Advice 4690-G

(Pacific Gas and Electric Company ID U 39 G)

Public Utilities Commission of the State of California

Subject: Status of the Storage Withdrawal Capacity of Storage Fields in Compliance with Ordering Paragraph of Decision 19-09-025

Purpose

This advice letter complies with Ordering Paragraph (OP) 28 in Pacific Gas and Electric's (PG&E) 2019 Gas Transmission and Storage (GT&S) Decision (D.) 19-09-025 (the Decision).

Background

On November 17, 2017, PG&E filed an application at the California Public Utilities Commission (CPUC or Commission) requesting that the Commission adopt its gas transmission and storage (GT&S) revenue requirement, cost allocation, and rate design for the period of 2019-2022. On September 23, 2019, the CPUC issued the Decision. PG&E submits this Advice Letter in compliance with OP 28 which directed PG&E to "file a Tier 1 Advice Letter to inform the Energy Division on the status of the storage withdrawal capacity of its storage fields" during the third week of December each year.

Current Storage Withdrawal Capacity

The following table outlines the current storage withdrawal capacity available at PG&E operated storage facilities based on current field inventory, well availability and station outage impacts, and well configuration (i.e., the current population of wells converted to tubing and packer construction and wells that currently flow both tubing and casing annuli) as of December 13, 2022. As PG&E progresses through work converting the storage wells to tubing and packer configuration through 2024 at the underground storage facilities per §1726.5 of the California Energy Management Division (CalGEM, previously DOGGR) code and validates the resulting rate via field flow tests, the capacities listed below are subject to change.

**Table 1: Status of Storage Withdrawal Capacity of Storage Fields
(as of December 13, 2022)**

Facility	Total Inventory (BCF)	Withdrawal Capacity (mmscf/d)
McDonald Island	Current 97.7	609
	Max 136.5	
Los Medanos	Current 21.6	122
	Max 29.1	
Pleasant Creek	Current 5.8	0
	Max 7.4
