

# PG&E's Solar Choice Product Information

## 2024 PROSPECTIVE PRODUCT CONTENT LABEL <sup>1</sup>

With PG&E's Solar Choice Program, you have the option to purchase 50% or 100% of your electricity from solar photovoltaic (PV) resources.

In 2024, PG&E's Solar Choice Program will be made up of the following new renewable resources averaged annually.

Green-e Energy Certified New <sup>2</sup> Renewables in PG&E's Solar Choice Program 2024		Generation Location
Solar	100%	California (within PG&E's service area)
<b>Total Green-e Energy Certified New Renewables</b>	<b>100%</b>	

1. These figures reflect the renewables that we have contracted to provide. Actual figures may vary according to resource availability. We will annually report to you the actual resource mix of the electricity you purchased during the preceding year before August 1 in the form of a Historic Product Content Label.

2. **New Renewables for PG&E's Solar Choice Program first began commercial operation January 1, 2014 or later.** As customers enroll in the program, PG&E will procure more, newer solar resources to match customer demand.

For comparison, the 2022 average mix of resources supplying PG&E customers includes: Biomass and Biowaste (5%), Geothermal (<1%), Renewable-Eligible Hydro (2%), Solar Electric (22%), Wind (9%), Nuclear (49%), Natural Gas (5%), and Large Hydroelectric (8%), as detailed on [PG&E's 2022 Power Content Label](#).

The average residential customer served by PG&E uses 460 kWh per month. Source: [PG&E FERC Form 1, 2022](#).<sup>3</sup>
