

Agricultural Customers

Are you on the best rate plan for your business?

Log in or register at pge.com to:

- Get detailed information about your current usage
- Save money with the business energy savings quick tool
- Learn about bill payment options

In addition to these online tools, you can call **1-877-311-FARM (3276)** for help choosing the best rate plan for your business.

Electric Rate Plan Options

For more information on all electric rate plan options, visit pge.com/tariffs.

Time-of-Use

Time-of-Use rate plans can help you save because they offer lower energy rates when energy demand is low. By shifting energy use to off-peak hours of the day, when rates are lower, you can reduce your business expenses.

Customers who are eligible for default will transition **annually each March**.

For more information, visit pge.com/tou.

SMALL BUSINESS:

Ag<35 kW Low Use (AG-A1) is a good choice if your small business has low to moderate operating hours and demand less than 35 kW.

Ag<35 kW High Use (AG-A2) is a good choice if your small business has high operating hours and demand less than 35 kW.

MEDIUM BUSINESS:

Ag35+ kW Med Use (AG-B) is a good choice if your medium-sized business has low to moderate operating hours and demand 35 kW or greater.

LARGE BUSINESS:

Ag35+ kW High Use (AG-C) is a good choice if your large business has high annual operating hours and demand 35 kW or greater. Includes Summer Peak Demand Charge and Demand Charge Rate Limiter.

YEAR-ROUND PEAK HOURS 5–8 p.m.

AG-F (Flex) is an option if you can limit operating hours to two off-peak days per week.

- Wednesday and Thursday, Saturday and Sunday or Monday and Friday.
- In exchange for two off-peak days, peak prices will be higher on other days.

Clean Energy Alternatives

Renewable Generation (e.g., Solar) enables you to install a generating system, interconnect to the PG&E grid and receive credits to offset the cost of your energy usage. With certain additional requirements, storage can also be installed to increase the value of your system.

The current renewable generation program focused on the agriculture customers (Net Energy Metering 2 Aggregation, NEM2A) closed on February 14, 2024.

If you submit an application after this date, you will be enrolled in the Solar Billing Plan program that is replacing NEM2A.

pge.com/savewithrenewables

Renewable Feed-in Tariffs offer long-term wholesale electric energy contracts to eligible generators.

pge.com/feedintariffs

Note: Direct Access and Community Choice Aggregation customers are eligible for many but not all of the rate plans or features listed in this notice. To learn more, contact your provider.

Programs to Save Money

For more information about the following Demand Response Programs, visit pge.com/drprograms.

Peak Day Pricing can offer you a discount on summer electricity rates in exchange for higher prices on 9 to 15 Event Days per year between 4 p.m. to 9 p.m.

Emergency Load Reduction Program offers incentives (\$2/kWh) for voluntarily reducing energy consumption during times of high demand on the grid. No penalties are associated with participation.

Capacity Bidding Program offers incentives for reducing energy consumption upon request.

Automated Demand Response offers a one-time incentive to offset the costs and installation of automated controls to shed load during a demand response event. Requires enrolling in a demand response program.

Natural Gas Rate Plans

For information on all natural gas rate plans, visit pge.com/tariffs.
