

**ELECTRIC SCHEDULE E-RSMART
RESIDENTIAL SMARTRATE PROGRAM**

Sheet 1

APPLICABILITY: The residential SmartRate™ program is a voluntary rate supplement to the customer's otherwise applicable rate schedule (OAS). Schedule E-RSMART is available to a PG&E Bundled-Service customer served on a single family residential electric rate schedule E-1, E-ELEC, E-TOU-C, E-TOU-D and EV2A. Each customer must continue to take service under the provisions of their OAS. Customers billed on the Net Billing Tariff (NBT) are eligible for SmartRate. A customer is not eligible to participate in the residential SmartRate program if the customer is taking service in the following manner: 1) through a residential master-metered rate schedule, 2) in conjunction with a Net Energy Metering or standby rate schedule, 3) in conjunction with direct access or community choice aggregation service, or 4) as a Transitional Bundled Service under electric Rule 22.1. The residential SmartRate program operates year-round on any day of the week, but most events are expected to occur on summer weekdays. (T)

Customers will receive a bill protection transitional incentive to participate in the residential SmartRate program subject to meeting the qualification criteria (see Bill Protection section below).

The customer must have a SmartMeter™ system to participate in the residential SmartRate program. Upon the customer's request to participate and verification of eligibility by PG&E, the customer will be placed on the residential SmartRate program on the first day of the next Billing Cycle where the Billing Cycle start date occurs at least five business days after the date of the customer's request. A customer request that is received within five business days of the customer's next Billing Cycle will be placed on the residential SmartRate program in the following Billing Cycle.

TERRITORY: This schedule is available to customers in PG&E's electric service territory.

RATES: The customer will be billed for all regular charges applicable under the customer's OAS. Additional charges (based on usage during SmartDay High-Price Periods) and SmartRate credits will be determined according to the rates specified in this schedule. See "Definition of Time Periods" section below for specific SmartRate program time periods. The SmartRate program time periods may differ from traditional Time-Of-Use (TOU) periods on the customer's OAS. The additional energy charges applicable during SmartDay High-Price Periods and SmartRate Credits will be determined as follows:

SmartDay High-Price Period Charge: The total effective energy charge on this schedule for usage during SmartDay High-Price Period will be the SmartDay High-Price Period Charge multiplied by the actual energy usage during the SmartDay High-Price Period.

SmartRate Credits: The customer taking service under Schedule E-RSMART will pay reduced total effective energy rates, through SmartRate Program and Participation credits for usage outside the SmartDay High-Price Period on SmartDays™ and all usage on those days within a bill period that are not declared as SmartDays. These credits are only applicable for bill periods in which at least one SmartDay occurs. The SmartRate Participation and Program credits are multiplied by the number of SmartDays in a bill period.

**ELECTRIC SCHEDULE E-RSMART
RESIDENTIAL SMARTRATE PROGRAM**

Sheet 3

**DEFINITION OF
TIME PERIODS:**

SmartDay Event Days May be called year-round on any day of the week (although most events are expected to occur on summer weekdays).

SmartDay High-Price Period: 4:00 p.m. to 9:00 p.m. (C)

Please refer to the sections of this schedule labeled "Program Operations" and "Notification and Trigger" for a complete description of how SmartDays will be determined, and how customers will be notified of those days when SmartDay High-Price Period charges will be in effect.

**METERING
EQUIPMENT:**

Each participating customer account must have a SmartMeter™ system installed that can be remotely read by PG&E. Metering equipment (including remote communication device) must be in operation prior to participating in the program to ensure proper operation of the metering and communication equipment.

**NOTIFICATION
EQUIPMENT:**

At the customer's option and expense, it is recommended, but not required that the customer provide a cellular telephone number that is capable of receiving a SMS text message, or an e-mail address to receive automated notification messages of a SmartDay event from PG&E.

(T)
|
(T)

If a SmartDay event occurs, the customer will be notified by using one or more of the above-mentioned systems. Receipt of notice is the responsibility of the participating customer. PG&E will make best efforts to notify the customer, however it is the customer's responsibility to receive notice and to check the PG&E website to see if a SmartDay event has been activated and that their SmartRate notification information is accurate and current. PG&E does not guarantee the receipt of notification by the notification system, the e-mail system, or Internet site by which the customer receives notification.

**ELECTRIC SCHEDULE E-RSMART
RESIDENTIAL SMARTRATE PROGRAM**

Sheet 4

CONTRACTS: Customer's participation in this schedule will be in accordance with Electric Rule 12.

Customers may terminate their participation in the SmartRate program by providing notice to PG&E. Cancellation of the customer's participation in the SmartRate program will become effective on the next business day. PG&E reserves the right to terminate the SmartRate program upon thirty (30) days written notice and approval by the CPUC.

PROGRAM OPERATIONS: A maximum of fifteen (15) SmartDay Event Days and a minimum of nine (9) SmartDay Event Days may be called in any calendar year. PG&E will notify customers by 4:00 p.m. on a day-ahead basis when a SmartDay Event Day will occur the next day. (T)

NOTIFICATION AND TRIGGER: PG&E will activate a SmartDay event when the day-ahead temperature forecast trigger is reached. The trigger will be the average of the day-ahead maximum temperature forecasts for San Jose, Concord, Red Bluff, Sacramento and Fresno.

Beginning May 1 of each summer season, the SmartDay Event Days on non-holiday weekdays will be triggered at 98 degrees Fahrenheit (°F), and will be triggered at 105°F on holidays and weekends. If needed, PG&E will adjust the non-holiday weekday trigger up or down over the course of the summer to achieve the range of 9 to 15 SmartDay Event Days in any calendar year. Such adjustments would be made no more than twice per month and would be posted on PG&E's website.

SmartDay events may also be initiated as warranted on a day-ahead basis by 1) extreme system conditions such as special alerts issued by the California Independent System Operator, 2) under conditions of high forecasted California spot market power prices, 3) to meet annual SmartDay Event Day limits for a calendar year, or 4) for testing/evaluation purposes.

PG&E will retain the sole discretion NOT to call a SmartDay event even if one or more of the above criteria are met.

**ELECTRIC SCHEDULE E-RSMART
RESIDENTIAL SMARTRATE PROGRAM**

Sheet 5

PROGRAM TERM: The SmartRate program will remain open until terminated or superceded by action of the Commission.

BILLING: Monthly bills are calculated in accordance with the customer's OAS and the rates contained herein. The amount under the SmartRate program will appear on the customer's bill as an additional charge or credit.

BILL PROTECTION: Bill Protection: A customer will be provided with a bill protection transitional incentive through the first full Summer Season (May 1 through October 31)¹. Under the bill protection transitional incentive, the customer will not pay more under the SmartRate program than it would pay under its OAS for the first full summer and, if applicable, any preceding partial summer, during the initial bill protection period. Bill protection benefits will be computed on a cumulative basis at the end of each Summer Season and any applicable credits will be applied to the customer's account on the next regular bill. (T)

If the customer terminates their participation in the SmartRate program before the end of the Summer season and during the initial bill protection period, the customer will receive bill protection up to the date the customer terminates its participation in the SmartRate program. Any applicable credits will be applied to the customer's account on the next regular bill following the end of their participation in the SmartRate program.

After the customer has completed its first full Summer season, bill protection will no longer apply. The customer will be notified twice that bill protection no longer applies by the following:

60 to 90 days before the customer's first Summer season without bill protection begins, and

During the month of May of the customer's first Summer season without bill protection.

These notices will be prepared in accordance with Ordering Paragraph 6 of Decision 06-07-027.

INTERACTION WITH OTHER DEMAND RESPONSE PROGRAMS: Pursuant to Decision 18-11-029, participants in the SmartRate program may no longer dual enroll in other demand response programs offered by PG&E or a third-party demand response provider. Participants who were dual enrolled in both SmartRate and SmartAC prior to October 26, 2018 may continue to participate in both programs at their subscribed megawatt level as of December 10, 2018, but shall not receive energy payment for performance under those programs during the SmartDay High-Price Period.

¹ The summer season (May 1 through October 31) as used for SmartRate bill protection purpose is different from the Summer season definition in the OAS which for all eligible residential rate schedules are defined as June 1 to September 30.
