled, and the cancellation will serve as your six month notice to return to bundled portfolio service. You will be subject to Transitional Bundled Commodity pricing, as defined in rate Schedule TBCC, for a period of six (6) months and then begin a new eighteen (18) month commitment period on bundled portfolio service.

In the event the available annual Load Cap for transferring to DA Service for the current or subsequent phase-in year, if applicable, has been met at the time PG&E receives your Notice, your Notice will be rejected and your service account will not be eligible to transfer to DA Service.

I understand that this form at all times shall be subject to such modifications as the California Public Utilities Commission may direct from time to time in the exercise of its jurisdiction.

Please email completed and signed form to **DANOI@pge.com**

*Important: If this notice is submitted by a third-party on behalf of the customer, a signed and executed customer authorization, Authorization to Receive Customer Information or Act Upon a Customer's Behalf (Electric Form No. 79-1095), must be enclosed.

Authorization

Please consider this my six month notice to transfer the service account(s) listed to DA service. I also acknowledge and understand the following statements:

- My Electric Service Provider must submit a Direct Access Service Request on my behalf prior to the specified date in order to complete the transfer.
- The rules and conditions, as set forth in PG&E's electric Rule 22.1, are available at pge.com/tariffs.
- I can rescind this Notice within three (3) business days by contacting PG&E at (800) 468-4743.
- A notice with more than one service agreement should use the supplemental list provided in Attachment A

Electric Sample Form 79-1118 Sheet 1
General Off-Bill and On-Bill Financing Loan Agreement

Please Refer to Attached Sample Form

GENERAL OFF-BILL AND ON-BILL FINANCING LOAN AGREEMENT

The undersigned customer ("**Customer**") has contracted for the provision of energy efficiency/demand response equipment and services (the "**Work**") which qualify for one or more of PG&E's applicable rebate or incentive programs. Subject to the conditions (including the process for Adjustment and preconditions to funding) set forth below, Pacific Gas & Electric Company (**"PG&E"**) shall extend a loan (the "**Loan**") to Customer in the amount of the loan balance (the "**Loan Balance**") pursuant to the terms of this On-Bill Financing Loan Agreement ("**Loan Agreement**") and PG&E's rate schedules E-OBF and/or G-OBF, as applicable (the "**Schedule**").

To request the Loan, Customer has submitted a completed On-Bill Financing Application and associated documentation as required by PG&E (the "**Application**"). Collectively the Application and this Loan Agreement (including any Adjustment hereunder) comprise the "Agreement".

1. Customer shall arrange for its Contractor, as identified at the end of this Agreement ("**Contractor**"), to provide the Work as described in the Application.

2. The estimated Loan Balance is set forth below. The total cost of the Work as installed, rebate/incentive for qualifying energy efficiency measures, Loan Balance, monthly payment, and loan term specified in this Loan Agreement may be adjusted, if necessary, after the Work and the post-installation inspection described in the Application and/or herein are completed (the "**Adjustment**"). The Adjustment will be calculated using the actual total cost of the Work, as installed, and the estimated energy savings (as described in the Application) of such Work. In no event will the Loan Balance be increased without Customer's written consent, even if Customer is eligible for such increased Loan Balance. Moreover, in no event will the Loan Balance exceed the maximum loan amount stipulated in the Application. Customer understands that in order to be eligible for the Loan, the initial Loan Balance for Work may not fall below the minimum loan amount, nor may the payback period exceed the maximum payback period. **Accordingly, if after the Adjustment, the Loan Balance falls below the minimum loan amount or if the simple payback period exceeds the program maximum payback period, each as described in the Application, PG&E shall have no obligation to extend the Loan, as the Work would not meet program requirements.** The Adjustment described in this paragraph will be communicated to the Customer in writing and will automatically become part of this Loan Agreement, except that any proposed increase in the Loan Balance will only become part of this Loan Agreement upon Customer's written consent to such increase.

3. **PG&E shall have no liability in connection with, and makes no warranties, expressed or implied, regarding the Work. Customer will be responsible for any and all losses and damage it may suffer in connection with, and any claims by third parties resulting from, the Work.** Customer shall indemnify and hold harmless PG&E, its affiliates, and their respective owners, officers, directors, employees and agents thereof, from and against all claims, demands, liabilities, damages, fines, settlements or judgments which arise from or are caused by (a) any breach of the Agreement by Customer; (b) any defects or problems with the Work, or the failure of the Work to deliver any anticipated energy efficiencies; (c) Customer's failure to pay any amount due or claimed by Contractor with respect to the Work; or (d) the wrongful or negligent acts or omissions of any party (including Contractor) in the conduct or performance of the Work.

POWER PURCHASE AND SALE AGREEMENT

CONTRACT FOR ELIGIBLE CHP FACILITIES WITH NET OUTPUT OF NOT GREATER THAN 5 MW

PREAMBLE

This Power Purchase and Sale Agreement (this "Agreement") by and between [Buyer's name], a California corporation ("Buyer"), and [Seller's name], a [Seller's form of business entity and state of registration] ("Seller"), is dated as of [Date of execution] (the "Effective Date"). Buyer and Seller are sometimes referred to in this Agreement individually as a "Party" and jointly as the "Parties." Unless the context otherwise specifies or requires, initially capitalized terms used in this Agreement have the meanings set forth in Exhibit A. Exhibits A through G inclusive are hereby incorporated into and made a part of this Agreement.

RECITALS

A. On June 26, 2008, the CPUC opened Rulemaking 08-06-024 to implement Assembly Bill 1613 (codified in California Public Utilities Code Section 2840 et. seq.), which establishes the Waste Heat and Carbon Emissions Reductions Act (the "Act").

B. Buyer is required to offer this Agreement to Seller in order to fulfill its obligations under the Act and the Decisions issued in Rulemaking ("R.") 08-06-024 ("AB 1613 Decisions"), and Seller desires to accept such offer and enter into this Agreement.

The Parties, intending to be legally bound, agree as follows:

{Buyer Comment: If the Term is greater than or equal to five years and if the Generating Facility provides baseload generation, before executing this Agreement, Seller must provide to Buyer documentation evidencing its compliance with the Greenhouse Gas Emissions Performance Standard set forth in D.07-01-039 and in subsequent CPUC rulings implementing D.07-01-039, and with any subsequent CPUC-established precondition to the execution of this Agreement.}

ARTICLE ONE. SPECIAL CONDITIONS

1.01 Term. The term of this Agreement (the "Term") commences on [Date] (the "Term Start Date") and ends on [Date] (the "Term End Date"). The Term Start Date must be on the first day of a calendar month. If the Generating Facility is (a) a New Eligible CHP Facility, the Term Start Date must occur within 18 months of the Effective Date, or (b) an Existing Eligible CHP Facility, the Term Start Date must occur within 6 months of the Effective Date. Subject to the limitation set forth in the immediately preceding sentence, Seller may change the Term Start Date set forth in this Section 1.01 by providing Notice to Buyer at least three months before such Term Start Date. The Term must be no less than one year and no more than 10 years.

1.02 Generating Facility. The name of the Generating Facility is [Generating Facility name], which is [a New Eligible CHP Facility] [an Existing Eligible CHP Facility], and which is further described in Exhibit G.

Electric Sample Form 79-1124 Sheet 1

Eligible Low Income Development Virtual Net Energy Metering Application and Interconnection Agreement for Multifamily Affordable Housing with Solar Generation Totaling 1 Megawatt or Less

Please Refer to Attached Sample Form

Pacific Gas and Electric Company®

NEMVMASH

Eligible Low Income Development Virtual Net Energy Metering Application and Interconnection Agreement for Multifamily Affordable Housing with Solar Generation Totaling 1 MW or Less

Please note that this agreement does not constitute an application for **rebate** and/or **incentive programs**. For more information on these programs and their specific applications, please contact PG&E by phone, or by email using the subject "solar energy" at smarter-energy@pge.com, 1-800-933-9555 (residential) or BusinessCustomerHelp@pge.com, 1-800-468-4743 (commercial/industrial).

For more information on the , Multifamily Affordable Solar Housing (MASH) or the New Solar Homes Partnership (NSHP) for affordable housing, please go to www.pge.com/csi where you will find information about the program, including the program handbook, reservation request forms with the program contract as well as a list of requirements, FAQ's and resources. For additional questions about the California Solar Initiative (CSI), MASH or the NSHP, contact PG&E at solar@pge.com.

A. Applicability and Purpose

The purpose of this Agreement is to allow Owner to interconnect solar electric generation with PG&E's Distribution System, subject to the provisions of this Agreement and PG&E's rate schedule NEMVMASH. Owner has elected to interconnect and operate its solar electric Generation in parallel with PG&E's Distribution System, to offset part or all of the Owner's Eligible Low Income Development's own electrical requirements at the affiliated service points as listed in Appendix A. Owner shall comply at all times with this Agreement as well as with all applicable laws, tariffs and applicable requirements of the Public Utilities Commission of the State of California.

B. Guidelines and Steps for Interconnection

This Application and Agreement must be completed and sent to PG&E along with a completed Supplemental Data Collection Form for Net Energy Metered Generating Facilities to initiate PG&E's interconnection review of the proposed Generating Facility.

C. NEM Transition

Customers receiving service on the current NEMVMASH tariff prior to the date that PG&E reaches its NEM Cap or July 1, 2017, whichever is earlier are subject to the NEM Transition Provisions outlined in Rate Schedule NEM. Please see Rate Schedules NEMVMASH at: https://www.pge.com/tariffs/assets/pdf/tariffbook/ELEC_SCHEDS_NEMVMASH.pdf and Rate Schedule NEM at: https://www.pge.com/tariffs/assets/pdf/tariffbook/ELEC_SCHEDS_NEM.pdf for more details.

For additional questions about the California Solar Initiative (CSI), MASH or the NSHP, contact PG&E at solar@pge.com.

Unique Project Name _____ (for PG&E's use only)

If you are applying for a CSI rebate, please check the appropriate box below and continue with this application.

☐ I am also applying for a MASH rebate, and understand that I will have to apply for MASH rebates separately.

☐ I am also applying for a NSHP rebate, and understand that I will have to apply for the NSHP rebates separately.

Part I – Identifying the Generating Facility's Location and Responsible Parties

A. Applicability and Purpose:

The purpose of this Agreement is to allow Owner to interconnect solar electric generation with PG&E's Electric System, subject to the provisions of this Agreement and PG&E's Schedule NEM2VMSH. Owner has elected to interconnect and operate its solar electric Generation in parallel with PG&E's Electric System, to offset part or all of the Owner's Eligible Low Income Development's own electrical requirements at the affiliated service points as listed in Appendix A. Owner shall comply at all times with this Agreement as well as with all applicable laws, tariffs and applicable requirements of the Public Utilities Commission of the State of California.

B. Guidelines and Steps for Interconnection

This Application and Agreement must be completed and sent to PG&E along with a completed Supplemental Data Collection Form for Net Energy Metered Generating Facilities to initiate PG&E's interconnection review of the proposed Generating Facility.

D. Owner's Information -

Electric Sample Form 79-1125 Sheet 1
NEM / NEMV / NEMVMASH Inspection Report

Please Refer to Attached Sample Form

Pacific Gas and Electric Company®

NEM / NEMV / NEMVMASH Inspection Report[1]

Who needs to complete this Inspection Report?

A customer:

- who becomes a PG&E customer at a home, office or other facility having with an existing Renewable Electrical Generation Facility with plans to remain interconnected with PG&E on Rate Schedules NEM, NEMV or NEMVMASH
- who must complete a new net energy metering contract (for example, Form 79-978 *Interconnection Agreement for Net Energy Metering of Solar or Wind Electric Generating Facilities of 1,000 kW or Less, other than Facilities of 30 kW or Less)* with PG&E for the existing generating facility and
- whose electrical generating facility and meter have not been installed or inspected within the previous three years and
- who must arrange to have their generating facility inspected and the Contractor section of this report completed by a California licensed electrician who is not the owner or operator of the facility and meter.

electrician (Inspector) shall perform the inspection of the electrical portion of the Generating Facility and meter.

Instructions

1) The Customer shall compete all of Part I and complete Section A of Part II. The Customer information in Section A of Part II should match that in Part I.

2) The Customer should arrange to have the Inspector inspect their Generating Facility and compete the reminder of Part II of this form and sign it.

3) The customer shall then submit the fully completed Report to PG&E.

If this form is not submitted within 90 days of the Customer becoming the customer of record for this account, Customer agrees to disconnect their Generating Facility and inform PG&E it no longer will take service on schedule NEM, NEMV or NEMVMASH.

For the safety of the Customer and PG&E employees, under no circumstances shall the Generating Facility be operated while interconnected with PG&E if it does not pass the Operational Test in Part II, Section I.

Electric Sample Form 79-1126 Sheet 1
Off-Bill and On-Bill Financing Loan Agreement for Self-Installed Projects

Please Refer to Attached Sample Form

OFF-BILL AND ON-BILL FINANCING LOAN AGREEMENT FOR SELF-INSTALLED PROJECTS

The undersigned customer ("**Customer**") will obtain and perform energy efficiency/demand response equipment and services (the "**Work**") which qualify for one or more of PG&E's applicable rebate or incentive programs. Subject to the conditions (including the process for Adjustment and preconditions to funding) set forth below, Pacific Gas and Electric Company (**"PG&E"**) shall extend a loan (the "**Loan**") to Customer in the amount of the loan balance (the "**Loan Balance**") pursuant to the terms of this On-Bill Financing Loan Agreement ("**Loan Agreement**") and PG&E's rate schedules E-OBF and/or G-OBF, as applicable (the "**Schedule**").

To request the Loan, Customer has submitted a completed On-Bill Financing Application and associated documentation as required by PG&E (the "**Application**"). Collectively the Application and this Loan Agreement (including any Adjustment hereunder) comprise the "Agreement".

1. Customer shall complete the Work as described in the Application.

2. The estimated Loan Balance is set forth below. The total cost of the Work as installed, rebate/incentive for qualifying energy efficiency measures, Loan Balance, monthly payment, and loan term specified in this Loan Agreement may be adjusted, if necessary, after the Work and the post-installation inspection described in the Application and/or herein are completed (the "**Adjustment**"). The Adjustment will be calculated using the actual total cost of the Work, as installed, and the estimated energy savings (as described in the Application) of such Work. In no event will the Loan Balance be increased without Customer's written consent, even if Customer is eligible for such increased Loan Balance. Moreover, in no event will the Loan Balance exceed the maximum loan amount stipulated in the Application. Customer understands that in order to be eligible for the Loan, the initial Loan Balance for Work may not fall below the minimum loan amount, nor may the payback period exceed the maximum payback period. **Accordingly, if after the Adjustment, the Loan Balance falls below the minimum loan amount or if the simple payback period exceeds the program maximum payback period, each as described in the Application, PG&E shall have no obligation to extend the Loan, as the Work would not meet program requirements.** The Adjustment described in this paragraph will be communicated to the Customer in writing and will automatically become part of this Loan Agreement, except that any proposed increase in the Loan Balance will only become part of this Loan Agreement upon Customer's written consent to such increase.

3. **PG&E shall have no liability in connection with, and makes no warranties, expressed or implied, regarding the Work. Customer will be responsible for any and all losses and damage it may suffer in connection with, and any claims by third parties resulting from, the Work.** Customer shall indemnify and hold harmless PG&E, its affiliates, and their respective owners, officers, directors, employees and agents thereof, from and against all claims, demands, liabilities, damages, fines, settlements or judgments which arise from or are caused by (a) any breach of the Agreement by Customer; (b) any defects or problems with the Work, or the failure of the Work to deliver any anticipated energy efficiencies; (c) Customer's failure to pay any amount due or claimed by any Contractor with respect to the Work; or (d) the wrongful or negligent acts or omissions of any party (including any Contractor) in the conduct or performance of the Work.

4. Customer represents and warrants that (a) Customer is receiving this Loan solely for Work obtained in connection with Customer's business, and not for personal, family or household purposes; (b) Customer, if not an individual or a government agency, is duly

Agreement to Perform Tariff Scheduled Related Work,
Rule 20A General Conditions

Please Refer to Attached
Sample Form

GENERAL CONDITIONS AGREEMENT TO PERFORM WORK PURSUANT TO PG&E ELECTRIC RULE 20A – REPLACEMENT OF OVERHEAD WITH UNDERGROUND ELECTRIC FACILITIES

PG&E Contract: _____
Contact #: _____

PROJECT NAME: _____

LOCATION: _____, CALIFORNIA

City/County of _____ (Governmental Body) has requested, and PACIFIC GAS AND ELECTRIC COMPANY (PG&E) has agreed to perform the replacement of overhead with underground electric facilities pursuant to Section A of PG&E's Electric Rule 20 Tariff (Electric Rule 20A), subject to the following General Conditions Agreement.

Rule 20A Tariff:

PG&E will, at its expense, replace its existing overhead electric facilities with underground electric facilities along public streets and roads, and on public lands and private property across which rights-of-way satisfactory to PG&E have been obtained by PG&E, consistent with Electric Rule 20A.

To ensure the success of this Electric Rule 20A project, Governmental Body and PG&E agree to the following terms. Any exceptions to these terms will require an advice filing with the California Public Utilities Commission (CPUC), with notice to the Governmental Body in accordance with General Order 96-B or any successor orders.

Responsibilities of the Governmental Body:

PG&E's Electric Rule 20A sets forth a program for replacing existing overhead electric facilities with underground electric facilities subject to certain requirements. In order to implement the Electric Rule 20A program as requested by the Governmental Body, the Governmental Body hereby agrees to:

1) Consult with PG&E to confirm the requirements of an Electric Rule 20A project and the location of the specific Electric Rule 20A project.
2) Hold public hearing(s) on the proposed Electric Rule 20A project in order to determine that the specific Electric Rule 20A project is in the general public interest.
3) Provide PG&E with a duly-adopted ordinance or resolution, as appropriate, creating an underground district in the area in which both the existing and new facilities are and will be located, requiring, among other things:
   a) That all existing overhead communication and electric distribution facilities in such district shall be removed;
   b) That each property served from such electric overhead facilities shall have installed in accordance with PG&E's rules for underground service, all electrical facility changes on the premises necessary to receive service from the underground facilities of PG&E as soon as it is available; and
   c) Authorizing PG&E to discontinue its overhead electric service upon completion of the underground distribution system.
4) Acknowledge that wheelchair access is in the public interest and will be considered as a basis for defining the boundaries of projects that otherwise meet the criteria set forth in PG&E's Electric Rule 20A, Subsection 1(a).
5) Provide PG&E with a project boundary map and available drawings showing all known Governmental Body-owned facilities and known road improvements.
6) Identify property owners/persons responsible for the properties identified by PG&E as requiring easements. Make initial contact with the property owners/responsible persons, mail PG&E prepared easement documents, and coordinate meetings for the purpose of assisting PG&E with acquisition of necessary easements.

ELECTRIC SAMPLE FORM 79-1129 Sheet 1
SPECIAL CONTRACT FOR UNMETERED SERVICE

Please Refer to Attached
Sample Form

Special Contract for Unmetered Service Agreement for Energy Use Adjustments for Network Controlled Dimmable Streetlights - Limited Pilot Program

This Agreement between _____
(the Customer) and Pacific Gas and Electric Company (the Company) is to establish and govern the provisions of a limited pilot program to evaluate, and provide billing adjustments to reflect actual energy used by streetlights that have been equipped with network controls that allow the lights to be dimmed under operating schedules established by the Customer.

WHEREAS, the streetlights in question are owned by the Customer and are currently served without electric meters and subject to the standard provisions of the Company's Electric Rate Schedule LS-2; and

WHEREAS, the technology available for use in remotely programmed network control systems for streetlights has advanced to the point where the systems are now capable of logging and reporting energy used by the streetlights; and

WHEREAS, the Customer and the Company agree that the current provisions of Electric Rate Schedule LS-2 do not provide sufficient flexibility to accommodate energy use adjustments for dimming schedules made possible by the use of remotely programmed network control systems; and

WHEREAS, the Company has determined that it would be impractical, and customer groups have confirmed that it would not be cost-effective, for customers to pay to install individual meters at each service delivery point for streetlights or streetlight circuits supporting controlled lights subject to this Agreement; and

WHEREAS, the Company agrees that the Customer has met the eligibility requirements to allow participation in this limited pilot program as identified in Attachment C, including the ability of the Customer's network control system to monitor, log and report energy consumption data for the controlled streetlights; and

WHEREAS, pursuant to the Company's electric Preliminary Statement Part A.6.a, the Customer and the Company agree that, in lieu of installing meters at each service delivery point, the Company shall provide unmetered electric service as provided herein.

NOW THEREFORE, in consideration of the terms and covenants contained herein, the Customer and the Company hereby agree as follows:

1. All controlled streetlights subject to this agreement will be grouped in a single Account and multiple Service Agreements for bill adjustment on an aggregated basis. The new Account will be created under Rate Schedule LS-2 (Customer Owned Street and Highway Lighting). Individual Service Agreements will be created for different lighting technologies and fixture wattages. The Service Agreements and Account will be assigned to a billing cycle according to Attachment A.

Electric Sample Form 79-1130 Sheet 1
Request to Opt-out of / Opt-in to Compensation for Surplus Electricity

Please Refer to Attached Sample Form

Request to Opt-out of / Opt-in to Compensation for Surplus Electricity*

Thank you for participating in the Net Energy Metering (NEM) program.
Because you generated more electricity than you used over your true-up period, you are eligible to receive payment for the surplus electricity.

Please select one of the options below. Fill out this form completely, sign it, and return it to the Pacific Gas and Electric Company using one of the methods listed at the bottom of this form.

Participation Options

☐ I choose not to participate in the NEM compensation program. I understand that I will not receive payment for any surplus electricity on my NEM True-up Statements. This election will remain in effect until I let PG&E know otherwise by resubmitting this form.

☐ I previously opted out of the NEM compensation program. Please re-enroll me in the program so that I can receive payment for the surplus electricity on my next NEM True-up Statement. This election will remain in effect until I let PG&E know otherwise by resubmitting this form at least 30 days in advance of my next true-up month.

NEMV APPLICATION AND INTERCONNECTION AGREEMENT FOR A SOLAR (PV) OR WIND GENERATING FACILITY OF 1 MW OR LESS

Please Refer to Attached Sample Form

Pacific Gas and Electric Company®

NEMV

Application and Interconnection Agreement for a Solar (PV) or Wind Generating Facility of 1 MW or Less

Please note: This agreement does not constitute an application for rebate and/or incentive programs. For more information on these programs, please visit the program website at the links provided below.

- California Solar Initiative (CSI): www.pge.com/csi
- Self-Generation Incentive Program (SGIP): www.pge.com/sgip

of all eligible Benefitting Accounts (as defined in Schedule NEMV) of the past year but with a maximum total size of no larger than one MW or 1,000 kW (Renewable Electric Generation Facility) that is located at a Single Delivery Point[1] with other individually metered PG&E Benefitting Accounts the will be allocated the benefits of the Renewable Electric Generation Facility as described in NEMV, that meets all the applicability requirements in Schedule NEMV, and that operates in parallel with Pacific Gas and Electric Company's (PG&E) Distribution System.

The purpose of this Agreement is to allow the Owner to interconnect the Renewable Electric Generation Facility with PG&E's Distribution System, subject to the provisions of this Agreement and PG&E's rate schedule NEMV. Owner has elected to interconnect and operate its Renewable Electric Generation Facility in parallel with PG&E's Distribution System, primarily to offset part or all of the NEMV Arrangement's own electrical requirements of the Benefitting Accounts at the affiliated service delivery point as listed in Appendix A. Owner shall comply at all times with this Agreement as well as with all applicable laws, tariffs and applicable requirements of the Public Utilities Commission of the State of California.

Note: If this application is for a Renewable Electric Generation Facility with a generator type that is other than solar (PV) and wind covered in Schedule NEMV, please use Application Form 79-1142.

Guidelines and Steps for Interconnection

This Application and Agreement must be completed and sent to PG&E along with a completed Supplemental Data Collection Form for Net Energy Metered Generating Facilities to initiate PG&E's interconnection review of the proposed Generating Facility.

B. NEM Transition

Customers receiving service on the current NEMV tariff prior to the date that PG&E reaches its NEM Cap or July 1, 2017, whichever is earlier are subject to the NEM Transition Provisions outlined in Rate Schedule NEM. Please see Rate Schedules NEM and NEMV at https://www.pge.com/tariffs/assets/pdf/tariffbook/ELEC_SCHEDS_NEM.pdf and https://www.pge.com/tariffs/assets/pdf/tariffbook/ELEC_SCHEDS_NEMV.pdf for more details.

Interconnection Agreement for Net Metering for a Renewable Electrical Generation Facility of 1,000 kW or Less, Except Solar Or Wind

Please Refer to Attached Sample Form

INTERCONNECTION AGREEMENT FOR NET ENERGY METERING FOR A RENEWABLE ELECTRICAL GENERATION FACILITY OF 1,000 KW OR LESS, EXCEPT SOLAR OR WIND

This *Interconnection Agreement for Net Energy Metering for a Renewable Electrical Generation Facility of 1,000 kW or Less, Except Solar Or Wind* (Agreement)[1] is entered into by and between _____ (Customer-Generator), and Pacific Gas and Electric Company (PG&E), a California Corporation. Customer-Generator and PG&E are sometimes also referred to in this Agreement jointly as "Parties" or individually as "Party." In consideration of the mutual promises and obligations stated in this Agreement and its attachments, the Parties agree as follows:

1. SCOPE AND PURPOSE

1.1 This Agreement provides for Customer-Generator to interconnect and operate a Renewable Electrical Generation Facility as defined in Schedule NEM (if this is a NEM Solar or Wind Generating Facility, please use form 79-978) (Generating Facility) in parallel with PG&E's Distribution System to serve the electrical loads connected to the electric service account that PG&E uses to interconnect Customer-Generator's Generating Facility. Customer-Generator's Generating Facility is intended primarily to offset part or all of the Customer-Generator's own electrical requirements. Consistent with, and in order to effectuate, the provisions of Sections 2827 of the California Public Utilities Code and PG&E's electric rate Schedule NEM (NEM), Parties enter into this Agreement. This Agreement applies to the Customer-Generator's Generating Facilities identified below with the specified characteristics and generating capacity, and does not allow interconnection or operation of facilities different than those described.

2. SUMMARY AND DESCRIPTION OF CUSTOMER-GENERATOR'S GENERATING FACILITY AND DESIGNATION OF OTHERWISE-APPLICABLE RATE SCHEDULE

2.1 A description of the Generating Facility, including a summary of its significant components, and a single-line diagram showing the general arrangement of how Customer-Generator's Generating Facility and loads are interconnected with PG&E's Distribution System, is attached to and made a part of this Agreement. (This description is supplied by Customer-Generator as Appendix A).

2.2 Generating Facility identification number: _____ (Assigned by PG&E).

2.3 Customer-Generator's electric service agreement ID number: _____ (Assigned by PG&E).

2.4 Name and address used by PG&E to locate the electric service account used to interconnect the Generating Facility with PG&E's Distribution System:

Name: _____

Address: _____

City/Zip Code: _____

[1] Additional forms are available on PG&E's website at http://www.pge.com/gen).

INTERCONNECTION AGREEMENT FOR NET ENERGY METERING FOR A RENEWABLE ELECTRICAL GENERATION FACILITY EXCEPT SOLAR OR WIND

This *INTERCONNECTION AGREEMENT FOR A NET ENERGY METERING (NEM2/NEM2V) FOR A RENEWABLE ELECTRICITY GENERATION FACILITY OF 1,000 KILOWATTS OR LESS, EXCEPT SOLAR OR WIND* (Agreement) [1] is entered into by and between _____ (Customer-Generator), and Pacific Gas and Electric Company (PG&E), a California Corporation. Customer-Generator and PG&E are sometimes also referred to in this Agreement jointly as "Parties" or individually as "Party." In consideration of the mutual promises and obligations stated in this Agreement and its attachments, the Parties agree as follows:

1. SCOPE AND PURPOSE

1.1 This Agreement provides for Customer-Generator to interconnect and operate a Renewable Electrical Generation Facility as defined in Schedule NEM2 (if this is a NEM Solar or Wind Generating Facility less than 1,000 kWh, please use form 79-978) (Generating Facility) in parallel with PG&E's Electric System to serve the electrical loads connected to the electric service account that PG&E uses to interconnect Customer-Generator's Generating Facility. Customer-Generator's Generating Facility is intended primarily to offset part or all of the Customer-Generator's own electrical requirements. Consistent with, and in order to effectuate, the provisions of Sections 2827 of the California Public Utilities Code and PG&E's electric rate Schedule NEM2 (NEM2), Parties enter into this Agreement. This Agreement applies to the Customer-Generator's Generating Facilities identified below with the specified characteristics and generating capacity, and does not allow interconnection or operation of facilities different than those described.

2. SUMMARY AND DESCRIPTION OF CUSTOMER-GENERATOR'S GENERATING FACILITY AND DESIGNATION OF OTHERWISE-APPLICABLE RATE SCHEDULE

2.1 A description of the Generating Facility, including a summary of its significant components, and a single-line diagram showing the general arrangement of how Customer-Generator's Generating Facility and loads are interconnected with PG&E's Electric System, is attached to and made a part of this Agreement. (This description is supplied by Customer-Generator as Appendix A).

2.2 Generating Facility identification number: _____ (Assigned by PG&E).

2.3 Customer-Generator's electric service agreement ID number: _____ (Assigned by PG&E).

Power Purchase and Sale Agreement - Contract for Eligible CHP Facilities With a Power Rating of Less Than 500 kW

Please Refer to Attached Sample Form

Pacific Gas and Electric Company

DISTRIBUTION:
☐ XXXX
☐ XXXX
☐ XXXX
☐ XXXX
☐ _____

REFERENCE: _____

POWER PURCHASE AND SALE AGREEMENT

CONTRACT FOR ELIGIBLE CHP FACILITIES WITH A POWER RATING OF LESS THAN 500 KW

PREAMBLE

This Power Purchase and Sale Agreement (this "Agreement") by and between [Buyer's name], a California corporation ("Buyer"), and [Seller's name], a [Seller's form of business entity and state of registration] ("Seller"), is dated as of [Date of execution] (the "Effective Date"). Buyer and Seller are sometimes referred to in this Agreement individually as a "Party" and jointly as the "Parties." Unless the context otherwise specifies or requires, initially capitalized terms used in this Agreement have the meanings set forth in Exhibit A. Exhibits A through G inclusive are hereby incorporated into and made a part of this Agreement.

RECITALS

A. On June 26, 2008, the CPUC opened Rulemaking 08-06-024 to implement Assembly Bill 1613 (codified in California Public Utilities Code Section 2840 et. seq.), which establishes the Waste Heat and Carbon Emissions Reductions Act (the "Act").

B. Buyer is required to offer this Agreement to Seller in order to fulfill its obligations under the Act and the Decisions issued in Rulemaking ("R.") 08-06-024 ("AB 1613 Decisions"), and Seller desires to accept such offer and enter into this Agreement.

The Parties, intending to be legally bound, agree as follows:

{Buyer Comment: If the Term is greater than or equal to five years and if the Generating Facility provides baseload generation, before executing this Agreement, Seller must provide to Buyer documentation evidencing its compliance with the Greenhouse Gas Emissions Performance Standard set forth in D.07-01-039 and in subsequent CPUC rulings implementing D.07-01-039, and with any subsequent CPUC-established precondition to the execution of this Agreement.}

ARTICLE ONE. SPECIAL CONDITIONS

1.01 Term. The term of this Agreement (the "Term") commences on [Date] (the "Term Start Date") and ends on [Date] (the "Term End Date"). The Term Start Date must be on the first day of a calendar month. If the Generating Facility is (a) a New Eligible CHP Facility, the Term Start Date must occur within 18 months of the Effective Date, or (b) an Existing Eligible CHP Facility, the Term Start Date must occur within 6 months of the Effective Date. Subject to the limitation set forth in the immediately preceding sentence, Seller may change the Term Start Date set forth in this Section 1.01 by providing Notice to Buyer at least three months before such Term Start Date. The Term must be no less than one year and no more than 10 years.

1.02 Generating Facility. The name of the Generating Facility is [Generating Facility name], which is [a New Eligible CHP Facility] [an Existing Eligible CHP Facility], and which is further described in Exhibit G. The Generating Facility is located at [Generating Facility address], which must be located within Buyer's service territory.

SA #: _____

AGREEMENT FOR SCHEDULE A-15 FIXED USAGE ESTIMATE

This Agreement between _____ (Customer) and Pacific Gas and Electric Company (the Company) is to establish and govern the provisions of unmetered electric service provided by the Company on Schedule A-15F at the locations reported for equipment described in the attachments to this Agreement and billing data reported monthly or annually as required by this Agreement and subject to review by the Company for unmetered status.

WHEREAS, in the Company's opinion, it would be impractical, infeasible, or cost prohibitive to install direct current (DC) electric meters at the requested locations and for equipment installed subject to this Agreement; and

WHEREAS, the consumption of electricity at such locations and for such equipment can be reasonably determined from manufacturer's specifications and operating characteristics of the Customer, or through the use of a temporary measuring device or DC monitor; and

WHEREAS, pursuant to the Company's electric Preliminary Statement Part A.6.a, Customer and the Company agree that, in lieu of installing meters at each location, the Company shall provide unmetered electric service as provided herein.

NOW THEREFORE, in consideration of the terms and covenants contained herein, Customer and the Company hereby agree as follows:

1. Customer's equipment that is the subject of this Agreement, are identified in the data sheets set forth in Attachment A (Equipment). Each location will be considered a separate account and billed on the Company's regular monthly billing cycle for the applicable area. Each location will be evaluated for unmetered service separate from any other location. Billing of fixed usage will be done under the rate schedule indicated on Attachment A. Billing will be based on the methodology described in paragraph 3, below. This Agreement is for Equipment directly connected to the Company's distribution system, and is not available for equipment connected via a third party service, or third party equipment.

2. Each individual piece of Equipment shall constitute a separate unit for purposes of this Agreement. The method of determining the electric usage for each unit shall be as follows:

   a) Customer shall provide the Company all of the information necessary to complete Attachment A, including without limitation, the description of the equipment model, type, unit and load, prior to the installation of any Equipment. To facilitate completion of Attachment A, third party testing results or metered results are required where Customer has no manufacturer data. Information to verify the number and location of all Equipment at each service location shall be reported as described in Attachment A.

3. The monthly energy charge will be based on Equipment identified in Attachment A and the calculated kilowatt hours (kWh) applied to all locations for that equipment from the documented average consumption or rated input under paragraph 2a, above. The monthly charge shall also include all other charges under the General Services rate Schedule A-15, including the single customer charge per location, and single facility charge per location.

ELECTRIC SAMPLE FORM 79-1142 Sheet 1

NEMV INTERCONNECTION APPLICATION FOR A RENEWABLE ELECTRICAL GENERATION FACILITY OF 1 MEGAWATT OR LESS

Please Refer to Attached Sample Form

Interconnection Application for a Renewable Electrical Generation Facility of 1 Megawatt or Less

Project Identification Number _____ (for PG&E's use only)

Part I – Identifying the Generating Facility's Location and Responsible Parties

Please note: This Application does not constitute an application for rebate and/or incentive programs. For more information on these programs, please visit the program website at the links provided below.

- California Solar Initiative (CSI): www.pge.com/csi
- Self-Generation Incentive Program (SGIP): www.pge.com/sgip

other individually metered PG&E Benefitting Accounts the will be allocated the benefits of the Renewable Electric Generation Facility as described in NEMV, that meets all the applicability requirements in Schedule NEMV, and that operates in parallel with Pacific Gas and Electric Company's (PG&E) Distribution System.

The purpose of this Application is to allow the Owner to apply for the interconnect the Renewable Electric Generation Facility with PG&E's Distribution System, subject to the provisions of this Application and PG&E's rate schedule NEMV. Owner has elected to interconnect and operate its Renewable Electric Generation Facility in parallel with PG&E's Distribution System, primarily to offset part or all of the NEMV Arrangement's own electrical requirements of the Benefitting Accounts at the affiliated service delivery point as listed in Appendix A. Owner shall comply at all times with this Application as well as with all applicable laws, tariffs and applicable requirements of the Public Utilities Commission of the State of California.

Note: If this application is for a Renewable Electric Generation Facility with a generator type that is solar (PV) and/or wind, please use Application form 79-1131.

B. Guidelines and Steps for Interconnection

This Application and Agreement must be completed and sent to PG&E along with a completed Supplemental Data Collection Form for Net Energy Metered Generating Facilities to initiate PG&E's interconnection review of the proposed Generating Facility.

C. NEM Transition

Customers receiving service on the current NEMV tariff prior to the date that PG&E reaches its NEM Cap or July 1, 2017, whichever is earlier, are subject to the NEM Transition Provisions outlined in Rate Schedule NEM. Please see Rate Schedules NEM and NEMV at https://www.pge.com/tariffs/assets/pdf/tariffbook/ELEC_SCHEDS_NEM.pdf and https://www.pge.com/tariffs/assets/pdf/tariffbook/ELEC_SCHEDS_NEMV.pdf for more details.

[1] Customer-owned line extensions that deliver power to other meters on the same property are not considered separate Service Delivery Points.

Electric Sample Form 79-1143 Sheet 1
California State Government Customers
On-Bill Financing Loan Agreement

Please Refer to Attached
Sample Form

CALIFORNIA STATE GOVERNMENT CUSTOMERS
ON-BILL FINANCING LOAN AGREEMENT

The undersigned customer ("**Customer**") has contracted for the provision of energy efficiency/demand response equipment and services (the "**Work**") which qualify for one or more of PG&E's applicable rebate or incentive programs. Subject to the conditions (including the process for Adjustment and preconditions to funding) set forth below, Pacific Gas & Electric Company (**"PG&E"**) shall extend a loan (the "**Loan**") to Customer in the amount of the loan balance (the "**Loan Balance**") pursuant to the terms of this On-Bill Financing Loan Agreement ("**Loan Agreement**") and PG&E's rate schedules E-OBF and/or G-OBF, as applicable (the "**Schedule**").

To request the Loan, Customer has submitted a completed On-Bill Financing Application and associated documentation as required by PG&E (the "**Application**"). Collectively the Application and this Loan Agreement (including any Adjustment hereunder) comprise the "Agreement".

1. Customer shall arrange for its Contractor, as identified at the end of this Agreement ("**Contractor**"), to provide the Work as described in the Application.

2. The estimated Loan Balance is set forth below. The total cost of the Work as installed, rebate/incentive for qualifying energy efficiency measures, Loan Balance, monthly payment, and loan term specified in this Loan Agreement may be adjusted, if necessary, after the Work and the post-installation inspection described in the Application and/or herein are completed (the "**Adjustment**"). The Adjustment will be calculated using the actual total cost of the Work, as installed, and the estimated energy savings (as described in the Application) of such Work. In no event will the Loan Balance be increased without Customer's written consent, even if Customer is eligible for such increased Loan Balance. Moreover, in no event will the Loan Balance exceed the maximum loan amount stipulated in the Application. Customer understands that in order to be eligible for the Loan, the initial Loan Balance for Work may not fall below the minimum loan amount, nor may the payback period exceed the maximum payback period. **Accordingly, if after the Adjustment, the Loan Balance falls below the minimum loan amount or if the simple payback period exceeds the program maximum payback period, each as described in the Application, PG&E shall have no obligation to extend the Loan, as the Work would not meet program requirements.** The Adjustment described in this paragraph will be communicated to the Customer in writing and will automatically become part of this Loan Agreement, except that any proposed increase in the Loan Balance will only become part of this Loan Agreement upon Customer's written consent to such increase.

3. **PG&E shall have no liability in connection with, and makes no warranties, expressed or implied, regarding the Work.** The Parties acknowledge and agree that PG&E is only providing the State with financing. The Customer has independently hired contractors ("State Contractors") to perform the work on behalf of the Customer to qualify for financing. The Customer acknowledges and agrees that the State Contractors are not third party beneficiaries to this agreement between the Customer and PG&E. To the extent authorized by law and subject to appropriation of the Legislature, the Customer agrees that it will look only to State Contractors for any claims related to the installed equipment or its performance and that PG&E shall have no responsibility or liability, except for the payment of the loan proceeds, and the Customer shall indemnify PG&E for any claims made by the State Contractors against PG&E.

4. Customer represents and warrants that (a) Customer is receiving this Loan solely for Work obtained in connection with Customer's business, and not for personal, family or household purposes; (b) Customer, if not an individual or a government agency, is duly organized, validly existing and in good standing under the laws of its state of formation, and has full power and authority to enter into this Agreement and to carry out the

Rule 21 Exporting Generator
Interconnection Request

Please Refer to Attached
Sample Form

Pacific Gas and Electric Company®

RULE 21
EXPORTING GENERATOR INTERCONNECTION REQUEST

1. The undersigned Applicant submits this request to interconnect its Generating Facility with the Pacific Gas and Electric Company (PG&E or Distribution Provider) Distribution System pursuant to Rule 21 (check only one):
   - ☐ Detailed Study Process
   - ☐ Fast Track Process

2. This Interconnection Request is for (check only one):
   - ☐ A proposed new Generating Facility.
   - ☐ An increase in the generating capacity or a Material Modification of an existing Generating Facility.

3. Applicant provides the following information:

   a. Address (to the extent known) or location, including the county, of the proposed new Generating Facility site or, in the case of an existing Generating Facility, the name and specific location, including the county, of the existing Generating Facility;

      Project Name:

      Project Location:
      Street Address:
      City, State:
      County:
      Zip Code:
      GPS Coordinates:

   b. Maximum net megawatt electrical output (as defined by section 2.c. of Attachment A to this appendix) of the proposed new Generating Facility or the amount of net megawatt increase in the generating capacity of an existing Generating Facility;

      Maximum net megawatt electrical output (MW): _____ or
      Net Megawatt increase (MW): _____

Electric Sample Form No. 79-1148 Sheet 1
Direct Access Customer Replacement Declaration

Please Refer to Attached Sample Form

Pacific Gas and Electric Company

DIRECT ACCESS CUSTOMER REPLACEMENT DECLARATION

I, _____, state as follows:

1. I am an authorized representative of _____ ("Customer") and I am authorized to make this declaration.

2. I have personal knowledge of the matters set forth herein and if called upon as a witness could and would testify competently thereto.

3. Customer has entered into an agreement for electric power service (Agreement) with the following ESP, _____ .

4. Customer seeks to refurbish, reconstruct or remodel facilities at the Current Location, as noted below, and continue to serves these facilities under direct access at the Current Location. This replacement is in the normal course of business. "Current Location" means one existing customer site where the electric load of one customer service account is currently being served under direct access.

   Current Location Information (Service Accounts listed by PG&E Service Agreement Number):

   Name on Account: _____
   Current Service Agreement Number: _____
   New Service Agreement Number: _____
   Service Address: _____
   City, State, ZIP: _____
   Meter Number: _____

5. Customer understands that a DASR must be submitted within sixty (60) days of acceptance of this notice by PG&E, or establishment of electric service for the New Service Account, whichever occurs last, for this replacement to be valid.

6. Customer agrees to maintain, and make available to the California Public Utilities Commission (CPUC) upon request, all records associated with its electricity service and consumption at Current Location, including, but not limited to, the applicable meter and account numbers, and the associated direct access load.

7. Customer agrees, by signing this Declaration, to authorize PG&E to share this information with the ESP named in Condition 3 above.

8. I understand that this form at all times shall be subject to such modifications as the California Public Utilities Commission may direct from time to time in the exercise of its jurisdiction.

I declare under penalty of perjury under the laws of the State Of California that the foregoing is true and correct. Executed this _____ day of _____ , _____ at _____ , _____ [City, State]

Signature: _____

Please Refer to Attached Sample Form

AGREEMENT AND CUSTOMER AUTHORIZATION
Net Energy Metering Interconnection For Solar And/Or Wind Electric Generating Facilities Of 30 Kilowatts Or Less

IMPORTANT NOTES:

- Customers may not operate their Generating Facility while interconnected to the PG&E system until they receive written permission from PG&E.
- City and County of San Francisco ("CCSF") owned generating facilities seeking Schedule NEMCCSF and participants in the Demand Response Programs below are not eligible to participate in NEM.
  - ○ Peak Day Pricing (PDP)
  - ○ Scheduled Load Reduction Program (SLRP)
  - ○ SmartRate
- Customers who participate in Direct Access and Community Choice Aggregation must contact their Energy Service Provider directly regarding their NEM program.

Part I – Generating Facility Information and Responsible Parties

A. Customer and Generating Facility Information (*as it appears on the PG&E bill):

Standard NEM Agreement Type: ❑ Single Account ❑ Multiple Aggregated Accounts

Note: Net Energy Metering Aggregation (NEMA) is a program that allows customers with multiple meters to use the renewable energy generated at one meter (up to 1MW) to be credited against other meters that are located on parcel(s) that is/are contiguous or adjacent to the parcel that has the renewable generator.

Customer Sector (check only one):
❑ Residential ❑ Educational
❑ Commercial ❑ Military
❑ Industrial ❑ Other Government
❑ Non-Profit

Account Holder Name* (Individual or Company)	Electric Service Agreement ID *	Meter Number*	
Service Address*	City*	CA State	Zip*
Customer Phone Number	Email (if blank, Permission to Operate (PTO) letter will be mailed to mailing address on record)		

B. Meter Access Issues (if applicable, check all that apply and provide contact information to request access):

❑ Meter in building or behind locked gate ❑ Unrestrained animal at meter or AC Disconnect Switch ❑ Other: _____

Contact Name to Request Access (if access issues exist)	Contact Phone

C. Authorized Contact Information (required if Customer is authorizing a third party to act on Customer's behalf):

Company Name	Contact Person
Contact Phone Number	Email

❑ **By checking this box and signing this Agreement, I (Customer) authorize PG&E to release my PG&E Electric Account information to the Company above limited to kilowatt hour (kWh) usage, operational characteristics, and other information related to my Generating Facility application. Company is also authorized to submit Application Form 79-1151B and act on my behalf with regard to the interconnection and receive copies of this executed Interconnection Agreement and the Permission to Operate Letter when issued.**

Please complete this agreement in its entirety

ELECTRIC SAMPLE FORM 79-1152 Sheet 1
CUSTOMER INFORMATION SERVICE REQUEST FOR DRP (CISR-DRP)

Please Refer to Attached Sample Form

Pacific Gas and Electric Company®

CUSTOMER INFORMATION SERVICE REQUEST FOR DRP (CISR-DRP)

IMPORTANT INFORMATION FOR CUSTOMERS – BE SURE TO READ FIRST
THIS IS A LEGALLY BINDING CONTRACT – READ IT CAREFULLY

Pacific Gas and Electric Company's (PG&E's) Electric Rule 27 and its corresponding privacy policies, which can be found at www.pge.com/about/company/privacy/customer, generally do not allow for the disclosure of customers' personal information, such as your name, address, phone number, or electric or gas account and billing information, to third parties unless you expressly authorize us to do so. This form allows you to exercise your right to disclose your personal electricity-related information to up to two third-party Demand Response Providers (DRPs), pursuant to PG&E's Electric Rule 24 (Rule 24), so that you may obtain Demand Response services offered by DRP(s). Rule 24 can be accessed at https://www.pge.com/tariffs/assets/pdf/tariffbook/ELEC_RULES_24.pdf. This form may be used for authorization to release Bundled, Community Choice Aggregation (CCA), and Direct Access (DA) customer's information. In some cases two different DRPs may work in concert to help a customer obtain Rule 24 Demand Response services. Accordingly, this form allows for disclosure of your information to both a First DRP and an optional Second DRP. Alternatively, each DRP may submit its own CISR-DRP forms with your consent to receive personal information about you. Once you authorize access by the DRP(s) to your personal information, you are responsible for ensuring that the DRP(s) safeguards this information from further disclosure without your consent. Authorization for PG&E to release your information under Rule 24 is separate from commitments you may have or may make with the DRP(s) for their services.

This form grants the First DRP the ability to request that PG&E make limited changes to the PG&E electric meter(s) serving your Service Agreement(s), as specified in Section C below.

I, (Customer),

Customer Name According To PG&E Records					
Contact Name *(if different from above)*	First		Last		
E-Mail				Phone	

(You are required to provide at least your e-mail or phone number.)

do hereby ☐ AUTHORIZE ☐ REVOKE (*check only one*) the following DRP(s):

Name of First DRP		PG&E Rule 24 ID	
E-Mail		Phone	

(Complete the following table only if the customer is authorizing data to be released to one additional DRP)

Name of Second DRP		PG&E Rule 24 ID	
E-Mail		Phone	

Access to the following electric Service Agreements:

SA #: _____
Premises #: _____
Control #: _____

This agreement is made between _____ _____ a(n)_____ ("Applicant"), and PACIFIC GAS AND ELECTRIC COMPANY (PG&E), a California Corporation, and if applicable, shall be made part of PG&E's Electric Service Agreement, General Service - Time Metered.

RECITALS: The Economic Development Rate (Schedule EDR) was established and is made available to qualified customers in PG&E's service territory, subject to approval by PG&E and the California Governor's Office of Business Investment Services (GO-Biz). Schedule EDR is a five-year rate reduction.

AGREEMENT: Applicant and PG&E agree to the following terms and conditions:

1. QUALIFICATION CRITERIA.
   (*Please mark the appropriate space below)*

a. _____ **Above 150 kW of demand**: Applicant is or will be a customer, eligible for and receiving service under Schedule A-10, E-19, E-20, B-10, B-19 or B-20 or its successor rate schedule. A customer with multiple service accounts within a single aggregation envelope, as defined in PG&E's Schedule EDR, may aggregate load from their Schedule A-1, A-6, A-10, B-1, B-6 and B-10 service accounts for purposes of meeting the minimum 150 kilowatts (kW) threshold required for eligibility under Schedule EDR, subject to the conditions in Schedule EDR. This customer must be a relocatable type of business; retail stores, hospitality services, schools, or government buildings are examples of customers types that cannot practicably relocate out-of-state. Customers receiving Direct Access service or service from a Community Choice Aggregator may also qualify for Schedule EDR.

The electric load subject to this agreement is a maximum billing demand of at least 150 kW of net new load to the state of California or of net retained load in the state of California, which is regularly supplied by PG&E. The minimum 150 kW of net new or retained load must be maintained for at least three consecutive months during the initial 12 months of this agreement. Only new or retained load that will be regularly served by PG&E will be eligible for this rate reduction.

b. _____ **150 kW of demand and below**: Applicant is or will be a Small Business Customer as defined herein, eligible for and receiving service under Schedule A-1, A-6, B-1 or B-6 or its successor rate schedule, with less than 150 kW of load. All other conditions of Schedule EDR apply. This customer must be a relocatable type of business; retail stores, hospitality services, schools, or government buildings are examples of customers types that cannot practicably relocate out-of-state. Customers receiving Direct Access service or service from a Community Choice Aggregator may also qualify for Schedule EDR. Only new or retained load

ELECTRIC SAMPLE FORM 79-1156 Sheet 1
AUTHORIZATION TO ADD LOAN CHARGES TO UTILITY BILL (Residential)

Please Refer to Attached
Sample Form

AUTHORIZATION TO ADD LOAN CHARGES TO UTILITY BILL (Residential)

You have applied for, or have received, a loan to finance energy efficiency improvements to your residence under the Energy Efficiency Financing Program's Residential Energy Efficiency Loan Assistance Program (REEL), approved by the California Public Utilities Commission (CPUC). The loan is being made by the financial institution described below. By signing this agreement, you give your consent to allow PG&E to include monthly loan repayment charges in your monthly utility bill, pursuant to PG&E's Energy Financing Line Item Charge (EFLIC) Gas and Electric Rate Schedules, and you agree to pay those charges, on the terms described below.

Please note that this Authorization contains summary information about the EFLIC Pilot. Before you sign this document, you should first review the more detailed program rules regarding the EFLIC Pilot, developed by the California Hub for Energy Efficiency Financing (CHEEF),[1] and the Gas or Electric Schedule EFLIC, as approved by the CPUC.[2]
In this document:
"**California Hub for Energy Efficiency Financing (CHEEF)**" means a central enabling entity through which energy users, financial institutions, energy efficiency providers and Participating Utilities can participate in a pilot to help finance the installation of Eligible Energy Efficiency Measures. The CHEEF may act through agents or third-party service providers. The CHEEF is administered by the California Alternative Energy and Advanced Transportation Financing Authority (CAEATFA), or a successor as approved by the CPUC.
"**Lender**" means the financial institution shown as the Lender in the Account Information section below.
"**Loan Charges**" means any and all principal, interest and other charges and fees payable by you in connection with your loan, as determined by Lender, including fees or late or deficient payments.
"**Service Address(es)**" means the property or properties serviced by PG&E as shown in the Account Information section below. determined by Lender, including fees for late or deficient payments.
"**Work**" means the installation of eligible measures at your Service Address.
"**You**" means you, the customer(s) signing this authorization.

1. **Authorization to Bill Loan Charges.** You authorize PG&E to include Loan Charges in your PG&E utility bills for the Service Address(es) until further notice. The Lender will determine the amount of the Loan Charge that is to be included in each bill, and PG&E will include that amount in your utility bill. PG&E does not verify the Loan Charges and other information provided by the Lender. The Loan Charges may increase or decrease from month to month based on the terms of the loan, the inclusion of late charges and interest, in accordance with the loan terms, and variations in the periods of time covered by each PG&E billing cycle.

2. **Payment.** You agree to pay the Loan Charges along with the other charges in your utility bill by the due date for payment of the utility bill. All payments should be made to PG&E. PG&E will forward your Loan Charge payments to the Lender. If a funding account for the PG&E payment is a credit card or checking account, PG&E will not forward your payment of Loan Charges to the Lender unless that account has sufficient available credit to pay the full amount of the energy charges and the Loan Charges.

3. **Partial Payments.** Partial payment applies to the components of the bill in accordance with existing Rules. Payments will be applied to past due Loan Charges prior to any current charges. If you make a partial payment on your utility bill, the partial payment will be applied to the following components of the utility bill in the order listed: (a) Utility charges, which include utility service and credit establishment charges; (b) Energy-related charges, which include charges based on energy consumption and tariff schedules; (c) Other applicable products and services charges, which include all other services billed by PG&E such as Loan Charges.

   If you do not pay the Loan Charges in full, PG&E may elect to stop billing you for Loan Charges in which case the Lender will be responsible for collecting any unpaid Loan Charges and future loan payments from you. The Lender will notify you if PG&E ceases to include Loan Charges in your utility bill. Please note that if PG&E stops billing you for Loan Charges before the Loan is paid in full, you are still responsible for making loan payments directly to the Lender. Late payments may be subject to reporting to credit agencies by the Lender.

[1] Program information can be accessed on CAEATFA's website at http://www.treasurer.ca.gov/caeatfa/cheef/reel/index.asp.
[2] PG&E Rate Schedules can be accessed on PG&E's website at http://www.pge.com/nots/rates/tariffs/.

† Information collected on this form is used in accordance with PG&E's Privacy Policy. The Privacy Policy is available at pge.com/privacy.

ELECTRIC SAMPLE FORM 79-1157 Sheet 1

AUTHORIZATION TO ADD LOAN CHARGES TO UTILITY BILL (Non-Residential)

Please Refer to Attached Sample Form

AUTHORIZATION TO ADD LOAN CHARGES TO UTILITY BILL (Non-Residential)

You have applied for, or have been given, a lease or loan to finance improvements to your building under the On-Bill Repayment (OBR) Pilots, approved by the California Public Utilities Commission (CPUC). The loan or lease is being made by the financial institution described below. By signing this Authorization, you consent to allow PG&E to include monthly loan or lease repayment charges in your monthly utility bill, pursuant to PG&E's Gas and Electric Schedule OBR, and you agree to pay those charges, on the terms described below.

Please note that this Authorization contains summary information about the OBR Pilots. Before you sign this document, you should first review the more detailed program rules regarding the OBR Pilots, developed by the California Hub for Energy Efficiency Financing (CHEEF)[1], and the Gas or Electric Schedule OBR, as approved by the CPUC.[2]

In this document:
"California Hub for Energy Efficiency Financing (CHEEF)" means a central enabling entity through which energy users, financial institutions, energy efficiency providers, and utilities can participate in a pilot to help finance the installation of eligible energy efficiency measures. The CHEEF may act through agents and third-party service providers. The CHEEF is administered by the California Alternative Energy and Advanced Transportation Financing Authority (CAEATFA), or a successor as approved by the CPUC.
"**Loan or Lease Charges**" means any and all principal, interest and other charges and fees payable by you in connection with your loan or lease, as determined by your Financial Institution, including fees for late or deficient payments.
"Financial Institution" means the lender or lessor shown in the Account Information section below.
"**Service Address(es)**" means the property or properties serviced by PG&E as shown in the Account Information section below.
"**You**" means you, the customer(s) signing this authorization.
"**Work**" means the installation of eligible measures at your Service Address.

1. **Authorization to Bill Loan Charges.** You authorize PG&E to include Loan or Lease Charges in your PG&E bills for the Service Address(es) until further notice. The Financial Institution will determine the amount of the Loan or Lease Charge that is to be included in each bill, and PG&E will include that amount in your utility bill. PG&E does not verify the Loan or Lease Charges and other information provided by the Financial Institution. The Loan or Lease Charges may increase or decrease from month to month based on the terms of the loan or lease, the inclusion of late charges and interest, in accordance with the loan or lease terms, and variations in the periods of time covered by each PG&E billing cycle.

2. **Payment.** You agree to pay the Loan or Lease Charges along with the other charges in your utility bill by the due date for payment of the utility bill. All payments should be made to PG&E. PG&E will forward your Loan or Lease Charge payments to the Financial Institution. If a funding account for the PG&E payment is a credit card or checking account, PG&E will not forward your payment to the Financial Institution unless that account has sufficient available credit to pay the full amount of the energy charges and the Loan or Lease Charges.

3. **Partial Payments.** If you pay less than the total amount of your utility bill (including Loan or Lease Charges), the amount you pay will be allocated to disconnectable charges, including OBR Charges[3] and utility and other non-OBR charges, consistent with existing Tariffs. Non-payment of OBR charges will subject your account to service disconnection; payments will be applied to past due OBR Charges prior to any current charges.

   A Customer's failure to pay any of the components (other than for master-metered residential properties) will subject the Customer to service termination as set forth in Gas and Electric Rule 11.

   Please note that, if PG&E stops billing you for Loan or Lease Charges before the Loan or Lease is paid in full, you are still responsible for making loan or lease payments directly to the Financial Institution. Late payments may be subject to reporting to credit agencies by the Financial Institution.

[1] Program information can be accessed on CAEATFA's website at http://www.treasurer.ca.gov/caeatfa/cheef/reel/index.asp.
[2] PG&E Rate Schedules can be accessed on PG&E's website at http://www.pge.com/nots/rates/tariffs/.
[3] OBR is not a disconnectable charge for participants of the multi-family pilot.

ELECTRIC SAMPLE FORM 79-1159 Sheet 1
ELECTRIC VEHICLE SUBMETERING PILOT (PHASE 1)
CUSTOMER ENROLLMENT AGREEMENT

Please Refer to Attached Sample Form

ELECTRIC VEHICLE SUBMETERING PILOT (PHASE 1) CUSTOMER ENROLLMENT AGREEMENT

I. Customer Enrollment Agreement - Electric Vehicle Submetering Pilot (Phase 1)

TERMS AND CONDITIONS

This Participation Agreement ("Agreement"), effective upon the date a Customer Enrollment Agreement is submitted, is entered into between Pacific Gas and Electric Company ("PG&E"), a California corporation, with principal offices located at 77 Beale St, San Francisco CA 94105, and customers that receive electric service from PG&E (hereafter, "Participant," "Customer," or "you"). PG&E and Participant are referred to jointly as "Parties."

A. PURPOSE AND OVERVIEW OF THE PHASE 1 PILOT

PG&E is conducting a temporary Plug-in Electric Vehicle (EV) Submeter Pilot. To participate in Phase 1 of the Pilot, Customers must read and agree to the terms and conditions of this Agreement and be eligible for an applicable separately-metered EV Rate. The customer enrollment process is described in the Customer Enrollment Agreement.

The applicable EV Rates require a separate meter to measure only the energy used to charge electric vehicles, which will be charged at a different rate than the rest of your residence or business. For this Pilot, the separate meter must be a submeter owned by the Customer or by a third party. This Pilot is available to eligible customers within all of PG&E's service districts and limited to 500 submeters on a first-come, first-served basis. Customers on a Net Energy Metering (NEM) rate are eligible but will be limited to 20% of the participation cap.

As a Participant in this Pilot, you agree to install an eligible Customer- or third party-owned submeter that meets the California Public Utilities Commission (CPUC)--approved Standards for Metering Products (accuracy and intervals) for the exclusive use of tracking the energy used to charge your electric vehicle to be billed on the applicable submeter Rate. Your Submeter Meter Data Management Agent (Submeter MDMA) will be required to collect and transmit your submeter usage data to PG&E as scheduled in the required format in compliance with the Submeter MDMA Performance Requirements (copy available upon request). You will retain sole responsibility for paying the entire monthly bill including EV and other charges regardless of any agreement between you and your Submeter MDMA.

This Pilot will begin on September 1, 2014. Any Customer enrolled in the Pilot will be eligible to participate for no more than 12 consecutive billing cycles; however the Customer may terminate participation in the pilot at any time. When Pilot participation ends, the submeter Rate will be terminated for the submetered account. Thereafter, any future electric vehicle charging will be billed at the Customer's otherwise applicable tariff rate for the primary meter. Customers are encouraged to contact PG&E to discuss available electric vehicle rates.

In addition, you agree to provide an independent evaluator paid by the Investor Owned Utilities (IOUs) with feedback on your experiences with Pilot participation, including enrollment, equipment installation, and billing. In accordance with the CPUC's instruction, this survey will not be burdensome. Additionally, you may be required to provide access to your home or facility for the evaluator to perform tests on your submeter. Such submeter testing is only required of five percent of participating customers. If your submeter is selected for testing, tests will be arranged at a convenient time, and your MDMA may be present. No adjustments to your primary or submetered accounts billed over the course of your participation in the Pilot will be made regardless of whether the submeter is found to violate CPUC meter accuracy standards.

ELECTRIC SAMPLE FORM 79-1160 Sheet 1
DEMAND RESPONSE PROVIDER (DRP)
SERVICE AGREEMENT

Please Refer to Attached
Sample Form

DEMAND RESPONSE PROVIDER (DRP) SERVICE AGREEMENT

This Demand Response Provider ("DRP") Service Agreement ("Agreement") is made and entered into as of this ___day of_____, by and between "_____" ("DRP"), a _____ organized and existing under the laws of the state of _____, and the Utility, "Pacific Gas and Electric Company" ("PG&E"), wherein PG&E is a corporation organized and existing under the laws of the state of California. From time to time, DRP and PG&E shall be individually referred to herein as a "Party" and collectively as the "Parties."

1. General Description of Agreement

1.1. This Agreement is a legally binding contract. The Parties named in this Agreement are bound by the terms set forth herein and otherwise incorporated herein by reference, and the Parties are also bound by the requirements of Electric Rule 24, which this Agreement is intended, in part, to effectuate. This Agreement and Electric Rule 24 shall govern the business relationship between the Parties hereto by which DRP shall offer Demand Response Provider Demand Response Service (DRP DR Service) in the California Independent System Operator's (CAISO's) wholesale electricity markets through transactions with bundled service customers in PG&E's service territory. Each Party, by agreeing to undertake specific activities and responsibilities for or on behalf of customers, acknowledges that each Party shall relieve and discharge the other Party of the responsibility for said activities and responsibilities with respect to those customers, consistent with Rule 24, Section C. Except where explicitly defined herein, the definitions controlling this Agreement are contained in PG&E's Rule 1, Definitions, and/or Rule 24, Direct Participation Demand Response.

1.2. The form of this Agreement has been developed as part of the California Public Utility Commission's (CPUC's or Commission's) regulatory process, was intended to conform to CPUC directives, was filed with and approved by the CPUC for use between PG&E and a DRP participating in the wholesale market with the PG&E's bundled service customers, and may not be waived, altered, amended or modified, except as provided a) herein or in Rule 24 or b) as may otherwise be authorized by the CPUC. Each party shall be responsible for keeping up-to-date on Commission-authorized changes.

2. Representations

2.1. Each Party agrees to remain in compliance with the terms of this Agreement, Rule 24, as amended from time to time upon CPUC approval, and other applicable Commission rules and requirements regarding use of the PG&E's bundled load to provide demand response in the wholesale electricity market.

2.2. Each person executing this Agreement for the respective Parties expressly represents and warrants he or she has authority to bind the entity on whose behalf this Agreement is executed.

2.3. Each Party represents that (a) it has the full power and authority to execute and deliver this Agreement and to perform its terms and conditions; (b) the execution, delivery and performance of this Agreement have been duly authorized by all necessary corporate or other action by such Party; and (c) this Agreement constitutes such Party's legal, valid and binding obligation, enforceable against such Party in accordance with its terms.

2.4. Each Party shall (a) exercise all reasonable care, diligence, and good faith in the performance of its duties pursuant to this Agreement; and (b) carry out its duties in accordance with applicable recognized professional standards in accordance with the requirements of this Agreement.

ELECTRIC SAMPLE FORM 79-1162 Sheet 1
RULE 21 DETAILED STUDY AGREEMENT

Please Refer to Attached Sample Form

RULE 21 DETAILED STUDY AGREEMENT

THIS DETAILED STUDY AGREEMENT ("AGREEMENT") is made and entered into this __ day of _____, 20___ by and between_____, a organized and existing under the laws of the State of _____, ("Applicant,") and Pacific Gas and Electric Company, a corporation, existing under the laws of the State of California, ("Distribution Provider "). Applicant and Distribution Provider each may be referred to as a "Party," or collectively as the "Parties."

RECITALS

WHEREAS, Distribution Provider, as a public utility in the State of California subject to the jurisdiction of the California Public Utilities Commission ("Commission"), provides non-discriminatory access to generating facilities wishing to interconnect to its Distribution System or Transmission System under the provisions of Rule 21 of its Tariffs; and

WHEREAS, Applicant is proposing to develop a Generating Facility or generating capacity addition to an existing Generating Facility consistent with the Interconnection Request submitted by Applicant dated _____ ; and

WHEREAS, Applicant desires to interconnect the Generating Facility with the Distribution System or Transmission System pursuant to the ☐ Independent Study Process, or ☐ Distribution Group Study Process [check one]; and

WHEREAS, the Applicant has requested Distribution Provider to perform Interconnection Studies to assess the system impact of interconnecting the Generating Facility to the Distribution System, Transmission System and any Affected Systems and to specify and estimate the cost of the equipment, engineering, procurement and construction work needed on the Distribution Provider's electric system to physically and electrically connect the Generating Facility to the Distribution Provider's Distribution System or Transmission System in accordance with Good Utility Practice;

NOW, THEREFORE, in consideration of and subject to the mutual covenants contained herein the Parties agreed as follows:

1.0 When used in this Agreement, with initial capitalization, the terms specified shall have the meanings indicated in Distribution Provider's Rule 21.

2.0 Applicant elects and Distribution Provider shall cause to be performed Interconnection Studies consistent with Section F.3.b of Rule 21 for Interconnection Requests evaluated under the Independent Study Process or Section F.3.c of Rule 21 for Interconnection Requests evaluated under the Distribution Group Study Process.

3.0 The scope of the Interconnection Studies shall be subject to the assumptions set forth in Attachments A and, if applicable, Attachment B to this Agreement.

† Information collected on this form is used in accordance with PG&E's Privacy Policy. The Privacy Policy is available at pge.com/privacy.

ELECTRIC SAMPLE FORM 79-1164 Sheet 1
MOBILEHOME PARK
UTILITY CONVERSION PROGRAM APPLICATION

Please Refer to Attached Sample Form

MOBILEHOME PARK
UTILITY CONVERSION PROGRAM APPLICATION

Date of Issuance: _____

In accordance with California Public Utilities Commission (CPUC or Commission) Decision (D.)20-04-004, and subject to the requirements of the Mobilehome Park Utility Conversion Program Rule (MHP Rule[1]), the Commission-regulated electric and natural gas utilities (Utilities) are offering a Mobilehome Park Utility Conversion Program (MHP Program) to replace existing privately owned master-meter electric and/or gas distribution service within a Mobilehome Park or Manufactured Housing Communities (MHP), to direct Utility service to each individual MHP space within the MHP.

MHP Owners/Operators who are receiving this Application previously submitted the CPUC Form of Intent during the open application period. After reviewing the information you submitted, the CPUC's Safety and Enforcement Division (SED) and/or the California Department of Housing and Community Development (HCD) or its local agency designee has pre-selected your MHP to participate in the MHP Program.

The MHP Owner/Operator must designate below each Utility[2] that currently provides electric and/or natural gas service to the master-meter of the MHP. The designated Utilities will be responsible for the conversion of the existing privately-owned master-meter system to direct Utility service, upon acceptance of the MHP into the MHP Program. Under the MHP Program, each Utility will only provide service conversion for the commodity (electricity and/or natural gas) that the Utility currently provides to the MHP. After the completion of the service conversion, the Utility will provide direct service to each individual HCD permitted Mobilehome (MH) space. and the eligible MHP common areas based on approval by the Commission's Safety and Enforcement Division (SED). Upon request, the Utility may provide to the MHP a new electric or gas utility service that is not currently being supplied by the Utility, provided that; 1) the Utility offers the requested electric or natural gas service in that territory; 2) a distribution line is located nearby and can be connected safely and economically to the MHP; and 3) the request would be governed by the existing Distribution and Service Extension Rules in the Utility's Tariff and would not be included in the MHP Program.

Electric Service	Natural Gas Service	
☐	N/A	***Bear Valley Electric Service***
☐	N/A	***Liberty Utilities*** (CalPeco Electric)
☐	☐	***Pacific Gas and Electric Company***
☐	N/A	***Pacific Power,*** *a Division of PacifiCorp*
☐	☐	***San Diego Gas & Electric Company***
☐	N/A	***Southern California Edison Company***
N/A	☐	***Southern California Gas Company***

MHP Rule by Utility

Bear Valley Electric Service – Rule 23	San Diego Gas and Electric – Rule 44
Liberty Utilities – Rule 23	Southern California Edison – Rule 27
Pacific Gas and Electric – Rule 28	Southern California Gas – Rule 44
Pacific Power – Rule 26	Southwest Gas – Rule 23

[2] Although the singular term "Utility" is used throughout this Application, each of the Utilities designated on this page is considered a party to this Application. The designated Utilities will be coordinating throughout the application and conversion processes. However, it is the sole responsibility of the MHP Owner/Operator to ensure that the information and documentation required by this Application is provided to *each* of the designated Utilities within the specified timeframes.

ELECTRIC SAMPLE FORM 79-1165 Sheet 1
MOBILEHOME PARK
UTILITY CONVERSION PROGRAM AGREEMENT

Please Refer to Attached Sample Form

MOBILEHOME PARK
UTILITY CONVERSION PROGRAM
AGREEMENT

This Mobilehome Park Utility Conversion Program Agreement ("Agreement") is made and entered into by and between _____ ("MHP Owner/Operator"), a _____ organized and existing under the laws of the state of _____, and the Utility, "Pacific Gas and Electric Company" ("PG&E" or "Utility"), a corporation organized and existing under the laws of the state of California. MHP Owner/Operator and PG&E may be individually referred to as a "Party" and collectively as the "Parties."

RECITALS

WHEREAS, PG&E offers a ten-year program under the direction of the California Public Utilities Commission ("CPUC" or "Commission") pursuant to Decision 20-04-004 whereby master-metered Mobilehome Parks ("MHP") may elect to convert to direct utility service, with eligible costs for "To-the-Meter" and "Beyond-the-Meter" work to be borne by PG&E (MHP Program).

WHEREAS, MHP Owner/Operator desires to convert the master-metered system(s) in its MHP to direct service from PG&E under the MHP Program.

In accordance with the foregoing premises, the Parties agree as follows:

1. General Description of Agreement

1.1. This Agreement is a legally binding contract. The Parties agree to be bound by the terms and conditions set forth herein, incorporated herein by reference, and the requirements of Electric and Gas Rule 28 ("MHP Rules"). This Agreement and the MHP Rules shall govern the conversion of the entire private owned and operated electric and/or natural gas distribution system servicing the MHP to direct PG&E electric and/or gas distribution and service, including all HCD permitted Mobilehome Spaces (MH-Space), eli

~~1.1.~~ gible common areas, permanent buildings, and/or structures that currently have utility service.

If the gas or electric service at the MHP is provided by a different Utility, please provide the name of the Utility who provides the other service.

☐ Electric ☐ Gas Name of Utility: _____

1.2. Prior to signing this Agreement, the MHP Owner/Operator would have already submitted the California Public Utilities Commission (CPUC or Commission's) "Form of Intent" and the MHP Application (Form 79-1164), and continue to be bound by the terms set forth in those documents.

† Information collected on this form is used in accordance with PG&E's Privacy Policy. The Privacy Policy is available at pge.com/privacy.

Electric Sample Form No. 79-1166 Sheet 1
Non-Disclosure Agreement

Please Refer to Attached
Sample Form

NON-DISCLOSURE AGREEMENT
FORM 79-1166

THIS AGREEMENT is by and between _____ ("Recipient"), and _____ ("Pacific Gas and Electric Company" or "PG&E") on _____ ("Effective Date") and, if applicable, terminating on _____. This Agreement is entered into pursuant to California Public Utilities Commission Decision 14-05-016 (the "Commission Order") requiring that PG&E disclose certain information as specified in the Commission Order.

Subject to the Commission Order and this Agreement, Recipient and PG&E agree as follows:

1. This Agreement is limited to information and data as identified in Exhibit A to this Agreement, which is in the possession or control of the PG&E and for which this Commission Order requires an NDA prior to disclosure to a requesting party (hereinafter "Data"). This Agreement applies to such Data, whether conveyed orally or in written, electronic or other form of media, and whether or not marked as "proprietary," "confidential," or "trade secret." This includes customer-specific billing, credit, or usage information, electricity and/or gas usage information, which has not been publicly disclosed or within the public domain.

2. Protection of Data. In consideration of having access to such Data, and for the purpose specified below in Attachment B, the Recipient shall hold the Data in strict confidence, and not disclose it, or otherwise make it available to any person, entity or third party without the prior written consent of the PG&E. The Recipient agrees that all such Data:

a. Shall be used only for the purpose(s) as identified by Recipient and described below in Attachment B; and for no other secondary purpose; and

b. Shall be used in compliance with all applicable privacy and information security laws and regulations, including, without limitation, California Public Utilities Code Sections 394, 454.5(g) and 8380, California Civil Code Sections 654-655, 1798 et seq., and 3426-3426.11.

c. Shall not be reproduced, copied, in whole or in part, in any form, except as specifically agreed to by Recipient and PG&E, and in conformance with the purpose(s) as identified in Attachment B; and

d. Shall, together with any copies, reproductions, documents or other records thereof, in any form created by the Recipient that contain Data be either (1) returned to PG&E upon completion of services or work product or (2) destroyed, with signed verification, by Recipient upon completion of services or work product described in Attachment B; and

e. Shall not be used to attempt to re-identify individual customers by combining or comparing the Data with other data either already available to the Recipient or other publicly available sources of information.

Electric Sample Form No. 79-1167 Sheet 1
Local Governments Terms of Service Acceptance Agreement

Please Refer to Attached
Sample Form

LOCAL GOVERNMENTS TERMS OF SERVICE ACCEPTANCE AGREEMENT
FORM 79-1167

As set forth in Ordering Paragraph 5 and Section 8 of California Public Utilities Decision (D.) 14-05-016, eligible local governments requesting aggregated and anonymous energy usage data pursuant to the Decision must expressly agree to the following terms of service prior to receiving any such data.

a. The local government agrees to use the data for the purposes stated in the request.

b. The local government agrees to not release the data to another third party or publicly disclose the data.

c. Prior to the release of any data to a requesting local government PG&E must inform the Executive Director of the Commission via a formal letter four weeks in advance of the proposed transfer. The letter shall contain the following information:

    1. The purpose identified by the local government requesting data.

        i. A description of the data requested and to be released.

d. The local government agrees to immediately notify the Commission and the utility in writing of any unauthorized access or disclosure of the data.

e. The local government agrees to require all agents, contractors, consultants, or other representatives of the local government that are not employees of the local government to agree to and execute the Non-Disclosure Certificate attached to this agreement, and to provide the utility with copies of all such Non-Disclosure Certificates, prior to any disclosure or use of the data by such agents, contractors, consultants or other representatives.

f. The local government agrees to comply with the laws, rules and orders of the California Public Utilities Commission applicable to the release, use and disclosure of the data, including D.14-05-016.

[DATE]

[CUSTOMER NAME]
[ADDRESS]
[CITY, STATE, ZIP]

RE: [PROJECT NAME,
ADDRESS]

Dear [CUSTOMER NAME]:

We are writing to let you know Pacific Gas and Electric Company (PG&E) will extend its facilities to provide the requested gas and electric service to the project address listed above. PG&E's costs have been developed based on the choices and information provided in your application and may change if you make changes. This letter, including PG&E's tariffs, which are incorporated by reference below, will serve as our contract. As required by the California Public Utilities Commission (CPUC), special facilities will be handled in a separate contract. Please complete the following four steps to execute this contract.

1 Review the following work responsibilities and cost information.

WORK TO BE DONE BY	GAS MAIN		GAS SERVICE		ELECTRIC DISTRIBUTION			ELECTRIC SERVICE		
	Trench	Pipe	Trench	Pipe	Trench	Substr.	Facilities	Trench	Substr.	Facilities
PG&E										
Customer										

	GAS	ELECTRIC
Total non-refundable project costs	**$**	**$**
Refundable extension costs	$	$
Allowances (credit)	–$	–$
Net refundable amount	**=$**	**=$**
10-YEAR REFUNDABLE OPTION		
Net refundable amount	$	$
Credit for value of design and/or facilities provided by applicant	–$	–$
Total non-refundable project costs	+$	+$
Total (if you select this option)	**=$**	**=$**
NON-REFUNDABLE 50% DISCOUNT OPTION		
Net refundable amount	$	$
Discount: 50% of Net refundable amount	–$	–$
Credit for value of design and/or facilities provided by applicant	–$	–$
Total non-refundable project costs	+$	+$
Total (if you select this option)	**=$**	**=$**
Potential refund per residential lot/unit	$	$
Potential reimbursement per service completion		
Pressurized or energized system	$	$
Not pressurized or energized system	$	$
Reimbursement for other work performed	$	$

All amounts listed include the Income Tax Component of Contribution (ITCC) PG&E is required to charge customers, where applicable.

DEFINITIONS AND EXPLANATIONS OF TERMS

(For more detail see rules 15 and 16):

Total non-refundable project costs include costs for work such as electric trench and excavation, conduits, inspections, streetlights, conversion from overhead to underground and contract processing.

Refundable extension costs include costs for facilities such as electric conductor, transformers and poles; gas pipe, gas share of distribution trench and regulators; and meters.

Allowances are a credit against refundable extension costs. They are based upon the number of residential units expected to be connected within the first six months and the expected annual non-residential net (distribution) revenue from your project.

Allowances granted under either option are subject to **deficiency billing** if the number of residential units connected or the annual non-residential net revenue falls below the forecast used to calculate the allowances.

Net refundable amount is the portion of overall costs eligible for refund to you based upon additional residential meters being set or upon increases in non-residential annual net (distribution) revenue. A cost-of-ownership charge is assessed against the Net refundable amount (except for individual residential applicants) per Rule 15.

Potential refund per residential lot/unit is for those lots/units for which you did not already receive an allowance (i.e., units not expected to be connected in the first six months). Any refunds may be decreased or eliminated by cost-of-ownership charges assessed under the provisions of Rule 15.

Potential reimbursement per service completion is the amount to which a customer may be entitled for performing certain service connection work PG&E would otherwise perform when installing service extensions and are not to be confused with refunds.

Reimbursement for other work performed is the amount to which a customer may be entitled for performing certain work (other than service completions) that normally is PG&E's responsibility.

~~March 2015~~February 2021

Electric Sample Form No. 79-1170 Sheet 1
Authorization to Add MCE Loan Charges to Utility Bill

Please Refer to Attached Sample Form

AUTHORIZATION TO ADD MCE LOAN CHARGES TO UTILITY BILL

You have applied for, or have been given, a loan to finance energy efficiency improvements or a solar photovoltaic system and/or battery storage system on your property. The loan is being made by the financial institution described below in connection with a finance program offered by Marin Clean Energy ("**MCE**"). For battery storage systems, the loan may be made by MCE. By signing this document, you give your consent to allow Pacific Gas And Electric Company (**"PG&E"**) to include monthly loan repayment charges in your monthly utility bill from PG&E, and you agree to pay those charges, on the terms described below.

In this document:

"**You**" means you, the customer(s) signing this document.

"**Service Address**" means the property serviced by PG&E as shown in the Account Information section below.

"**Lender**" means the financial institution shown as the Lender in the Account Information section below.

"**Loan Charges**" means any and all principal, interest and other charges and fees payable by you in connection with your loan, as determined by MCE or its authorized representative(s), including fees for late or deficient payments.

1. **Authorization to Bill Loan Charges.** You authorize PG&E to include Loan Charges in your PG&E utility bills for the Service Address(es) until further notice. The Lender will determine the amount of the Loan Charge that is to be included in each bill, and PG&E will include that amount with any supporting information that the Lender supplies to PG&E. PG&E does not verify the information provided by the Lender. The Loan Charges may increase or decrease from month to month based on the terms of the loan, the inclusion of late charges and interest, in accordance with the loan terms, and variations in the periods of time covered by each PG&E billing cycle.

2. **Payment.** You agree to pay the Loan Charges along with the other charges in your utility bill by the due date for payment of the utility bill. All payments should be made to PG&E. PG&E will forward your Loan Charge payments to MCE. If a funding account for the PG&E payment is a credit card or checking account, PG&E will not forward your payment of Loan Charges to MCE unless that account has sufficient available credit to pay the full amount of the energy charges and the Loan Charges.

3. **Overpayments.** Overpayments will be applied to the amounts due currently or in the future to PG&E for PG&E charges and will not be applied to the Loan Charges. If you want to fully or substantially prepay Loan Charges, you must send the payment directly to the Lender.

4. **Billing Inquiries and Disputes.** If you have any questions about your loan or the Loan Charges, including any concerns that you may have been incorrectly charged, please contact the Lender at the number shown in the Account Information section below. Any disputes about your loan or the Loan Charges must be resolved between you and the Lender in accordance with your loan documentation and applicable law. PG&E will not be involved in resolving such disputes. Questions about the PG&E charges on your utility bill should be directed to PG&E at the number shown on your utility bill.

5. **Jurisdiction.** The terms of this document are subject to such modifications as the California Public Utilities Commission may direct from time to time in the exercise of its jurisdiction.

6. **Authorization to Release Information.** You must sign an Authorization Or Revocation of Authorization To Receive Customer Usage Information (PG&E Form 79-1147). This Authorization allows PG&E to disclose information about your account to MCE and the Lender to facilitate the loan repayment procedures described above.

7. **PG&E not Liable for Energy Efficiency Improvements, Products or Loan Process**. PG&E shall have no liability in connection with, and makes no warranties, expressed or implied, regarding the energy efficiency improvements, solar photovoltaic system, battery storage system or other products and services that are not furnished by PG&E ("Work"). Customer will be responsible for any and all losses and damage it may suffer in connection with, and any claims by third parties resulting from, the Work. Customer shall indemnify and hold harmless PG&E, its affiliates, and their respective owners, officers, directors, employees and agents thereof, from and against all claims, demands, liabilities, damages, fines, settlements or judgments which arise from or are caused by (a) any breach of the agreement by Customer; (b) any defects or problems with the Work, or the failure of the Work to deliver any anticipated energy efficiencies; (c) Customer's failure to pay any amount due or claimed by Contractor with respect to the Work; or (d) the wrongful or negligent acts or omissions of any party (including Contractor) in the conduct or performance of the Work.

Electric Sample Form No. 79-1171 Sheet 1
Authorization to Add MCE Storage Charges to Utility Bill

Please Refer to Attached Sample Form

AUTHORIZATION TO ADD MCE STORAGE CHARGES TO UTILITY BILL

You have entered into an agreement with a service provider and Marin Clean Energy ("**MCE**") to install and operate a battery storage system that will store and provide electricity to your property. This service has been arranged through a program offered by MCE. MCE will bill you for the storage service on the service provider's behalf, by adding storage charges to the MCE charges in your monthly Pacific Gas and Electric Company (**"PG&E"**) utility bill. By signing this document, you give your consent to allow PG&E to include monthly storage charges in your monthly utility bill from PG&E, and you agree to pay those charges, on the terms described below.

In this document:

"**You**" means you, the customer(s) signing this document.

"**Service Address**" means the property serviced by PG&E as shown in the Account Information section below.

"**Storage Provider**" means the battery storage service provider identified in the Account Information section below.

"**Storage Charges**" means any and all charges and fees payable by you under your contract with the Storage Provider, as determined by MCE or its authorized representative(s), including fees for late or deficient payments.

1. **Authorization to Bill Storage Charges.** You authorize PG&E to include Storage Charges in your PG&E utility bills for the Service Address(es) until further notice. MCE will determine the amount of the Storage Charge that is to be included in each bill, and PG&E will include that amount with any supporting information that MCE supplies to PG&E. PG&E does not verify the information provided by MCE. The Storage Charges may increase or decrease from month to month based on the terms of your contract with the Storage Provider, the inclusion of late charges and interest (if permitted by your contract), and variations in the periods of time covered by each PG&E billing cycle.

2. **Payment.** You agree to pay the Storage Charges along with the other charges in your utility bill by the due date for payment of the utility bill. All payments should be made to PG&E. PG&E will forward your Storage Charge payments to MCE. If a funding account for the PG&E payment is a credit card or checking account, PG&E will not forward your payment of Storage Charges to MCE unless that account has sufficient available credit to pay the full amount of the energy charges and the Storage Charges. MCE will forward your payments to the Storage Provider.

3. **Overpayments.** Overpayments will be applied to the amounts due currently or in the future to PG&E for PG&E charges. If you want to prepay Storage Charges, (if permitted by your Battery Storage Contract) You must send the payment directly to the Storage Provider.

4. **Billing Inquiries and Disputes.** If you have any questions about your contract or the Storage Charges, including any concerns that you may have been incorrectly charged, please contact MCE. Any disputes about your contract or the Storage Charges must be resolved between you and the Storage Provider in accordance with your contract documentation and applicable law. PG&E will not be involved in resolving such disputes. Questions about the PG&E charges on your utility bill should be directed to PG&E at the number shown on your utility bill.

5. **Jurisdiction.** The terms of this document are subject to such modifications as the California Public Utilities Commission may direct from time to time in the exercise of its jurisdiction.

6. **Authorization to Release Information.** You must sign an Authorization Or Revocation of Authorization To Receive Customer Usage Information (PG&E Form 79-1147). This Authorization allows PG&E to disclose information about your account to MCE and the Storage Provider to facilitate the payment procedures described above.

7. **PG&E not Liable for Storage Services or Charges**. PG&E shall have no liability in connection with, and makes no warranties, expressed or implied, regarding the installation, operation or benefits of the battery storage system or services provided by the Storage Provider ("**Services**"). You are responsible for any and all loss and damage You may suffer in connection with the Services, and You agree to look to the Storage Provider or MCE, and not to PG&E, for any claim you might have relating to the Services, the cost or the benefits You expect to receive from them, or any errors in the calculation of Storage Charges

Electric Sample Form No. 79-1173 Sheet 1
Energy Efficiency Financing Pilot Programs
Authorization or Revocation of Authorization to Release Customer Information

Please Refer to Attached Sample Form

Pacific Gas and Electric Company®

ENERGY EFFICIENCY FINANCING PILOT PROGRAMS AUTHORIZATION OR REVOCATION OF AUTHORIZATION TO RELEASE CUSTOMER INFORMATION

This *Authorization or Revocation of Authorization to Release Customer Information* ("Authorization"): (1) authorizes Pacific Gas and Electric Company ("PG&E") to release your energy usage data to the Master Servicer, which will release such data to the Data Manager and Contractor Manager, all in accordance with the rules of, and as a condition of your participation in PG&E's Energy Efficiency Financing Pilot Programs ("Programs"), as administered by CAEATFA; or (2) revokes an existing Authorization.

If you do not wish to share your energy usage data as described herein, you are not required to fill out this Authorization, but you will be unable to participate in the Programs.
You may also revoke your authorization at any time after signing this Authorization, but such revocation may lead to the termination of your participation in the Programs and may breach the terms and conditions of your loan or lease agreement with your lender.
Definitions:

"CAEATFA": The California Alternative Energy and Advanced Transportation Financing Authority, a public instrumentality of the State of California, or its agents, that administer the Programs for the California investor-owned utilities, or any successor administrator approved by the California Public Utilities Commission ("CPUC").

"Contractor Manager": An entity hired by and under contract with CAEATFA to manage qualified contractor activity under the Programs. The Contractor Manager will perform quality assurance procedures for which it may require the customer contact information and the installed project information. The Contractor Manager's contract with CAEATFA will require the Contractor Manager to protect the confidentiality of your contact and project information and prevent unauthorized contact and project information from being released to any other entity. CAEATFA may assume the obligations of the Contractor Manager.

"Data Manager": An entity hired by and under contract with CAEATFA solely to collect statewide energy usage data and data regarding the financial products provided to customers participating in the Programs and build a database for the aggregated and anonymized data provided by the Master Servicer. The Data Manager's contract with CAEATFA will require the Data Manager to protect the confidentiality of your usage data and prevent unauthorized disclosure of your usage data to any other entity. CAEATFA may assume the obligations of the Data Manager.

"Master Servicer": An entity hired by and under contract with CAEATFA. The Master Servicer will use customer energy usage data solely to: (1) establish a master file including project and financial product data for each loan and lease enrolled in the Programs; and (2) develop and update financial product servicing data files to be maintained throughout the term during which the loans and leases are enrolled in the Programs. The Master Servicer's contract with CAEATFA requires the Master Servicer to protect the confidentiality of your usage data and prevent unauthorized disclosure of your usage data to any other entity. The Master Servicer will aggregate and anonymize the data for the purpose of evaluating the Programs. CAEATFA may assume the obligations of the Master Servicer.

Electric Sample Form No. 79-1174 Sheet 1
Rule 21 Generator Interconnection Application

Please Refer to Attached Sample Form

FORM 79-1174 - ATTACHMENT A – INTERCONNECTION APPLICATION - CUSTOMER AND PROJECT INFORMATION

Part I - Selecting the Study Process[1]

This Application is not applicable for incentives and/or rebates offered by the Energy Resources Conservation and Development Commission (CEC), the CPUC or any other entity. Please contact those agencies directly or on their respective websites:

www.energy.ca.gov and www.cpuc.ca.gov.

Please check one:

- ☐ Fast Track Process.
- ☐ Detailed Study (not typical)
  - Will be either an Independent Study Process, Distribution Group Study Process or Transmission Cluster Study Process, dependent upon the Electrical Independence Tests.

Part II – Identifying the Generating Facility Location and Responsible Parties

Project Name:

A. Generating Facility Account Information (What electric service will the Generating Facility be interconnected for parallel operation with PG&E? For aggregated electric accounts provide the primary account and meter information).

Name shown on PG&E service account	Electric Service Agreement ID number - 10-digits	Electric Badge (Meter) Number - 6-10 digits (alpha numeric)

NOTE: ***Customer Electric account must match the customer's utility bill account information.***

Meter Location Street Address	City	State	Zip - 5-digits
		CA	

Please check all that apply:

- ☐ A New Generating Facility interconnection (at an existing service).
- ☐ Physical Changes to an interconnected Generating Facility with previous approval by PG&E (adding PV panels, adding energy storage as an addition or enhancement, changing inverters/turbines or changing load and/or operations).
- ☐ A New interconnection in conjunction with a new service.
  - An **Application for Service** must be completed. Additional fees may be required if a service or line extension is required (in accordance with PG&E Electric Rules 15 and 16). Please contact PG&E at 1-800-PGE-5000 or Rule21Gen@pge.com.
- ☐ An Interconnection under Direct Access (DA).

[1] For selection of Study Process for Exporting Generating Facilities, please complete the Rule 21 Exporting Generating Facility Interconnection Request Form 79-1145.

Electric Sample Form No. 79-1174-02 Sheet 1
Rule 21 Generator Interconnection Application

Please Refer to Attached Sample Form

RULE 21 GENERATOR INTERCONNECTION APPLICATION (Form 79-1174-02)

Part I - Introduction and Overview

A. Applicability: This Generating Facility Interconnection Application (Application) is used to request the interconnection to Pacific Gas and Electric Company's (PG&E) Electric System (over which the California Public Utilities Commission (CPUC) has jurisdiction) one or more of the following[1] tariffs:

(1) Non-Exporting Generating Facilities;
(2) NEM2 Solar (PV) (other than PV 30 KW or less)[2]; or RPS Generating Facilities
(3) NEM2 California Dept. of Corrections & Rehabilitation
(4) NEM2A – NEM2 Load Aggregation (under Schedule NEM2)
(5) NEM2MT- generating facilities subject to multiple tariff treatment
(6) RES-BCT (Renewable Energy Self-Generation Bill Credit Transfer) Generating Facilities;
(7) NEMFC / NEMFCA Net Energy Metering for Fuel Cells
(8) NEM2V – Virtual Net Energy Metering
(9) NEMVMASH (on a single Service Delivery Point, or for a Low Income Development)

Refer to PG&E's Electric Rule 21 and program tariffs to determine the specific requirements for interconnecting a Generating Facility. Capitalized terms used in this Application, and not otherwise defined herein, shall have the same meanings as defined in PG&E's Rule 21 and Rule 1.

Except as noted in the next paragraph, this Application may be used for any Generating Facility to be operated by, or for, a Customer and/or Interconnection Customer to supplement or serve part or all of its electric energy requirements that would otherwise be provided by PG&E, including distributed generation, cogeneration, emergency, backup, standby generation, and certain Net Energy Metered Generating Facilities. While Customers operating Generating Facilities isolated from PG&E's Electric System are not obligated to enter into an Interconnection Agreement with PG&E, parts of this Application will still need to be completed to satisfy PG&E's notice requirements for operating an isolated Generating Facility as specified in the California Health and Safety Code Section 119085 (b).

This Application may not be used to apply for interconnecting Generating Facilities used to participate in transactions where all, or a portion of, the electrical output of the Generating Facility is scheduled with the California Independent System Operator (CAISO). Such transactions may be subject to the jurisdiction of the Federal Energy Regulatory Commission (FERC) and require a different application available from PG&E.

This Application is not applicable for incentives and/or rebates offered by the Energy Resources Conservation and Development Commission (CEC), the CPUC or any other entity. Please contact those agencies directly or on their respective websites:

www.energy.ca.gov and www.cpuc.ca.gov.

B. Guidelines and Steps for Interconnection: This Application must be completed and sent to PG&E along with the additional information indicated in Part II below to initiate PG&E's interconnection review of

[1] Also when included with Energy Storage (e.g., batteries), or when operating under the provisions of PU Code 218, where permitted.
[2] For Net Energy Metering Customers with Solar and/or Wind Electric Generating Facilities less than 30 kW that are not paired with Energy Storage, simpler, shorter forms are available from PG&E (i.e., Forms 79-1151-02 A and B). These forms are available on PG&E's website at http://www.pge.com/gen.

† Information collected on this form is used in accordance with PG&E's Privacy Policy. The Privacy Policy is available at pge.com/privacy.

Electric Sample Form No. 79-1175 Sheet 1
Rule 21 Consent to Assignment Form for Non-NEM Projects

Please Refer to Attached
Sample Form

RULE 21 CONSENT TO ASSIGNMENT FORM FOR NON-NEM PROJECTS

This Rule 21 Exporting and Non-Exporting Generating Facilities Consent to Assignment and Agreement is by and among **PACIFIC GAS AND ELECTRIC COMPANY** ("PG&E"), a California corporation, _____, _____, a _____ ("Assignor"), and _____ a _____ ("Assignee").

RECITALS

A. Assignor currently owns _____ ("Facility") located at _____ _____, which will be interconnected with PG&E's electric system, and will receive standby service from PG&E. This project has an interconnection Queue number of _____ and an executed interconnection agreement under PG&E's CPUC Rule 21 Generator Interconnection Agreement for Exporting Generating Facilities or Generating Facility Interconnection Agreement for Non-Exporting Generating Facilities. Assignor wishes to assign/sell the Project to Assignee, and Assignee agrees to the Project assignment.

B. In connection with this assignment/sale, Assignor wishes to assign to Assignee various agreements with PG&E related to the Facility that are listed on Exhibit A (the "Assigned Agreements").

C. In connection with this assign/sale, the Assignee also provides to PG&E the updated customer contact information listed in Exhibit B, such contact information to be used by PG&E for all Facility-related communication following execution of this Consent to Assignment.

NOW THEREFORE, PG&E hereby consents to an assignment by Assignor to Assignee of whatever rights, title and interest it may have in and to the Assigned Agreements, under the following terms and conditions:

1. Assignor and Assignee each recognize and acknowledge that PG&E makes no representation or warranty, express or implied, that Assignor has any right, title, or interest in the Assigned Agreements. Assignee is responsible for satisfying itself as to the existence and extent of Assignor's right, title, and interest in the Assigned Agreements and Assignee expressly releases PG&E from any liability resulting from the assignment, to which PG&E is consenting herein. Assignee and Assignor further release PG&E from any liability for consenting to any future assignments of the Agreements by Assignee or Assignor.

† Information collected on this form is used in accordance with PG&E's Privacy Policy. The Privacy Policy is available at pge.com/privacy.

Special Contract for Unmetered Service Agreement for Energy Use Adjustments for Network Controlled Dimmable Streetlights - 2014 Pilot Program

This Agreement between _____
(the Customer) and Pacific Gas and Electric Company (PG&E or the Company) is to establish and govern the provisions of a 2014 pilot program to evaluate, and provide billing adjustments to reflect actual energy used by streetlights that have been equipped with network controls that allow the lights to be dimmed under operating schedules established by the Customer.

WHEREAS, the streetlights in question are owned by the Customer and would otherwise be subject to the standard provisions of the Company's Electric Rate Schedule LS-2; and

WHEREAS, the technology available for use in remotely programmed network control systems for streetlights has advanced to the point where the systems are now capable of logging and reporting energy used by the streetlights; and

WHEREAS, the Customer and the Company agree that the current provisions of Electric Rate Schedule LS-2 do not provide sufficient flexibility to accommodate energy use adjustments for dimming schedules made possible by the use of remotely programmed network control systems; and

WHEREAS, the Company has determined that it would be impractical, and typically not cost-effective, for customers to pay to install individual meters at each service delivery point for streetlights or streetlight circuits supporting controlled lights subject to this Agreement; and

WHEREAS, the Company agrees that the Customer has met the eligibility requirements to allow participation in this pilot program as identified in Attachment 4, including the ability of the Customer's network control system to monitor, log and report energy consumption data for the controlled streetlights; and

WHEREAS, pursuant to the Company's electric Preliminary Statement Part A, Description of Service Area and General Requirements, Section 6.a, the Customer and the Company agree that, in lieu of installing meters at each service delivery point, the Company shall provide unmetered electric service as provided herein.

NOW THEREFORE, in consideration of the terms and covenants contained herein, the Customer and the Company hereby agree as follows:

A. Establishment of Initial Estimated Average Dimming Level

A Customer shall submit lamp installs/retrofits to PG&E via the monthly inventory report as detailed in Attachment 1, section I. The establishment of the initial estimated average dimming level for each lamp shall be established according to the following terms and conditions.

PLUG-IN ELECTRIC VEHICLE SUBMETERING PILOT PHASE 2
SUBMETER MDMA REGISTRATION AGREEMENT

Please Refer to Attached
Sample Form

PLUG-IN ELECTRIC VEHICLE SUBMETERING PILOT PHASE 2

Submeter MDMA Registration Agreement

1.0 Instructions for Qualifying as a Submeter Meter Data Management Agent

Background

On November 19, 2013, the California Public Utilities Commission (Commission or CPUC) issued Decision (D.)13-11-002 modifying the PEV Submetering Protocol requirements set forth in D.11-07-029 by adopting the Commission Energy Division (ED) Staff's Plug-In Electric Vehicle Submetering Roadmap for a two-phase pilot. Resolution E-4651, dated June 26, 2014, requires the investor-owned utilities (IOUs) to submit a Phase 2 Tier 2 Advice Letter that includes the metering requirements provided by the ED to the IOUs, draft versions of the data format template, the Submeter Meter Data Management Agent (MDMA) Registration Agreement (RA), the customer enrollment Agreement, and MDMA Service Requirements.

Submeter MDMA Registration Process

Submeter MDMA Registration for the Phase 2 Pilot will be a two-step process:

Step 1:

All Submeter MDMAs desiring to participate in the Phase 2 Pilot must complete and submit the attached Submeter MDMA Registration Agreement to the Commission's Energy Division's (ED), Melicia Charles, to receive preliminary approval to participate in the Phase 2 Pilot (Note: Electronic signatures will not be accepted on the Submeter MDMA Registration Agreement (RA).)

Submeter MDMAs must indicate the following in the RA: (1) the number of submeters associated with customers that have agreed to participate as of the date they submit the RA and (2) the total number of submeters that they plan to enroll. The Phase 2 Pilot starts on January 16, 2017, and ends on April 30, 2018. Any individual customer participant may only participate for a maximum of 12 billing cycles.

The Commission may require that potential Submeter MDMAs comply with certain Energy Division standards in experience, education and training to perform the functions of a Submeter MDMA. These functions and associated requirements are described in detail in the Phase 2 Performance Standards for Metering and Meter Data Agents Participating in California's Electric Vehicle Submetering Pilot (Performance Standards), and attached hereto as Attachment 1.

The Energy Division will review the submitted documentation, determine if the prospective Submeter MDMA standards meet the requirements established by the Commission, and notify the Submeter MDMA whether its request is preliminarily approved via e-mail. The determination is based on the Energy Division's review of the Submeter MDMA's written, completed application and documentation. The Energy Division will make reasonable efforts to review the documentation and respond to the Submeter MDMA request within five business days. Missing documentation may require the prospective Submeter MDMAs to resubmit that portion of the application and restart the five business day review process. The Energy Division may also request additional information, as needed, to provide preliminary approval of the MDMA's registration request to participate in the Phase 2 Pilot.

ELECTRIC SAMPLE FORM 79-1179 Sheet 1
PLUG-IN ELECTRIC VEHICLE SUBMETERING PILOT PHASE 2
SINGLE CUSTOMER-OF-RECORD ENROLLMENT AGREEMENT

Please Refer to Attached Sample Form

PLUG-IN ELECTRIC VEHICLE SUBMETERING PILOT PHASE 2

Single Customer-of-Record Enrollment Agreement

Terms and Conditions

This Participation Agreement ("Agreement"), effective upon the date a Customer Enrollment Agreement (CEA) is submitted, is entered into between Pacific Gas & Electric (PG&E), the customer that receives electric service from PG&E (hereafter, "Participant," "Customer," or "you") and the Submeter Meter Data Management Agent (Submeter MDMA) providing data management services. PG&E, Participant and Submeter MDMA are referred to jointly as "Parties."

A. Purpose and Overview of the Phase 2 Pilot

PG&E is conducting a temporary Plug-in Electric Vehicle (EV) Submeter Phase 2 Pilot. To participate in the Phase 2 Pilot, Customers must read and agree to the terms and conditions of this Agreement and be eligible for an applicable separately-metered EV Rate. The customer enrollment process is described in the Customer Enrollment Agreement.

The applicable EV Rate requires a separate meter to measure only the energy used to charge electric vehicles. PG&E will set up a separate service account and the energy used to charge EVs will be billed on the applicable EV rate schedule. The rest of the energy used at your residence or business will be billed at your otherwise applicable tariff. For the Phase 2 Pilot, the separate meter must be a submeter owned by the Customer or by a third-party. The Phase 2 Pilot is available to eligible customers within all of PG&E's service districts and limited to 500 submeters on a first-come, first-served basis. Customers on a Net Energy Metering (NEM) rate are eligible but will be limited to 20% of the participation cap (100 submeters).

As a Participant in the Phase 2 Pilot, you agree to install an eligible Customer- or third-party-owned submeter that meets the California Public Utilities Commission (CPUC) approved Submeter MDMA Registration Agreement, Attachment 1 - Performance Standards for Metering and Submeter Meter Data Management Agents, for the exclusive use of tracking the energy used to charge your electric vehicle to be billed on the applicable EV rate. Your Submeter MDMA will be required to collect and transmit your submeter usage data to PG&E as scheduled in the required format in compliance with the Submeter MDMA Performance Requirements (copy available upon request). You will retain sole responsibility for paying the entire monthly bill including EV and other charges regardless of any agreement between you and your Submeter MDMA. Your Submeter MDMA will be the single point-of-contact for all submeter data issues regardless of any agreement you or the Submeter MDMA may have with other organizations providing Submeter Pilot services on its or your behalf. PG&E will be the single point-of-contact for all PG&E billing issues.

The Phase 2 Pilot will begin on November 1, 2016, and enrollment will end on April 30, 2017. Any Customer enrolled in the Phase 2 Pilot will be eligible to participate for no more than 12 consecutive billing cycles; however, the Customer may terminate participation in the Phase 2 Pilot at any time by contacting PG&E. When Phase 2 Pilot participation ends, the EV rate will be terminated for the submetered account. Thereafter, any future electric vehicle charging will be billed at the Customer's otherwise applicable tariff rate for the primary meter. Customers are encouraged to contact PG&E to discuss available electric vehicle rates.

In addition, you agree to provide an independent evaluator, Nexant, paid by the Investor Owned Utilities (IOUs), with feedback on your experiences with Phase 2 Pilot participation, including enrollment, equipment installation, and billing. In accordance with the CPUC's instruction, this survey will not be burdensome. Additionally, you may be required to provide access to your home or facility for the evaluator to perform tests on your submeter. Such submeter testing is only required of five percent of participating customers. If

PLUG-IN ELECTRIC VEHICLE SUBMETERING PILOT PHASE 2

Multiple Customer-of-Record Enrollment Agreement

Terms and Conditions

This Participation Agreement ("Agreement"), effective upon the date a Customer Enrollment Agreement (CEA) is submitted, is entered into between Pacific Gas & Electric (PG&E), the customer that receives electric service from PG&E (hereafter, "Participant," "Customer," "you," or "primary meter customer"), the customer that receives submeter service from PG&E (hereafter, "Participant," "Customer," "you," or "submeter customer"), and the Submeter Meter Data Management Agent (Submeter MDMA) providing data management services. PG&E, Participant and Submeter MDMA are referred to jointly as "Parties."

A. Purpose and Overview of the Phase 2 Pilot

PG&E is conducting Phase 2 of a temporary Plug-in Electric Vehicle (EV) Submeter Pilot. To participate in the Phase 2 Pilot, Customers must read and agree to the terms and conditions of this Agreement and be eligible for an applicable separately-metered EV Rate. The customer enrollment process is described in the Customer Enrollment Agreement.

The applicable EV Rate requires a separate meter to measure only the energy used to charge electric vehicles. PG&E will set up a separate service account and the energy used to charge EVs will be billed on the applicable EV rate schedule. The rest of the energy used at your residence or business will be billed at your otherwise applicable tariff. For the Phase 2 Pilot, the separate meter must be a submeter owned by the Customer or by a third-party. The Phase 2 Pilot is available to eligible customers within all of PG&E's service districts and limited to 500 submeters on a first-come, first-served basis. Customers on a Net Energy Metering (NEM) rate are eligible but will be limited to 20% of the participation cap (100 submeters).

As a Participant in the Phase 2 Pilot, you agree to install an eligible Customer- or third-party-owned submeter that meets the California Public Utilities Commission (CPUC) approved Submeter MDMA Registration Agreement, Attachment 1 - Performance Standards for Metering and Submeter Meter Data Management Agents, for the exclusive use of tracking the energy used to charge your electric vehicle to be billed on the applicable EV Rate. Your Submeter MDMA will be required to collect and transmit your submeter usage data to PG&E as scheduled in the required format in compliance with the Submeter MDMA Performance Requirements (copy available upon request). You will retain sole responsibility for paying the entire monthly bill including EV and other charges regardless of any agreement between you and your Submeter MDMA. Your Submeter MDMA will be the single point-of-contact for all submeter data issues regardless of any agreement you or the Submeter MDMA may have with other organizations providing Submeter Pilot services on its or your behalf. PG&E will be the single point-of-contact for all PG&E billing issues.

The Phase 2 Pilot will begin on January 16, 2017, and enrollment will end on April 30, 2017. Any Customer enrolled in the Phase 2 Pilot will be eligible to participate for no more than 12 consecutive billing cycles; however, the Customer may terminate participation in the Phase 2 Pilot at any time by contacting PG&E. When Phase 2 Pilot participation ends, the EV rate will be terminated for the submetered account. Thereafter, any future electric vehicle charging will be billed at the Customer's otherwise applicable tariff rate for the primary meter. Customers are encouraged to contact PG&E to discuss available electric vehicle rates.

In addition, you agree to provide an independent evaluator, Nexant, or another third party, paid by the Investor Owned Utilities (IOUs), with feedback on your experiences with Phase 2 Pilot participation, including enrollment, equipment installation, and billing. In accordance with the CPUC's instruction, this

RULE 21 PRE-APPLICATION REPORT REQUEST

Please Refer to Attached
Sample Form

Pacific Gas and Electric Company®

RULE 21 PRE-APPLICATION REPORT REQUEST

1. GENERAL INTENT, CLARIFICATION AND OBLIGATION

A. Upon receipt of a completed Pre-Application Report Request, the applicable non-refundable processing fee and Authorization to Receive Customer Information or Act on a Customer's Behalf (PG&E Form 79-1095), if applicable, Distribution Provider shall provide pre-application data for the Pre-Application Report package selected by Applicant and within the corresponding timeframe.

B. The Pre-Application Report is based on readily available pre-existing system data at the time of request.

C. A Pre-Application Report Request does not obligate Distribution Provider to conduct a study or other analysis of the proposed project.

D. A Pre-Application Report Request does not obligate Distribution Provider to provide a response for data that is not readily available.

E. If Distribution Provider cannot complete all or some of the data fields in a Standard Pre-Application Report due to lack of available data, Distribution Provider will provide Applicant with a Pre-Application Report package that includes the data that is available.

F. In requesting a Pre-Application Report, Applicant understands that:

(1) The existence of "Available Capacity" in no way implies that an interconnection up to this level may be completed without system impacts since there are many variables studied as part of the interconnection review process.

(2) The Distribution System is dynamic and subject to change.

(3) Data provided in the Pre-Application Report may become outdated and not useful at the time of submission of Applicant's Interconnection Request.

(4) Data included in the Pre-Application Report may be subject to confidentiality requirements and may only be released to Distribution Operator's customer of record or authorized representative.

(5) Notwithstanding any of the provisions of this Section, Distribution Provider shall, in good faith, provide a Pre-Application Report containing data that represents the best available information at the time of reporting.

(6) A Pre-Application Report Request may include various sets of data, and as such:

CUSTOMER INFORMATION SERVICE REQUEST FOR SHARE MY DATA (CISR-SMD)

IMPORTANT INFORMATION FOR CUSTOMERS – BE SURE TO READ FIRST
THIS IS A LEGALLY BINDING CONTRACT – READ IT CAREFULLY

This form allows you to voluntarily create a new Authorization to grant a Third Party of your choice access to your PG&E personal, energy usage, energy billing and other program data about you via PG&E's Share My Data (SMD) platform or to modify or revoke an existing Authorization you currently have on the Share My Data platform. This form should be completed by the main Customer Account Holder (name on the PG&E bill).

Pacific Gas and Electric Company's (PG&E's) Gas and Electric Rules 27 and its corresponding privacy policies, which can be found at www.pge.com/about/company/privacy/customer, do not allow for the disclosure of customers' personal information, such as your name, address, phone number, or electric account and billing information, to third parties for purposes other than providing utility services to you or as otherwise required by law, unless you expressly authorize us to do so. This form allows you to exercise your right to disclose personal and energy-related information about you to a Third Party under PG&E's Electric Rule 25 which can be found at https://www.pge.com/tariffs/assets/pdf/tariffbook/ELEC_RULES_25.pdf. This form may be used to authorize the release of electric-related information for Bundled, Community Choice Aggregation (CCA), Direct Access (DA) customers, and gas-related information for Core End-Use and Noncore End-Use customers. Once you authorize access by a Third Party to personal and energy-related information about you, you are responsible for and agree that you are solely responsible for ensuring that the Third Party safeguards this information from further disclosure without your consent.

If you want to provide data to a Demand Response Provider (DRP), please use "Customer Information Service Request For Demand Response Provider" (CISR-DRP), Form 79-1152.

This agreement at all times shall be subject to such modifications as the California Public Utilities Commission may direct from time to time in the exercise of its jurisdiction, including, without limitation, revisions to the types of customer information to be released.

Bioenergy Market Adjusting Tariff Program (BioMAT Program) - Fuel Resource Attestation

Please Refer to Attached Sample Form

BIOENERGY MARKET ADJUSTING TARIFF PROGRAM (BIOMAT PROGRAM) – FUEL RESOURCE ATTESTATION

Together herewith, and in accordance with the BioMAT Bioenergy Market Adjusting Tariff ("BioMAT Tariff"), _____ *[Insert Applicant's full legal name],* a _____ *[Insert Applicant's form of entity and state of registration]* ("Applicant"), submits a Program Participation Request ("PPR") for its electric generating Project to Pacific Gas and Electric Company ("PG&E"). In order for such Project to be eligible for participation in the BioMAT Program, Applicant must, among other things, submit this attestation describing its planned Fuel Resource Category and its compliance with the Fuel Resource Requirements set forth in the BioMAT Tariff. Applicant hereby represents, warrants and covenants that:

1. The fuel resource(s) Applicant intends to use for such Project are eligible for the Renewables Portfolio Standard (RPS) in accordance with the California Energy Commission's (CEC) RPS eligibility requirements.

2. The fuel resource(s) Applicant intends to use for such Project meet(s) the definition and requirements of one of the Fuel Resource Categories defined in the BioMAT Tariff.

3. The fuel resource(s) and percentages of Fuel Use, as applicable, that Applicant intends to use for such Project are *[check one Fuel Resource Category and all percentages of Fuel Use, as applicable, within that Fuel Resource Category]:*

Fuel Resource Category		**Fuel Use**
☐ Category 1		
	Wastewater treatment	_____ %
	Municipal organic waste diversion	_____ %
	Food processing	_____ %
	Codigestion	_____ %

SPECIAL AGREEMENT FOR RETAIL STORAGE STATION SERVICE FOR IN FRONT OF THE METER APPLICATIONS

This is an agreement between Pacific Gas and Electric Company (PG&E), a California corporation, and _____ (Customer), a(n) _____. This agreement will be herein referred to as "Agreement".

Customer has requested PG&E to provide Retail Station Power at Customer's premises at _____, County of_____ California, under one of the billing options designated below:

Storage Resource Name/Location	Resource Type: NAS, Flow Battery, Flywheel, Pumped storage etc.	Capacity (KW)	Make and Model e.g.Tesla, ABB, Siemens, Samsung etc.

Capitalized terms in this agreement that are not defined in this agreement are otherwise defined in PG&E's other applicable tariff schedules

☐ **Option 1 – Station Power Load Reference –** Station Power Load Reference value will be established by measuring its Retail Station Power loads at Idle Charging State, prior to issuance of the Permission To Operate (PTO) letter by PG&E.[1] This reference point will be set initially via field tests and will at each anniversary adjust based on the maximum demand values obtained in the prior 12 months.

The initial Station Power Load Reference Value _____ kW

The initial Crossover Threshold Value _____ kW

☐ **Option 2 – Separate Retail Station Power Meter –** Retail Station Power is separately metered, the bill will be determined from actual usage data obtained from either the Retail Station Power grid-tie meter or the station power sub-meter.

The initial Station Power Load Reference Value _____ kW

[1] Per PG&E Rule 21, all energy resources, including storage facilities are not permitted to operate in parallel with the PG&E grid until after all Rule 21 requirements are met including Customer's receipt of a Permission to Operate letter from PG&E.

† Information collected on this form is used in accordance with PG&E's Privacy Policy. The Privacy Policy is available at pge.com/privacy.

Electric Sample Form No. 79-1189 Sheet 1

Eligible Low Income Development Virtual Net Energy Metering (NEM2VMSH) Interconnection Agreement for Multifamily Affordable Housing with Solar Generation Totaling 1 MW or Less

Please Refer to Attached Sample Form

(Continued)

ELIGIBLE LOW INCOME DEVELOPMENT VIRTUAL NET ENERGY METERING (NEM2VMSH) INTERCONNECTION AGREEMENT FOR MULTIFAMILY AFFORDABLE HOUSING WITH SOLAR GENERATION TOTALING 1 MW OR LESS

This *Eligible Low Income Development Virtual Net Energy Metering (NEM2VMSH) Interconnection Agreement for Multifamily Affordable Housing with Solar Generation Totaling 1 MW or Less*, (Agreement) is entered into by and between _____ (Customer-Generator), and Pacific Gas and Electric Company (PG&E), a California Corporation. Customer-Generator and PG&E are sometimes also referred to in this Agreement jointly as "Parties" or individually as "Party." In consideration of the mutual promises and obligations stated in this Agreement and its attachments, the Parties agree as follows:

1. SCOPE AND PURPOSE

This Agreement provides for Customer-Generator to interconnect and operate solar electric generation for the Customer-Generator or designated agent of the Customer-Generator sized no larger than for the energy requirements of all eligible Benefitting Accounts (as defined in Schedule NEM2VMSH).

The purpose of this Agreement is to allow the Customer-Generator to interconnect solar electric generation with PG&E's Electric System, subject to the provisions of this Agreement and PG&E's Rate Schedule NEM2VMSH. Customer-Generator has elected to interconnect and operate its solar electric Generation in parallel with PG&E's Electric System, to offset part or all of the Eligible Low Income Development's own electrical requirements at the affiliated service points. Customer-Generator shall comply at all times with this Agreement as well as with all applicable laws, tariffs and applicable requirements of the Public Utilities Commission of the State of California.

2. SUMMARY AND DESCRIPTION OF CUSTOMER-GENERATOR'S GENERATING FACILITY AND DESIGNATION OF OTHERWISE-APPLICABLE RATE SCHEDULE

2.1 A description of the Generating Facility, including a summary of its significant components and a single-line diagram showing the general arrangement of how Customer-Generator's Generating Facility and loads are interconnected with PG&E's Electric System, is attached to and made a part of this Agreement. (This description is supplied by Customer-Generator as Appendix A).

2.2 Generating Facility identification number: _____ (Assigned by PG&E).

2.3 Customer-Generator's electric service agreement ID number: _____ (Assigned by PG&E).

2.4 Name and address used by PG&E to locate the electric service agreement ID number used to interconnect the Generating Facility with PG&E's Electric System:

Name: _____

Address: _____

City/Zip Code: _____

2.5 The Generating Facility's expected date of Initial Operation is _____.
The expected date of Initial Operation shall be within two years of the date of this Agreement.

3. DOCUMENTS INCLUDED AND DEFINED TERMS

3.1 This Agreement includes the following exhibits that are specifically incorporated herein and made a part of this Agreement.

† Information collected on this form is used in accordance with PG&E's Privacy Policy.
The Privacy Policy is available at pge.com/privacy.

Sample Form

(Continued)

VIRTUAL NET ENERGY METERING (NEM2V) INTERCONNECTION AGREEMENT FOR SOLAR (PV) OR WIND GENERATION TOTALING 1 MW OR LESS

This *Virtual Net Energy Metering (NEM2V) Interconnection Agreement for Solar (PV) or Wind Generation Totaling 1 MW or Less,* (Agreement) is entered into by and between _____ (Customer-Generator), and Pacific Gas and Electric Company (PG&E), a California Corporation. Customer-Generator and PG&E are sometimes also referred to in this Agreement jointly as "Parties" or individually as "Party." In consideration of the mutual promises and obligations stated in this Agreement and its attachments, the Parties agree as follows:

1. SCOPE AND PURPOSE

This Agreement provides for Customer-Generator to interconnect and operate a multi-tenant or multi-meter Eligible NEM2V installation on a single Premises, as defined in Electric Rule 1 for the Customer-Generator or designated agent of the Customer-Generator who interconnects a single solar photovoltaic and/or wind generating facility (Renewable Electric Generation Facility) sized no larger than 1 MW for the energy requirements of all eligible Benefitting Accounts (as defined in Schedule NEM2V) of the past year that is on a single Premises, as defined in Electric Rule 1 [1] with other individually metered PG&E Benefitting Accounts that will be allocated the benefits of the Renewable Electric Generation Facility as described in NEM2V, that meets all the applicability requirements in Schedule NEM2V, and that operates in parallel with Pacific Gas and Electric Company's (PG&E) Electric System.

The purpose of this Agreement is to allow the Customer-Generator to interconnect the Renewable Electric Generation Facility with PG&E's Electric System, subject to the provisions of this Agreement and PG&E's Rate Schedule NEM2V. Customer-Generator has elected to interconnect and operate its Renewable Electric Generation Facility in parallel with PG&E's Electric System, primarily to offset part or all of the NEM2V Arrangement's own electrical requirements of the Benefitting Accounts at the affiliated service. Customer-Generator shall comply at all times with this Agreement as well as with all applicable laws, tariffs and applicable requirements of the Public Utilities Commission of the State of California.

2. SUMMARY AND DESCRIPTION OF CUSTOMER-GENERATOR'S GENERATING FACILITY AND DESIGNATION OF OTHERWISE-APPLICABLE RATE SCHEDULE

2.1 A description of the Generating Facility, including a summary of its significant components and a single-line diagram showing the general arrangement of how Customer-Generator's Generating Facility and loads are interconnected with PG&E's Electric System, is attached to and made a part of this Agreement. (This description is supplied by Customer-Generator as Appendix A).

2.2 Generating Facility identification number: _____ (Assigned by PG&E).

2.3 Customer-Generator's electric service agreement ID number: _____ (Assigned by PG&E).

2.4 Name and address used by PG&E to locate the electric service agreement ID number used to interconnect the Generating Facility with PG&E's Electric System:

Name: _____

Address: _____

City/Zip Code: _____

2.5 The Generating Facility's expected date of Initial Operation is _____

The expected date of Initial Operation shall be within two years of the date of this Agreement.

[1] From Electric Rule2, a PREMISES is defined as all of the real property and apparatus employed in a single enterprise on an integral parcel of land undivided, excepting in the case of industrial, agricultural, oil field, resort enterprises, and public or quasi-public institutions, by a dedicated street, highway or public thoroughfare or railway. Automobile parking lots constituting a part of and adjacent to a single enterprise may be separated by an alley from the remainder of the Premises served.

GENERATING FACILITY INTERCONNECTION AGREEMENT FOR LOCAL GOVERNMENT RENEWABLE ENERGY SELF-GENERATION BILL CREDIT TRANSFER (RES-BCT)

This *Generating Facility Interconnection Agreement for Local Government Renewable Energy Self-Generation Bill Credit Transfer (RES-BCT),* (Agreement) is entered into by and between _____, a _____ (Producer), and Pacific Gas and Electric Company (PG&E) a California Corporation. Producer and PG&E are sometimes also referred to in this Agreement jointly as "Parties" or individually as "Party." In consideration of the mutual promises and obligations stated in this Agreement and its attachments, the Parties agree as follows:

1. SCOPE AND PURPOSE

This Agreement provides for Producer to interconnect and operate a Local Government Renewable Energy Self Generation Bill Credit Transfer Generating Facility in parallel with PG&E's Distribution System to serve the electrical loads connected to the electric service account that PG&E uses to interconnect Producer's Generating Facility (or, where permitted under Section 218 of the California Public Utilities Code (PUC), the electric loads of an on-site or neighboring party lawfully connected to Producer's Generating Facility through Producer's circuits).

2. SUMMARY AND DESCRIPTION OF PRODUCER'S GENERATING FACILITY

2.1. A description of the Generating Facility, including a summary of its significant components and a single-line diagram showing the general arrangement of how Producer's Generating Facility and loads are interconnected with PG&E's Distribution System, are attached to and made a part of this Agreement. (Supplied by Producer as Appendix A).

2.2. Generating Facility identification number: _____ (Assigned by PG&E).

2.3. Producer's electric service agreement ID number: _____ (Assigned by PG&E).

2.4. Name and address used by PG&E to locate the electric service account used to interconnect the Generating Facility with PG&E's Distribution System:

Name: _____

Address: _____

City/Zip Code: _____

2.5. The Gross Nameplate Rating of the Generating Facility is: _____ kW.

2.6. The Net Nameplate Rating of the Generating Facility is _____ kW.

2.7. The expected annual energy production of the Generating Facility is _____ kWh.

Electric Sample Form No. 79-1192 Sheet 1
Interconnection Agreement for Non-Export Storage Generating Facilities 500KW or Less

Please Refer to Attached Sample Form

(Continued)

INTERCONNECTION AGREEMENT FOR NON-EXPORT STORAGE GENERATING FACILITIES 500KW or LESS

This *INTERCONNECTION AGREEMENT FOR NON-EXPORT STORAGE GENERATING FACILITIES 500kW or LESS* (Agreement) is entered into by and between _____, a _____, (Producer), and Pacific Gas and Electric Company (PG&E) a California Corporation. Producer and PG&E are sometimes also referred to in this Agreement jointly as "Parties" or individually as "Party." In consideration of the mutual promises and obligations stated in this Agreement and its attachments, the Parties agree as follows:

1. SCOPE AND PURPOSE

This Agreement provides for Producer to interconnect and operate a Non-Export Storage Generating Facility or Non-Export Alternating Current/Direct Current (AC/DC) Converter in parallel with PG&E's Distribution System to serve the electrical loads connected to the electric service account that PG&E uses to interconnect Producer's Generating Facility or Non-Export AC/DC Converter (or, where permitted under Section 218 of the California Public Utilities Code (PUC), the electric loads of an on-site or neighboring party lawfully connected to Producer's Generating Facility through Producer's circuits). To be eligible for interconnection using this agreement, Producer's Non-Export Energy Storage Generating Facility or Non-Export AC/DC Converter interconnection must satisfy the Fast Track Process technical review requirements of Rule 21 Section F.2 and all of the following requirements must be met:

1.1 The Producer must meet all the eligibility criteria described in Rule 21, Section N.1 for the expedited storage interconnection process, including:

(a) Producer must have electronically submitted a completed Interconnection Request, including completing all application fields and submitting all supporting documentation necessary to facilitate the expedited review as required by Distribution Provider. Such documentation may include, but is not limited to, single line diagrams with specific details, manufacturer data sheets for proposed equipment, description of control systems, validation of the right to do business in the state, etc. PG&E shall clearly communicate these requirements as part of the application process. Producer shall select this process option in the Interconnection Request.

(b) Producer's Interconnection Request must be eligible for, and select, the Fast Track Process, as described in Rule 21.

(c) Producer's Interconnection Request must pass Fast Track Initial Review and not require any Interconnection Facilities, Distribution Upgrades or Network Upgrades to remain eligible under this Section. As such, Interconnection Requests that select the Cost Envelope Option are not eligible.

1.2 The Producer's Generating Facility (except for Non-Export AC/DC Converters which are addressed in Section 1.3) must meet and adhere to all of the following criteria, per Rule 21 Section N.2.

(a) The Generating Facility must be comprised solely of the following specific categories of generation technology: Non-Exporting battery storage

(b) The Generating Facility must have an aggregate maximum inverter nameplate rating of no

Agreement and Customer Authorization Net Energy Metering Interconnection for Solar and/or Wind Electric Generating Facilities of 30 Kilowatts or Less Paired with Energy Storage of 10 Kilowatts or Less

Please Refer to Attached Sample Form

(Continued)

AGREEMENT AND CUSTOMER AUTHORIZATION
Net Energy Metering Interconnection For Solar And/Or Wind Electric Generating Facilities Of 30 Kilowatts Or Less Paired with Energy Storage of 10 Kilowatts Or Less

IMPORTANT NOTES:

- Customers may not operate their Generating Facility while interconnected to the PG&E system until they receive written permission from PG&E.
- City and County of San Francisco ("CCSF") owned generating facilities seeking Schedule NEMCCSF and participants in the Demand Response Programs below are not eligible to participate in NEM.
  - Scheduled Load Reduction Program (SLRP)
  - SmartRate
- Customers who participate in Direct Access and Community Choice Aggregation must contact their Energy Service Provider directly regarding their NEM program.

Part I – Generating Facility Information and Responsible Parties

A. Customer and Generating Facility Information (*as it appears on the PG&E bill):

NEM 30 kilowatts or Less Paired with Energy Storage: ❑ Single Account ❑ Multiple Aggregated Accounts

Note: Net Energy Metering Aggregation (NEMA) is a program that allows customers with multiple meters to use the renewable energy generated at one meter (up to 1MW) to be credited against other meters that are located on parcel(s) that is/are contiguous or adjacent to the parcel that has the renewable generator. Energy Storage system must be 10 kilowatts or less.

Customer Sector (check only one):

❑ Residential
❑ Commercial
❑ Industrial
❑ Non-Profit
❑ Educational
❑ Military
❑ Other Government

Account Holder Name* (Individual or Company) | Electric Service Agreement ID * | Meter Number*

Service Address* | City* | State (CA) | Zip*

Customer Phone Number | Email (if blank, Permission to Operate (PTO) letter will be mailed to mailing address on record)

B. Meter Access Issues (if applicable, check all that apply and provide contact information to request access):

❑ Meter in building or behind locked gate
❑ Unrestrained animal at meter or AC Disconnect Switch
❑ Other: _____

Contact Name to Request Access (if access issues exist) | Contact Phone

C. Authorized Contact Information (required if Customer is authorizing a third party to act on Customer's behalf):

Company Name | Contact Person

Contact Phone Number | Email

Please complete this agreement in its entirety

Electric Sample Form No. 79-1194 Sheet 1
Local Agency And District Customers On-Bill Financing Loan Agreement

Please Refer to Attached Sample Form

(Continued)

LOCAL AGENCY AND DISTRICT CUSTOMERS ON-BILL FINANCING LOAN AGREEMENT

The undersigned Local Agency or District customer ("**Customer**") has contracted for the provision of energy efficiency/demand response equipment and services (the "**Work**") which qualify for one or more of PG&E's applicable rebate or incentive programs. Subject to the conditions (including the process for Adjustment and preconditions to funding) set forth below, Pacific Gas & Electric Company (**"PG&E"**) shall extend a loan (the "**Loan**") to Customer in the amount of the loan balance (the "**Loan Balance**") pursuant to the terms of this On-Bill Financing Loan Agreement ("**Loan Agreement**") and PG&E's rate schedules E-OBF and/or G-OBF, as applicable (the "**Schedule**").

To request the Loan, Customer has submitted a completed On-Bill Financing Application and associated documentation as required by PG&E (the "**Application**"). Collectively the Application and this Loan Agreement (including any Adjustment hereunder) comprise the "Agreement**"**.

1. Customer shall arrange for its Contractor, as identified at the end of this Agreement ("**Contractor**"), to provide the Work as described in the Application.

2. The estimated Loan Balance is set forth below. The total cost of the Work as installed, rebate/incentive for qualifying energy efficiency measures, Loan Balance, monthly payment, and loan term specified in this Loan Agreement may be adjusted, if necessary, after the Work and the post-installation inspection described in the Application and/or herein are completed (the "**Adjustment**"). The Adjustment will be calculated using the actual total cost of the Work, as installed, and the estimated energy savings (as described in the Application) of such Work. In no event will the Loan Balance be increased without Customer's written consent, even if Customer is eligible for such increased Loan Balance. Moreover, in no event will the Loan Balance exceed the maximum loan amount stipulated in the Application. Customer understands that in order to be eligible for the Loan, the initial Loan Balance for Work may not fall below the minimum loan amount, nor may the payback period exceed the maximum payback period. **Accordingly, if after the Adjustment, the Loan Balance falls below the minimum loan amount or if the simple payback period exceeds the program maximum payback period, each as described in the Application, PG&E shall have no obligation to extend the Loan, as the Work would not meet program requirements.** The Adjustment described in this paragraph will be communicated to the Customer in writing and will automatically become part of this Loan Agreement, except that any proposed increase in the Loan Balance will only become part of this Loan Agreement upon Customer's written consent to such increase.

3. **PG&E shall have no liability in connection with, and makes no warranties, expressed or implied, regarding the Work.** The Parties acknowledge and agree that PG&E is only providing the Local Agency or District cited here with financing. The Customer has independently hired contractors ("Local Agency or District Contractors") to perform the work on behalf of the Customer to qualify for financing. The Customer acknowledges and agrees that the Local Agency or District Contractors are not third party beneficiaries to this agreement between the Customer and PG&E. To the extent authorized by law and subject to appropriation of the Legislature, the Customer agrees that it will look only to Local Agency or District Contractors for any claims related to the installed equipment or its performance and that PG&E shall have no responsibility or liability, except for the payment of the loan proceeds, and the Customer shall indemnify PG&E for any claims made by the Local Agency or District Contractors against PG&E.

Electric Sample Form No. 79-1195 Sheet 1

Eligible Low Income Development Virtual Net Energy Metering (NEMVMASH) Interconnection Agreement for Multifamily Affordable Housing with Solar Generation Totaling 1 MW or Less

Please Refer to Attached Sample Form

(Continued)

ELIGIBLE LOW INCOME DEVELOPMENT VIRTUAL NET ENERGY METERING (NEMVMASH) INTERCONNECTION AGREEMENT FOR MULTIFAMILY AFFORDABLE HOUSING WITH SOLAR GENERATION TOTALING 1 MW OR LESS

This *Eligible Low Income Development Virtual Net Energy Metering (NEMVMASH) Interconnection Agreement for Multifamily Affordable Housing with Solar Generation Totaling 1 MW or Less*, (Agreement) is entered into by and between _____ (Customer-Generator), and Pacific Gas and Electric Company (PG&E), a California Corporation. Customer-Generator and PG&E are sometimes also referred to in this Agreement jointly as "Parties" or individually as "Party." In consideration of the mutual promises and obligations stated in this Agreement and its attachments, the Parties agree as follows:

1. SCOPE AND PURPOSE

This Agreement provides for Customer-Generator to interconnect and operate solar electric generation for the Customer-Generator or designated agent of the Customer-Generator sized no larger than for the energy requirements of all eligible Benefitting Accounts (as defined in Schedule NEMVMASH) but with a maximum total size of no larger than one MW or 1,000 kW (Renewable Electric Generation Facility) that is located at a Single Delivery Point[1] with other individually metered PG&E Benefitting Accounts the will be allocated the benefits of the Renewable Electric Generation Facility as described in NEMV, that meets all the applicability requirements in Schedule NEMV, and that operates in parallel with Pacific Gas and Electric Company's (PG&E) Distribution System

The purpose of this Agreement is to allow the Customer-Generator to interconnect solar electric generation with PG&E's Electric System, subject to the provisions of this Agreement and PG&E's Rate Schedule NEMVMASH. Customer-Generator has elected to interconnect and operate its solar electric Generation in parallel with PG&E's Electric System, to offset part or all of the Eligible Low Income Development's own electrical requirements at the affiliated service points. Customer-Generator shall comply at all times with this Agreement as well as with all applicable laws, tariffs and applicable requirements of the Public Utilities Commission of the State of California.

2. SUMMARY AND DESCRIPTION OF CUSTOMER-GENERATOR'S GENERATING FACILITY AND DESIGNATION OF OTHERWISE-APPLICABLE RATE SCHEDULE

2.1 A description of the Generating Facility, including a summary of its significant components and a single-line diagram showing the general arrangement of how Customer-Generator's Generating Facility and loads are interconnected with PG&E's Electric System, is attached to and made a part of this Agreement. (This description is supplied by Customer-Generator as Appendix A).

2.2 Generating Facility identification number: _____ (Assigned by PG&E).

2.3 Customer-Generator's electric service agreement ID number: _____ (Assigned by PG&E).

2.4 Name and address used by PG&E to locate the electric service agreement ID number used to interconnect the Generating Facility with PG&E's Electric System:

Name: _____

Address: _____

City/Zip Code: _____

[1] 1 Customer-owned line extensions that deliver power to other meters on the same property are not considered separate SDPs.

Electric Sample Form No. 79-1196 Sheet 1
Virtual Net Energy Metering (NEMV) Interconnection Agreement
for Solar (PV) or Wind Generation Totaling 1 MW or Less

Please Refer to Attached
Sample Form

(Continued)

VIRTUAL NET ENERGY METERING (NEMV) INTERCONNECTION AGREEMENT FOR SOLAR (PV) OR WIND GENERATION TOTALING 1 MW OR LESS

This *Virtual Net Energy Metering (NEMV) Interconnection Agreement for Solar (PV) or Wind Generation Totaling 1 MW or Less,* (Agreement) is entered into by and between _____ (Customer-Generator), and Pacific Gas and Electric Company (PG&E), a California Corporation. Customer-Generator and PG&E are sometimes also referred to in this Agreement jointly as "Parties" or individually as "Party." In consideration of the mutual promises and obligations stated in this Agreement and its attachments, the Parties agree as follows:

1. SCOPE AND PURPOSE

This Agreement provides for Customer-Generator to interconnect and operate a multi-tenant or multi-meter Eligible NEMV installation on a single Premises, as defined in Electric Rule 1 for the Customer-Generator or designated agent of the Customer-Generator who interconnects a single solar photovoltaic and/or wind generating facility (Renewable Electric Generation Facility) sized no larger than 1 MW for the energy requirements of all eligible Benefitting Accounts (as defined in Schedule NEMV) of the past year that is on a single Premises, as defined in Electric Rule 1 [1] with other individually metered PG&E Benefitting Accounts that will be allocated the benefits of the Renewable Electric Generation Facility as described in NEMV, that meets all the applicability requirements in Schedule NEMV, and that operates in parallel with Pacific Gas and Electric Company's (PG&E) Electric System.

The purpose of this Agreement is to allow the Customer-Generator to interconnect the Renewable Electric Generation Facility with PG&E's Electric System, subject to the provisions of this Agreement and PG&E's Rate Schedule NEMV. Customer-Generator has elected to interconnect and operate its Renewable Electric Generation Facility in parallel with PG&E's Electric System, primarily to offset part or all of the NEMV Arrangement's own electrical requirements of the Benefitting Accounts at the affiliated service. Customer-Generator shall comply at all times with this Agreement as well as with all applicable laws, tariffs and applicable requirements of the Public Utilities Commission of the State of California.

2. SUMMARY AND DESCRIPTION OF CUSTOMER-GENERATOR'S GENERATING FACILITY AND DESIGNATION OF OTHERWISE-APPLICABLE RATE SCHEDULE

2.1 A description of the Generating Facility, including a summary of its significant components and a single-line diagram showing the general arrangement of how Customer-Generator's Generating Facility and loads are interconnected with PG&E's Electric System, is attached to and made a part of this Agreement. (This description is supplied by Customer-Generator as Appendix A).

2.2 Generating Facility identification number: _____ (Assigned by PG&E).

2.3 Customer-Generator's electric service agreement ID number: _____ (Assigned by PG&E).

2.4 Name and address used by PG&E to locate the electric service agreement ID number used to interconnect the Generating Facility with PG&E's Electric System:

Name: _____

Address: _____

City/Zip Code: _____

2.5 The Generating Facility's expected date of Initial Operation is _____

The expected date of Initial Operation shall be within two years of the date of this Agreement.

3. DOCUMENTS INCLUDED AND DEFINED TERMS

3.1 This Agreement includes the following exhibits that are specifically incorporated herein and made a part of this Agreement.

[1] From Electric Rule2, a PREMISES is defined as all of the real property and apparatus employed in a single enterprise on an integral parcel of land undivided, excepting in the case of industrial, agricultural, oil field, resort enterprises, and public or quasi-public institutions, by a dedicated street, highway or public thoroughfare or railway. Automobile parking lots constituting a part of and adjacent to a single enterprise may be separated by an alley from the remainder of the Premises served.

Please Refer to Attached
Sample Form

(Continued)

INTERCONNECTION AGREEMENT FOR NET ENERGY METERING (NEM2) AND RENEWABLE ELECTRICAL GENERATING FACILITY SIZED GREATER THAN 1,000 KW

This *Interconnection Agreement for Net Energy Metering (NEM2) and Renewable Electrical Generating Facility Sized Greater than 1,000 kW* (Agreement)[1] is entered into by and between _____ (Customer-Generator), and Pacific Gas and Electric Company (PG&E), a California Corporation. Customer-Generator and PG&E are sometimes also referred to in this Agreement jointly as "Parties" or individually as "Party." In consideration of the mutual promises and obligations stated in this Agreement and its attachments, the Parties agree as follows:

1. SCOPE AND PURPOSE

This Agreement provides for Customer-Generator to interconnect and operate a Generating Facility in parallel with PG&E's Electric System to serve the electrical loads connected to the electric service agreement ID number that PG&E uses to interconnect Customer-Generator's Generating Facility. Customer-Generator's Generating Facility is intended primarily to offset part or all of the Customer-Generator's own electrical requirements. Consistent with, and in order to effectuate, the provisions of Sections 2827, and 2827.7 of the California Public Utilities Code and PG&E's electric rate Schedule NEM2 (NEM2), Parties enter into this Agreement. This Agreement applies to the Customer-Generator's Generating Facilities identified below with the specified characteristics and generating capacity, and does not allow interconnection or operation of facilities different than those described.

2. SUMMARY AND DESCRIPTION OF CUSTOMER-GENERATOR'S GENERATING FACILITY AND DESIGNATION OF OTHERWISE-APPLICABLE RATE SCHEDULE

2.1 A description of the Generating Facility, including a summary of its significant components and a single-line diagram showing the general arrangement of how Customer-Generator's Generating Facility and loads are interconnected with PG&E's Electric System, is attached to and made a part of this Agreement.

2.2 Generating Facility identification number: _____ (Assigned by PG&E).

2.3 Customer-Generator's electric service agreement ID number: _____ (Assigned by PG&E).

2.4 Name and address used by PG&E to locate the electric service agreement ID number used to interconnect the Generating Facility with PG&E's Electric System:

Name: _____

Address: _____

City/Zip Code: _____

Electric Sample Form No. 79-1199 Sheet 1
Agreement and Customer Authorization
Non-Export Standalone Energy Storage of 30 Kilowatts or Less

Please Refer to Attached Sample Form (N) (N)

(Continued)

AGREEMENT AND CUSTOMER AUTHORIZATION
Non-Export Stand-Alone Energy Storage of 30 Kilowatts or Less

1. SCOPE AND PURPOSE

The purpose of this *Non-Export Stand-Alone Energy Storage of 30 Kilowatts or Less Agreement* (Agreement) is to allow the Customer identified below to interconnect and operate a Non-Export Energy Storage Generating Facility (Generating Facility) in parallel with Pacific Gas and Electric Company's (PG&E) Distribution System. Customer has elected to interconnect and operate its Generating Facility to serve the electrical loads connected to the electric service agreement ID identified below. Customer shall comply at all times with this Agreement as well as with all applicable laws, tariffs and requirements of the California Public Utilities Commission (CPUC).

2. CUSTOMER AND GENERATING FACILITY

a. A description of the Generating Facility, including a summary of its significant components and a single-line diagram showing the general arrangement of how Customer's Generating Facility and loads are interconnected with PG&E's Distribution System, are attached to and made a part of this Agreement. (Supplied by Customer as Appendix A).

b. Generating Facility identification number: _____ (Assigned by PG&E).

c. Customer's electric service agreement ID number: _____ (Assigned by PG&E).

d. Customer name and address used by PG&E to locate the electric service account used to interconnect the Generating Facility with PG&E's Distribution System:

Name: _____

Address: _____

City/Zip Code: _____

e. The Gross Nameplate Rating of the inverter connected to the Generating Facility is: _____ kW.

f. The Net Nameplate Rating of the Generating Facility is _____ kW.

g. The expected annual energy production of the Generating Facility is _____ kWh.

3. DOCUMENTS INCLUDED; DEFINED TERMS

a. This Agreement includes the following exhibits which are specifically incorporated herein and made a part of this Agreement.

Appendix A - Description of Generating Facility and Single-Line Diagram (Supplied by Customer).

Appendix B - Web-site references to Rules 2 and 21 and other selected rules and tariffs of PG&E (Supplied by PG&E).

Appendix C - A Copy of PG&E's Agreement for Installation or Allocation of Special Facilities for Parallel Operation of Nonutility-Owned Generation and/or Electrical Standby Service (Form 79-280) (Special Facility Agreement), if applicable, (Formed by the Parties).

Appendix D - Operating Requirements for Energy Storage Device(s).

Pilot Pedestal Program Application

Please Refer to Attached Sample Form

(Continued)

PILOT PEDESTAL PROGRAM APPLICATION FORM 79-1204

_____ (Customer Name), AN INDIVIDUAL (Applicant) has requested **PACIFIC GAS AND ELECTRIC COMPANY (PG&E),** a California corporation to perform the tariff schedule related work as located and described in paragraph 11 herein. PG&E agrees to perform the requested work and furnish all necessary labor, equipment, materials, and related facilities required therefore, subject to the following conditions:

1. Participation in the PG&E pilot pedestal program is limited to the following residential customers:

    a. Property owner is requesting temporary service for a property that was impacted by the Camp Fire and is located in a residential area where PG&E plans to underground services.

    b. Service can be fulfilled with a 125 amp service pedestal.

    c. Temporary service is requested before PG&E completes planned undergrounding of distribution assets in the area where the property is located.

2. Whenever part or all the requested work is to be furnished or performed upon property other than that specified in the Application, Applicant shall first procure from such owners all necessary rights-of-way and/or permits in a form satisfactory to PG&E and without cost to PG&E.

3. Applicant shall be responsible to pay all taxes applicable to receiving the asset and service provided through this contract.

4. Property owner must file an application for temporary service with PG&E that qualifies for a fee waiver due to a disaster under PG&E's Electric Rule 13. In order to properly track this request, the property owner cannot receive this free asset and service if they have another party (i.e. contractor) apply for service on their behalf.

5. PG&E shall not incur any expenses associated with the removal or retirement of the assets provided in this contract after installation is complete. Exceptions are when the customer changes to permanent service. At the time permanent service is installed PG&E will disconnect the service pedestal on behalf of the customer and leave the service pedestal on the property. Customer retains ownership of the pedestal and any connections made to the pedestal. If the customer does not switch to permanent service, PG&E is not responsible for removal of the service pedestal.

ELIGIBLE LOW-INCOME DEVELOPMENT VIRTUAL NET ENERGY METERING (NEM2VSOM) INTERCONNECTION AGREEMENT FOR THE SOLAR ON MULTIFAMILY AFFORDABLE HOUSING (SOMAH) PROGRAM WITH SOLAR GENERATION TOTALING 1 MW OR LESS

This *Eligible Low-Income Development Virtual Net Energy Metering (NEM2VSOM) Interconnection Agreement for Solar on Multifamily Affordable Housing (SOMAH) Program with Solar Generation Totaling 1 MW or Less*, (Agreement) is entered into by and between _____ (Customer-Generator), and Pacific Gas and Electric Company (PG&E), a California Corporation. Customer-Generator and PG&E are sometimes also referred to in this Agreement jointly as "Parties" or individually as "Party." In consideration of the mutual promises and obligations stated in this Agreement and its attachments, the Parties agree as follows:

1. SCOPE AND PURPOSE

This Agreement provides for Customer-Generator to interconnect and operate solar electric generation for the Customer-Generator or designated agent of the Customer-Generator sized no larger than for the energy requirements of all eligible Benefitting Accounts (as defined in Schedule NEM2VSOM).

The purpose of this Agreement is to allow the Customer-Generator to interconnect solar electric generation with PG&E's Electric System, subject to the provisions of this Agreement and PG&E's Rate Schedule NEM2VSOM. Customer-Generator has elected to interconnect and operate its solar electric Generation in parallel with PG&E's Electric System, to offset part or all of the Eligible Low-Income Development's own electrical requirements at the affiliated service points. Customer-Generator shall comply at all times with this Agreement as well as with all applicable laws, tariffs and applicable requirements of the Public Utilities Commission of the State of California.

2. SUMMARY AND DESCRIPTION OF CUSTOMER-GENERATOR'S GENERATING FACILITY AND DESIGNATION OF OTHERWISE-APPLICABLE RATE SCHEDULE

2.1 A description of the Generating Facility, including a summary of its significant components and a single-line diagram showing the general arrangement of how Customer-Generator's Generating Facility and loads are interconnected with PG&E's Electric System, is attached to and made a part of this Agreement. (This description is supplied by Customer-Generator as Appendix A).

2.2 Generating Facility identification number: _____ (Assigned by PG&E).

2.3 Customer-Generator's electric service agreement ID number: _____ (Assigned by PG&E).

2.4 Name and address used by PG&E to locate the electric service agreement ID number used to interconnect the Generating Facility with PG&E's Electric System:

Name: _____

Address: _____

City/Zip Code: _____

2.5 The Generating Facility's expected date of Initial Operation is _____.

The expected date of Initial Operation shall be within two years of the date of this Agreement.

3. DOCUMENTS INCLUDED AND DEFINED TERMS

AGREEMENT FOR INSTALLATION OR ALLOCATION OF SPECIAL FACILITIES

At the request of _____
(Applicant), PACIFIC GAS AND ELECTRIC COMPANY (PG&E) hereby agrees, as an accommodation, to install at the Applicant's expense within a reasonable time, or allocate for Applicant's use at

_____

_____
State of California, certain facilities consisting of _____(Special Facilities), at an estimated total additional installed cost of $ _____ over and above the cost of standard facilities which PG&E would normally provide or allocate for regular service in accordance with its tariffs on file with and authorized by the California Public Utilities Commission (Commission), subject to the following terms and conditions:

1. Applicant shall pay to PG&E, on demand and in advance of construction by PG&E, the initial sum of:

   (a) $ _____ (Advance) which consists of a credit of $ _____ for that portion of the facilities provided by and conveyed to PG&E by the Applicant, and Applicant's payment of $ _____ representing PG&E's additional costs for Special Facilities; plus,

   (b) $ _____ (Rearrangement) a non-refundable amount representing PG&E's cost of rearranging existing facilities to accommodate the installation of the Special Facilities.

2. Applicant shall also pay to PG&E, in addition to the monthly rates and charges for service, at the option of PG&E, either:

   (a) A monthly charge for the Special Facilities of $ _____ (Cost of Ownership Charge) representing the continuing ownership costs of the Special Facilities (_____% per month) as determined in accordance with the applicable percentage rate established in the Special Facilities section of PG&E's applicable Gas or Electric Rule No. 2, copy attached; or,

   (b) $ _____ (Equivalent One-Time Payment) which is the present worth of the monthly ownership costs (%) for the Special Facilities in perpetuity. Refunds and adjustments, if any, of the Advance and Equivalent One-Time Payment will be made in accordance with paragraph 13. Interest at the rate of _____% annually will be added to the unamortized balance of the Equivalent One-Time Payment on each anniversary of the date the Special Facilities are first made available, as such date is established in PG&E's records, before the current year's Cost of Ownership Charges are deducted.

   The monthly Cost of Ownership Charge shall commence on the date the Special Facilities are first available for Applicant's use, as such date is established in PG&E's records. PG&E will notify Applicant, in writing, of such commencement date.

3. The annual ownership cost used to determine the Equivalent One-Time Payment or used to determine the monthly charges in paragraph 2 above shall automatically increase or decrease without formal amendment to this agreement if the Commission should subsequently authorize a higher or lower percentage rate for monthly costs of ownership for Special Facilities as stated in Rule No. 2, effective with the date of such authorization. Thereafter, such revised annual ownership cost shall also be used to determine the unamortized balance of the Equivalent One-Time Payment, as provided in paragraph 13.(a).

Agreement for Installation or Allocation of Special Facilities for Parallel Operation of NonUtility-Owned Generation and/or Electrical Standby Service[1] (Electric Rules 2 and 21)

At the request of _____, (Applicant), **PACIFIC GAS AND ELECTRIC COMPANY (PG&E)** hereby agrees to furnish at Applicant's expense within a reasonable time certain facilities consisting of _____ (Special Facilities). Such Special Facilities are expected to be necessary on or about _____ for the interconnection of Applicant's electric generating plant with PG&E's system and/or PG&E's delivery of electrical standby service to Applicant's premises at _____, County of _____, State of California.

1. This Agreement includes Appendix A, Detail of Special Facilities Charges, which is attached and incorporated herein by reference. Appendix A may be revised or superseded by mutual written agreement and without formal amendment of the remainder of this agreement.

2. Applicant shall pay PG&E, on demand prior to commencement of any work by PG&E, an initial charge equal to the sum of the amounts which are specified in Appendix A.

3. Applicant also shall pay PG&E any applicable monthly rates and charges for service under PG&E's tariff schedules plus an ownership charge, either (a) or (b) below as specified in Appendix A, namely:

   (a) COST-OF-OWNERSHIP CHARGE representing PG&E's continuing monthly cost of financing (if applicable), owning and maintaining Special Facilities; or

   (b) An EQUIVALENT ONE-TIME CHARGE which is equal to the present worth of the monthly COST-OF-OWNERSHIP CHARGE in perpetuity. The COST-OF-OWNERSHIP CHARGE shall commence on the date Special Facilities are first available for Applicant's use, as such date is established in PG&E's records. PG&E will notify Applicant, in writing, of such commencement date. The EQUIVALENT ONE-TIME CHARGE (if applicable) shall be payable by Applicant to PG&E on demand.

4. The ownership charge set forth in paragraphs 3(a) or 3(b) herein is determined in accordance with the applicable percentage rates established in the Special Facilities section of PG&E's electric Rule 2, copy attached. Should the California Public Utilities Commission (Commission) subsequently authorize higher or lower percentage rates, the monthly COST-OF-OWNERSHIP CHARGE shall automatically increase or decrease without formal amendment to Appendix A as of the effective date of the Commission's authorization.

5. Where it is necessary to install Special Facilities on Applicant's premises, Applicant hereby grants to PG&E:

   (a) the right to make such installation on Applicant's premises along the shortest practical route thereon with sufficient legal clearance from all structures now or hereafter erected on Applicant's premises; and

   (b) the right of ingress and egress from Applicant's premises at all reasonable hours for any purposes reasonably connected with the operation and maintenance of Special Facilities.

6. Where formal rights of way or easements are required on or over property of Applicant or the property of others for the installation of Special Facilities, Applicant agrees that PG&E shall obtain them at Applicant's expense, or if Applicant and PG&E agree otherwise, Applicant shall obtain any necessary permanent rights of way or easements, satisfactory to and without cost to PG&E.

7. PG&E shall not be responsible for any delay in completion of the installation of Special Facilities resulting from shortage of labor or materials, strike, labor disturbance, war, riot, weather conditions, governmental rule, regulation or order, including orders or judgments of any court or regulatory agency, delay in obtaining necessary rights of way and easements, acts of God, or any other cause or condition beyond the control of PG&E, nor shall PG&E be liable for incidental, indirect, special, punitive, or consequential damages for any such delay. PG&E shall have the right, if for one of the above reasons it is unable to obtain materials or labor for all of its construction requirements, to allocate materials and labor to construction projects which it deems, in its sole discretion, most important to serve the needs of its customers, and any delay in construction, hereunder resulting from such allocation shall be deemed to be a cause beyond PG&E's control. In any event, PG&E's total liability for any delay in the completion of the installation of Special Facilities shall not exceed the amount of Special Facilities Charges paid by Applicant.

_____

This is an agreement between Pacific Gas and Electric Company (PG&E), a California corporation, and _____ (Customer), a(n) _____. This agreement will be herein referred to as "Agreement".

Customer has requested PG&E to provide standby service at Customer's premises at _____, County of_____ California, under one of the standby options designated below:

[ ] **Option 1 – PG&E Standby Through Non-PG&E Supply Facilities –** Standby service for customers whose supply requirements would otherwise be delivered through PG&E owned facilities (including Independent System Operator controlled transmission facilities), are regularly and completely supplied through facilities not owned by PG&E.

The non-utility owned generating facilities have a total rated capacity of approximately _____kVA.

All PG&E power deliveries will be made under Schedule S or Schedule SB -- *Standby Service*.

[ ] **Option 2 – PG&E Standby When Service is from Another Utility –** Standby service for customers who regularly take electric service from another public utility but desire PG&E to reserve its generation, transmission or distribution capacity for their use:

Customer currently is supplied regular electric service from another utility's generation, transmission, or distribution system; Customer may be alternately served by PG&E by means of a double-throw switch. Both PG&E and the other utility have consented to this arrangement. Customer's maximum demand from electric equipment on his premises is _____kW.

All PG&E power deliveries will be made under Schedule S or Schedule SB.

This option is closed to all new customers after January 19, 2001.

[ ] **Option 3 – PG&E Standby for Non-Continuous/Irregular PG&E Supply –** Standby service for customers who require PG&E to reserve transmission or distribution capacity and stand ready at all times to deliver electricity on an irregular or non-continuous basis:

Customer has a) a premise which is normally, in part but not in whole, served by non-utility owned generation facilities with a total rated capacity of less than 50 percent of Customer's maximum demand for that premise, or b) a premise which qualifies for back-up service under the provisions of Special Condition 7 of Schedule S or Schedule SB (See Option 4) but chooses not to elect Option 4 or currently lacks the necessary on-site metering to bill Option 4 properly, or c) electrical equipment

Agreement for Installation or Allocation of Special Facilities for Parallel Operation of Nonutility-Owned Generation and/or Electrical Standby Service*

APPENDIX – A
Detail of Special Facilities Charges

Dated:_____

I. Applicability

The application of charges specified herein are pursuant to the provisions of this Agreement between_____ _____ (Applicant) and Pacific Gas and Electric Company (PGandE) and shall be a part thereof and in effect until superseded by mutual written agreement.

II. Initial Charge

A. Net cost of all Special Facilities $_____

B. Less the cost of "removable and reusable" Special Facilities which are provided, installed and financed by PGandE pursuant to Rule No. 21 $(_____)[1]

C. ADVANCE equal to PG&E's estimated installed Cost of Special Facilities which are financed by Applicant, including in lieu of cash payment, a credit for that portion of Special Facilities furnished and deeded to PG&E by Applicant (line A + line B) $(_____)[1]

D. Less PG&E's estimate of the cost of Special Facilities provided, installed and deeded to PG&E by Applicant (includes costs of design and administration by PG&E) $(_____)

E. Plus the costs of design, administration and inspection by PG&E of Special Facilities provided, installed and deeded to PG&E by Applicant $_____

F. Plus REARRANGEMENT CHARGE which is equal to PG&E's estimated cost of rearranging existing facilities to accommodate the installation of Special Facilities $_____

G. Plus CIAC Tax if applicable (line C + line E+ line F x Applicable CIAC Tax[2] of (_____%) $_____

H. Initial Charge (does not include monthly Cost-of-Ownership Charge--see below $_____

III. Installed Cost of PGandE's Existing Facilities Allocated to Applicant's Use $_____[1]

* This agreement at all times shall be subject to such modifications as the California Public Utilities Commission may direct from time to time in the exercise of its jurisdiction.

1 Used in calculation of the monthly COST OF OWNERSHIP CHARGE or EQUIVALENT ONE-TIME CHARGE.

2 See the Income Tax Component of Contribution Provision in the Electric Preliminary Statement for the current applicable CIAC tax rate.

COMPRESSED NATURAL GAS FUELING AGREEMENT

GENERAL

1. This Agreement, between Pacific Gas and Electric Company (PG&E), a California corporation, and _____(Customer), a(n) _____, is for compressed natural gas (CNG) for fueling of motor vehicles.

2. Customer agrees to purchase and PG&E agrees to provide CNG pursuant to the terms of this Agreement and to experimental rate Schedule G-NGV2, or its successor.

3. Customer agrees to provide a written list of all vehicles, including make, model, year, and vehicle identification number, which will be using CNG. The Customer agrees to notify PG&E if any of the vehicles are taken out of service, no longer fueled by CNG, or other vehicles converted to use CNG.

4. This Agreement includes Exhibit A (Certificate of Instruction for Fueling Natural Gas Vehicles) and Exhibit B (Certificate of Inspection for Compressed Natural Gas Vehicle Fuel System). All Exhibits are incorporated into and made a part of this Agreement. Exhibits may be amended from time-to-time in accordance with this Agreement. All applicable PG&E gas rules in effect at the time of execution and any amendments thereto during the term of this Agreement are incorporated in this Agreement by reference.

5. Both Customer and PG&E agree to abide by the terms of the above rate Schedule and its successor, as well as all effective rules in PG&E's gas tariffs.

FUELING LOCATION

6. PG&E will provide locations for fueling of Customer's vehicles. All fueling will be provided at designated PG&E fueling stations where excess capacity is available. Customer agrees to obey posted speed limits and to operate their vehicles in a safe manner at refueling locations.

7. Customer access time shall be mutually arranged.

8. Fueling will be accomplished using the fast-fill CNG dispensing system. Customer will be provided one (1) card key per vehicle which will be used to initiate fueling. Customer will be held responsible for the safe keeping of the card key and may be charged for replacement of said card key if it is lost or stolen. It shall be the responsibility of the Customer to notify PG&E immediately if said key card is lost or stolen.

9. Training certification will be required for each new account individual who may fuel a natural gas vehicle. Each operator shall be responsible for completing a Certificate of Instruction for Fueling Natural Gas Vehicles (Exhibit A) or for completing a comparable fueling-instruction session verified and approved by PG&E.

† Information collected on this form is used in accordance with PG&E's Privacy Policy. The Privacy Policy is available at pge.com/privacy.

Gas Sample Form No. 79-755 Sheet 1
Agreement for Transportation of Natural Gas for Compression as a Motor-Vehicle Fuel

Please Refer to Attached
Sample Form

AGREEMENT FOR TRANSPORTATION OF NATURAL GAS FOR COMPRESSION AS A MOTOR-VEHICLE FUEL

GENERAL

1. This Agreement, between Pacific Gas and Electric Company (PG&E), a California corporation, and _____(Customer), a(n) _____ is for natural gas service for compression for use as a motor-vehicle fuel at Customer's premises located at: _____
(street, city, state, and zip code)
2. Customer agrees to purchase and PG&E agrees to provide natural gas service pursuant to the terms of this Agreement and to experimental-rate Schedule G-NGV1, or its successor.
3. This Agreement includes, where applicable, Exhibit A (Rate Schedule G-NGV1 Customer Communications). The Exhibit is incorporated into and made a part of this Agreement. The Exhibit may be amended from time to time in accordance with this Agreement. Attached to this Agreement, for illustrative purposes, are all applicable PG&E gas rules and rate schedules in effect at the time of this Agreement execution.
4. Both Customer and PG&E agree to abide by the terms of the above rate Schedule and its successor, as well as all effective rules in PG&E's gas tariff schedules.

FACILITIES

5. PG&E shall not be obligated to furnish facilities in addition to standard metering and pressure regulating equipment to provide service under rate Schedule G-NGV1. Where additional facilities are required, they will be treated as special facilities in accordance with PG&E's gas Rule 2, Description of Service.
6. Delivery of natural gas shall be at the point where pipes owned, leased or under license by Customer contact PG&E's pipes.

BILLING

7. PG&E will bill customer at the applicable rate(s) set forth above for the total natural gas service during the billing period.
8. PG&E will send the Customer's bill to the address specified in Exhibit A. After service has been initiated, the billing addresses may be modified by calling PG&E's NGV Support Team at 1-800-684-4648.

GENERAL

1. This Natural Gas Service Agreement (NGSA), between Pacific Gas and Electric Company (PG&E), a California Corporation, and _____ (Customer), a(n) _____, (together referenced as "Parties"), is for gas service to (service address):
   _____

2. Customer agrees to pay for, and PG&E agrees to provide, natural gas service in accordance with the provisions of this NGSA, attached exhibits, and the applicable PG&E gas rate schedule(s) and rules, as approved by the Public Utilities Commission of the State of California (CPUC).

3. This NGSA includes, where applicable, Exhibit A (A.1, A.EG, A.NGV4, A.WSL, A.LNG (Rates and Metering Information)), Exhibit B (Contract Quantities), Exhibit C (Scheduling and Operations Data), and Exhibit D (Customer Contact and Billing Addresses). All applicable Exhibits are incorporated into and made a part of this NGSA. Exhibits may be amended from time to time in accordance with this NGSA.

4. Attached to this NGSA are applicable PG&E gas rate schedule(s) and rules in effect at the time of NGSA execution. Both Parties agree to abide by the provisions of the applicable rate schedule(s), as amended or their successor rate schedules, as well as all applicable PG&E gas rules and gas tariff schedules, as may be amended from time to time.

TERM

5. This NGSA shall be effective upon the date that both Parties have executed the agreement, or on _____ (specify effective date). The initial term of this NGSA, unless otherwise specified in Exhibit A, will be twelve (12) months unless Customer ceases to take gas service at the facility served by this NGSA. After twelve (12) months, this NGSA will continue on a month-to-month basis unless terminated by Customer upon thirty (30) days' prior written notice to PG&E, or unless terminated by PG&E upon the approval of or an order by the CPUC. Termination by the Customer will take effect on the first day of the calendar month that occurs at least thirty (30) days after notification, unless otherwise agreed by PG&E. This NGSA will also terminate if Customer's gas use no longer qualifies for the rate schedule(s) specified in Exhibit A.

RATES AND CONTRACT QUANTITIES

6. The rate(s) to be charged for all natural gas service under this NGSA shall be specified in Exhibit A.

7. Contract quantities for all service under this NGSA are specified in Exhibit B.

_____

SUPPLEMENTAL AGREEMENT FOR AS-AVAILABLE CAPACITY

This supplemental agreement is made between _____ (Applicant), and PACIFIC GAS AND ELECTRIC COMPANY (PG&E), a California Corporation, and shall be made part of the_____ (Agreement), dated _____ between these two parties.

RECITALS:

Applicant recognizes that PG&E is required by its California Public Utilities Commission (Commission) authorized tariffs to design its gas and electric facilities to provide adequate capacity to meet the maximum demands of Applicant's loads during normal, non-emergency, conditions. It is also understood that to achieve this degree of service reliability at Applicant's business facility, which is located at_____ _____(Site), reinforcement work must be done to PG&E's existing system at a substantial cost to both parties. Therefore, PG&E and Applicant agree as follows:

AGREEMENT:

1. In lieu of reinforcing PG&E's existing system to fully accommodate loads at Site, Applicant agrees to accept a lower level of service reliability than would normally be available if PG&E's design criteria was met. This decreased reliability may manifest itself through the curtailment or interruption of gas or electric supply to the Applicant.

2. PG&E's ability to serve Applicant's load will be determined by Equipment which, at all times, will limit the gas or electric demand supplied to the Site to the capacity immediately available on PG&E's system. Equipment will be installed at Applicant's expense and as a special facility (Form 79-255). PG&E system conditions that will cause the Equipment to operate are set forth as follows:

   _____
   _____
   _____
   _____
   ____ Applicant may be subject to additional curtailments as provided by PG&E's gas and electric Rule 14 and Agreement.

3. Applicant understands that all of the conditions and provisions specified in other agreements with PG&E remain in effect and that interruption or curtailment, due to the presence of the Equipment, does not excuse any of the charges associated with their applicable rate schedules.

4. Applicant agrees that PG&E is not liable for any physical damage or property damage caused by the presence or operation of the Equipment.

5. Termination of either this supplemental agreement or the original Agreement shall constitute the termination of both, with Applicant being subject to any applicable minimum or termination charges as specified in the tariffs or Agreement.

AGREEMENT FOR ADJUSTMENT FOR NATURAL GAS ENERGY EFFICIENCY MEASURES

PARTIES

This AGREEMENT is by and between PACIFIC GAS & ELECTRIC COMPANY, a California corporation (PG&E), and_____ (Customer), collectively herein referred to as "Parties." Parties agree as follows:

RECITALS

Subsequent to January 1, 1992, certain energy efficiency measures (Efficiency Measures) have been implemented at Customer's business facility, located at _____(Facility), which is currently being billed for gas service under rate Schedule _____ and the account number referenced above.

These Efficiency Measures include the following:

_____
_____
_____
_____
_____
_____
_____

These Efficiency Measures have resulted in a permanent natural gas usage and/or demand reduction hereinafter termed "Efficiency Adjustment," at the facility in the following amount: (Choose only those that are applicable.)

_____ average monthly therms and/or,

_____ Mcf per day and/or,

_____ annual therms.

The natural gas usage and/or demand reduction resulting from Efficiency Measures has been verified, and attested to, at Customer's expense, by a professional engineer registered in the State of California (unless otherwise waived by PG&E).

AGREEMENT

The natural gas usage and/or demand reduction described in this Agreement may cause Customer's usage or demand to fall below the minimum qualifying amount required for Customer to remain on Schedule _____ or its successor schedule.
Such a change in Customer's applicable rate schedule may result in Customer's average rate for natural gas average monthly usage to increase, creating a disincentive for Customer to implement and maintain Efficiency Measures.

Gas Sample Form No. 79-845 Sheet 1
Core Gas Aggregation Service Agreement

Please Refer to Attached
Sample Form

CORE GAS AGGREGATION SERVICE AGREEMENT

This Core Gas Aggregation Service Agreement (CTA Agreement or Agreement) is made by and between Pacific Gas and Electric Company (PG&E), a California Corporation, and _____, to be known as a Core Transport Agent (CTA). PG&E and CTA are collectively herein referred to as "Parties" and individually as "Party." CTA requests that PG&E provide Core Gas Aggregation Service to CTA on behalf of its Core Transport Group (Group). CTA shall be considered an Agent for the Group, and for individual Group members, who are Core End-Use Customers receiving transportation service and who have selected the CTA as their gas supplier, pursuant to Schedule G-CT.

The CTA agrees to abide by the applicable sections of PG&E's tariffs as well as the terms and conditions stated in this Agreement and Attachments hereto. The Attachments described below are hereby made a part of this Agreement and specify terms and conditions of Core Gas Aggregation Services provided by PG&E pursuant to its tariffs, including Schedule G-CT, and gas Rules 23 and 25.

TERM OF AGREEMENT

This Agreement will become effective as of _____ (Effective Service Date) and will remain in effect unless terminated by the CTA or PG&E in accordance with this Agreement, Schedule G-CT and/or gas Rules 23 and 25.

ATTACHMENTS

A. Customer Authorization for Core Gas Aggregation Service (Authorization). Attachment A provides one method by which CTA may obtain authorization from a Core End-Use Customer to act on the Customer's behalf to provide Core Gas Aggregation Service.

B. Core Transport Group Summary (Group Summary). This Attachment is no longer in use.

C. Allocation of Firm Pipeline Capacity (Pipeline Capacity Allocation). In accordance with Schedule G-CT, the CTA will be offered an allocation for each month in the capacity allocation period, of a pro rata share of the firm pipeline capacity contracted for and held by PG&E for its Core Customers on the Gas Transmission – Northwest Corporation (GTN), Foothills Pipe Lines Ltd. (Foothills), NOVA Gas Transmission Ltd. (NGTL), PG&E's Backbone Transmission System paths, Ruby Pipeline, El Paso Natural Gas Company, Kern River Gas Transmission, and Transwestern Pipeline Company (each of which is a Pipeline and, collectively, the "Pipelines"), which will be identified in Attachment C of this Agreement. If CTA has multiple CTA Agreements, the allocated volumes for Attachment(s) C with the same term will be combined and considered as one direct allocation with the Pipelines, unless otherwise agreed by the Parties. Executed Attachment C will record capacity amounts allocated and rejected.

D. Core Firm Storage Requirement (Core Storage) PG&E will allocate to CTA a pro rata share of core firm storage capacity, which allocation shall be set forth in Attachment D of this CTA Agreement. Executed Attachment D will record the amounts accepted, rejected, and allocated to the CTA for the PG&E-Allocated Storage, Self-Managed Storage procured by the CTA from either an Independent Storage Provider (ISP) or PG&E Storage or Alternate Resources procured by the CTA, and Independent Storage Provider (ISP) Firm Storage. Amounts of core firm storage capacity held by the CTA (PG&E-Allocated Storage, including Self-Managed Storage and ISP Firm Storage) will be used according to Schedule G-CT and Schedule G-CFS and will be paid for by the CTA.

E. Termination of Customer Authorization for Core Gas Transportation Service (Termination). This Attachment is no longer in use.

F. Formal Communications Between Parties (Communications). Any formal communications concerning this Agreement shall be in writing and shall be delivered by e-mail with read receipt verification, hand or certified delivery to the appropriate address shown in Attachment F and shall be deemed to be received as of the delivery or read receipt date. Operational communications regarding billing, capacity, forecasts, imbalances, and other matters will be directed as indicated on the most recent version of this Attachment, as provided by CTA. CTA will promptly submit changes in this Attachment to PG&E.

TRANSMISSION LOAD OPERATING AGREEMENT

THIS LOAD OPERATING AGREEMENT (the "Agreement") is effective as of the date last executed by the parties hereto by and between PACIFIC GAS AND ELECTRIC COMPANY ("PG&E"), a California corporation, and _____ ("Load Entity") a _____. PG&E and the Load Entity are sometimes referred to collectively as the "parties" and individually as the "party."

RECITALS

A. PG&E and the Load Entity have made arrangements under PG&E's tariffs for an interconnection and power deliveries between the PG&E Transmission System and the Load Entity's substation facility, _____, located at _____ (the "Interconnection Facility.")

B. Among other things, this Load Operating Agreement obligates the Load Entity to operate its Substation in a safe and prudent manner.

C. As part of this obligation, it is important that the Load Entity stay in close contact with PG&E system operators.

D. This Agreement sets up operating responsibilities and associated procedures for communications between the Load Entity and PG&E system operators. The Agreement also establishes procedures for safe work on electric systems and routine test procedures.

ELECTRONIC DATA INTERCHANGE (EDI) – TRADING PARTNER AGREEMENT

THIS ELECTRONIC DATA INTERCHANGE TRADING PARTNER AGREEMENT (the "Agreement") is made as of _____, 20_____ by and between _____ _____, a _____ ("Trade Partner"), and Pacific Gas and Electric Company ("PG&E"), a California Corporation.

RECITALS

Trade Partner and PG&E desire to participate in the electronic transmittal and receipt data in agreed formats in substitution for conventional paper-based documents and to ensure such transactions are not legally invalid or unenforceable as a result of the use of available electronic technologies for the mutual benefits of the parties.

NOW THEREFORE, the parties, intending to be legally bound agree as follows:

1. **Section 1 - Prerequisites**

1.1. **Documents Standards:** Each party shall electronically transmit to or receive from the other party each of the transaction sets listed in the Appendix (collectively "Documents"), Documents include billings for utility service and payments which are (1) the electronically transmitted information delivered to Trade Partner from PG&E or to PG&E from Trade Partner, and (2) the non-electronically transmitted utility billings and payments transmitted during testing periods or equipment failures. All Documents shall be transmitted in accordance with the standards set forth in the Appendix.

1.2. **Scope of the Agreement** This Agreement shall govern and apply to all Documents and information related to transactions electronically transmitted from either party to the other.

1.3. **Third-Party Service Providers**

1.3.1. Documents will be transmitted electronically to each party either directly or through any third-party service provider ("Provider") with which either party may contract on its own behalf. Either party may modify its election to use, not use or change its Provider upon thirty (30) days prior written notice.

1.3.2. Each party shall be responsible for the costs and performance of any Provider with which it contracts, unless otherwise set forth in the Appendix.

1.4. **System Operations** Each party, at its own expense, shall provide and maintain the equipment, software, services and testing necessary to effectively and reliably transmit and receive Documents.

1.5. **Security Procedures** Each party shall properly use those security procedures, including those specified in the Appendix, if any, which are reasonably sufficient to ensure that all transmissions of Documents are authorized and to protect its business records and data from improper access.

1.6. **Signatures** Each party shall adopt as its signature an electronic identification consisting of symbol(s) or code(s), which are affixed to or contained in each Document transmitted by such party ("Signatures"). Each party agrees that any Signature of such party affixed to or contained in any transmitted Document shall be sufficient to verify such party originated such Document. Neither party shall disclose to any unauthorized person the Signatures of the other party.

Gas Transmission Service Agreement

Please Refer to Attached Sample Form

GAS TRANSMISSION SERVICE AGREEMENT

This Gas Transmission Service Agreement (GTSA) is made by and between PACIFIC GAS AND ELECTRIC COMPANY (PG&E), a California Corporation, and _____ _____ (Customer), a _____. PG&E and Customer each shall be referred to herein as a Party and together as Parties.

Subject to the provisions of this GTSA and the applicable PG&E gas Rules and Rate Schedules, PG&E agrees to make available to Customer the following categories of service:

Gold Coast Transportation Services
Golden Gate Market Center Services, including Storage Services

Election of any or all of such services by Customer and acceptance and authorization by PG&E shall be evidenced by the signatures of Customer and PG&E on the Exhibit(s) under this GTSA or pursuant to an executed Electronic Commerce System User Agreement (Form 79-982) with Customer which shall describe the specific terms and conditions of the service transactions to be performed.

1. TERM

1.1 This GTSA shall be effective upon the date that both parties have executed the agreement, or on _____. The initial term shall be twelve (12) months. Thereafter this GTSA shall continue from month to month unless terminated by either Party upon thirty (30) days' prior written notice to the other. Notwithstanding the above: (a) Neither Customer nor PG&E may unilaterally terminate this GTSA prior to the termination date for service set forth in any Exhibit executed by Customer and PG&E under this GTSA, and (b) PG&E may terminate this GTSA at any time in accordance with Paragraph 6.3 hereof or in accordance with PG&E's gas Rule 25 and may do so without thirty (30) days' prior written notice to Customer.

2. RATES AND CONTRACT QUANTITIES

2.1 The rate(s) to be charged for service(s) provided pursuant to this GTSA shall be as specified in the Exhibit(s) incorporated hereunder and applicable Rate Schedule(s), and Customer shall pay PG&E each billing period for all services rendered at the agreed-upon price.

2.2 PG&E shall have the unilateral right to apply at any time to the appropriate regulatory authority and, subject to approval thereof, make effective changes in the rates and charges applicable to services provided under this GTSA, the Rate Schedule(s) pursuant to which service hereunder is rendered, or any provisions of the applicable PG&E gas Rules.

2.3 The contract quantities for all services provided pursuant to this GTSA shall be as specified in the Exhibits incorporated hereunder.

3. BILLING AND PAYMENT

3.1 Bills shall be rendered and payments shall be due in accordance with gas Rule 25, Section C.

3.2 If an error is discovered in any bill rendered by PG&E, the amount of such error shall be adjusted, provided that a valid claim therefore is made within twelve (12) months from the date of the bill containing the original error.

3.3 Either Party may submit a billing dispute for resolution in accordance with Section 8; however, PG&E's remedies for late payments pursuant to Section C of gas Rule 25 shall be available notwithstanding such dispute resolution process.

Assignment of PG&E Backbone Pipeline and Firm
Storage Capacity Allocation

Please Refer to Attached
Sample Form

ASSIGNMENT OF PG&E BACKBONE PIPELINE AND FIRM STORAGE CAPACITY ALLOCATION

_____(Customer/Assignor), who holds a current Gas Transmission Service Agreement (Form 79-866) (GTSA) and a current GTSA Exhibit agrees to assign to _____ (Assignee) Customer/Assignor's rights to PG&E's capacity allocation as set forth below.

Customer/Assignor #: _____

Customer/Assignor's GTSA Exhibit #: _____

Applicable Rate Schedule: _____

Term of Assignment: From _____ to _____

For Firm Transportation: Contract Quantity (Dth): _____

For Firm Storage Capacity: Annual Inventory (Dth): _____

This assignment is subject to PG&E's consent and its determination that Assignee meets PG&E's creditworthiness requirements as set forth in gas Rule 25. This completed form must be received and consented to by PG&E no later than three (3) business days prior to Assignee utilizing the assigned capacity. PG&E will notify Customer/Assignor and Assignee of its consent to the assignment pursuant to the provisions of its executed Electronic Commerce System User Agreement (Form 79-982) with PG&E. As consideration for PG&E's consent to this assignment, Assignee accepts the assignment as set forth herein and agrees to all of the terms, conditions and obligations, including payment obligations under the GTSA and Exhibit specified above, as well as PG&E's gas rules and applicable rate schedules, and agrees to perform fully thereunder for the term of assignment set forth herein. All remedies available to PG&E under the Customer/Assignor's GTSA and Exhibit shall be available to PG&E under this assignment.

PG&E shall send all bills and notices to Assignee at the addresses provided in their GTSA. This assignment may consist of all or a portion of the Customer/Assignor's Exhibit. For the assignment of a core firm storage Exhibit, the assignment may be effective any day throughout the current Storage Year (April-March) and shall be for all of the remaining portion of the Exhibit's current term.

This form at all times shall be subject to such modifications as the California Public Utilities Commission may direct from time to time in the exercise of its jurisdiction

The parties hereto, by their signature below, assign and accept the assignment of the GTSA Exhibit subject to the terms and conditions herein.

Gas Sample Form No. 79-868 Sheet 1
California Gas Transmission Credit Application

Please Refer to Attached Sample Form

CALIFORNIA GAS TRANSMISSION CREDIT APPLICATION

Prior to receiving natural gas transmission services (e.g. transportation, storage, park & lend, core aggregation, and balancing aggregation), an applicant must complete and sign this form and submit it to Pacific Gas and Electric Company (PG&E), along with financial information as described in gas Rule 25.

PG&E will determine if an applicant meets PG&E's creditworthiness standards. If PG&E determines an applicant has demonstrated sufficient creditworthiness to be eligible for gas transmission services, PG&E shall establish a credit line for the applicant.

An applicant shall forward this completed and signed application, and accompanying financial information to the following address:

Pacific Gas and Electric Company
California Gas Transmission Credit Application
6121 Bollinger Canyon Road
Room 4240E
San Ramon, CA 94583

An applicant will not be eligible to receive gas transmission services until PG&E approves the applicant's credit application and the applicant and PG&E execute, as may be applicable, a Gas Transmission Service Agreement (GTSA) (Form No. 79-866) or a Noncore Balancing Aggregation Agreement (NBAA) (Form No. 79-869), a Self-Balancing Amendment (SB Amendment) (Form No. 79-971), or a Core Gas Aggregation Service Agreement (CTA Agreement) (Form No. 79-845).

Please furnish the following information:

1. Applicant/Company

Applicant Name (i.e., company) _____

State of Incorporation _____
(Please mark N/A if not incorporated.)

DUNS Number _____
(Required for making backbone transportation nominations.)

Federal Tax ID _____

State Tax ID _____

Internet Web Site Address (if applicable) _____

† Information collected on this form is used in accordance with PG&E's Privacy Policy. The Privacy Policy is available at pge.com/privacy.

Gas Sample Form No. 79-869 Sheet 1
Noncore Balancing Aggregation Agreement

Please Refer to Attached
Sample Form

NONCORE BALANCING AGGREGATION AGREEMENT

This Noncore Balancing Aggregation Agreement (NBAA) is made by and between PACIFIC GAS AND ELECTRIC COMPANY (PG&E), a California Corporation,
and_____
a(n)_____(Balancing Agent). PG&E and Balancing Agent each shall be referred to herein as "Party" and together as "Parties".

1. GENERAL

PG&E will provide gas balancing services on an aggregated basis, if appropriate, to Balancing Agent on behalf of Balancing Agent's individual Noncore End-Use Customers (Customer). Customer and Balancing Agent shall execute a separate Exhibit A for each Customer account under this NBAA.

By entering into this NBAA, Balancing Agent accepts responsibility for all applicable balancing, capacity allocation and constraint obligations, rights, penalties and credits pursuant to gas rate Schedule G-BAL, gas Rule 14 and other applicable rules, from the date this NBAA is effective, and for each Customer executing an Exhibit A. Any existing Customer imbalances and/or adjustments to past imbalances will also become the responsibility of the Balancing Agent upon the effective date of the NBAA.

Balancing Agent shall be subject to PG&E's tariffs, as they may change from time to time, and as they apply to Customers' accounts on an aggregated basis. Balancing Agent may act as an agent for other PG&E Customers under separate NBAAs.

The Balancing Agent is authorized by PG&E, and by each Customer executing an Exhibit A to this NBAA, to do any and all things both proper and necessary in receiving balancing services and complying with all obligations for and on the Customer's behalf, including (by way of illustration and not limitation) the purchase, nomination and delivery of gas supplies, accounting, trading and/or cash-outs of gas imbalances, compliance with gas Rule 14 and other rules as applicable, management of gas storage inventories, and all related transactions for each PG&E Customer account as set forth in the attached Exhibit(s) A.

2. TERM OF AGREEMENT

This NBAA is effective upon the date that both Parties have executed the Agreement.

3. EXHIBITS

Exhibit A--Customer Balancing Agent Service Authorization: To assign to the Balancing Agent all applicable balancing, capacity allocation and constraint obligations, rights, penalties and credits and to authorize the Balancing Agent to act on the Customer's behalf in providing, receiving service, and complying with the terms and conditions thereof pursuant to rate Schedule G-BAL, gas Rule 14 and other rules, as applicable, Customer and Balancing Agent must execute an Exhibit A. If the Customer has multiple accounts under this NBAA, a separate Exhibit A must be executed for each account.

APPLICATION AND AGREEMENT FOR ELECTRIC AND/OR NATURAL GAS FACILITIES WHERE FULL ADVANCE PAYMENT IS REQUIRED Rule 13 - Temporary Service

To Pacific Gas and Electric Company:

The undersigned Applicant hereby requests you to deliver ❑electric energy and/or ❑ natural gas to and for the equipment hereinafter described, at the location shown on Exhibit A, in accordance with the applicable rates and rules of PG&E.

In consideration of PG&E's acceptance of this application and the installation of facilities to supply temporary electric and/or natural gas service, Applicant hereby agrees to the following:

1. PG&E has made available for inspection its applicable rates and rules. Applicant agrees to comply therewith, and with any changes or modifications thereof which may be authorized from time to time by the Public Utilities Commission of the State of California
2. Applicant's attention has been directed to the rate schedules applicable to the service herein described, and Applicant has elected to take and pay for service under Schedule _____for a maximum period of _____months. As specified in this schedule, Applicant elects the following optional provisions:
3. Applicant agrees to pay, in advance to PG&E, prior to the installation thereof, the estimated cost installed plus the estimated cost of removal, less the estimated salvage of the facilities installed to provide the service herein applied for, which cost is agreed to be the sum of _____Dollars ($_____).
4. The amount of refund upon reclassification of Applicant's facilities from temporary to permanent will be made on the basis of the extension and/or service rule in effect at the time temporary service is reclassified to permanent. No interest shall be paid on any amount advanced.
5. Applicant hereby grants to PG&E a right-of-way for any electric and/or natural gas lines which it may be necessary to build in, on, under or over Applicant's premise for the purpose of making delivery hereunder. Where Applicant requests facilities which are in addition to, or in substitution for, the standard facilities which PG&E normally would install, the extra cost thereof shall be paid by Applicant under the provisions of PG&E's Gas or Electric Rule 2.
6. In the event Applicant, prior to reclassification, materially increases or decreases his electric service and/or natural gas requirements from those installed hereunder and a change is made in PG&E's facilities, settlement shall be made for the installation and removal cost of the facilities removed. A new temporary service agreement shall be entered into providing for the modified service required by Applicant.
7. This contract shall at all times be subject to such changes or modifications by the Public Utilities Commission of the State of California as said Commission may, from time to time, direct in the exercise of its jurisdiction.

JOB #:_____

CUSTOMER-OWNED STREETLIGHTS PG&E POLE CONTACT AGREEMENT

_____(Applicant) has elected to enter into this Agreement with PACIFIC GAS AND ELECTRIC COMPANY, a California corporation (PG&E).

PG&E owns, operates and maintains overhead electric distribution facilities located in geographic areas within the political jurisdiction of Applicant.

Applicant desires to enter into an agreement with PG&E that will (a) allow having that portion of the Applicant's existing streetlights to contact PG&E's distribution poles, and (b) specify conditions for future installation, operation, maintenance, use or removal of Applicant's streetlights. PG&E is willing to permit Applicant to have such pole contacts under the following terms and conditions:

1. **POLE CONTACT PERMISSION**.

   a. **Existing Streetlights** PG&E hereby gives Applicant general permission under the terms and conditions herein stated to contact, replace, operate, maintain, and use existing luminaires, lamps, photocells, support arms and service wiring facilities (hereinafter Equipment) installed on poles owned by PG&E or jointly owned by PG&E and others. Such permission covers all existing lights owned by the Applicant that are mounted on PG&E-owned poles, based on the most current billing records as of the date of this Agreement. However, specific permission for such streetlights must be in the form of pole Contact Permits for specific locations.

   b. **New Streetlights**. Applicant or Its contractor shall not install any new or additional equipment on PG&E's poles without first securing PG&E's written approval in the form of a Contact Permit for specific locations. Within thirty (30) days of receipts of the application, PG&E will either grant the permit or deny the permit and specify why the action cannot be taken. Upon the receipt of each such approved Contact Permit, Applicant shall have the right to install, operate, maintain and use the additional equipment on the poles specified in such permit and under the terms and conditions specified in this Agreement, (thereafter included as Equipment), which shall be considered a part of each such permit without regard to whether this Agreement Is referred to in each Contact Permit.

2. **POLE CONTACT PERMITS**. PG&E will provide Contact Permits in the form attached and marked Exhibit A to Applicant for the specific locations involved, and shall charge no pole contact fee for each electric distribution pole covered under this contact Agreement unless such a fee Is permitted in the future under authorization by the California Public Utilities Commission (Commission).

3. **PRIOR POLE CONTACT AGREEMENT**. This Agreement shall supersede any previous pole contact agreement between PG&E and the Applicant insofar as it may pertain to street lighting.

4. **PG&E REQUIREMENTS**. Facilities installed under this Agreement shall be subject to all of the provisions of the General Orders of the Commission, and PG&E's applicable tariff schedules on file with and authorized by the Commission and further shall at all times be subject to such changes or modifications as the Commission may, from time to time, direct in the exercise of Its jurisdiction.

5. **SERVICE DELIVERY**. PG&E will supply electrical energy and service to streetlight equipment owned by Applicant in accordance with the provisions of rate Schedule LS-2 for customer-owned street and highway lighting.

Gas Sample Form No. 79-944 Sheet 1
California Production Balancing Agreement

Please Refer to Attached
Sample Form

CALIFORNIA PRODUCTION BALANCING AGREEMENT

Contract No._____
Date: _____

This California Production Balancing Agreement (CPBA) is made by and between Pacific Gas and Electric Company (PG&E), a California corporation, and _____ _____ hereafter referred to as Authorized Agent (AA), a(n) _____. PG&E and the AA are each also referred to herein as "Party" and together as "Parties".

PURPOSE

This CPBA establishes the terms and conditions for the resolution of imbalances on PG&E's gas transportation system (PG&E System) caused by volumes of gas, delivered into the PG&E System from California Production as defined in PG&E's Gas Rule 1 (California Production), which volumes exceed or are insufficient to match the nominations made for the deliveries into the PG&E System.

The AA requests that PG&E recognize (1) the AA's authority to represent and act on behalf of the parties (party) who own(s) or control(s) gas produced from certain California Production (Producer(s)) and who deliver that gas into the PG&E System, for transportation, at the point(s) of interconnection where gas is measured before delivery into the PG&E System (Receipt Point(s)), which is (are) specified in Attachment 2 "Receipt Point(s)" (Attachment 2);' and (2) that the AA has been duly appointed to act as agent for the Producer(s) pursuant to Attachment 1 "Appointment of Authorized Agent" (Attachment 1).

This CPBA is not intended to be an agreement for transportation services. PG&E provides transportation services pursuant to applicable rules, schedules, tariffs, and agreements.

This CPBA does not apply to gas volumes delivered at the Receipt Point(s) specified in Attachment 2 for procurement by PG&E under a traditional procurement contract executed prior to December, 1989, and such deliveries shall not be included in the Cumulative Imbalance calculation applicable to gas nominated by the AA under this CPBA as explained in more detail below.

AGREEMENT

The Parties intend to be legally bound agree as follows:

REPRESENTATIONS

By entering into this CPBA, the AA accepts the obligations of the AA hereunder. The AA represents that:

(1) the AA is the exclusive agent for one or more Producer(s), who are supplying gas to the Receipt Point(s) listed in Attachment 2 of this CPBA, for the purpose of nominating volumes of that gas for transport by PG&E under PG&E's standard nomination procedures; balancing those nominations against actual deliveries at the Receipt Point(s); allocating, prorating and handling administrative matters concerning Receipt Point(s); giving and receiving payments, notices and requests; and taking such action and exercising such powers as agent on behalf of the Producer(s) as set forth in Attachment 1;

(2) the AA is duly authorized and has all necessary legal rights and powers to enter into this CPBA and to perform all of the obligations of the AA set forth herein, to grant to PG&E the rights set forth herein, and to bind the Producer(s) to all obligations, acts and omissions of the AA under this CPBA; and

(3) the AA will comply with all of the obligations set forth in this CPBA, notwithstanding any agency relationship between the AA and the Producer(s) or other third party.

Electric Sample Form No. 79-948 Sheet 1
Electric Service Provider (ESP) Service Agreement

Please Refer to Attached Sample Form

ELECTRIC SERVICE PROVIDER (ESP) SERVICE AGREEMENT

This Electric Service Provider (ESP) Service Agreement (this "Agreement") is made and entered into as of this ____ day of _____, _____, by and between "_____ _____" ("ESP"), a _____ _____ organized and existing under the laws of the state of _____, and "Pacific Gas and Electric Company" ("PG&E"), a corporation organized and existing under the laws of the state of California. From time to time, ESP and PG&E shall be individually referred to herein as a "Party" and collectively as the "Parties."

Section 1: General Description of Agreement

1.1 This Agreement is a legally binding contract. The Parties named in this Agreement are bound by the terms set forth herein and otherwise incorporated herein by reference. This Agreement shall govern the business relationship between the Parties hereto by which ESP shall offer electrical energy services, including, but not limited to, account maintenance and billing services, electrical meter installation, meter reading services and/or any other services that may be approved by the California Public Utilities Commission ("CPUC") in Direct Access transactions with customers in PG&E's service territory ("Direct Access Services"). Each Party, by agreeing to undertake specific activities and responsibilities for or on behalf of customers, acknowledges that each Party shall relieve and discharge the other Party of the responsibility for said activities and responsibilities with respect to those customers. Except where explicitly defined herein (including Attachment A hereto) the definitions controlling this Agreement are contained in PG&E's applicable rules or in the relevant direct access tariff.

1.2 The form of this Agreement has been developed as part of the CPUC regulatory process, was intended to conform to CPUC directions, was filed and approved by the CPUC for use between PG&E and ESPs and may not be waived, altered, amended or modified, except as provided herein or in the relevant direct access tariff, or as may otherwise be authorized by the CPUC.

Section 2: Representations

2.1 Each Party represents that it is and shall remain in compliance with all applicable laws and tariffs, including applicable CPUC requirements.

Electric Sample Form No. 79-954 Sheet 1
Departing Load Competition Transition Charge Agreement

Please Refer to Attached
Sample Form

DEPARTING LOAD COMPETITION TRANSITION CHARGE AGREEMENT

This is an agreement, between _____, (Customer), and PACIFIC GAS AND ELECTRIC COMPANY (PG&E), hereinafter referred to individually as (Party) and collectively as (Parties). This agreement will be herein referred to as "Agreement".

RECITALS

A. On December 20, 1995, the California Public Utilities Commission ("CPUC"), issued D. 95-12-063 (as modified by D. 96-01-009) which, among other things, authorized PG&E to collect retail transition costs associated with electric restructuring. In its order, the Commission ruled that the Competition Transition Charge ("CTC") will be nonbypassable and will apply to retail customers of record on or after December 20, 1995.

B. On September 23, 1996, Governor Wilson signed into law Assembly Bill (AB) 1890 (Statutes 1996, Ch. 854, codified primarily in various sections of the Public Utilities Code), which also affected the restructuring of the electric industry in California, including the collection of retail transition costs and other nonbypassable charges. Among other things, AB 1890 establishes:

(i) a nonbypassable CTC (Public Utilities Code Sections 367-368, 375-376);

(ii) certain exemptions to the CTC (Sections 372, 374);

(iii) nonbypassable charges for nuclear decommissioning (Section 379), recovery of Rate Reduction Bond principal, interest, and ongoing costs (Section 840(d)), and public purpose program costs (Sections 381-383) (hereinafter referred to as "other nonbypassable charges"); and

(iv) CTC responsibility for existing retail customers and for new electric consumers or loads located in PG&E's service territory as it existed on December 20, 1995, except for those new or incremental loads that might be met through a direct transaction and the transaction does not require the use of transmission or distribution facilities owned by PG&E (Section 369).

C. On June 11, 1997, the CPUC issued D. 97-06-060 adopting a CTC Procedure for Departing Loads (hereinafter referred to as the "Departing Load CTC") and accepting the Departing Load CTC as an amendment to PG&E's Electric Tariff Preliminary Statement.

D. Under the Departing Load CTC, customers that meet the requirements of Departing Load, as that term is defined in the Departing Load CTC Procedure, are required to make payments according to a Departing Load CTC Statement (which includes payments for CTC and other applicable nonbypassable charges) and to execute a Departing Load CTC agreement five days before such Customer discontinues or reduces purchases of electricity from PG&E and has its load or the reduced portion of its load met by an alternate supplier of electricity.

Electric Sample Form No. 79-955 Sheet 1

Amendment to PG&E's Departing Load Competition Transition Charge Agreement for Subsequently Obtained CTC Exemption

Please Refer to Attached Sample Form

AMENDMENT TO PG&E'S DEPARTING LOAD COMPETITION TRANSITION CHARGE AGREEMENT FOR SUBSEQUENTLY OBTAINED CTC EXEMPTION

This Amendment to Pacific Gas and Electric Company's Departing Load Competition Transition Charge Agreement (the Agreement) between Pacific Gas and Electric Company (PG&E) and _____ (Customer) amends the Pacific Gas and Electric Company's Departing Load Competition Transition Charge Agreement entered into on or about _____ between Customer and PG&E.

RECITALS

A. Customer and PG&E have previously entered into a Departing Load Competition Transition Charge Agreement, approved by the California Public Utilities Commission (the Commission), pursuant to the CTC procedure for departing loads approved by the Commission as amendments to PG&E's electric tariff preliminary statement.

B. Subsequent to executing the Departing Load Competition Transition Charge Agreement, Customer obtained an exemption from the Competition Transition Charge.

C. On _____, PG&E received a Notice of Assertion of CTC Exemption from Customer.

AGREEMENT

In consideration of the promises and mutual covenants and agreements contained herein, the parties agree as follows:

1. The Effective Date of the CTC Exemption is _____.

2. After the Effective Date of the CTC Exemption, Customer shall not be responsible for, and PG&E shall not bill Customer for, monthly payments of Customer's share of CTC.

3. Nothing in this Amendment relieves Customer of its obligation to pay CTC obligations incurred by Customer and billed by PG&E prior to the Effective Date of the CTC Exemption.

4. Nothing in this Amendment affects Customer's obligation to pay other nonbypassable charges under the Agreement or to make post-2001 CTC and/or other nonbypassable charge payments as provided in paragraph 3 of the Agreement.

5. This Amendment shall, at all times, be subject to such changes or modifications by the Commission as it may from time to time direct in the exercise of its jurisdiction.

DUAL SOCKET METERING AGREEMENT

THIS DUAL SOCKET METERING AGREEMENT is made by **PACIFIC GAS AND ELECTRIC COMPANY**, a California corporation, (PG&E) and _____ _____ (Customer) (individually "Party" and jointly "the Parties").

The installation by PG&E of dual socket metering under this Agreement is pursuant to PG&E's electric tariff rules and rate schedules, of which this Agreement is a part. Customer agrees to abide by the requirements of PG&E's rules and rate schedules including the following terms and conditions:

1. Under this Agreement, PG&E shall perform all work necessary for installation at Customer's site(s) two meter sockets such that the PG&E meter can be installed and operated for purposes of Customer's bundled service and a second customer supplied meter (non-PG&E meter) can be installed in parallel with the PG&E meter to allow Customer access to its usage data (hereinafter "dual socket metering") The dual socket metering installed under this Agreement is located at various northern California locations and listed on Appendix A: "List of Customer Sites" which shall be updated from time-to-time by PG&E as sites are added or removed. Such updates shall not be considered an amendment to this Agreement and will not require the signature of either Party.

2. This Agreement shall be effective on _____, and shall continue from month to month unless terminated pursuant to the Parties' rights under this Agreement provided that, each party agrees to use reasonable efforts to give the non-terminating party at least 30 days' prior notice of any such termination.

   a. If Customer elects Direct Access at any time during the term of this Agreement for any of the sites listed in Appendix A hereto, the Agreement will terminate for those sites effective on the date the customer's service converts to Direct Access. Use of Customer's dual socket metering installed under this Agreement for Direct Access purposes shall be governed by the Direct Access tariffs.

   b. This Agreement shall be revoked in its entirety and terminated immediately if at any time during the term of the Agreement PG&E receives actual notice that such Agreement is prohibited by regulatory requirement, decision or order.

   c. If this Agreement or Customer's exercise of it at any time interferes with the operations, practices or service of PG&E to or for any of its Customers, PG&E will immediately revoke this Agreement in whole or in part, or will terminate this Agreement, as is necessary to end such interference.

   d. If Customer should default in performing any of the terms and conditions herein, or if Customer fails to conform to any new standards imposed by a legal or administrative body having jurisdiction, PG&E shall have the right to terminate this Agreement entirely.

† Information collected on this form is used in accordance with PG&E's Privacy Policy. The Privacy Policy is available at pge.com/privacy.

AGREEMENT FOR SCHEDULE E-OBMC

_____,
a(n)_____ (Applicant), and Pacific Gas and Electric Company, a California Corporation (the Company), hereby agree to the following supplemental terms and conditions:

1. RATE SCHEDULE: Applicant must qualify for and receive service to Applicant's premises under an applicable PG&E Rate Schedule. Additionally, Applicant is subject to the provisions of Schedule E-OBMC, which is attached hereto and made a part hereof as Attachment A and any other applicable Company Electric Rate Schedule(s).

2. PLAN OPERATION: Applicant agrees to operate its Optional Binding Mandatory Curtailment (OBMC) Plan upon each and every notice from the Company for the entire duration of the Rotating Outage (RO).

3. APPLICANT RESPONSIBILITIES: Upon notice from the Company, Applicant is responsible to reduce its load such that the load on the entire circuit or dedicated substation serving the Applicant is at or below the required Maximum Load Level (MLL). Load reductions must be achieved as quickly as possible but no later than 15 minutes after the Applicant receives notification from PG&E. If Applicant's OBMC Plan is submitted for a group of customers on a particular circuit, Applicant is the lead customer for the OBMC Plan and shall guarantee the load reductions required to reach the MLLs and pay for all non-compliance penalties. Applicant is responsible to work and coordinate with the non-lead customer(s) on its circuit and represent the non-lead customers for the purposes of the OBMC Plan.

4. PARTICIPATION IN OTHER PG&E DEMAND RESPONSE PROGRAMS: Applicant may participate in another demand response program as specified in Schedule E-OBMC.

5. OBMC PLAN NOT A GUARANTEE: An OBMC Plan is not a guarantee against Applicant being subject to a rotating outage. Daily and emergency switching may cause the circuit to become subject to rotating outages. Applicant may not receive advance notice from the Company of such a rotating outage. Additionally, an OBMC Plan is applicable only to electrical emergencies requiring a rotating outage and it does not prevent Applicant from being subject to outages caused by other load shedding schemes.

   PG&E will make reasonable efforts to notify Applicant of circuit changes other than short-term or emergency circuit changes.

   Pursuant to Electric Rule 14, the Company does not guarantee continuity or sufficiency of supply and will not be liable for interruption or shortage or insufficiency of supply.

6. CIRCUIT AGGREGATION: Applicant may aggregate the load of two circuits for the purposes of participating in the OBMC program if Applicant has a single tax payer identification number and provided: (a) Applicant is the lead customer for both circuits; (b) Applicant has the ability to achieve required load reductions on the total load for the circuits; (c) Applicant agrees to achieve required load reductions on individual circuits subject to the aggregation as required by PG&E or the CAISO in response to geographic area constraints; and (d) Applicant commits that it has not, and will not, receive any payment from any customer on any OBMC circuit for any action related to the OBMC program. All provisions of this agreement and Schedule E-OBMC applicable to individual OBMC plans shall apply to the aggregated OBMC plan.

7. ANNUAL REVIEW: Applicant must update the OBMC Plan by March 15 of each year and confirm with the Company any changes to the previous version. Should Applicant fail to update the OBMC Plan by March 15 this agreement will be terminated.

Gas Sample Form No. 79-971 Sheet 1
Election for Self-Balancing Option

Please Refer to Attached
Sample Form

Pacific Gas and Electric Company

ELECTION FOR SELF-BALANCING OPTION

1. GENERAL

This Self-Balancing Amendment (SB Amendment) form shall amend an existing service agreement as indicated herein between Pacific Gas and Electric Company (PG&E), a California Corporation, and _____who obtains natural gas transmission and/or distribution services from PG&E. In executing this SB Amendment, the undersigned Agent elects and agrees to be subject to the terms, conditions, charges and fees of the Self-Balancing and ancillary provisions of PG&E's gas rate Schedule G-BAL and other applicable gas tariffs.

2. DESIGNATION OF BALANCING AGENT

Self-Balancing Agent executes this SB Amendment in one of the following capacities as indicated below:

a. _____ **Noncore Balancing Agent**, who has executed a currently valid Noncore Balancing Aggregation Agreement (Form No. 79-869) (NBAA) with PG&E and who acts for other Noncore End-Use Customers in a Group. This SB Amendment shall amend the NBAA and shall be subject to its terms and conditions as well as the terms and conditions of other Amendments thereto.

The applicable NBAA Group Number is: _____.

b. _____ **Core Transport Agent**, who has executed a currently valid Core Gas Aggregation Service Agreement (Form No. 79-845) (CTA Agreement) with PG&E and who acts for Customers in a Core Transport Group as defined in gas rate Schedule G-CT. This SB Amendment shall amend the CTA Agreement and shall be subject to its terms and conditions as well as the terms and conditions of other exhibits thereto.

The applicable CTA Group Number is: _____.

3. TERM

The election confirmed by this SB Amendment shall be made during the time period for elections set forth in Schedule G-BAL and shall be effective either for a one-year or two-year period beginning April 1 as shown below. The term of this SB Amendment shall equal the length of Self-Balancing election as indicated by Self-Balancing Agent below.

AGREEMENT FOR UNMETERED ELECTRICAL SERVICE

This Agreement between _____ (Customer) and Pacific Gas and Electric Company (the Company) is to establish and govern the provisions of unmetered electric service provided by the Company at the locations reported for equipment described in the attachments to this Agreement and billing data reported monthly or annually as required by this Agreement and subject to review by the Company for unmetered status.

WHEREAS, in the Company's opinion, it would be impractical to install electric meters at the requested locations and for equipment installed subject to this Agreement; and

WHEREAS, the consumption of electricity at such locations and for such equipment can be reasonably determined from manufacturer's specifications and operating characteristics of the Customer where the load is 11 hour photo controlled or 24 hour constant and of *one hundred fifty (150) watts or less rated or average consumption* on any one service connection point; and

WHEREAS, pursuant to the Company's electric Preliminary Statement Part A.6.a, Customer and the Company agree that, in lieu of installing meters at each location, the Company shall provide unmetered electric service as provided herein.

NOW THEREFORE, in consideration of the terms and covenants contained herein, Customer and the Company hereby agree as follows:

1. Customer's equipment that is the subject of this Agreement, are identified in the data sheets set forth in Attachment A (Equipment). Each location will be considered a separate account and billed on the Company's regular monthly billing cycle for the applicable area. Each location will be evaluated for unmetered service separate from any other location. Billing of fixed usage will be done under the rate schedule indicated on Attachment A. Billing will be based on the methodology described in paragraph 3, below. This Agreement is for Equipment directly connected to the Company's distribution system, and is not available for equipment connected via a third party service, third party equipment, or through photo control adapters attached to Company-owned or third-party-owned street light facilities.

2. Each individual piece of Equipment shall constitute a separate unit for purposes of this Agreement. The method of determining the electric usage for each unit shall be as follows:

   a) Where a unit is controlled by a photo control, any such photo control must meet ANSI Standard C136.10, turn on value 1.0 foot candles and turn off value of 1.5 foot candles. Usage must be equal to or less than 150 watts rated or average consumption. It will be billed at 11 hours of photo controlled operating time per day.
   b) Where a unit is not photo controlled, the unit will be billed on a 24-hour basis. Usage must be equal to or less than 150 watts rated or average consumption.
   c) Customer shall provide the Company all of the information necessary to complete Attachment A, including without limitation, the description of the equipment model, type, unit and load, prior to the installation of any Equipment. To facilitate completion of Attachment A, third party testing results or metered results are required where Customer has no manufacturer data. Information to verify the number and location of all Equipment at each service location shall be reported as described in Attachment B.

Generating Facility Interconnection Agreement
For Non-Export Generating Facilities

Please Refer to Attached
Sample Form

GENERATING FACILITY INTERCONNECTION AGREEMENT FOR NON-EXPORT GENERATING FACILITIES

This *Generating Facility Interconnection Agreement for Non-Export Generating Facilities* (Agreement) is entered into by and between _____, a _____ (Producer), and Pacific Gas and Electric Company (PG&E) a California Corporation. Producer and PG&E are sometimes also referred to in this Agreement jointly as "Parties" or individually as "Party." In consideration of the mutual promises and obligations stated in this Agreement and its attachments, the Parties agree as follows:

1. SCOPE AND PURPOSE

This Agreement provides for Producer to interconnect and operate a Non-Export Generating Facility in parallel with PG&E's Distribution System to serve the electrical loads connected to the electric service account that PG&E uses to interconnect Producer's Generating Facility (or, where permitted under Section 218 of the California Public Utilities Code (PUC), the electric loads of an on-site or neighboring party lawfully connected to Producer's Generating Facility through Producer's circuits).

2. SUMMARY AND DESCRIPTION OF PRODUCER'S GENERATING FACILITY

2.1. A description of the Generating Facility, including a summary of its significant components and a single-line diagram showing the general arrangement of how Producer's Generating Facility and loads are interconnected with PG&E's Distribution System, are attached to and made a part of this Agreement. (Supplied by Producer as Appendix A).

2.2. Generating Facility identification number: _____ (Assigned by PG&E).

2.3. Producer's electric service agreement ID number: _____ (Assigned by PG&E).

2.4. Name and address used by PG&E to locate the electric service account used to interconnect the Generating Facility with PG&E's Distribution System:

Name: _____
Address: _____
City/Zip Code: _____

2.5. The Gross Nameplate Rating of the Generating Facility is: _____ kW.

2.6. The Net Nameplate Rating of the Generating Facility is _____ kW.

2.7. The expected annual energy production of the Generating Facility is _____ kWh.

2.8. For the purpose of securing the Competition Transition Charge exemption available under Section 372 of the California Public Utilities Code (PUC), Producer hereby declares that the Generating Facility ☐ does / ☐ does not meet the requirements for Cogeneration as such term is used in Section 216.6 of the California Public Utilities Code.

Please Refer to Attached Sample Form

INTERCONNECTION AGREEMENT FOR NET ENERGY METERING OF SOLAR OR WIND ELECTRIC GENERATING FACILITIES OF 1,000 KW OR LESS, OTHER THAN FACILITIES OF 30 KW OR LESS

This *Interconnection Agreement for Net Energy Metering of Solar or Wind Electric Generating Facilities of 1,000 kW or Less, Other Than Facilities of 30 kW or Less* (Agreement)[1] is entered into by and between _____ (Customer-Generator), and Pacific Gas and Electric Company (PG&E), a California Corporation. Customer-Generator and PG&E are sometimes also referred to in this Agreement jointly as "Parties" or individually as "Party." In consideration of the mutual promises and obligations stated in this Agreement and its attachments, the Parties agree as follows:

1. SCOPE AND PURPOSE

This Agreement provides for Customer-Generator to interconnect and operate a Generating Facility in parallel with PG&E's Distribution System to serve the electrical loads connected to the electric service agreement ID number that PG&E uses to interconnect Customer-Generator's Generating Facility. Customer-Generator's Generating Facility is intended primarily to offset part or all of the Customer-Generator's own electrical requirements. Consistent with, and in order to effectuate, the provisions of Sections 2827, 2827.7 and 2827.8 of the California Public Utilities Code and PG&E's electric rate Schedule NEM (NEM), Parties enter into this Agreement. This Agreement applies to the Customer-Generator's Generating Facilities identified below with the specified characteristics and generating capacity, and does not allow interconnection or operation of facilities different than those described.

2. SUMMARY AND DESCRIPTION OF CUSTOMER-GENERATOR'S GENERATING FACILITY AND DESIGNATION OF OTHERWISE-APPLICABLE RATE SCHEDULE

2.1 A description of the Generating Facility, including a summary of its significant components and a single-line diagram showing the general arrangement of how Customer-Generator's Generating Facility and loads are interconnected with PG&E's Distribution System, is attached to and made a part of this Agreement. (This description is supplied by Customer-Generator as Appendix A).

2.2 Generating Facility identification number: _____ (Assigned by PG&E).

2.3 Customer-Generator's electric service agreement ID number: _____ (Assigned by PG&E).

2.4 Name and address used by PG&E to locate the electric service agreement ID number used to interconnect the Generating Facility with PG&E's Distribution System:

Name: _____

Address: _____

City/Zip Code: _____

Gas Sample Form No. 79-982 Sheet 1
Electronic Commerce System User Agreement

Please Refer to Attached Sample Form

Pacific Gas and Electric Company

ELECTRONIC COMMERCE SYSTEM USER AGREEMENT

This agreement ("Agreement") is between Pacific Gas and Electric Company ("PG&E"), and the party identified below (hereafter "User").

WHEREAS, PG&E has established an electronic commerce system and one or more Web sites or other Internet-based electronic transaction and scheduling facilities (and may establish additional such facilities). (The electronic commerce system, Web site(s) and facilities are referred to herein collectively as the "ECS.") Included in the ECS is the capability to do the following transactions: enter into a Gas Transmission Service Agreement ("GTSA") and Exhibits thereto; enter into a Noncore Balancing Aggregation Agreement ("NBAA"); conduct natural gas pipeline related business, and trade on the California Gas Transmission (CGT) Trading Platform, including without limitation: (i) obtaining natural gas transportation, storage, parking and lending services provided pursuant to a GTSA on the PG&E natural gas pipeline system (collectively "Service Transactions"); (ii) scheduling of such services ("Scheduling Transactions"); (iii) trading of natural gas imbalances; and (iv) on-line accessing of pipeline related information. (The Service Transactions and Scheduling Transactions are also collectively referred to herein as "Transactions.")

WHEREAS, User desires to access and use the ECS; and PG&E is willing to provide such access subject to the terms and conditions set forth herein.

NOW THEREFORE, for consideration, the receipt and adequacy of which are hereby acknowledged, the parties intending to be legally bound agree as follows:

1. ACCESS AND USE CONDITIONS

After execution of this Agreement, and subject to its terms and conditions, PG&E agrees to provide User with on-line access to the ECS, and User understands and agrees to the following:

1.1. User shall complete and execute the "Access Request Form," Exhibit B (Form 79-982-B), identifying authorized employees or agents of User, designated by User to access and use the ECS and execute transactions on behalf of User. PG&E will issue to User an identification code ("User ID") for each of User's employees and agents identified on the Access Request form, to enable User to access and use the ECS. Any and all use and/or access of the ECS with any of the User IDs issued to User shall be deemed and construed to be use or access by User. User shall strictly limit the use of the User IDs to those employees and agents of User who are identified on the Access Request form. User shall immediately notify PG&E when an individual identified on the Access Request form ceases to be authorized by User to use his or her User ID.

1.2. User shall take all measures to maintain the confidentiality of the User IDs and of all passwords used to access the ECS ("Passwords"). User shall be solely responsible for the assignment, security and use of the User IDs and Passwords and the control and monitoring of such use. PG&E shall have no responsibility for any of the foregoing and no liability for or arising from the use of the User IDs or Passwords by anyone. User

REQUEST FOR RECLASSIFICATION FROM NONCORE SERVICE TO CORE SERVICE

This form must be executed by a Customer that requests reclassification of its load from noncore service to core service. This form must also be executed by a new Customer that takes legal ownership of a business that is currently served under noncore rates when the new Customer elects to receive core service.

1. This Request for Reclassification from Noncore Service to Core Service (Request) is being made by _____ (Customer), for the facility located at _____ _____ (Service Address, City)

2. This Request is specific to the meter(s) installed at Service Point(s) _____.

3. Customer's gas service will be reclassified as Core Status and placed on the applicable core rate schedule(s) for a minimum period of five (5) years commencing on _____ (Effective date of Core Status), in accordance with Pacific Gas and Electric Company's Gas Rule 12.

4. A Customer that switches from noncore service to core service will pay the Crossover Charge for any of the first twelve (12) regular monthly billing periods that they are taking core procurement service from PG&E, as specified in Schedule G-CPX and their otherwise applicable core rate schedule.

5. This Request shall at times be subject to any changes or modification the California Public Utilities Commission may direct from time to time in the exercise of its jurisdiction. Such changes or modification may be to this Request or to PG&E's applicable tariff schedule and rules.

This agreement is effective when accepted and executed by PG&E.

Electric Sample Form No. 79-988 Sheet 1
Generating Facility Interconnection Agreement (Third Party Non-Exporting)

Please Refer to Attached Sample Form

Pacific Gas and Electric Company®

GENERATING FACILITY INTERCONNECTION AGREEMENT 3rd PARTY NON-EXPORTING

This *Generating Facility Interconnection Agreement (3rd Party Non-Exporting)* (Agreement) is entered into by and between _____ a _____ (Producer), and Pacific Gas and Electric Company (PG&E), a California corporation. Producer and PG&E are sometimes also referred to in this Agreement jointly as "Parties" or individually as "Party." In consideration of the mutual promises and obligations stated in this Agreement and its attachments, the Parties agree as follows:

1. SCOPE, PURPOSE, AND RELATED AGREEMENT

1.1 This Agreement, in conjunction with the *Customer Generation Agreement (3rd Party Generator on Premises, Non-Exporting)* (Form 79-992) identified in Section 1.2 and attached as Appendix E, provides for Producer to interconnect and operate a Generating Facility in parallel with PG&E's Distribution System to serve the electrical loads at the location identified in Section 2.2. This Agreement does not provide for Producer to deliver electric power to PG&E's Distribution System, nor does this Agreement constitute an agreement by PG&E to provide retail electrical service to Producer. Such arrangements must be made separately between PG&E and Producer.

1.2 The Generating Facility shall be interconnected with PG&E's Distribution System consistent with, and pursuant to, the *Customer Generation Agreement (3rd Party Generator on Premises, Non-Exporting)* between PG&E and _____, (Customer) its successors or assigns dated _____, (*Customer Agreement*).

2. SUMMARY AND DESCRIPTION OF PRODUCER'S GENERATING FACILITY

2.1 A description of the Generating Facility, including a summary of its significant components and a single-line diagram showing the general arrangement of how Producer's Generating Facility and Customer's loads are Interconnected with PG&E's Distribution System, are attached to and made a part of this Agreement.

2.2 Name and address used by PG&E to locate the Customer's Electric Service Account(s) used to interconnect the Generating Facility with PG&E's Distribution System:

_____

_____

_____

CUSTOMER GENERATION AGREEMENT (3rd PARTY GENERATOR ON PREMISES, NON-EXPORTING)

This *Customer Generation Agreement (3rd Party Generator on Premises, Non-Exporting)* (Agreement) is entered into by and between _____ _____ a _____ (Customer), and Pacific Gas and Electric Company (PG&E), a California Corporation. Customer and PG&E are sometimes also referred to in this Agreement jointly as "Parties" or individually as "Party." In consideration of the mutual promises and obligations stated in this Agreement and its attachments, the Parties agree as follows:

1. SCOPE, PURPOSE, AND RELATED AGREEMENTS

This Agreement, in conjunction with the *Generating Facility Interconnection Agreement (3rd Party Non-Exporting* (Form 79-988), identified in Section 2.2 and attached as Appendix A, allows the Producer (as identified in Section 2.2) to utilize Customer's electrical facilities to interconnect and operate the Generating Facility in parallel with PG&E's Distribution System. The purpose of the Generating Facility is to serve the Customer's electrical loads at the location identified in Section 2.1.

2. SUMMARY AND DESCRIPTION OF THE PARTIES AND LOCATION OF GENERATING FACILITY

2.1 The name and address used by PG&E to locate the Customer or electric service account where the Generating Facility interconnects with PG&E's Distribution System is:

_____

_____

_____

2.2 The Generating Facility shall be Interconnected with PG&E's Distribution System pursuant to the *Generating Facility Interconnection Agreement (3rd Party Non-Exporting)* between PG&E and _____ its successors or assigns (Producer) dated _____ (Producer Agreement).

AGREEMENT FOR CUSTOMERS TAKING SERVICE ON SCHEDULE E-31

This Agreement for Customers Taking Service on Schedule E-31 (hereinafter "Agreement") is made between _____ ("Customer" or "the Customer"), a(n) _____Corporation and PACIFIC GAS AND ELECTRIC COMPANY ("PG&E"), a California corporation. PG&E and the Customer will be referred to collectively herein as the "Parties" or individually as "Party." Customer is either: (a) an existing PG&E customer who, because of Schedule E-31, is declining an offer of retail electric service from a competing irrigation district ("Competitor") through the use of Competitor's transmission and/or distribution facilities and thus is choosing not to bypass PG&E's distribution system for retail delivery of electricity to the Customer's premises; or (b) a potential PG&E customer who is currently taking, or has the option to take, retail distribution service from Competitor but, because of Schedule E-31, has decided to take retail distribution service from PG&E. Customer's premises are located at _____
("Premises").

This Agreement provides for a discount to be applied to Customer's otherwise-applicable PG&E rate schedule, to establish an average electric rate (net of commodity costs) competitive with the rate the Customer currently pays or would pay for obtaining electricity through [ne Competitor's distribution facilities ("Discount Percentage"). This discount is determined using the price calculations described in Section 1 below and is intended to respond to the potential for bypass of PG&E's distribution system by making PG&E's rates competitive with the rates offered by Competitor.

The Parties agree to the following terms and conditions:

AGREEMENT

1. **DISCOUNTED RATE**: The Customer's Discounted Rate under this Agreement will be calculated as follows:

    a. **PG&E Average Non-Commodity Rate**. The PG&E Average Non-Commodity Rate is me projected annual PG&E revenue from the Customer (excluding commodity cost revenue and taxes and surcharges) divided by the Customer's projected annual usage in kilowatt-hours. The projected annual PG&E revenue is calculated by applying the non-commodity rates in the Customer's otherwise-applicable schedule to its historical billing determinants over the preceding twelve months. Customer's historical billing determinants will be adjusted for projected load change.

    b. **Competitor's Average Non-Commodity Rate**. The Competitor's Average Non-Commodity Rate is calculated using the identical billing determinants in Section 1.a., above. The Competitor's tariff rates (or other documented non-tariff rate offer) are applied to billing determinants adjusted as appropriate to account for differences in Competitor's billing determinant definitions (e.g. seasons, time-of-use periods) to calculate total bundled annual revenue (excluding any applicable taxes and surcharges). An estimate of Customer's annual commodity cost is then subtracted from this amount, and the result is then divided by the Customer's projected total annual usage to obtain the Competitor's Average Non-Commodity Rate. PG&E will estimate the Customer's annual commodity cost based upon the generation rate component in PG&E's owe respective tariff as a proxy for what the Competitor would pay for its generation. After April 1. 2003, the generation rate in PG&E's rate schedule will be reduced by the energy surcharges provided in Schedule E-EPS to determine the generation portion of the rates.

INTERCONNECTION AGREEMENT FOR NET ENERGY METERING OF BIOGAS DIGESTER GENERATING FACILITIES

This "Interconnection Agreement for Net Energy Metering of Qualifying Biogas Digester Generating Facilities" ("Agreement") is entered into by and between _____("Biogas Customer-Generator"), and Pacific Gas and Electric Company ("PG&E"), a California Corporation. Biogas Customer-Generator and PG&E are sometimes also referred to in this Agreement jointly as "Parties" or individually as "Party." In consideration of the mutual promises and obligations stated in this Agreement and its attachments, the Parties agree as follows:

1. SCOPE AND PURPOSE

This Agreement provides for Biogas Customer-Generator to interconnect and operate an Eligible Biogas Digester Electrical Generating Facility in parallel with PG&E's Distribution System to serve the electrical loads connected to the electric service account that PG&E uses to interconnect Biogas Customer-Generator's Generating Facility. Biogas Customer-Generator's Generating Facility is intended primarily to offset part or all of the Biogas Customer-Generator's own electrical requirements. Consistent with, and in order to effectuate, the provisions of Section 2827.9 of the California Public Utilities Code and Pacific Gas and Electric Company's electric rate Schedule NEMBIO ("NEMBIO"), Parties enter into this Agreement. This Agreement applies to the Biogas Customer-Generator's Generating Facilities identified below with the specified characteristics and generating capacity, and does not allow interconnection or operation of facilities different than those described.

2. SUMMARY AND DESCRIPTION OF BIOGAS CUSTOMER-GENERATOR'S GENERATING FACILITY AND DESIGNATION OF OTHERWISE-APPLICABLE-RATE SCHEDULE.

2.1 A description of the Generating Facility, including a summary of its significant components and a single-line diagram showing the general arrangement of how Biogas Customer-Generator's Eligible Biogas Digester Electrical Generating Facility and loads are interconnected with PG&E's Distribution System, are attached to, and made a part of this Agreement. (This description is supplied by Biogas Customer-Generator as Appendix A).

2.2 Generating Facility identification number: _____ (Assigned by PG&E)

2.3 Biogas Customer-Generator's electric service account number: _____ (Assigned by PG&E)

2.4 Name and address used by PG&E to locate the electric service account used to interconnect the Eligible Biogas Digester Electrical Generating Facility with PG&E's Distribution System:

Name: _____

Address: _____

City/Zip Code: _____

_____

AGREEMENT FOR LIMITED OPTIONAL REMOTE METERING SERVICE

This AGREEMENT FOR LIMITED OPTIONAL REMOTE METERING SERVICE (Agreement) is made by **PACIFIC GAS AND ELECTRIC COMPANY**, a California corporation, (PG&E) and _____ (Customer) (individually "Party" and jointly "Parties").

The installation of PG&E's meters under this Agreement is pursuant to PG&E's electric tariff rules and rate schedules, of which this Agreement is a part. Customer agrees to abide by the requirements of PG&E's rules and rate schedules including the following terms and conditions.

1. At the request of Customer, PG&E hereby agrees, as an accommodation, to install at Customer's expense within a reasonable period of time, a PG&E-owned interval meter. PG&E will remove any existing meter.
2. If required, Customer is responsible for the installation of a wired telephone line that terminates within three (3) feet of the Customer's meter panel and terminates within eighteen (18) inches to seventy-two (72) inches above grade. Customer is also responsible for any maintenance and repair of the telephone line. The telephone line installation must be completed and the telephone line must be operational before PG&E will perform any meter installation work. For a situation in which it is not feasible for the telephone company to install a wired telephone line, PG&E may, at Customer's request and expense, arrange for a cellular telemetry system to be installed and activated.
    a. Customer is responsible for the on-going phone service charges.
    b. Operation and maintenance of telecommunications lines shall be Customer's sole responsibility.
3. PG&E will perform all metering and meter programming work. This includes all maintenance, repair, or any meter related work.
4. PG&E will bill Customer in advance of the meter installation work, its estimated cost for all costs associated with the meter installation, including labor, materials, shipping and administration costs. Customer agrees to pay an ownership cost, as specified in PG&E's Electric Rule 2, and any applicable Income Tax Component of Contribution (ITCC) at the rate set forth in PG&E's electric Preliminary Statement Part J. The Customer charges will be shown on Exhibit A – Cost Summary, to this Agreement. Revocation or termination of the Agreement in whole or in part shall not relieve Customer of any obligation: (a) to pay charges incurred prior to such revocation, nor (b) to indemnify PG&E as provided in Section 12 herein.
5. PG&E will begin the meter installation work when both parties have signed the Agreement and PG&E has received payment from the Customer.
